THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] JANUARY, 1939 [NUMBER 1

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

EMPLOYMENT at the beginning of December, 1938, showed a seasonal recession, which, however, was smaller than the average loss indicated between November 1 and December 1 in the experience of the years since 1920. The Dominion Bureau of Statistics tabulated reports from 11,173 employers, whose pay-rolls were reduced from 1,102,679 at the beginning of November to 1,096,434 at December 1, 1938. The index (average 1926=100) declined from 114·6 at the former date, to 114·0 at December 1, as compared with 121·6 at the same date in 1937. At December 1 in recent years, the index was as follows: 1936, 110·1; 1935, 104·6; 1934, 98·9; 1933, 91·8; 1932, 83·2; 1931, 99·1; 1930, 108·5; 1929, 119·1; 1928, 116·7 and 1927, 108·1.

Unemployment in Trade Unions.—At the beginning of December, 1938, the unemployment percentage reported to the Department of Labour by local trade unions throughout Canada stood at 13·7 in comparison with 12·3 per cent at the beginning of November and 11·2 per cent at the beginning of December, 1937. The percentage for December was established from the reports furnished by 1,920 labour organizations with an aggregate of 242,815 members, 33,387 of whom were without work.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed an increase in the work transacted during November, 1938, when a comparison was made with the average daily placements effected during October, 1938, and also with those reported during the corresponding month a year ago, the most noteworthy gains in the first instance taking place in farming and logging and in the second in farming, construction and maintenance, and services. Vacancies in November, 1938, numbered 43,859, applications 81,426 and placements in regular and casual employment 42,783.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget was $17.25 at the beginning of December as compared with $17.29 for November, the slight decrease in December being due to the lower cost of the list of foods. Comparative figures for certain earlier dates are $17.58 for December, 1937; $15.41 for June, 1933 (the low point during recent years); and $22.11 for December, 1929. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100, changed little during the month, being 73·5 for the week ended December 30 as compared with 73·4 for the week ended December 2. The figure at the end of October was 73·9. On a monthly basis the index number was 73·5 for November, 1938; 82·7 for December, 1937; 79·7 for December, 1936; 63·5 for February, 1933 (the low point in recent years); and 96·0 for December, 1929.

Business Statistics.—The table on page 2 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business in November at 123·4 was about four per cent higher than in the preceding month and higher also than in any month since November, 1937, when it was 127·9. Of the principal groups used in the construction of the index three were higher than in the previous month. These are, mineral production because of increased exports of copper, nickel and asbestos and increased shipments of gold; manufacturing because of greater activity indicated in the manufacture of foodstuffs, certain forestry products and automobiles; and the output of electric power. The groups in which lower volume was indicated in this same comparison are construction, trade employment, car loadings, imports and exports. Information available for December shows car loadings and gross earnings of the Canadian National Railways lower than in the previous month and lower than in December, 1937. Contracts awarded showed advance in both comparisons.

Strikes and Lockouts.—The number of strikes and lockouts recorded during December was

69800—1½

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended December 30, 1938.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending December 31, 1938, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending December 3, November 5 and October 8, 1938; December 4, November 6, and October 9, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

eight, involving 274 workers and resulting in a time loss of 2,357 man working days as compared with seven disputes during November, involving 392 workers with time loss of 3,150 man working days. The number of workers involved and the time loss were lower than in any month since January, 1936, and also lower than in any December since 1926. None of the disputes during November and December involved a large number of workers for any considerable period. The most important strikes in both months were those involving leather goods workers in Montreal and lime plant workers at Blubber Bay, B.C. In December, 1937, there were 17 disputes involving 3,851 workers, with a time loss of 33,498 man working days. About half of this time loss resulted from a strike of coal miners at Minto, N.B. Strikes of cotton dress factory workers at Montreal, P.Q., textile factory workers at Coaticook, P.Q., and shoe factory workers at Port Colborne, Ont., also caused considerable time loss. Of the eight disputes recorded for December, 1938, six were terminated during the month, one resulting in favour of the employer, one in favour of the workers, while a compromise settlement was reached in one case and three were recorded as indefinite. Two disputes involving 152 workers were recorded as unterminated at the end of December. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Proceedings Under the Industrial Disputes Investigation Act

During the past month the department received reports from three Boards of Conciliation and Investigation which dealt with disputes between (1) Canadian Collieries (Dunsmuir), Limited, and Western Fuel Corporation of Canada, Limited, and their coal miners on Vancouver Island, members of the United Mine Workers of America; (2) Winnipeg Electric Company and its electrical workers, members of the International Brotherhood of Electrical Workers; and (3) coal mine operators, members of the Western Canada Bituminous Coal Operators' Association, and their employees, represented by District 18, United Mine Workers of America. The texts of these reports, as well as of interim reports made by the board in the case of the dispute involving the bituminous coal mines, appear in the article on pages 9-29.

Other proceedings under the Act included the submission of an application for a board and the appointment of the chairman of a board already established. Information respecting prosecutions under the Act is given on page 8.

Activities Under Combines Investigation Act

Announcement was made on November 29, 1938, by the Deputy Attorney-General of Alberta that charges of operating a combine had been laid against thirty-four tobacco companies and distributing firms. These charges follow the report of an investigation under the Combines Investigation Act. The report of the Commissioner which was reviewed in the LABOUR GAZETTE, October, 1938, pages 1090-1092, indicated that a combine has been found to exist in the tobacco trade. Mr. H. J. Wilson, K.C., assistant deputy attorney-general, is in charge of preparations for the trial.

Inquiry under the Combines Investigation Act in connection with the manufacture and sale of corrugated and solid fibreboard boxes and related products has reached the concluding stage. Argument by counsel was heard by F. A. McGregor, Commissioner of the Combines Investigation Act, early in January, when J. C. McRuer, K.C., and J. L. McLennan, of Toronto, appeared for the Commission. H. E. Manning, K.C., and W. J. Palmer, of Toronto, appeared for Container Materials, Limited, a trade organization with which are associated all but one of the Canadian manufacturers of corrugated boxes, located in six provinces of the Dominion, and Shipping Case Material Manufacturers' Association. W. B. Scott, K.C., and J. D. Kearney, K.C., both of Montreal, and G. M. Willoughby, K.C., of Toronto, appeared for certain individual manufacturers of paperboard who are members of the shipping case association. Evidence concerning the operations of these organizations has been heard by the Commissioner during recent months, principally in Toronto and Montreal. The next stage in the inquiry is the preparation of a report by the Commissioner. Publication of the report is required by the Act after it has been presented to the Minister of Labour.

An alleged combine in the distribution of fruits and vegetables in Western Canada is now under investigation by the Commissioner of the Combines Investigation Act. During the summer of 1938 a number of requests for an inquiry were made by growers' organizations and others in British Columbia but a formal application for an investigation, as required by the Act, was not received by the Commissioner until October 15, 1938. The investigation was commenced in November when hearings were held by the Commissioner assisted as counsel by H. I. Bird of Vancouver in several fruit centres in the Okanagan Valley. Hearings at other points in British Columbia and in the Prairie Provinces are expected to be resumed in this case toward the end of January.

Statistics of Material Aid Recipients for November

A substantial reduction in the numbers of farmers and their families on Agricultural Aid in November this year compared with November last year was again the outstanding feature of the early figures from the National Registration of Persons on Aid, issued by Honourable Norman McL. Rogers, Minister of Labour. Although unemployed persons receiving aid showed the usual increase from October into November and, as in October, brought this total above that of the same month in 1937, nevertheless, the grand total of all classes of persons benefiting by aid showed a substantial decrease from the year before.

Preliminary figures from the November registration showed the Dominion total of the unemployed but fully employable persons on aid in November this year at 142,000, an increase of 13·6 per cent from the October total of 125,000. The figure for November this year represented an increase of slightly more than 4 per cent over November a year ago.

A total of 532,000 persons were receiving non-agricultural aid in November this year, 11·3 per cent more than in the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of three and a half per cent from the figure for November, 1937.

Some 59,800 farmers who, together with their dependents, account for a farm population of 277,000, were reported as receiving agricultural aid for subsistence in November. Of these persons 241,000 were located in the province of Saskatchewan alone. The Dominion total on agricultural aid, while up by nearly 50 per cent in November over October, was 23·7 per cent less than in November, 1937. The November total of farmers and their families on aid in Saskatchewan, while continuing to hold the improvement over a year ago due to this year's crop, showed the continuance of the winter rise, having increased by 53 per cent over revised figures for October, 1938, was still more than 25 per cent lower than in November a year ago.

The grand total of all classes of persons on Urban and Agricultural Aid in November, according to these early figures, was 809,000, an increase of 21·9 per cent over the October figure as now revised, but 7·7 per cent less than in November, 1937.

Social-economic measures indicated in Throne Speech

The Speech from the Throne, read by His Excellency the Governor General on January 12 in opening the fourth session of the 18th Parliament of Canada, contained several references to measures in operation, or in contemplation, to cope with the problem of unemployment.

In dealing with plans already functioning, the Speech cited the Home Improvement Plan, the National Housing Act, the Municipal Improvements Assistance Act, the grants-in-aid to the provinces, the prairie farm rehabilitation plan, etc.

Further action with regard to unemployment was indicated in the Speech as follows:

In Canada, the problem of unemployment has been aggravated in recent years by recurrent crop failures in the western provinces, and by the serious business recession experienced in the last year in other parts of the world. The intensification of the problem has set forth in bold relief the obstacles which the existing division of constitutional authority places in the way of a solution.

The report of the commission on dominion-provincial relations will be presented to parliament in the course of the present session. In accordance with the purpose for which the commission was instituted, its report will provide the basis for, and the material essential to the deliberations of a national conference, at which, among the important subjects to be dealt with, will be the problem of unemployment and social services generally. The government have not altered their view that a national unemployment insurance scheme is essential to a permanent policy of meeting the problem of unemployment.

My ministers recognize that the plight of those who are still unemployed cannot await necessary constitutional amendments, nor the summoning of any conference. They are prepared therefore, notwithstanding constitutional impediments to effective action, to join with the provinces in a further determined effort to meet the immediate situation.

To this end it is proposed further to expand the government's long range program of public undertakings. In pursuance of the policy of the active encouragement of employment, it is also proposed to undertake, with provincial co-operation, to provide assistance to municipalities which, as an alternative to the provision of direct relief, desire to expand their normal programs of civic improvements.

As a means of providing an opportunity for useful work and national service to single unemployed men, the assistance given to forest conservation will be extended to include other work of national importance.

The beneficial results of the youth training program, have demonstrated the wisdom of this experiment, and a measure will be introduced to increase its efficiency and expand its usefulness. . . .

New Year's messages of Canadian labour leaders

The social-economic situation was reviewed in New Year's messages by Canadian labour leaders. Summaries of the messages are given in the following paragraphs:

Mr. P. M. Draper, president of the Trades and Labour Congress of Canada viewing the international situation, emphasized the will for peace uppermost in the desire of the common people. He warned that "dictatorships care little for public opinion" and that "dictatorships are in the saddle in important countries."

In the domestic sphere, he considered that the unemployment situation "is quite as unfavourable as a year ago," and "still requires the application of some extraordinary measures to give jobs." He declared that "governments must do more than has been done in the last decade or we will have to face the prospect of a continuance of heavy unemployment."

From the broad survey of the Royal Commission on Dominion-Provincial Relations he hoped for a re-allocation of responsibility resulting in more adequate social services, and stated:

"As long as Canada's constitution fastens on the provinces the major responsibility for social legislation, a proper system of social services—unemployment insurance, health insurance, adequate old age pensions—will be out of the question. One of the more hopeful prospects for the New Year is that the work of the Royal Commission on Dominion-Provincial Relations may yet lead to a re-division of power and responsibility between the Dominion and the provincial governments, and that sensible amendments to the constitution may be made, rendering possible adequate governmental social services. That of itself would justify much hope on the part of Canada's industrial population."

Emphasizing the obligations of free citizenship, Mr. A. R. Mosher, president of the All-Canadian Congress of Labour, advocated a united effort on the part of all Canadian citizens "to put our house in order." Stating that the cause of present world insurgence was believed by many to be economic, Mr. Mosher declared in part:

"If anything is needed to arouse active efforts to establish a more equitable social order in Canada, it ought to be sufficient to point out that the rise of dictatorships and the loss of political liberty in Europe were preceded by conditions similar to those which now exist in Canada. Where there is no economic security there can be no lasting democracy, and fear may easily be stirred up into hatred and ill-will, not only between classes and racial groups within a nation, but between the nations themselves. . . ."

Urging that "Canadians should not delay whatever action may be necessary to establish their democratic institutions on a firm basis of equity and economic security," Mr. Mosher stated: "There is no need for complete agreement with regard to all the details of a new economic system before a study of the present one is undertaken; the chief requirement is a realization of the possibilities of using the resources in men and materials which are available, in such a manner as to bring actual and potential abundance within the reach of every citizen. . . ."

Mr. Alfred Charpentier, president of the Confederation of Catholic Workers of Canada, Inc., referred to the progress achieved in 1938 in a more general recognition of the workers' right to organize. In this connection, he pointed out that most of the provinces had now enacted legislation recognizing this legal right.

Referring particularly to Quebec in this matter, he considered that the amending legislation of 1938 made the situation unsatisfactory.

In this respect, he criticised the attitude of what he termed "narrow minded and selfish individualists," and declared that "the normal development of the trade union workers' right as advocated by the Church and demanded by the undeserved misery of the working people must not be hampered by the same overfearful people."

In conclusion, Mr. Charpentier stated that his message had but one object, viz.: "Centralizing the attention of the Catholic trade-union workers and of all their sympathizers upon the fundamental question of the future development of the trade-union workers' right in Quebec and in Canada. For, the further improvement of the trade-union workers' right would result in a bigger impetus to the so much desired professional organization amongst employers. Can indeed the social Christian order be erected otherwise?"

Mr. W. T. Burford, secretary-treasurer of the Canadian Federation of Labour, after reviewing the "alternatives to democracy" in certain other countries, dealt with the Canadian situation in part as follows:

"Whatever attraction new social orders have had for Canadian workers in the past, there is little yearning now for the systems which have effaced the Labour movement in central and eastern Europe. It is realized that freedom is possible only under democracy, and that freedom is not merely a moral satisfaction but the foundation of all the material advantages of civilization. But the belief persists that freedom is divisible, that we can surrender it in the economic field and continue to enjoy it in our other activities. Plans for new social orders which affect to reconcile this contradiction are still purveyed. They will continue to find a market as long as the abundance that economic freedom has put within our reach is denied to a large section of the community. . . ."

Railway Unions Re-affirm Opposition to Amalgamation

At its session in Ottawa on January 10, the Dominion Joint Legislative Committee of 18 standard railroad labour organizations by resolution reaffirmed opposition to any proposals for "co-ordinating, consolidating, unifying or amalgamating" the railway systems of Canada. The resolution is as follows:—

"That the best means of relieving Canada of its financial burdens consequent to the railway situation is for the federal government to become clothed with the necessary legislative competence to deal effectively by regulations and control of all forms of transportation of passengers and freight for hire, together with a like legislative competence to deal with all related factors in transport enterprises within the Dominion of Canada.

"The whole transportation problem must be considered in all its co-related divisions. To segregate the railways for investigation without due regard to the conditions existing in all the other competitive means of transport cannot be productive of a sound or satisfactory national transportation policy that would reduce the burdens or be in the best interests of the people of this country and would only further cause untold sacrifice by those employed in the railway industry. The gains resulting from such a policy would be disproportionately distributed among the few financial interests involved.

"We are not prepared to accept any proposals in the spirit that they, because of conditions, will inevitably be forced upon us. We are firmly of the opinion that any program of co-ordinating, consolidating, unifying or amalgamating the whole or any part of the various railway systems is not the best means of solving the problem and we are determined in our opposition to any such proposals. We further reiterate our opposition to unified management and compulsory co-operation. Our legislative representatives should be instructed to continue their activities to meet the desires of the men in railroad service."

Report on Labour Legislation in Canada

A report on Labour Legislation in Canada as existing on December 31, 1937, has just been issued by the Department. This consolidation of Canadian labour laws is the fourth made by the Department, the earlier reports covering the periods up to the end of the years 1915, 1920 and 1928. In the intervening years the annual report covers only the legislation enacted during the year. Comprising some 750 pages, the volume for 1937 contains the text, in full or abridged, of all Dominion and provincial statutes directly affecting labour which were on the statute books at the end of the year. Certain social legislation, such as old age pensions and mothers' allowances, are given in summary form. Wherever regulations have been made under the authority of the statutes their effect is indicated in footnotes. The report is thoroughly indexed permitting ready reference to the subjects covered by the statutes.

Legislation enacted since the 1928 volume was issued and printed in the new volume includes laws providing for apprenticeship in British Columbia and Nova Scotia as well as Ontario, the Industrial Standards Acts of Alberta, Nova Scotia, Ontario and Saskatchewan, the Quebec Collective Labour Agreements Act, revised Minimum Wage Acts in nearly all provinces, Hours of Work Acts in Alberta and British Columbia, laws providing for the settlement of industrial disputes in British Columbia, Manitoba and New Brunswick, and the revised Workmen's Compensation Act of Nova Scotia.

Free distribution of the report is made to a limited mailing list including trade unions and educational institutions. A copy of the report may be obtained from the Department for $1.

Workmen's Compensation and Wages Legislation in Quebec

Workmen's Compensation and Hours and Wages Legislation in Quebec are the subjects of two mimeographed memoranda prepared recently and distributed to its members by the Quebec Division of the Canadian Manufacturers' Association.

The Workmen's Compensation memorandum deals particularly with the waiting period, accidents happening outside the Province, notice of accident, choice of physician, rehabilitation of workmen, tenure of office of the members of the Workmen's Compensation Commission, merit rating, self-insurance instead of collective liability, and the problem of permanent partial disability cases.

The memorandum on Hours and Wages is confined to discussion of the Professional Syndicates Act, the Collective Labour Agreements Act and the Fair Wage Act. A list of agreements in effect under the Collective Labour Agreements Act is appended to the memorandum.

Tom Mooney Secures Unconditional Pardon

An historic case in the labour movement of the United States was settled finally on January 8 with the unconditional pardon of Tom Mooney.

Mooney, a member of the International Moulders' Union, was convicted of participation in the San Francisco Preparedness Day bombing on July 22, 1916, when 10 persons were killed and 40 injured.

During the twenty-two years of his incarceration Mooney had declared his innocence, and he was supported by practically the entire strength of organized labour on this continent in his long fight to receive his freedom

on the basis of wrongful conviction. (From time to time, the LABOUR GAZETTE has contained references to the "Mooney Case" in resolutions adopted by labour conventions.)

Last November, Culbert Olson was elected Governor of California, and in the latest move to receive his freedom, Governor Olson gave Mooney an unconditional pardon and absolved him from all guilt.

Extension of 48-Hour Law to Beauty Shops in New York

Legislation in New York State limiting the hours of labour of women and minors in mercantile and other establishments was amended from July 1, 1938, to apply to beauty shops. In these places, as in shops, business and telegraph offices, restaurants, hotels, places of amusement, bowling alleys, barber shops, shoe-shine establishments or the distribution or transmission of merchandise, articles or messages or the sale of articles, children under 16 may not be employed more than eight hours in a day, 44 hours or six days in a week or between the hours of 6 p.m. and 8 a.m. Children over 14 and under 16 may only be employed in such places if they have employment certificates. No woman or girl over 16 in any city or village with a population of 15,000 or more and no boy between 16 and 18 years of age in any community may work in a beauty parlour more than 48 hours a week. This weekly maximum has applied since 1927 to women and minors employed in shops and factories and since 1937 in hotels and restaurants.

In order to suit the particular business carried on in beauty shops, the employer may choose one of three different arrangements for daily hours as in mercantile establishments: (1) women and boys under 18 may be employed for not more than eight hours on six days; or (2) women and boys may work ten hours on one day a week, if 4½ hours or less are worked on another and nine or less on the remaining four days; or (3) women may be employed ten hours on one day for the purpose of making one or more shorter work days in that week. The employer is required to notify the State Department of Labour annually of the arrangement of hours he has made and he may not change the arrangement more than twice in a calendar year. Working schedules are to be posted in the premises by an Inspector of the Department.

The employment of females in beauty parlours between 10 p.m. and 7 a.m. and of males over 16 and under 18 years of age between midnight and 6 a.m. is prohibited throughout the state.

Rights of Performers as Regards Broadcasting, etc.

The experts convened by the I.L.O. to study the adoption of international regulations to safeguard the rights of interpretative artists as regards broadcasting, television and the mechanical reproduction of sound, finished their work on November 29.

They adopted certain principles as the basis of a proposed Draft Convention which might be placed on the Agenda of a future session of the International Labour Conference. These principles include the following points:—

Without prejudice to the exclusive rights of authors, no record and no broadcast may be made without the consent of the performer. (This provision does not cover recording for the internal technical needs of the broadcasting institution.)

The performer is entitled to require that his name be indicated on records of his performances and when his performances are broadcast.

The performer is entitled to claim from his employer a separate remuneration, distinct from the remuneration for the performance itself, if his performance is broadcast (in the case of theatrical performances or concerts given in theatres or public halls), even when his contract contains no provision to that effect.

Performers should be protected against clandestine recording (that is recording without the performer's knowledge and consent) and against all use of such records.

The broadcasting organizations are entitled to register artists' performances for broadcasting at a later date without making a payment additional to that stipulated for the direct broadcast. On the other hand, if subsequent use is made of the registration, special remuneration must be given for it.

Exercise of these rights should be vested in performers or, in the case of group performances, in the persons empowered to this effect.

The acquisition from an artist of the right to record all his future performances in consideration of a lump sum payment should be prohibited.

The experts also agreed on including in the proposed regulations provisions concerning the duration of the rights of performers, their transfer to the heirs of the artist, exceptions to be allowed in the application of the rights of performers for concerts in the public interest, and methods of the transmission of all or part of such rights. They also stressed the necessity of providing for arbitration in case of dispute.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

AN application for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act was received in the Department of Labour on December 31 from approximately 350 trainmen, members of the Brotherhood of Railroad Trainmen, employed by the Canadian National Railways in the Southern Ontario district. The cause of the dispute is stated to be the merging of two promotion districts involving the seniority rights of men holding seniority on the former individual districts, and the abolishing of so-called "homestead rights" in applying seniority and promotion rules on the enlarged district.

The chairmanship of the Board of Conciliation and Investigation established to deal with a dispute involving various coal mining companies at Bienfait in the Estevan district, Saskatchewan, and their employees represented by the Bienfait local union of the United Mine Workers of America, was filled on December 22 by the appointment of Professor A. R. Greig, Superintendent of Buildings, University of Saskatchewan, Saskatoon. This appointment was made by the Minister of Labour in the absence of a joint recommendation from the other board members, Messrs. B. D. Hogarth, K.C., and Angus J. Morrison.

The application for a board in the Estevan coal mines dispute named the following coal mining companies as the employers affected: Western Dominion Coal Mines, Limited, Dominion Briquettes and Chemicals, Limited, Manitoba and Saskatchewan Coal Company, Limited, Bienfait Mines, Limited, Lignite Mines, Limited, Eastern Collieries of Bienfait, Limited, Baniulis Brothers, Limited, and Wilson Coal Company. After the board was established the Dominion Briquettes and Chemicals, Limited, protested its inclusion in the inquiry on the ground that it is not engaged in mining activities, but is an industrial concern processing the products of mining companies. The Industrial Disputes Investigation Act does not apply to an industrial company and the Minister has consequently excluded the Dominion Briquettes and Chemicals, Limited, from the inquiry by the board.

Prosecutions Under the Act

Statements in regard to prosecutions under the provisions of the Industrial Disputes Investigation Act appear elsewhere in this issue in the article entitled "Recent Legal Decisions Affecting Labour."

Report of Board in Dispute Between the Canadian Collieries (Dunsmuir), Limited, and the Western Fuel Corporation of Canada, Limited, and their Employees on Vancouver Island.

A report stating that all matters outstanding between the owners and employees of Canadian Collieries (Dunsmuir), Limited, and the Western Fuel Corporation, Limited, have been amicably settled was received by the Minister of Labour on January 9 from the Board of Conciliation and Investigation composed of Mr. Leonard W. Brockington, K.C., Chairman; Mr. Geo. Kidd, the member nominated by the employers; and Mr. Angus J. Morrison, the member nominated by the men. The report indicates the various steps taken by the board since its establishment in July, 1937, in its endeavours to bring about a satisfactory adjustment of the various points at issue.

The cause of the dispute was the request of the employees, approximately 1,800 in number, members of the United Mine Workers of America, for union recognition, increased wages and certain alterations in working conditions. In an interim report submitted on August 20, 1937, the board announced that the companies had agreed to grant union recognition and accept the principle of the closed shop. The text of the interim report appeared at page 954 of the LABOUR GAZETTE for September, 1937.

The board then stood adjourned to allow the parties to endeavour to evolve a system for contract mining at piece rates on terms satisfactory to both sides. In March, 1938, the department was advised by the companies and the men that they had been unable to arrive at a settlement concerning wages and working conditions, and on their joint request the board was reconvened.

In May, 1938, a temporary agreement proposed by the board was accepted by the parties. This provided for an interim increase of 5 per cent in wages for all classes of labour, effective to October 31, 1938, pending an experiment with contract labour and certain technical financial investigations.

The agreement now consummated became effective November 18, 1938, and may be terminated by one month's notice prior to March 30 in any year. It provides for the

closed shop and check-off of union dues to the United Mine Workers of America; also for reference of any dispute not settled by negotiations between the management and the committees of the union to an independent chairman to be nominated by the Minister of Labour if not agreed upon. The wage scale is understood to average 7 per cent higher than before the dispute. The base rate for miners is $5.30 per day, as compared with $4.51 to $4.55 previously. Underground labourers now get $4.60 per day, as compared with $4.22, and surface labourers $4, as compared with $3.81 previously.

Following is the text of the final report of the board:—

Report of Board

In the matter of The Industrial Disputes Investigation Act and a certain Board of Conciliation and Investigation appointed pursuant to the said Act to consider a dispute between the owners and employees of Canadian Collieries (Dunsmuir) Limited at Nanaimo and Cumberland, B.C., and Western Fuel Corporation of Canada, Limited, at Nanaimo, B.C.

The Board of Conciliation and Investigation duly appointed to consider the above-mentioned dispute has pleasure in reporting that all matters outstanding between the parties have been settled by mutual agreement, to which further reference will be made below.

The Board held its first meeting on the 17th day of August, 1937.

As a result of round table conferences, attended by the General Manager and officials of the company, representative of the United Mine Workers of America, District No. 18, delegates of the men and the members of the Board of Conciliation and Investigation, a tentative agreement was made by which the company recognized the right of collective bargaining and accepted the principle of the closed shop. Under the terms of the agreement then arrived at, the men and the employers further agreed, by joint committee, to explore the possibility of the evolution of a system of contract labour, on terms satisfactory to both sides. The Board, recognizing that the provisions and subdivisions of labour and wages in the Mines operated by Canadian Collieries (Dunsmuir) Limited were both complicated and difficult, drew to the attention of the impending conference of employers and employees, a number of salient facts and factors, which, in the opinion of the Board, should be considered by both parties, if an agreement were to be reached.

A series of meetings between the employers and the employees did take place but no definite agreement was possible as a result of negotiations.

The Board reconvened at the request of both parties and with the approval of the Department of Labour in April, 1938. Again the Board held a number of round table conferences, with delegates appointed by the men and representatives of the company. Considerable discussion took place concerning the history of the company, its finances and its coal reserves. In the realization that no understanding was possible between the parties unless certain essential facts were established to the satisfaction both of the men and of the company, the Board proposed a further temporary agreement, to expire on the 31st day of October, 1938. Under the terms of this second agreement the parties agreed to continue their attempts to reclassify employment in the company's mines and to experiment, within the period of the agreement, with contract labour and contract rates. An interim increase of five (5%) per cent in wages for all classes of employees was agreed upon.

The company agreed to appoint an independent, competent mining expert, to be nominated by the Board. The cost of his services was to be borne by the company and he was to assist the company in the making of a complete survey of production and selling costs and other cognate matters.

The Board further undertook to appoint one chartered accountant to represent the United Mine Workers' Union, at the cost of the union, and another to represent the company, at the cost of the company, in an endeavour to obtain agreed correct answers to certain specified queries which the Board undertook to prepare.

The above terms, and others naturally consequential thereto, became the subject matter of a private agreement between the parties.

The appointment of Dr. F. W. Gray, of Sydney, Nova Scotia, as the Investigating Engineer, was agreed upon. Mr. Kenneth Morrison, of the firm of Harvey & Morrison, Chartered Accountants, of the City of Calgary, was appointed to represent the men, and Mr. W. L. Gordon, of the firm of Clarkson, Gordon, Dilworth & Nash, Chartered Accountants, Toronto, was appointed to represent the company. Dr. Gray made an exhaustive inquiry into the matters submitted to him for investigation and his report was made available to both parties. Messrs. Morrison and Gordon engaged in a lengthy investigation of the company's books, the financial history and present position, and presented a joint report on the 17th day of October, 1938. This report was also made available to all parties.

After the representatives of the men and the company officials had examined the findings of the Engineer and of the Chartered Accountants, negotiations were initiated by

the employers and the employees in an endeavour to arrive at a fair and just agreement on the basis of the facts established. The Board is very pleased to report that such an agreement was reached on the 18th day of November, 1938. This forms a basis for a mutually satisfactory relationship until the year 1940. Its signing, which was the result of the most patient effort and mutual confidence, was accompanied by joint pledges of assistance on the part of the representatives of the company and of the representatives of the men.

The greatest credit is due to Mr. H. R. Plommer, the General Manager of Canadian Collieries (Dunsmuir) Limited, and to Mr. Pat Conroy, Vice-President of the United Mine Workers of America, District No. 18, and to all those who assisted them towards this most satisfactory culmination and consummation of the previous efforts of the Board. The Board would like to pay to these men, and to their associates, a sincere tribute.

The Board also feels sure that it is voicing the opinion of all those who have been connected with these negotiations which have led to an amicable settlement when it expresses deep regret at the death of Colonel Villiers, former General Manager of Canadian Collieries (Dunsmuir) Limited. He passed away while negotiations were in progress, and it would be no less than justice to state that a great part of the successful outcome was due to his vision, humanity and goodwill.

The Board has not felt it necessary to detail the terms of the agreement of November, 1938, but takes leave to file the following documents:—

1. Copy of agreement entered into between United Mine Workers of America, District No. 18, and Canadian Collieries (Dunsmuir) Limited, and Western Fuel Corporation of Canada, Limited, dated November 18, 1938.
2. Report of Dr. F. W. Gray, Mining Engineer, dated the 12th day of October, 1938.
3. Copy of report of Messrs. Harvey & Morrison and Messrs. Clarkson, Gordon, Dilworth & Nash, Chartered Accountants, dated the 17th day of October, 1938.

In conclusion, the Board wishes humbly to voice its opinion that the Conciliation and Investigation Act, under which it has operated, has once again proved of great value in the maintenance of industrial peace, and to express its hope that the agreement of the 18th of November, 1938, and particularly the mutual understanding and goodwill upon which it is founded, will form the basis for a continued happy and just relationship between Canadian Collieries (Dunsmuir) Limited and its employees.

Report of Board in Dispute between the Winnipeg Electric Company and its Electrical Workers

The report of a Board of Conciliation and Investigation concerning wage rates of 45 electrical workers in the employ of the Winnipeg Electric Company was received by the Minister of Labour on December 21. These employees, members of Locals 1037 and 435 of the International Brotherhood of Electrical Workers, had requested cancellation of the wage reduction of 6 per cent which was still in force. Over 1,800 other employees of the company had already accepted restoration, on a horizontal basis, of one cent per hour to each man for a period of two years effective May 1, 1938. An identical restoration had been offered by the company to the 45 employees, but this had been refused, the men concerned contending that the restoration should be upon a percentage basis.

The members of the board, Honourable Chief Justice E. A. McPherson, chairman, and Messrs. W. C. Hamilton, K.C., and Fred Keeley, nominees of the company and employees, respectively, are unanimously of the view that in making restorations all employees should be dealt with equally, and that a percentage basis is the most desirable and should be used if circumstances permit. The chairman and Mr. Keeley are of the opinion that the percentage basis, which had been used in all reductions and previous restorations, should be continued, and recommend that a restoration of 1½ per cent be made in respect of the wages of the employees in the present case. Mr. Hamilton does not concur on this point and recommends that the proposed restoration should be on the same basis as already granted to other employees, namely, one cent per hour. All three members recommend that, in the event of future restorations, the parties endeavour to proceed by means of the percentage basis.

Following is the text of the board's report:—

Report of Board

The Honourable the Minister of Labour,
Ottawa, Ontario.

Re: Industrial Disputes Investigation Act and re differences between the Winnipeg Electric Company and certain of its employees being foremen, troublemen and linemen on emergency truck, sub-foreman, linemen, journeymen and linemen apprentices, meter installers and helpers, meter repairers and helpers and cable splicers, members of Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers.

Sir:

Following its establishment and after considering the reference, the Board proceeded to hear the parties to the dispute. The first meeting of the Board was held at the Law Courts in the City of Winnipeg on the 12th day of September, 1938. The representatives of the employees as then announced were Mr. E. Ingles, Vice-President of the International Brotherhood of Electrical Workers for Canada, and Mr. J. L. McBride, Business Manager of Local Unions Nos. 1037 and 435, and a member of the General Executive Board of the International Brotherhood of Electrical Workers. Mr. C. Barrett, President of Local Union No. 1037, and Mr. C. McElrea, Vice-President of Local Union 435, were also present. The employer was represented by Mr. C. H. Dahl, its Vice-President in charge of operations, Mr. W. E. Blodgett, its Vice-President in charge of finances, and Mr. E. V. Caton, its Chief Engineer and Manager of Power Production. Both parties presented their cases with commendable conciseness and frankness.

The dispute arises out of a claim on the part of the employees in respect of restoration of reductions in their pay, aggregating fifteen per cent which became effective in the years 1932 and 1933. Various restorations from time to time, amounting in all to nine per cent, have already been made, leaving the rates now standing at six per cent below the wages in force prior to the reductions. The last agreement between the parties whereby this result was reached, was dated November 9th, 1937, and applies to the year May 1st, 1937, to April 30th, 1938. The present dispute involved the question of the six per cent still unrestored. It is not deemed necessary to enlarge upon the issues, as the facts surrounding the matter have been dealt with in reports of prior Boards of Conciliation.

From the material submitted to the Board, it appears that in addition to the forty-five employees affected by this proceeding, there are twelve hundred and seventy-two other employees of the company who belong to organizations affiliated with One Big Union. These employees sustained the same reductions, and up to May 1st, 1938, received the same restorations as those here concerned.

The same applies to approximately two hundred and fifty unorganized employees and three hundred employees of the office staff. The company has made an agreement with the men belonging to the last named organizations whereby they accepted a restoration on a horizontal basis, of one cent per hour to each man for a period of two years. The unorganized employees and office staff were similarly dealt with. The present application only concerns the forty-five employees above mentioned.

The fact that the main body of employees has received the restoration just referred to, constitutes the ground upon which a recommendation for a restoration to the employees now before this Board, may be based. The company is agreeable to a restoration identical with that granted its other employees. The employees here concerned are unwilling to accept a horizontal restoration and contend that it should be upon a percentage basis.

The members of the Board are unanimously of the view that in making restorations, all employees should be dealt with equally, and that the employees here concerned should have restorations to place their rates on a parity with those employees of the company with whom settlement has been made, and for the same period, namely, May 1st, 1938, to April 30th, 1940. This Board therefore recommends that a new agreement be entered into between the parties in the same form as that of November 9th, 1937, above referred to, except that the first sentence of Article 18 thereof, be amended to provide for the period recommended, and the rate of the further restoration. This agreement does not appear to call for any other alterations to maintain the positions and requirements of the parties at this time.

There remains the question of the basis to be adopted for the proposed restoration in order to establish the desired equality among all employees of the company. All members of the Board are of the view that a percentage basis is the most desirable, and should be used if the circumstances permit. The only difference of opinion arises out of the question as to whether that basis is capable of being applied in the present instance. The schedule of wages set forth in the agreement shows a range in rates of from 37½ to 97½ cents per hour, according to the classification of the employees there set out. A similar range prevails with regard to the employees with whom settlement has been made as above mentioned. It is therefore readily apparent that no percentage rate can be fixed which will give all employees the exact restorations

granted to those having the same classifications as to rates who have received restorations made on the horizontal plan.

The Chairman and Mr. Keeley are of the opinion that as all reductions and previous restorations were made on the percentage basis, that plan should be continued in the proposed new agreement. They feel that a rate should be applied which would come as close as possible to the average result if a horizontal restoration of one cent per hour had been put in effect. They accordingly recommend that a restoration of one and one-half per cent be made in respect of the wages of the employees now before this Board, and that the result be incorporated in the agreement. Mr. Hamilton does not concur in the last mentioned conclusion and on his part recommends that the proposed restoration should be on the same basis as already granted to other employees, namely, one cent per hour.

In view of the fact that the members of the Board are in agreement on all matters of principle and the difference of opinion arises only in respect of the application of such principles, it has been thought desirable that Mr. Hamilton should here set forth his reasons for his non-concurrence and recommendations. They are as follows:—

1. The only material before the Board upon which any restoration whatever can be recommended is the fact that the other employees of the company have been granted and have accepted the restoration above referred to. But for this, the last agreement between the parties would have to stand and be renewed. Such being the case, it is not open to the Board to make, and there is no evidence to justify any departure from the horizontal plan. The evidence must be accepted in toto or rejected.

2. The horizontal plan has been accepted by all other employees of the company, including 1,272 members of other organizations, 250 unorganized employees and 300 of the office staff. It is difficult to imagine any stronger evidence of the fairness or adaptability of the plan in this particular instance.

3. From the practical standpoint, it is impossible to operate two wage schedules at the same time among employees in common employment, and any attempt to do so would be discriminating as between employees in the same classes of employment. It would mean that those belonging to the International organization, entitled to the higher rates of pay, would receive more than those of the same classes belonging to the One Big Union, while as applied to employees entitled to the lower rates, the members of the One Big Union would receive more than those belonging to the International. Such a result would be certain to cause difficulty and unrest.

4. The company has made an arrangement with over 1,800 of its employees for a two-year period, whereby peace now prevails, and a small group of 45 individuals should not be permitted to compel the Company to adopt a scheme calculated to disturb the tranquility of the existing situation, particularly as it would confer no material benefit on those who affect to desire it.

5. The fact that the proposed percentage basis would not result in any material benefit to the applicant employees, but would tend to cause industrial unrest among members of the other groups, and the further fact that nearly all of the applicants are in the more highly paid classifications, indicate that its adoption is sought for the purpose of giving one organization a technical advantage over a rival organization. Such a purpose is an improper use of the Industrial Disputes Investigation Act, and should not be permitted. Moreover, it would be unfair to place an employer in so difficult a position between two contending forces.

As above stated, these are Mr. Hamilton's views and they are not shared by the other members of the Board.

All members of the Board recommend that in the event of future restorations, the parties endeavour to proceed by means of the percentage basis.

All of the above is respectfully submitted.

Dated this 8th day of December, A.D. 1938.

(Sgd.) E. A. McPHERSON,
Chairman.

(Sgd.) FRED KEELEY,
Member of the Board.

(Sgd.) W. C. HAMILTON,
Member of the Board.

Report of Board in Dispute Involving Operators of Certain Bituminous Coal Mines in Southern Alberta and Southeastern British Columbia and their Employees.

Advice of settlement of a dispute concerning wages and working conditions in certain bituminous coal mines in Alberta and Southeastern British Columbia was contained in the final report received by the Minister of Labour on December 13 from the Board of Conciliation and Investigation composed of Mr. Justice A. A. McGillivray of Edmonton, chairman; Mr. R. M. Young of Canmore, the member nominated by the employers, and Mr. Robert Livett of Calgary, the member nominated by the employees. Nine coal-producing companies, members of the Western Canada Bituminous Coal Operators Association, and

approximately 2,600 employees, represented by District 18, United Mine Workers of America, were involved in the dispute.

The agreement which the board negotiated has been ratified by a referendum vote of the miners taken on December 19. It provides for an increase of 7 per cent in all day-wage rates over $5 per day, and of 10 per cent in all wage rates of $5 per day and under. Existing contract rates are to be continued, except in two or three cases.

Interim reports were submitted by the board on August 3 and September 2 and 3, respectively, showing what had been done by the board at those dates to advance the inquiry.

Following are the texts of the three interim reports and of the final report of the board:—

First Interim Report

In the matter of a dispute between The Crow's Nest Pass Coal Company, Ltd., Mohawk Bituminous Mines, Ltd., West Canadian Collieries, Ltd., Hillcrest Collieries, Ltd., Canmore Mines, Ltd., Brazeau Collieries, Ltd., Cadomin Coal Co., Ltd., Luscar Collieries, Ltd., and Mountain Park Coal Co., Ltd., members of the Western Canada Bituminous Coal Operators Association, (Employer) and their employees in Alberta and Southern British Columbia, being members of District 18, United Mine Workers of America.

This dispute is primarily a dispute as to wage rates in the bituminous coal field of Alberta and southeastern British Columbia. The difficulties ordinarily attendant upon the proposing of a wage rate are here added to by reason of the fact that any increase or decrease proposed is to have application to all mines in the field.

A list of a number of alleged inequalities as between mines has been presented by the representative of the employees and in addition certain clauses which have not been agreed upon in a proposed agreement have been brought to the attention of the Board by the representatives of the employers and employees. With these alleged inequalities and with these clauses the Board may have occasion to deal in its final report in the event of a settlement not being reached prior thereto. For the present suffice it to say that the main dispute is as to the rate structure and that, in the event of the Board being successful in causing the parties to come to an amicable agreement with respect thereto, it is not anticipated that the Board and the parties will experience any serious difficulty in disposing of these collateral differences to the satisfaction of both parties to the dispute.

Before arriving at the conclusions which seem to justify the making of this interim report, this Board has entered upon fields of investigation which have been occupied by Royal Commissions and other Boards of inquiry with seemingly wider powers and larger objectives, and so it may not be amiss to say at the outset that this Board is not unmindful of the many precedents in this and other countries for the establishment of a wage rate by reference to such considerations as a living wage, having regard to the cost of living in the locality in which the work is done; the rates paid in similar employment in competitive fields; the nature of the work to be performed and the degree of experience or skill required in connection therewith; the risks necessarily taken in the carrying out of the work; the change in conditions, if any, since the last voluntary agreement; the ever increasing and in my opinion quite proper demands of workmen to be paid at a rate which will insure something more than a bare existence in return for a life of toil, and the financial capacity of the industry to pay the rate demanded. But these and like considerations do not alone serve as a sound basis for the fixing of a wage rate in the bituminous coal fields of Alberta and southeastern British Columbia.

In those fields in which the considerations alluded to have been taken as the basis for the fixing of a wage rate, generally speaking the demand for the product was not from one or two consumers, but from the public, and could be estimated in the light of past experience with some degree of accuracy, and the price to be paid for the product was determined by the producer and limited only by the competition which he was called upon to meet from other producers in a public market. Thus it was possible to determine with some measure of certainty the number of days in the year that would be work days for a given number of men and so arrive at the earning power of the competent and industrious workman at a given rate, and it was also possible to form an intelligent opinion as to the financial ability of the employer to pay at a prescribed rate.

In the bituminous coal fields of Alberta and southeastern British Columbia, which hereafter I shall refer to as District 18, it is not now possible to estimate the earning power of the workmen nor the financial ability of the employer to pay because, remarkable as it may sound and strange as it may appear, it is in the main true that two customers, the one in the north and the other in the south, who as buyers are not even in competition the one with the other, have the decision as to the amount of coal that will be taken from any mine in any year, when it will be taken during that year, and the price that will be paid therefor.

Now this Board is not I think too greatly impressed with a sense of its own importance.

nor does it I think over-estimate its responsibilities, but the fact is that it is functioning under oath and is charged with the statutory duty of endeavouring to bring about a settlement of this dispute as to wage rates, and failing that to make a report "according to the merits and substantial justice of the case," and it goes without saying that to formulate a proposed settlement or a report, as the case may be, this Board cannot in good sense or good conscience come to a conclusion as to a proper wage rate without regard to the number of days of work in any given period available to the workmen in respect of whom the wage rate is being proposed, nor can the Board in reason strike a proposed wage rate without any regard to the financial ability of the employer to meet that rate out of the earnings of the industry. It is quite evident that a rate which would provide not only a living wage but a very fair wage in a mine which was able to offer work to its workmen for five days a week throughout the year, might be wholly inadequate to provide a living wage, much less a fair wage, to the employees in a mine which was unable to provide more than one work day per week for its employees. It is also quite evident that an operator whose mine was working full time would be better able to pay a given wage rate than an operator whose mine was working but one day per week. It is also evident that there is a difference between estimating public demand and speculating as to what one consumer will do.

It may be that in the end this Board will have to proceed without further light and do that which juries are sometimes told they must do, namely, do the best they can, but this Board conceives it to be its duty not to proceed in that fashion until it has first exhausted every means at its command to get a proper foundation upon which to rest its proposals, hence the enlargement of the scope of this inquiry and the presentation of an interim rather than a final report.

There are two parties named in connection with this dispute, the employers and the employees. If this Board had the power so to do it would long since have added the principal consumers as third parties. In the northern part of Alberta the Canadian National Railway is served as to its bituminous coal requirements by the Cadomin, Mountain Park and Luscar mines at or near Cadomin, and by the Brazeau Collieries at Nordegg. In the southern part of Alberta and in southeastern British Columbia the Canadian Pacific Railway Company is served by the Crow's Nest Pass Coal Company with two mines, the one at Michel and the other at Coal Creek near Fernie in the Province of British Columbia; by the McGillivray and International, two coal companies under one management at Coleman, by two mines of West Canadian Collieries, Ltd., at Bellevue and Greenhill, by Mohawk Bituminous, Ltd., at Bellevue, and on its main line by Canmore Coal Company, Ltd. In addition this railway has been served by Hillcrest Collieries, Ltd., at Hillcrest. This last mentioned mine has gone into the hands of a receiver and its future is therefore uncertain. The Board is informed that it has withdrawn from membership in the Association by which the employers are represented. All of the other mines, with the exception of McGillivray and International, whose agreement with its employees runs until March next, are parties to this inquiry.

It is quite clear from the evidence that these two railways take about eighty-five per cent of the total coal sold by these mines and that at present there is not a single one of these mines that could continue in business if railway orders were withdrawn. In this connection the following tabulation is of interest:—

SHIPMENTS OF BITUMINOUS COAL BY YEARS, SHOWING TONNAGE SHIPPED TO RAILROADS AND PERCENTAGE OF SUCH SHIPMENTS TO TOTAL

ALBERTA

Year	Total Tonnage Shipped	Railroad Tonnage Shipped	Percentage of Railroad Tonnage to total Tonnage Shipped
1921	2,712,672	2,032,408	75%
1922	2,725,100	2,234,803	82%
1923	3,112,032	2,860,926	92%
1924	1,442,393	1,285,739	89%
1925	2,054,188	1,819,384	88%
1926	2,738,689	2,468,118	90%
1927	2,817,488	2,466,234	88%
1928	3,040,903	2,706,505	89%
1929	2,919,438	2,625,937	90%
1930	2,125,150	1,838,001	86%
1931	1,724,576	1,431,995	83%
1932	1,612,455	1,353,434	84%
1933	1,522,590	1,249,778	82%
1934	1,687,624	1,434,727	85%
1935	2,001,949	1,665,345	83%
1936	2,042,447	1,667,092	82%

Taken from—*Coal Statistics for Canada.*

It is also clear from the evidence that the capacity of these mines to produce coal is far in excess of the present demand for coal. Thus we have a buyer's market in which operators walk warily and speak softly lest they lose the orders that they have to competitors not only without but within their own association, but what is even more tragic is that, even as there are too many mines to supply the present demand for coal, there are far too many men engaged in and about these mines for the present operating needs of the industry, with the result that more than seventy per cent of the men are earning less than the amount shown in the Dominion Government Labour Gazette of April, 1938, as a living cost for a man with a wife and three children.

This had been the situation for some years when in 1935 the Canadian Pacific Railway made a change in policy which, to those operators who are parties to this inquiry, meant going from bad to worse. Prior to January, 1935, the Canadian Pacific Railway Company purchased its coal from the mining companies mentioned, on a quota basis. Each of these mines was treated as a unit, except the Fernie mine and the Mohawk mine, which were regarded as a half unit each, and the tonnage to each mine was divided on a unit basis. The ruling price was $3.40 per ton, except in the case of two mines one of which got something more and the other something less because of special conditions. In February, 1935, under a four year contract with the McGillivray Creek Coal Company and the International Coal and Coke Company, which are under one management, the railway agreed to take a much larger tonnage from these two mines at a greatly reduced price. This contract was a convenient lever for the forcing down of the price paid for coal to all other mines in the Crow's Nest Pass and at Canmore, notwithstanding that they did not enjoy a four year contract and the benefit of a large daily tonnage which makes for economy in the operation of any mine, notwithstanding that they were not given the slightest opportunity of bidding with the McGillivray Creek Coal Company and the International Company on a competitive basis, before the contract was entered into with these two companies, and notwithstanding that the greatly increased tonnage awarded these companies being some forty per cent of the total tonnage which the railway had to offer, placed the remaining companies in a bad position to allow lower prices, or to operate profitably on the reduced tonnage remaining available to them. It is perhaps significant, since the Canadian Pacific Railway Company admittedly controls the Consolidated Mining & Smelting Company, that the President of both the McGillivray Creek and International Companies is a director of Consolidated Mining & Smelting Company and that a director of these two companies is said to be President of Consolidated Mining & Smelting Company. When questioned as to the connection the representative of the Canadian Pacific Railway Company stated that, while he had no personal knowledge as to this, it was commonly reported that the Smelters Company had an interest in these two companies. This connection is mentioned in passing, not with a view to denying the right of the Canadian Pacific Railway Company to enter into the coal business (this may be incidental to the carrying on of its transportation business), but to make the point that it but adds to the difficulties of the coal operators to require them, with limited and sporadic orders over a period of one year, to come within a near approach to the price of captive mines, if such they be, whose prices are quoted on the basis of a very considerable daily tonnage for a four-year period.

This contract with McGillivray Creek and International had a far reaching effect in that the Canadian National Railway Company immediately insisted upon a similar price base from the mines with which it had to do in the north and in short secured to itself a very considerable reduction in the cost of coal, notwithstanding the protests of the operators that they could not carry on at a profit, and that to be put into competition with a captive mine with a large daily tonnage for four years was manifestly unfair.

Since 1935 the McGillivray Creek and International Companies have enjoyed regularity of production. This has been far from true of the remaining companies. With these companies the Canadian Pacific Railway Company places its orders on the basis of an annual estimate of its minimum requirements on prices settled for that year. A company knows what this railway's minimum requirements will be and may assume that a considerable excess may be required, usually at a lower figure, but the ordering is a weekly ordering, and the quantities ordered vary very considerably. In the case of the Canadian National Railways this company refuses to make any commitment for any period and insists upon weekly ordering, at the same time requiring the mines to stand ready to deliver coal to the extent of whatever the orders may be. In the result all mines, being anxious for coal orders, stand ready with surplus men to fill large orders if and when received. In this connection the following compilations are of interest.

SHIPMENTS OF COAL TO RAILWAYS

It appears from the correspondence between the Canadian National Railways and the mine owners of the north that in the opinion of this company they should in no circumstances be required to pay a higher price for coal than the Canadian Pacific Railway pays, and the

base price pressed for is the price of the alleged captive mine, with a four year contract and a large daily tonnage.

It may also be mentioned that this railway company has taken occasion to point out that if the wage scale is lowered the price to the operators must fall accordingly; that is to say, a reduction in wages must not be a benefit to the coal operator but to this railway company, this notwithstanding that the railway company is not a party to wage disputes, and that the operators were warned not later than in March of this year that, if the men do obtain higher wages, the railway company will pay no more for its coal.

It seems to me quite unnecessary to refer to the oral evidence or to the correspondence which operators have produced under subpoena with some trepidation, to support what I have before said, that the Canadian Pacific Railway Company in the south and the Canadian National Railway Company in the north enjoy a position unique amongst consumers, of being able to dictate the price that they will pay for the bituminous coal which they require in District 18. It is true that the formalities of calling for tenders are gone through with, sometimes the price is suggested at which tenders should be made and sometimes it is not, but in any case if the tenders are not satisfactory the operators are required to adjust them to the satisfaction of the railway companies or do without the orders, which means the closing of their mines. The position of the railway companies as dictators is presently assured, not only because as has been stated the supply of coal is much greater than the present demand, but because, in the case of the Canadian National Railways at least, it has been established that the company is the owner of the Rail and River Coal mines in the State of Ohio in the United States of America. It has also been suggested, although I think not established, that the Canadian Pacific Railway Company is directly or indirectly interested in United States mines.

It has been forcibly brought out by each of the representatives of the railway companies that their company has by no means exerted the pressure upon the operators which they might have done if they had been wholly mercenary in connection with the ordering of their coal. It seems proper to say that there appears to be truth in this submission and that the railway companies could have been more drastic in the handling of the operators who are so completely under their domination if they had been disposed so to do; but it equally apears that there has been a change of policy and there is no telling what the next few months will bring forth, particularly since both representatives of the railway companies assert the right and the duty to buy coal in the cheapest market and deny the slightest responsibility for or interest in wage disputes, even though the outcome thereof has a very distinct bearing upon the cost of production of coal. In short considering their extraordinary powers one must say that the railway companies have not been wholly forgetful of the difficulties of the operators and through them of the men who work in and about mines. Equally it may be said that they have at all times dealt at arm's length; that they have been at no pains to understand the problems of and lend aid to an industry which they dominate, an industry which cannot appeal to the Railway Board or any other Board to increase their rates to the consumer whenever circumstances justify such an appeal.

One fact stands out, namely, that the bitmunious coal industry of District 18 is in a shaky and chaotic condition. As to just when it will be forced to that irreducible minimum in price beyond which it cannot go without going into bankruptcy is difficult to forecast.

Representatives of the railway companies do not dispute that the industry as a whole is in an unhealthy condition, but they assert, perhaps with good reason, that the trouble is that there are too many mines and too many men in and about those mines; that the railway companies should be able to buy coal at a less cost even than is being paid to the McGillivray and International at this time. There can be no doubt that there are too many mines and too many miners to meet the present demand for coal; also it would seem not unreasonable that in an area which contains such great coal deposits that coal could be produced at a lower price to the consumer, and there appears to be good sense in the suggestion that a smaller number of mines could produce coal more economically. There is force in the further submission on behalf of the railway companies that they should not be looked to as supporters of an industry which cannot so arrange its affairs as to stand on its own feet, but in connection with all of this it is to be remembered that the reason for the number of mines in operation is that during the war years there was an extraordinary demand for coal, mines were pressed to increase their output; this was true again in the prosperous years of 1926, 1927, 1928 and 1929 when the present mines were working on a basis so little removed from capacity as to leave no great margin for emergencies as shown by the first before

quoted tabulation. Granting that there are too many mines and by far too many miners for present day coal requirements, this fault, if it be a fault, cannot be placed solely at the doors of the operators; they were called upon to meet a demand and they met it. they have made large expenditures in connection with their plants and they have brought in miners who have made their homes in the mining towns adjacent to their work, all of which would not have occurred had they not been called upon to meet a demand.

The representatives of the railway companies not only say what is the trouble with the industry, they also suggest the remedy. They say that the operators should by appropriate amalgamations or by some other means reduce the number of mines and the number of miners, and it is suggested that if this be done the industry even at a still lower price for coal to the consumer may become a prosperous one and the employees thereof enjoy a decent wage by virtue of the greater number of days of work which a lesser number of mines would be able to afford to a lesser number of men. But such a solution as the amalgamation of companies and the closing of all mines which may not then be economically worked to supply present demand, is perhaps giving thought to to-day and not to tomorrow. Mines once closed in this district cannot be reopened and will not be there to meet the needs of the railways in a time of national emergency such as War, or in times of greater prosperity which have been experienced and indeed may come again. Then again it is to be borne in mind that mines may be shut down for indefinite periods through circumstances more or less peculiar to the nature of the industry. One does not have to go back to any very distant date to find records of serious accidents caused by explosions, fires and the like which have closed down mines or parts of mines for prolonged periods during which production was wholly or to a great degree impossible. Similarly faults have markedly reduced the productive capacity of mines and the bringing of production back to a normal figure has often taken a long time and a large sum of money, which mines working on a narrow margin of profit might not be able to provide. There is also the danger to the railway companies attendant upon the creation of a monopoly which might in time take the whip from the hand of the consumer; there is the further consideration as to whether or not, having regard to their need for freight and passenger traffic along the lines of their railroad, it is the part of wisdom to destroy mining towns by closing up the industries upon which the life of those towns depends. In addition to all of this there is the broad consideration so ably advanced, with the endorsation of the coal operators and employees, by Mr. L. R. Lipsett, K.C., which perhaps should commend itself to Canadian railways that look to the Canadian people for their financial well being. In short it is that if Canadians are to preserve their entity as a Canadian people trade must flow from the far flung parts of this Dominion to its populous centres even as it is forced by artificial means to go from those centres along Canadian railway lines to the far East and the far West.

These are all question of policy which the representatives of the fuel departments of these great railways who were before this Board have said it is not for them to consider or pass upon.

In the minds at least of some of the members of this Board it is still an open question as to whether or not the course of closing mines advocated by members of the fuel departments of the railway companies should be recommended, but before coming to a final conclusion in the matter it is thought that those who are concerned with policy and are able to speak with authority for each railway company, should give to the Board the benefit of their views as to the wisdom and practicability of closing mines, and, if this is thought wise, the assurance of their support to any practical method which might be recommended and accepted for bringing this about,—for example, absorption of one mine by another on the basis of an independent appraisal. As it is unlikely that any operator will voluntarily let go his undertaking for the good of the industry or sell at any price other than his own, the remedy of amalgamation suggested by the railway representatives is quite useless as a practical solution of the trouble unless supported by the withholding of coal orders by the railway companies according to a definitely known plan.

It seems to me that neither Canadian railway company can well take the position that it stands aloof and indifferent to the problems of another Canadian industry which these railway companies in great measure control.

The underlying idea of the Board is not to increase the price of coal to the consumer but to find some means whereby this industry may be put upon some stable foundation which will permit of an intelligent recommendation as to a proper wage relationship between employer and employee.

It is not conceivable that either one of these great railway corporations intends to needlessly wreck any mine or any place that relies upon it for the support of its citizens, but if it be for the good of the industry as a whole

that in some measure this should be done, then it should be done in an intelligent and orderly fashion with full notice to those that are to be affected, rather than by the slow and insidious process of gradually cutting away all profits from all mines until the whole industry except for a favored few is in such a lamentable financial position that its operators are on the eve of financial collapse and its men on the border of starvation.

If on the other hand the railway companies should decide that the present number of mines should be encouraged to continue, then it is not unreasonable to suppose that long term agreements might be entered into so that the railway companies, on the one hand, and the operators and men on the other, might have the assurance of industrial peace.

In this connection and at this point it may be well to state that both operators and men are now prepared to enter into a five year agreement in the event of a rate being agreed upon, subject only to some extraordinary change in conditions, as, for example, a War, which was not and could not reasonably be in the contemplation of the parties at the time of the entering into of the agreement. As to this, operators and men are well content to leave the determination of whether or not this changed condition has taken place at any time, to an appointee of whomsoever may be the Minister of Labour at that time. Such an arrangement would be of immense advantage to the industry and it would appear, from the evidence, of distinct advantage to the railway companies. It would avoid general strikes and disputes which in times past have disrupted the industry to the disadvantage of the consumer as well as the producer and the workmen, and would eliminate the cost to the railway companies of safeguarding themselves against strikes in the putting down and picking up of reserves of coal. But a long term agreement as between operators and men is futile without a concrete arrangement between the operators and the railway companies for a like term, because, while no one of the operators before this Board has denied the right of the men to a fair wage, the fact is that the financial capacity of each operator to pay a fair wage is dependent upon the consumer's attitude towards him. It is thus evident that the consumer must be looked to before a long term agreement can be consummated. With a long term agreement between operators and men and a long term agreement between operators and the railways on a definite tonnage basis associated with more orderly ordering than now obtains, it is to be expected that the consumer would get cheaper coal, that the operators who could then operate more economically would get a fair profit, and that the men would receive a wage which would make for peace and contentment in the bituminous mining areas of this country. In this connection the representative of the Canadian Pacific Railway Company stated that, in view of the contract made with the McGillivray and International, it might indeed be the policy of his company to enter into long term agreements. With regard to orderly marketing the following is to be found in the written statement which he presented to this Board.

> "I am not in a position to express an opinion based on knowledge of coal mining, but recalling statements made by different coal operators over many years, large tonnage with regular output by any one mine makes for economy and lower cost of production. Our experience confirms this in the light of the contract made with the McGillivray Creek and International Coal Companies at the beginning of 1935. This contract provided for a fixed substantial tonnage taken in equal quantities each week throughout the year and resulted in a reduction of the price of coal to us of fifty cents per ton, and provided for the miners regular work. If there was a sufficient demand for coal to give all the mines operating a similar output, the cost of coal from those other mines could no doubt be similarly reduced. Unfortunately, as is apparent to anyone familiar with the situation in the Crow's Nest and Canmore areas, the potential capacity of the mine is far beyond the present or prospective demands".

This Board, mindful of the possibility that the railway companies might not see fit to co-operate in the stabilizing of this industry by any means mentioned, or by any means which they might have to propose, have felt it to be their duty, as having a distinct bearing on a wage rate, to examine into the possibilities of extending the market for coal amongst commercial industries and of advancing the use of railway and other coal to points further east than has heretofore been the practice. In this connection it has given thought to such matters as subventions and as to why the railway companies do not use western coal to such points east as, in the opinion of the Executive-Secretary of the Dominion Fuel Board, coal from District 18 can through the subventions which it now enjoys be placed upon a competitive basis with United States coal. The Board has also had occasion to consider as to whether or not the suggestion made by Sir Montague Barlow in his comparatively recent report to the Alberta Government as to reduction in freight rates is not one which may well be accepted by the railway companies with a view to placing this industry upon a better footing with its United States competitors both with regard to railway and commercial coal. In this connection it is interesting to read that

the Dominion Fuel Board once represented to the Board of Railway Commissioners that it was in the national interest to extend the market for Canadian coal and that coal was entitled to preferential terms.

Since it is not well that any industry should be dominated either by employer, employee or consumer, if the dominating party will not co-operate with the others to the good of the industry, the Board has also given consideration to whether or not it should recommend government intervention not only with regard to wage regulation but, in order that this might be intelligently done, the fixing of the price at the pithead for those who seek to make use of western bituminous coal. It is clear that the Public Utilities Boards of the country have served the country well and that the Railway Commission and the Grain Boards play an important part in the industrial life of the country, and it is perhaps not too much for those interested to ask for some such governing body to determine what is a fair price to pay for coal, fair alike for the consumer and the producer and of course such a price as will provide a fair wage to the employees without whom the coal cannot be produced.

Before coming to a final conclusion with regard to any of the matters mentioned, each and all of which may have to be dealt with in a final report, this Board is of the opinion that it should invite each of the railway companies and the Dominion Fuel Board to send a representative to a round table conference for the consideration of the matters hereinbefore mentioned and all other matters which would make for the stabilization of the coal mining industry in District 18, without which there is no proper basis for the making of a district wide rate structure.

This opinion has been formed only after the views of the representatives of the operators and of the men, the representatives of each of the railway companies and the Executive Secretary of the Dominion Fuel Board, were first obtained. Their respective statements as to this are as follows:—

In speaking of the proposed conference the Executive Secretary of the Dominion Fuel Board said:—

"I think it is a mighty fine idea. Anything which has been accomplished in the past has been due to the co-operative methods of meeting the consumer, labour, Government, operators and so on."

On the same subject, after having previously expressed doubts as to the value of such a conference, the representative of the Canadian Pacific Railway made the following answers in response to the following questions:—

"Q. What I am getting at is this, if, without prejudice to your company, Mr. Stockdill, you could meet or representatives of your company could meet with representatives of the operators and the men, not with the idea of seeing who could beat each other for that particular day or days in which you were in conference, but with the idea of understanding the point of view of each other, do you think anything but good could come of that? If you got no further than understanding each other's point of view?—A. Anything that will result in friendly relationships between the employees or workers and the employer and the consumer, I think is valuable.

Q. It does seem to me it is perhaps ordinary business sense that three parties interested in a problem should each try and take a hand in its solution—if you concede interest.—A. Well we would have no objection, Mr. Chairman, if such a meeting were called, we would have no objection, at least I would have no objection and I am sure my chiefs would be glad to endorse it and have someone sit in and discuss any matters in relation to the question.

Q. Who is your immediate chief?—A. Mr. Neale of course is my Vice-President."

The representative of the Canadian National Railways gave evidence as follows:—

"Q. Yes, what would you think, or what do you think of a coal administrator such as you had in the War years?—A. Oh, I think the best thing to do is for the consumer and the industry to try and work out this thing together. If there is anything to be gained by starting all over again let us do it.

Q. You think from your standpoint, you or some representative of your Company, would be satisfied to sit in on such a conference?—A. I think that would involve a matter of railway management decision, but I think our Company would be willing to do that.

Q. When I suggest such a thing I do so without prejudice to anyone's position to see if three people or three parties in interest cannot sit down and bring their intelligence to bear upon a problem which is of common interest to see what is a fair and just solution, if there be any, before throwing up their hands and saying 'there is none'.—A. There is always the possibility, my Lord, of good coming out of a fresh exchange of views by the parties concerned. At the very extreme it cannot do any harm and it may do good."

Another representative of the Canadian National Railways had this to say in the course of his evidence:—

"Q. As a practical railway man, Mr. Owens, do you see any objection to the type of conference which I am suggesting?

"A. I think it would be a very splendid idea."

In addressing themselves to the question of whether or not such a conference should be held Mr. Dick and Mr. Morrison, the respective representatives of the operators and men, spoke in part as follows:—

"Mr. Dick: Speaking on behalf of the operators we would be very glad to co-operate in such a meeting.

"Mr. Morrison: I can assure you, Sir, that is also my viewpoint."

Mr. Shanks, another representative of the operators, spoke in part as follows:—

"Mr. Shanks: My Lord, I would just like to add to Mr. Dick's remarks. I think it is a very good idea."

Believing that much good might come from such a conference and that it would have manifold advantages over the calling of further witnesses, and that this Board may be in a much better position to effect a settlement or to render an intelligent report after such a conference, this Board has decided to place the foregoing in the hands of the Railway Companies and the Dominion Fuel Board and to invite these bodies to appoint a representative to attend a meeting with the Board on Monday, the 22nd day of August next, at the Court House at Calgary, Alberta, at ten o'clock in the forenoon, and if then thought fit to attend a further meeting with representatives of operators and employees present.

Having come to this decision this Board will so report to the Honourable the Minister of Labour for Canada.

Dated at Calgary the third day of August, 1938.

(Sgd.) A. A. McGILLIVRAY,
Chairman.

I concur in all of the foregoing.

(Sgd.) R. LIVETT,
Board Member.

Witnesses appearing before the Board and representing the operators, the employees and the railways have agreed on the desirability of stability in the industry, not only as to the operation of the mines, but as to the conditions of employment of the men necessarily required in them. They have also agreed that a conference such as proposed by my colleagues on the Board may be of benefit in establishing a foundation upon which such stability may be built.

With the decision to give effect to that view, and without necessarily accepting some of the opinions expressed by my colleagues regarding present conditions in the industry, I concur.

(Sgd.) R. M. YOUNG,
Board Member.

Second Interim Report

In the matter of a dispute between the Crow's Nest Pass Coal Company Ltd., Mohawk Bituminous Mines Ltd., West Canadian Collieries Ltd., Hillcrest Collieries Ltd., Canmore Mines Ltd., Brazeau Collieries Ltd., Cadomin Coal Co., Ltd., Luscar Collieries Ltd., and Mountain Park Coal Co., Ltd., members of the Western Canada Bituminous Coal Operators Association, (Employer) and their employees in Alberta and Southern British Columbia, being members of District 18, United Mine Workers of America.

On the 3rd day of August last this Board made an interim report. For the sake of continuity a copy of this report is attached hereto. In that report this Board pointed out that a wage rate for the bituminous coal fields of Alberta and southeastern British Columbia, known as District 18, could not be arrived at without regard to the number of days of work available to the men in respect of whom the rate is to be proposed. It was also pointed out that a wage rate could not be arrived at in entire disregard of the financial ability of the individual operators to make payment of wages out of the earnings of the industry at the proposed rate. It was also pointed out that there were too many mine operators and too many miners engaged in the production of coal for present-day demands, with the result that not one bituminous coal mine in the whole of the Province of Alberta or southeastern British Columbia could be continued in operation if railway orders were entirely withdrawn in favour of other mines. It was also pointed out that because of this the Canadian Pacific Railway and the Canadian National Railways not only enjoyed the power so to do but had in fact dictated the amount of coal to be taken from particular mines, the times when it was to be delivered and the price to be paid therefor. In short, it was made to appear and this Board so reported that both mine operators and men were as to the south in the hands of the Canadian Pacific Railway, and as to the north in the hands of the Canadian National Railways.

In these circumstances the Board was of the opinion and so reported that no useful purpose was to be served by its speculating either as to the earnings of operators or as to the number of days of work that would be available to a given number of workmen in any mine or mines so long as both entirely depend upon an unstated policy on the part of these two railway companies.

In the result this Board proposed a conference with representatives of the two railway companies with a view to ascertaining as to whether or not these two great railway corporations were willing to play any part in the stabilization of this industry.

The foregoing is not put forward as a summarization of the twenty-seven page interim report of August 3, hereto attached, but as a fitting if indeed not a necessary premise to the report which this Board now presents.

On the 22nd and 23rd days of August last this conference was held, at which the Canadian Pacific Railway was represented by its General Solicitor, Mr. George A. Walker, K.C., and Mr. Charles E. Stockdill, assistant to the Vice-President, Western Lines, and Mr. Ernest Humphrys, General Fuel Agent, Western Lines. The Canadian National Railways was represented by Mr. R. C. Vaughan, Vice

President, and Mr. George H. Jenkins, General Fuel Agent.

Since the marketing of coal from the field with which the Board is concerned must necessarily be associated with the subvention plan of the Dominion Government, it was thought desirable to invite a representative of the Dominion Fuel Board to be present at this conference. The invitation was accepted and Mr. Frank Neate, Executive Secretary of that Board, was present.

It may not be amiss to now state that Mr. Neate's clear and lucid explanation of the Government's subvention plan was of great interest, and the figures which he produced, showing the extent to which the operators in District 18 had taken advantage of the opportunity afforded them by Government subventions to supplant United States coal and to occupy the Winnipeg commercial field, made it quite clear that the operators had not been content to rest their problem of operating their mines at a profit upon the shoulders of the railways alone.

In the Board's opinion it is a fair inference from what Mr. Neate has said in evidence and at this conference that the Canadian Pacific Railway Company, although perhaps not doing all that it might do in the matter of taking coal from District 18 for railway consumption on its lines east of Winnipeg, none the less has done very well, and equally that the Canadian National Railways has made no serious attempt to go east of Winnipeg in the use of western coal, notwithstanding that because of subventions this western coal is put on a proper competitive basis with United States coal as far east as Sioux Lookout.

Mr. Neate fully discussed the extent to which bituminous coal from District 18 could be introduced into Ontario under the existing subvention arrangement. It may be a matter for consideration by the Government of Canada, as pointed out by Mr. Livett, as to whether it is not better to increase subventions rather than pay out relief moneys to miners, but this does not appear to be a matter with which this Board is concerned, even as it was not a matter upon which Mr. Neate was prepared to speak.

In consequence of what Mr. Neate had to say I think it was brought home to the representatives of the railways, even as it was to the members of the Board, that a very great responsibility rests upon the shoulders of the railway companies in connection with this coal mining industry. It is said, perhaps with reason, that this is not a responsibility which the railway companies have voluntarily undertaken, it is none the less a responsibility which they cannot in good conscience avoid because, had it not been for their encouragement of mines by the granting of orders to these mines as they came into existence, the coal industry in District 18 would not now be faced with a super-abundance of mines and a surplus of workmen.

Turning now to the matters discussed with the representatives of the railway companies. This Board made it clear at the outset that it had not invited their attendance with a view to getting them to pay more for railway coal, and furthermore that it was not the intention of the Board to ask them to purchase more coal than the amount necessary to meet their requirements. It was then made clear that in the opinion of the Board it was entitled to a direct answer to the question as to whether or not the railways were willing to play any part in the stabilization of the coal industry in District 18. If the position of the railways had been that they would stand aloof, then the Board, being of the opinion that stabilization is essential to the fixing of a wage rate on an intelligent basis, would have been bound to use every endeavour to bring about government intervention. Fortunately the Board is able to report that each of these railway companies through their representatives asserted that they were not only willing but anxious to do all that could be done with ordinary business prudence to help in the stabilization of this industry.

Accepting this statement this Board was then at pains to put forward the view that so long as the Railways insisted upon uncertainty as to the amount of coal that would be ordered from any mine, uncertainty as to the time of delivery and uncertainty as to the price that would be paid therefor, there necessarily would be uncertainty as to the number of men that might be advantageously employed in any mine, uncertainty as to the number of days of work available to these men, uncertainty as to the operators' ability to pay wages out of earnings and so complete uncertainty as to what a proper wage rate might be.

Furthermore this Board, being mindful of the needs of the employees who have not been consulted as to the relations which have obtained between the operators and the railways, and at the same time anxious not to be forced into the fixing of an exorbitant wage rate, in order that these employees may enjoy a decent annual income, stressed the necessity of some plan being formulated which would permit of operators assuring to all of those employees who are necessary to the operation of their mines an opportunity to work on at least two hundred and thirty-four days in the year or pay for this minimum

number of days if the opportunity to work be not provided.

To this end this Board proposed that the railways enter into a long-term contract with the operators of their choice based upon the long-term contract now in force between the Canadian Pacific Railway and the mines of the McGillivray Creek Coal and Coke Company, Limited, and The International Coal and Coke Company, Limited, which mines are said to be captive mines owned or controlled by the Canadian Pacific Railway Company. With such a contract in force no difficulty would be presented in arriving at a fair wage rate or in formulating a contract between operators and men for a like period. As an alternative this Board proposed that the railway companies make a firm offer to the operators of their choice for a definite term for their coal requirements, this offer to remain open at least until operators and men and this Board had an opportunity of meeting and of considering as to whether or not a fair wage rate could be worked out on the basis of such an offer. This led to a general discussion with the representatives of each of the railways in turn. In the opinion of this Board no useful purpose is to be served by entering upon a detailed statement of all that was said in the course of these discussions. Suffice it to say that the Board's proposals were respectfully but firmly rejected. The position of both railway companies was the position taken by Mr. Stockdill and Mr. Jenkins as witnesses before this Board, namely, that, although a long-term contract on a definite tonnage basis might have been of definite benefit in the case of the McGillivray and International mines, it was not an essential of a healthy industry so far as the other operators in this field were concerned, that their real trouble was that there were too many mines and too many miners producing coal having regard to the present-day demand for coal and that the remedy was the elimination of mines by an operators' amalgamation or amalgamations.

The representatives of the railways, however, declined to express an opinion as to what mines should be eliminated in this fashion; furthermore these representatives refused point blank to declare what proportion of their total coal orders would be given to an amalgamated company or companies; furthermore they definitely refused to state that they would withhold orders from any company by which they were now being served whether a party to an amalgamation scheme or not.

Since, to use a common expression, no one buys a pig in a bag, and since it is well known that the Canadian National Railways owns mines in the United States, and since it has been freely stated before this Board, and not as yet denied, that the Canadian Pacific Railway owns or controls the McGillivray and International coal mines at Coleman, Alberta, it is not to be thought that an amalgamation of other mines could possibly be effected without the slightest knowledge as to whether or not the amalgamated companies would receive coal orders in an amount that would justify the expenditure incident to amalgamation.

It would have appeared had the conference then ended, that the attitude of the railways was intended to and would adequately block the amalgamation or amalgamations which they had themselves suggested as a means of providing steady employment for employees. Had the conference then ended there would have been support for the view that the Railway Companies welcomed the present chaotic state of the industry as making it easy for them to use their captive mines to force down the price of coal in all other mines which they might choose to keep open as safety valves to the irreducible minimum of operating cost without regard either to fair profit or adequate reserves for the operators and without the slightest regard to the needs of their employees.

In the light of later discussion it may be now said that this view was perhaps not justifiable, but it then appeared to be a strange attitude for the railway companies to say in one breath that they were willing to co-operate in the stabilization of an industry and in the next say that, although they were not asked to pay more for their coal and although they were not asked to take more coal than they actually required, none the less they would not contract upon any definite basis with any member or members of the operators' association. Furthermore, it seemed strange that, if they believed in an operators' amalgamation, they would not agree upon a concrete division of their tonnage whatever it might be and further agree to withhold orders from those operators who might refuse to consider amalgamation upon any reasonable basis.

However, the conference did not then end and this Board is pleased to be able to report that further discussion led to results which it is thought may do much towards the stabilization of the industry to the benefit of all parties connected with it.

Again it may be said that no useful purpose is to be served by reporting this further discussion in detail. It is enough to say that out of the discussion emerged concrete concessions and proposals on the part of each railway company which in the opinion of the Board provide the operators with an oppor-

tunity of mining coal with some certain knowledge as to the demand therefor, the price at which it can be sold and the approximate times when deliveries will be required, and, what is probably much more important as it affects more people, it provides the operators with an opportunity to give the assurance to their employees of steady employment at least to the extent of two hundred and thirty-four days in the year.

I shall first deal with the Canadian Pacific Railway Company. The attitude of the distinguished General Solicitor and his associates, at the conclusion of this conference, gave to this Board a very real hope that this railway company would now deal with the coal operators of District 18 without seeking undue financial advantage and with due regard to the needs of the industry and the men engaged therein, and even as I have ventured to criticize so may I venture to commend the granting of the concessions hereinafter mentioned, which are now offered to the operators in order that they may be in a position to adopt the basic and fundamental principle that there shall be certainty in the working days available to the men necessary to the operation of their mines who are able and willing to work.

The concessions to which I have alluded are as follows: First, in speaking of the McGillivray and International mines, the General Solicitor, as spokesman for his company, has said that it is not now anticipated that the contract with these companies which will expire on or about the 31st day of January next will be renewed unless it be on a competitive basis. This statement, although not binding in effect, none the less provides good ground for the belief that these mines, whether they be or be not captive mines, are not to be given preferential treatment as against the operator members of the association in the southern part of the Province.

Second, the General Solicitor acknowledges the importance of orderly marketing and assures the Board that the whole situation as to ordering will be reconsidered with a view to the avoidance of having an unnecessary number of men retained in and about mines to fill orders that may be irregularly or unexpectedly given. This assurance from this source is, in the opinion of the Board, of great value, particularly as an examination of the deliveries of coal to the Canadian National Railways working in a similar territory under similar crop and climatic conditions would lead to the belief that a great improvement in the ordering of coal by the Canadian Pacific Railway may be accomplished once attempted.

Third, the General Solicitor proposes that the operators of this Association in the south put forward a tentative scheme of amalgamation which provides for the elimination of unnecessary mines; which provides for fair dealing with the owners of mines that are to be closed, and which provides for certainty as to a minimum number of working days for those employees who are retained in the industry. The General Solicitor states that if such a tentative amalgamation scheme is put forward his company will be glad to examine and discuss it with the operators and, in the event of the scheme meeting with the approval of his company, that his company will then place before the operators for their consideration tentative contracts for the purchase of coal over a period of years so that the operators may know exactly where they stand should the amalgamation be proceeded with.

It is of course evident that a contract or contracts could be put forward by the Canadian Pacific Railway Company which would make any amalgamation futile, but as to this the Board has the General Solicitor's assurance, which it unreservedly accepts, that the contract or contracts put forward by his company will be framed on the basis of fairness to operators and men as well as to the railway, as distinguished from being framed upon the basis of the bargaining strength of the railway, which is admittedly all-powerful; that the contract or contracts will set such a price and be for a sufficiently long period of years as to justify the carrying out of any amalgamation scheme of which this Railway Company has approved; that the contract or contracts will contemplate the exclusion of new and re-opened mines, that the contract or contracts will be framed upon the basis of the Railway Company's consumption of coal without room for preferences in favour of any of the operators concerned as to so-called excess tonnage; that the contract or contracts will provide for the operators entering into a wage agreement with their employees for a like term so that the contract between the railway company and the operators may not be set at naught by industrial unrest; and that such contract or contracts will be entered into as soon as the approved amalgamation scheme is an accomplished fact.

It is obvious that any operator or operators may refuse to enter upon any amalgamation scheme or refuse to do so other than upon terms which would be impossible of acceptance by other operators. As to this it is enough to say that, as the Board understands the General Solicitor, granted that the Canadian Pacific Railway has approved of an amalgamation scheme it will not be deterred from entering into a contract or contracts with operators based thereon because of the

refusal of any operator or operators to become parties to that scheme if it is shown that such operator or operators have been invited so to do upon terms which in the opinion of the Railway Company are fair and just.

Recognizing that an attempt to carry out the plan above outlined will take time, the General Solicitor assures the Board that the Canadian Pacific Railway Company will not, for a period of five months, by any change in policy or in contract or otherwise put any obstacle in the way of such an amalgamation scheme being worked out.

In connection with the foregoing it is well that the operators should know that the General Solicitor has stated to this Board that his purpose in making the proposals and granting the concessions outlined is to help stabilize this industry primarily for the benefit of the employees who are retained in the service of the industry. It should therefore be apparent that any operators' scheme which does not provide for certainty in the number of working days available to employees will be quite without value.

While the General Solicitor's proposal does not embrace all that the Board has asked for with a view to speedily putting an end to the uncertainties hereinbefore referred to, yet in the opinion of the Board the proposal is eminently fair and one that may be recommended. It differs from other suggestions as to amalgamation in that it is not suggested that the operators actually amalgamate without full knowledge of the benefits that will flow to them from so doing. It is one thing to suggest that the operators act in the dark, it is quite another thing for them to be invited to weigh and consider a proposed contract with the railway company framed upon a basis which is deemed to be fair, before committing themselves to the expenditure of moneys or to the realignment of their corporations. This Board has no doubt that, if the operators put forward a fair amalgamation scheme, the Canadian Pacific Railway Company will put forward a fair contract.

In the opinion of this Board the responsibility for the stabilizing of this industry in the southern part of District 18 is now committed, in the first instance at least, to the operators concerned.

With regard to the Canadian National Railway Company the following observations may be made. First, the Vice-President of this company has assured the members of this Board that the whole position with respect to moving western coal east of Winnipeg will be re-examined with a view to taking western coal further east. The Vice-President has emphasized that it is not the desire of the Canadian National Railways to utilize its own mines in the United States to the disadvantage of Canadian operators and Canadian workmen. If this statement was made in good faith, and this Board has no doubt that it was, then it would appear that orders may be given by this Company for an additional one hundred and eighteen thousand tons of coal to the operators in this field.

Second, the Board is assured that an obvious discrimination as against one mine with regard to price having regard to the tonnage allowed to that mine will be adjusted upon application. The Board accepts that assurance without further comment.

Third, this Board is assured by the Vice-President that further effort will be made to bring about the orderly marketing of coal and that every endeavour will be made to give notice to operators of coal requirements so far in advance as to obviate the necessity of having an unnecessary number of men in and about the coal mines which serve this railway.

Fourth, the Vice-President states that his company has made examination into the financial affairs of the coal companies in the north and that with the knowledge so acquired as to the financial position of these companies he does not now ask for a lower coal price.

Fifth, the conference with the representatives of this railway with regard to a long term contract was not a satisfactory one. This company has definitely refused to enter into a contract for a longer term than one year and that only if it should seem to them to be advantageous so to do. Aside from the competitive feature the principal reason advanced for this refusal is that this company might thereby create a precedent which might be referred to by other persons with whom it deals in the purchasing of railway supplies if they should also desire long term contracts. This reason appeared to the Board to be wholly inadequate as a ground for refusal to do that which would help stabilize the industry without additional cost to the railway company. It is however to be borne in mind, as the Vice-President asserts with some reason, that the position in the north is very different from the position in the south, that the ordering of coal has been done with greater regularity and that, the number of mines being less, it is possible for the operators to give an assurance to their workmen as to the number of working days at these mines, which would be impossible under existing conditions in the south. The Vice-President insists that, in all the circumstances, a contract for a long term would be of disadvantage to the Railway Company and would be of little advantage to the operators or men.

After much discussion, which at first appeared to be fruitless, the Vice-President made a proposal which in this Board's opinion is entitled to great weight. This proposal, made with a view to showing that it is not the desire of this Railway to create unjust competition and with a view to showing that it is the desire of this company to play a part in the stabilization of this industry, is as follows: If so desired the Canadian National Railways will agree that the northern bituminous mine operators now serving this road may work out between themselves an allocation of all coal required by this railway, subject only to the railway being provided with good coal without the added expense of extra haulage. It is to be noted that no time limit is placed upon this privilege. A careful consideration of this proposal has led the Board to recommend its acceptance. As has been pointed out, conditions in the north are different from those in the south, furthermore, there may be reasons which have not been stated which preclude the operating officers of a government railway as a matter of policy from entering into agreements which a private corporation may. The Board hopes that it does not give too free a rein to the imagination of its members in thinking that this is a possibility. But, however this may be, it seems to the Board that, if the operators of the north approach the problem of stabilization in a proper spirit, they may, because of this concession on the part of the Canadian National Railways, either by amalgamations or by private treaty so regulate the distribution of coal orders as between themselves as to be able to assure to the employees in that part of the district two hundred and thirty-four working days in each year.

This Board is of the opinion that each railway company, and particularly the Canadian Pacific Railway Company, has gone far in an effort to show a bona fide intention to assist in the stabilization of this industry. This Board is of the further opinion that if so disposed the operators in District 18 may now work out ther own salvation and that of their employees who are necessary to the industry.

This Board would not have it thought that it has overlooked the fact that its recommendations, if acted upon, may have the effect of causing some men to lose work in this industry. This is regrettable, but in the opinion of this Board it is far better that some men be forced to seek other employment than that all men be asked to live their lives without adequate reward for their work.

In view of the recommendations which the Board has made the Board has had to consider what should be done with regard to the wage rate pending negotiations in connection with the proposals hereinbefore set forth.

After giving much thought to the matter the Board is of the opinion that the operators should be given the opportunity to determine as to whether or not the proposed plans for stabilizing the industry can be worked out without any change in the position of the parties in the meantime. To this end it is agreed that no change in the wage structure be made for a period of two months. This should provide the operators with ample time in which to come to a decision as to whether or not they propose to carry on with an endeavour to stabilize this industry along the lines suggested. If at the expiration of this period or at any time prior thereto it is declared by the representative of the operators that there is no possibility of advancing the plans outlined, then this Board will give a final report dealing with the wage rate. If on the other hand it is made to appear to this Board that plans for stabilization are being gone on with and that there seems to be every likelihood of stabilization becoming an established fact, then this Board will defer its final report for a further period of three months, but it reserves the right in that event to declare that an interim wage rate shall apply during that three months period. At the expiration of this last mentioned three months' period the Board will in any event make its final report and give its final recommendation with regard to a wage rate unless both parties to this dispute at that time request that the final report be further deferred.

In concluding this report this Board desires to record its deep appreciation of the attendance upon it of representatives of the Railways and of the Dominion Fuel Board.

All of which is respectfully submitted.

Dated at Calgary this 2nd day of September, 1938.

(Sgd.) A. A. McGILLIVRAY,
Chairman.

(Sgd.) R. LIVETT,
Board Member.

(Sgd.) R. M. YOUNG.
Board Member.

To: The Honourable Norman McL. Rogers,
Minister of Labour,
Ottawa.

Third Interim Report

In the Matter of a Dispute Between the Crow's Nest Pass Coal Company, Ltd., Mohawk Bituminous Mines, Ltd., West Canadian Collieries, Ltd., Hillcrest Collieries, Ltd., Canmore Mines, Ltd., Brazeau Collieries, Ltd., Cadomin Coal Co., Ltd., Luscar Collieries, Ltd., and Mountain Park Coal Co., Ltd., members of the Western Canada Bituminous Coal Operators' Association, (Employer) and their employees in Alberta and Southern British Columbia, being members of District 18, United Mine Workers of America (Employees).

This Board begs to report that on the 2nd inst., at the hour of 2 o'clock in the afternoon, members of the Operators' Association from all parts of District 18 attended before this Board, at which time the interim report of this Board of the 2nd instant was placed before the operators and discussed with them.

Following upon this a meeting of the Operators' Association was held at which, according to the report of the President of the Association to this Board, the following resolution was unanimously carried:—

"This Association considers that the proposals made by the Board in its further interim report of September 2, looking towards stabilization of the industry by consolidation of mines, the employment of employees necessarily required by the remaining mines and by the allocation of tonnage with the object of giving to such employees at least two hundred and thirty-four days' work annually, are worthy of serious consideration and it is resolved that the constituent members proceed immediately to investigate preliminary details of the proposed consolidation and/or allocation of tonnage with a view to reporting, within the period of two months specified by the Board, progress made with the scheme or, at the earliest possible date, their inability to arrive at a satisfactory solution."

This Board makes the further report that on this date it had a conference with Mr. Angus J. Morrison, representative of the employees, who has authorized the statement that on behalf of the employees he "approves of the recommendation looking towards stabilization of the industry and the guarantee of two hundred and thirty-four days' work per annum to the employees." This resolution and this statement, when coupled with the Board's reports, speak for themselves.

All of which is respectfully submitted.

Dated at Calgary, Alberta, this 3rd day of September, 1938.

Ottawa.

Final Report

In the matter of a dispute between The Crow's Nest Pass Coal Company, Ltd., Mohawk Bituminous Mines, Ltd., West Canadian Collieries Ltd., Hillcrest Collieries, Ltd., Canmore Mines, Ltd., Brazeau Collieries, Ltd., Cadomin Coal Co., Ltd., Luscar Collieries, Ltd., and Mountain Park Coal Co., Ltd., members of the Western Canada Bituminous Coal Operators Association (Employer), and their employees in Alberta and Southern British Columbia, being members of District 18, United Mine Workers of America.

This Board comes to the making of a final report some considerable time after the date on which the many problems involved in this dispute were committed to the Board's consideration.

No useful purpose is to be served by dwelling upon the need for the extended adjournments granted by the Board, but it is perhaps proper to point out that in addition to the many sittings of the Board for the hearing of evidence, the Board has had on different occasions the benefit of round table conferences with the Operators and with representatives of the Railways. It may also be pointed out that Ministers of the Government of Alberta and the heads of their departments, and the Chief Inspector of Mines, and Counsel to the Department of the Attorney General, were so gracious as to attend upon this Board.

On the 28th of November last this Board entered upon the consideration of its final report, and on the 2nd of December, having come to a decision as to what would be a just recommendation in all the circumstances, it was decided to invite the Operators and representatives of the employees to attend a meeting at Calgary, with members of the Board, to consider the advisability of a settlement of the dispute, and the entering into of a new contract upon a basis to be recommended by the Board.

This meeting was held. The Board is pleased to be able to report that, after lengthy discussion, full examination and careful consider-

ation, the parties to the dispute arrived at a settlement, and entered into a new agreement, a copy of which is hereunto attached.

Speaking for myself alone, I may say there is much that I might say and would like to say as to the present relations between the Operators and the men, and the present relations between the Operators and the Railway Companies, but in so much as it has been suggested that this might have some prejudicial effect upon the negotiating of the contracts between the Operators and the Railway Companies that are yet to be made, I reluctantly refrain from giving expression to the strong views that I hold.

In concluding this report I desire to record my appreciation of the open mind with which each of my colleagues, the one, the President of the Employees' Union, the other, the President of the Operators' Association, has approached the consideration of the matters necessary to be taken into account to arrive at a proper conclusion. No doubt there are people who expect that their representative on a Board of this kind will, notwithstanding an oath of office, be nothing more than an advocate for the side nominating him. If such there be amongst the Operators or the Employees, they will be disappointed to learn that their representative carried himself with traditional judicial impartiality, but those who believe in fair dealing, and in the sanctity of an oath, will be gratified to know that their representative sought for truth and aimed to do that which was just. This is refreshing, as it is admirable, and for my part, I desire to pay my tribute of respect to each of my colleagues.

Mr. Livett and I are indebted to Mr. Young who, at our request, was graciously pleased to act as Secretary to the Board. He has, in that capacity, rendered great service in keeping at his fingers' ends each of the one hundred and twenty Exhibits before the Board, and in making available compilations therefrom for the use of all members of the Board.

The Board further reports that all Exhibits are being returned to the parties by whom the Exhibits were filed.

All of which is respectfully submitted.

(Sgd.) A. A. McGillivray, Chairman.

In joining with the Chairman in this, the final report of the Board, the undersigned desire to record the fact that the settlement arrived at between the parties in dispute was substantially that which the Chairman had determined to be, in his view, a fair adjustment of the issues involved. That an agreement was reached on that basis is sufficient proof of the care and impartiality with which the Chairman had investigated the situation.

It is fitting that as members of the Board we record our appreciation of the unfailing courtesy and consideration shown by Chairman McGillivray in all the sittings and deliberations of the Board.

(Sgd.) R. Livett
(Sgd.) R. M. Young
Members of the Board.

Dated at Calgary, Alberta,
December 10, 1938.

To The Honourable
Norman McL. Rogers,
Minister of Labour,
Ottawa.

MEMORANDUM OF TERMS OF NEW AGREEMENT REACHED IN JOINT CONFERENCE

Calgary, Alta., December 9, 1938.

1. That the term of the agreement shall be to the 31st of March, 1940, and that the same shall be continued in full force and effect annually thereafter subject to two months' notice by either party to the other prior to March 31 of any year, and that the following proviso be added:

That in the event of a national emergency, the economic situation will be subject to review should either party to the contract so desire.

2. That the General Clauses agreed to in Joint Conference in March shall be the general clauses of the new agreement, with the following additions thereto:

(*a*) *Blasting*—Where in the future blasting is prohibited in the mine, and it can be shown that the earnings of the miner are decreased thereby, the contract rates shall be taken up as under the "New Work" clause and an equitable allowance made.

(*b*) *Re-employment of Men Who Left Their Employment to become Checkweighmen or Miners' Local Union Officials*—Where the practice exists at present of taking back into employment of company men who left its employment to become checkweighmen or local union officers, it is recommended that this practice be continued.

(*c*) *New Work*—The rate of $6.18 shall be inserted in the "New Work" clause and the following provisos added:—

Provided that where it is found impracticable to arrive at a contract rate for new work, owing to the system of mining or the use of mechanical equipment or experimental methods, the rate of $6.18 shall be paid.

Provided further that where an existing contract rate has been established and

mechanical equipment is in use and is not giving satisfaction, the parties may mutually agree to a day wage basis, the company rate to be $6.18.

(*d*) That in the "Minimum Rate" clause the rate to be inserted shall be $5.78.

(*e*) That in the "Miners taken to do company work" clause the rate to be inserted shall be $5.78.

3. That the present contract rates shall be continued unchanged, except as follows:—

Crow's Nest Pass Coal Company, Limited —*Cap Rock*

Where Cap Rock cannot be held up and has to be removed by the miner, it shall be paid for at the rate of four-fifths of a cent per inch in thickness per foot in width per lineal yard.

It is understood that all impurities between the Cap Rock and the floor are not subject to the above rate but when removed shall be paid for at the rate of 58 cents per cubic yard.

Contract Rates for Coke Oven Men—Michel—The increases granted hereunder on the Day Wage Scale shall apply on contract coke oven work at Michel.

Brazeau Collieries, Limited—*Forepoling*

The management contends that the question is not one at issue at the present time owing to the closing down of the mine in which the alleged work has been done, but agrees that if and when similar work arises in future, payment for same may be taken up between the management and the men on the principle stated by Chairman McGillivray, viz., "that while the work alleged to have been done does not constitute forepoling in the accepted definition thereof, some additional work is done by the men beyond that contemplated in the existing agreement, and it is recommended that the matter be referred back to the management and the men to make a reasonable allowance therefor."

4. *Day Wage Scales*—The day wage scales as now in effect at the various mines shall be increased by seven per cent (7%) on all rates over Five Dollars ($5.00) per day, and by ten per cent (10%) on all rates of Five Dollars ($5.00) and under.

It is understood that in the case of the Radial Machine Man's rate at the mines of the Crow's Nest Pass Coal Company, he shall under no circumstances receive more than his present rate of $5.85 plus seven per cent (7%) viz., $6.26 under New Work conditions.

5. *Overtime*—The present practice at the respective mines covering payment of overtime shall be continued.

6. *Dockage*—The present practice covering "Dockage" at the respective mines shall continue unchanged.

7. *Local Conditions*—The present local conditions in the respective mines, which shall include Tools, Washhouse, Rent, Light, House Coal, Sanitation, etc., shall be continued subject only to the following:—

Consideration shall be given by the management at Mountain Park and Luscar to the question of "Ground Rents" and by the management at Nordegg to the question of "House Coal."

In all "Local Conditions" agreements, the following shall be added to the "Washhouse" clause:

Insurance on Employees' Clothing—It is agreed that the respective companies will insure employees' clothing in washhouses against loss by fire only, to a maximum amount of Ten Dollars ($10.00) in each individual case.

8. It is agreed that all other conditions shall remain the same as in the existing contracts.

9. The agreement shall date from the date of the signing hereof, but the increases granted herein shall apply as from the Second day of November, 1938, inclusive.

10. The Agreement shall be between the Western Canada Bituminous Coal Operators' Association representing the Crow's Nest Pass Coal Company, Limited, West Canadian Collieries, Ltd., Mohawk Bituminous Mines, Ltd., Canmore Mines, Limited, Brazeau Collieries Limited, Cadomin Coal Co., Ltd., Luscar Collieries, Ltd., and Mountain Park Coals, Limited, and The United Mine Workers of America, District 18.

Signed on behalf of the Western Canada Bituminous Coal Operators' Association,

(Sgd.) R. M. YOUNG, President.

Signed on behalf of the United Mine Workers of America, District 18,

(Sgd.) PAT CONROY, Vice-President

Calgary, Alberta,
December 9, 1938.

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM OCTOBER 1, 1938, TO DECEMBER 31, 1938

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period October 1, 1938, to December 31, 1938. (An article covering the period July 1, 1938, to September 30, 1938, appeared in the LABOUR GAZETTE, October, 1938, page 1080).

COAL MINERS, EDMONTON DISTRICT, ALTA.—The October, 1938, issue of the LABOUR GAZETTE, at page 1081, carried a report of a dispute between coal mine operators in the Edmonton district, organized into the Edmonton Coal Operators' Conference, and their coal miners, members of District No. 18, United Mine Workers of America. At the close of September conferences, participated in by a departmental conciliator, looking to a new agreement were under way. No definite settlement was reached at that time, but subsequently an agreement was concluded, effective from November 15, 1938.

ORNAMENTAL IRON AND SHEET METAL WORKERS, LONDON, ONT.—Under date of September 23, 1938, the Department of Labour was advised that a committee of employees of the Dennisteel Corporation Limited, London, had been unsuccessful in its efforts to secure a general wage increase and certain other concessions and the services of a conciliation officer of the Department were requested. Early in the following month a departmental officer discussed this matter with officials of the Company and representatives of the men, and was successful in bringing the parties into agreement. The employees, members of Federal Local Union 21451, American Federation of Labour, dropped their demand for a 10-cent per hour wage increase but were granted concessions in regard to overtime work. The management further undertook to meet at any time a representative committee of the employees for the purpose of discussing adjustments for any individual workman in order that inequalities in the wages for comparative lines of work might be adjusted.

CARTAGE COMPANY EMPLOYEES, MONTREAL, P.Q.—During the month of September, 1938, the conciliation services of the Department of Labour were requested in connection with a dispute between Cunningham and Wells, Limited, cartage contractors, Montreal, and their employees, approximately 115 in number, members of Local No. 730, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers. A one-day strike of these employees had occurred on September 7, the men demanding union recognition and increased wages but work had been resumed the following day pending negotiations for an agreement. No basis of settlement was reached, however, and the management gave consideration to Board procedure under the Industrial Disputes Investigation Act. Efforts on the part of a conciliator of the Department resulted in negotiations being continued, and a second strike which had been reported imminent was averted. In the latter part of October an agreement between the firm and the union was reached.

TRUCK DRIVERS, TORONTO, ONT.—On October 25, 1938, representatives of the Automotive Section of the Canadian Brotherhood of Railway Employees advised the Department of Labour that they had been unsuccessful in their efforts to secure an agreement with the K. & L. Motor Express Company, Toronto, covering its truck drivers and that unless a satisfactory adjustment of the dispute could be effected through the Department a strike would be called. A few days previously strike action had been threatened following the dismissal of one of the em-

ployees but a conciliator of the Department had intervened and drastic action was averted. A further conference was held with the manager of the Company in regard to the desire of the employees for an agreement. The manager contended, however, that it was impossible for him to pay higher wages at that time and that if he were forced to sign the agreement which had been presented to him he would be unable to carry on business. The position of the Company was made known to the representatives of the employees, who stated that their attitude remained unchanged and that, failing an agreement, a strike would be called. On November 4 eight drivers employed by this Company went on strike but work was resumed the same day, a signed agreement being secured.

TRUCKERS, FREIGHT HANDLERS, CHECKERS, ETC., MONTREAL, P.Q.—On July 11, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with differences between the Canadian National Railways and its checkers, freight handlers, coopers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed at the Montreal Wharf. The request of the employees for an increase of 12 cents in all hourly rates was given as the cause of the dispute.

On the same date a similar application for a Board was received from the same classes of workers, members of the Brotherhood, employed by the Canadian Pacific Railway Company at the Montreal Wharf.

Following the receipt of these applications a conciliation officer of the Department interviewed the managements of the Railway Companies to ascertain if there was a possibility of a direct settlement being secured without the necessity of Board procedure. The information obtained, however, did not warrant further efforts in this direction and subsequently one Board was established to deal with the two disputes. The Board recommended that the rate for truckers, which group comprised 80 per cent of the men involved, be increased from 50 cents to 57 cents, with similar increases for the other classes affected. The employers rejected the recommendation. Through the conciliation service of the Department, however, a compromise agreement on the basis of a three-cent hourly increase, effective November 1, 1938, was reached. This agreement had the effect of standardizing the rates for this class of employees in the principal Atlantic ports. It was stated that approximately 650 employees were affected by this dispute.

FREIGHT HANDLERS AND LONGSHOREMEN, PORT MCNICOLL, ONT.—The failure to secure an agreement with the contractor engaged in handling freight at the docks of the Canadian Pacific Railway Company at Port McNicoll was the cause of a strike, on October 6, 1938, of approximately 200 freight handlers and longshoremen at that point, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. Intervention through the conciliation service of the Department of Labour resulted in the resumption of work on October 8 and subsequent conferences between the parties directly interested and officials of the Railway Company, which were arranged for through the Department, resulted in a signed agreement. A general wage increase of 3 cents per hour, with an additional 2 cents per hour for night work, was granted.

TRUCK DRIVERS, WAREHOUSEMEN, ETC., WINNIPEG, MAN.—When representatives of the Automotive Section of the Canadian Brotherhood of Railway Employees failed to obtain an agreement with the Security Storage Company, Limited, Winnipeg, covering its truck drivers, helpers, warehousemen, etc., an application was made early in November for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. Representatives of the Company stated that the management would be quite willing to enter into an agreement with its own employees but that objection was taken to an agreement with the Canadian Brotherhood of Railway Employees on the ground that this was primarily a railway labour organization and as such its interests were in conflict with those of the employing company. A conciliator of the Department of Labour dealt with this dispute and following lengthy negotiations a settlement was reached and an agreement between the Company and a committee of its own employees was signed. The application stated that 53 employees were involved in this dispute.

TRUCK DRIVERS, WAREHOUSEMEN, ETC., WINNIPEG, MAN.—On November 8, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the City Dray Company, Limited, Winnipeg, and its truck drivers, helpers, warehousemen, etc., members of Division No. 205, Automotive Transport Sec-

tion, Canadian Brotherhood of Railway Employees. It was stated that representatives of the employees had approached the management in regard to an agreement embodying wages and working conditions but that no headway had been made. The management objected to the affiliation of the employees on the ground that the Canadian Brotherhood of Railway Employees was essentially a railway labour organization and therefore its interests were in conflict with those of the Company. A conciliation officer of the Department of Labour visited Winnipeg, and as a result of his conferences with the parties directly involved an agreement was signed by officials of the company and a committee of its own employees on December 1. Forty employees were stated to be affected in this instance.

CLERKS, CANADIAN NATIONAL RAILWAYS, MONTREAL, P.Q.—Early in December, 1938, the President of the Canadian Brotherhood of Railway Employees advised the Department of Labour that negotiations regarding wages and working conditions which had been taking place between the Canadian National Railways and a committee representing clerks, members of this Brotherhood, employed in the office of the Auditor of Revenues, Montreal, had reached a deadlock, and the assistance of the Department was requested. On December 16 officials of the Department visited Montreal and conferred separately with the Management of the Railway Company and with a representative of the employees concerned. As a consequence before the end of the month an agreement between the respective parties had been completed. It was stated that 771 employees were affected by this dispute.

UNLICENSED PERSONNEL, CANADIAN PACIFIC RAILWAY COMPANY, BRITISH COLUMBIA COASTAL STEAMSHIP SERVICE.—In September, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Canadian Pacific Railway Company and certain employees being unlicensed personnel employed in the British Columbia Coastal Steamship Service. The employees were stated to be members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, and the dispute arose when this Brotherhood requested an agreement covering the men in question. A conciliator of the Department of Labour dealt with this matter and during the conferences which followed it developed that the Brotherhood mentioned had authority to speak for the stewards only. The departmental officer was finally successful in having negotiations proceed with a committee of the Company's own employees in regard to an agreement for this class of workers, and at the close of December the indications were that a settlement would be concluded very shortly. Approximately 200 employees were affected by this dispute.

TELEGRAPH MESSENGERS, TORONTO, ONT.—On November 12, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Canadian National Telegraphs and its messengers in the City of Toronto, members of Division No. 264, Canadian Brotherhood of Railway Employees. It was stated that representatives of the employees had conferred on several occasions with officials of the Company in regard to wages and working conditions and that subsequently the Company had posted a schedule of the rates applicable and also a notice covering conditions of employment, the terms of which were unsatisfactory to the messengers. One hundred and thirty employees were stated to be affected by this dispute. Through the conciliation service of the Department efforts were made to bring about a settlement of the existing differences without recourse to Board procedure, and at the close of the year the matter was still receiving attention.

The Industrial Accident Prevention Associations of Ontario recently published statistics showing that there was a total of 4,460 accidents reported to the Ontario Workmen's Compensation Board during December, 1938, compared with 5,728 accidents reported in December of the previous year. Of the total number of accidents, 20 proved fatal compared with 44 fatalities in December, 1937. The total cost of awards for compensation and medical aid amounted to $604,954.88 compared with $572,556.65 so expended in 1937. Medical aid only cost $99,641.92 during December.

Statistics for the year 1938 show that a total of 59,834 accidents were reported to the Workmen's Compensation Board compared with 70,582 accidents reported in 1937. There were 352 fatalities in 1938 compared with 376 in 1937. The total cost of awards for compensation and medical aid in 1938 amounted to $6,464,261.19 compared with $6,129,960.55 expended in 1937. Medical aid during 1938 cost $1,153,894.99 compared with $1,251,848.47 expended in 1937.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1938

THE following table shows the number of disputes, workers involved and time loss for December, 1938, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Dec. 1938.....	8	274	2,357
*Nov. 1938.....	7	392	3,150
Dec. 1937.....	17	3,851	33,498

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Although the number of disputes was one more in December than in the previous month, the number of workers involved and the time loss in man working days were lower. All figures were lower than in any previous month since the beginning of 1936. The number of workers involved and the time loss were lower than in any December since 1926. As in November, none of the disputes involved a large number of workers for any considerable period. The most important disputes in both November and December were those involving leather goods workers in Montreal and lime plant workers at Blubber Bay, B.C., the former commencing in October and the latter in June. In December, 1937, when the time loss was many times that of December, 1938, the most important strike involved coal miners at Minto, N.B., causing nearly half of the time loss. Strikes of cotton dress factory workers at Montreal, P.Q., textile factory workers at Coaticook, P.Q., and shoe factory workers at Port Colborne, Ont., also caused considerable time loss in December, 1937.

Four disputes involving 174 workers and causing a time loss of 2,175 man working days were carried over from November. Four disputes commenced during the month. Of these eight disputes in the record for December six were terminated during the month, one resulting in favour of the employer involved, one in favour of the workers, while a compromise settlement was reached in one case and three were recorded as indefinite. At the end of December, therefore, there were two strikes and lockouts on record, namely: leather goods workers, Montreal, P.Q.; and lime plant employees, Blubber Bay, B.C.

The record does not include minor disputes such as are defined in a previous paragraph nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers. London, Ont., August 31, 1938, one employer; winery employees, Toronto, Ont., October 3, 1938, one employer; and bakers and helpers, Vancouver, B.C., November 11, 1938, one employer, the last two being added to the list in December.

Three disputes—involving motion picture projectionists, Toronto, Ont., commencing July 11, 1932; meat packing employees, Vancouver, B.C., commencing December 29, 1936; and cotton factory workers, St. Gregoire de Montmorency, P.Q., commencing July 11, 1938,—carried in the above list for some time appear to have lapsed and have consequently been removed from the list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute in Vancouver, reported too late for inclusion in the December issue of the LABOUR GAZETTE, involved 45 gillnet herring fishermen, members of the Pacific Coast Fishermen's Union, who ceased fishing on November 4, demanding recognition of the union by the fish buyers and an agreement covering the sale and prices for gillnet caught fish. The wholesale fish markets were picketed. As a result of negotiations an agreement with the union was signed fixing prices for herrings to be kippered, or to be frozen, with rules as to sales for the fresh fish market, particularly as to the sale of seine-caught fish. Work was resumed on November 23.

69800—3½

A strike reported too late for inclusion in the December issue of the LABOUR GAZETTE involved 258 coal miners, members of the United Mine Workers of America at Canmore, Alberta, who ceased work on November 14, as a result of a dispute as to the order in which 27 men laid off should be taken on, the company insisting on a seniority basis in accordance with the agreement. The miners resumed work on November 28 on the advice of the district officers of the union, the seniority basis being accepted.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1938*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to December, 1938				
MANUFACTURING—				
Vegetable Foods, etc.—				
Bakers and helpers, Vancouver, B.C.	1	13	75	Commenced Nov. 11, 1938, for union agreement with restoration of union wages, etc.; employment conditions no longer affected early in December; replacement; in favour of employer.
Tobacco and Liquors—				
Winery employees, Toronto, Ont.	1	9	100	Commenced Oct. 3, 1938; against hiring additional employees while present staff working only part time; employment conditions no longer affected early in December; indefinite.
Fur, Leather, etc.—				
Leather goods workers (handbags, etc.) Montreal, P.Q.	1	48	1,000	Commenced Oct. 8, 1938; for closed shop union agreement, with increased wages, reduced hours, etc.; unterminated.
Non-Metallic Minerals—				
Lime plant workers, Blubber Bay, B.C.	1	104	1,000	Commenced June 2, 1938; *re* application of conciliation board (provincial) award as to reinstatement of certain employees; unterminated.
(b) Strikes and Lockouts commencing during December, 1938				
MINING, ETC.—				
Coal miners, New Waterford, N.S.	1	70	70	Commenced December 7; for payment for time and work lost through mechanical breakdown; terminated Dec. 8; return of workers pending negotiations; indefinite.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	1	15	60	Commenced December 6; against change in wages, piece rates, with new equipment, alleged to lower earnings; terminated Dec. 10; negotiations; compromise.
CONSTRUCTION, ETC.—				
Buildings—				
Carpenters, Barriefield, Ont.	1	10	40	Commenced Dec. 7; for employment of local carpenters to lay floors; terminated Dec. 10; negotiations; in favour of workers.
SERVICE—				
Business and Personal—				
Hotel employees, Toronto, Ont.	1	5	12	Commenced Dec. 1; for renewal of agreement; terminated Dec. 3; return of workers pending negotiations; indefinite.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

Disputes in Progress Prior to December

LIME PLANT WORKERS, BLUBBER BAY, B.C.—This dispute in progress since June was unterminated at the end of December. A police officer found guilty of assaulting a man arrested, as a result of a disturbance on a dock at Blubber Bay in September, was sentenced to six months imprisonment and four men found guilty of unlawful assembly and rioting during the same disturbance were sentenced to six months imprisonment. Nine others were found guilty of unlawful assembly only, five being sentenced to four months and four to three months imprisonment.

Disputes Commencing During December

COAL MINERS, NEW WATERFORD, N.S.—Employees in one section of a mine ceased work on December 7 for one shift demanding payment for contract miners for time lost and for extra work due to a mechanical breakdown. This colliery was not due to be operated on the next day and it was reported that the striking employees would return to work, when the mine reopened, pending a settlement. Work was resumed on December 13.

RUBBER FACTORY WORKERS, KITCHENER, ONT.—A number of employees in one department of a rubber factory ceased work on December 6 against a proposed change in piece work rates of wages following the installation of a new machine. The employees, members of the United Rubber Workers of America, contended that a reduction in earnings of about 3 cents per hour would result from the proposed scale posted in the department but this was denied by the company. The employees were reported to have remained in the plant and were joined in the "sit-down" by the workers on the two shifts following, making a total of fifteen. The strikers then vacated the premises. About fifty other workers were indirectly affected. Work was resumed on December 12 following negotiations, the proposed changes in rates not to be applied pending a settlement at the end of the year.

CARPENTERS, BARRIEFIELD, ONT.—A number of carpenters, members of the United Brotherhood of Carpenters and Joiners of America, employed by a construction company ceased work on December 7 in protest against the employment of floor layers from another locality by a sub-contractor. After negotiations the sub-contractor agreed to employ local carpenters to lay the floors and work was resumed on December 12.

HOTEL EMPLOYEES, TORONTO, ONT.—A number of employees in one hotel, members of the Hotel and Restaurant Employees' International Alliance and Bartenders International League, ceased work on December 1 demanding renewal of an agreement which had expired on August 30, 1938. It was reported that negotiations had been carried on between the union and the management for a considerable period prior to the strike and the employees returned to work on December 5 on the understanding that further negotiations would take place. Later in the month a union member was reported to have been dismissed.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1937. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in the monthly articles are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is obtained for the most part from newspaper reports which at times are uncertain or incomplete.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details, which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes beginning during November was 81 and 13 were still in progress from the previous month, making a total of 94 during the month, involving approximately 30,800 workers with a resultant time loss of 90,000 man working days.

Of the 81 strikes which began during November, 13 arose out of demands for wage increases, 3 out of proposed wage decreases, and 18 were over other wage questions; 30 were over questions respecting the employment of particular classes or persons, 10 were over other questions respecting working arrangements and 7 were over questions of trade union principle.

Final settlements reached during November numbered 80. Of these 16 were settled in favour of the workers, 43 were settled in favour of the employers and 21 resulted in compromises. In the case of three other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during November was that which occurred at Oxford on November 1 when 1,798 workers employed by a firm manufacturing automobile bodies went on strike against the dismissal of an employee for alleged disobedience; 1,504 workers were indirectly involved. The strikers resumed work on the same day without securing their demand.

On November 28, 1,800 dockers, carters, etc., employed by coal importers at Belfast, went on strike against the employment of a non-union foreman. On November 30, work was resumed pending negotiations and an amicable settlement was subsequently reached.

On November 24, 1,688 fitters, turners, machine operators, etc., employed by an engineering firm at Sheffield ceased work in protest against the transference of certain rough machining work operations from skilled men to apprentices. Work was resumed on November 29, the apprentices remaining on the work in question.

In Glamorganshire, 1,349 colliery workers were out on strike twice during the month. On November 3 they ceased work due to a dispute respecting payment of the minimum wage. By November 8, 600 of the workers had returned and on November 12 work was resumed, the dispute being referred to two arbitrators. On November 18, a dispute regarding payment of a bonus caused a further cessation of work which the mine owners met by closing the colliery for an indefinite period.

A two-day strike of 1,416 workers at a colliery near Port Talbot against working with non-unionist workers led to the workers in question becoming members of the union.

In an aero engine plant at Coventry 65 toolroom employees struck on November 16 for a minimum wage of 2s. 2d. per hour. They were joined by about 1,100 more employees on November 19 but two days later they all returned to work under the same conditions which had existed prior to the strike.

Belgium

The monthly labour review of Belgium reports eight strikes as beginning during August, which with three unterminated at the end of the previous month made a total of 11 strikes in progress. The number of workers directly involved was 2,940 and the resultant time loss was 28,300 man working days. During the month seven strikes were settled; one was settled in favour of the workers, four in favour of the employers and two were settled by compromise. Six of the eleven strikes in progress arose out of wage questions.

France

The strike of seamen employed by the French Line which was an aftermath of the general strike of November 30 (LABOUR GAZETTE, December, 1938, page 1342) was reported settled on December 11 when the employees involved voted to go back to work. The sailors approved a suggestion that their representatives seek an arrangement with their employers to avoid penalties either in wages or seniority rights.

United States

Preliminary estimates of strikes in October, 1938, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 240 strikes as beginning during the month, which with 125 unterminated at the end of September, made a total of 365 in progress during the month. The number of workers involved in these disputes was 100,000 with a resultant time loss of 1,000,000 man working days. The comparable figures for the previous month which have been partially revised but are not final show that there were 311 strikes in progress, involving 120,000 workers with a resultant time loss of 975,000 man working days.

At Buffalo a strike of about 600 warehouse and produce workers on December 20 threatened to tie up food distribution in the western part of New York state. The strikers were protesting the breakdown of negotiations which had been going on for two months in which the union sought increases in pay to compensate for a reduction of hours stated to be occasioned by the Federal Wage and Hour Act. Two days after the strike commenced a conference between representatives of the workers and employers reached a settlement and work was resumed.

At New York members of the Motor Bus and Terminal Checkers, Platform and Office Workers, Local 21,510 of the American Federation of Labour, employed by food warehouses, struck early in December, demanding increases in wages. On December 9 about 1,000 truckers ceased work in sympathy and as a result food distribution was seriously affected. Mediation of city officials resulted in a compromise settlement being reached on December 12.

NEW YEAR'S MESSAGE OF MINISTER OF LABOUR

Reduction in Public Aid Recipients—Adoption of Employees' Retirement Pension Plans under Government Annuities Act—Importance of Industrial Relations

IN a New Year's message issued on December 31 by the Hon. Norman McL. Rogers, Minister of Labour, the social-economic situation was appraised as follows:—

"During the year now drawing to a close, the revival throughout Canada of industrial and commercial activity which had marked the preceding year was retarded by the uncertainties of the international situation.

"The year 1938 opened with accumulating evidence of substantial improvement in economic conditions, and the forward movement was indeed general in all parts of the country in the earlier months of the year; but with successive threats of conflict in Europe, the confidence of the business community in Canada as elsewhere was shaken to a degree from which it has not yet fully recovered."

Reduction in Public Aid.—"Happily, the acute distress in parts of Saskatchewan and Alberta, due to recurrent crop failures, has been materially improved through the crop of 1938, and notwithstanding the unsettled state of international affairs, the number of those receiving public assistance in Canada at the beginning of the present winter was almost forty per cent less than was the case two years ago. Not only is the number of families on relief much lower than was the case in 1936 but over this period the number of persons in employment has largely increased, as indicated by returns made to the Dominion Government by employing firms in all parts of the country. There is cause for satisfaction also in the fact that the serious trade recession in the United States, during the latter part of 1937 and the early months of 1938, did not react more unfavourably on the situation in Canada and that throughout these months employment in this country was maintained at an encouraging level."

Youth Training Program.—"As Minister of Labour, I feel that any message which I have to give at this time should contain an assurance of the continuing interest of the Dominion Government in the case of those in need, and should deal as well with the efforts which are being made to promote the restoration of normal employment. During the past year, not only has the federal government assisted the provincial and municipal authorities by financial grants toward direct relief and in the execution of public works, but has itself executed many federal projects through which employment was afforded to large numbers of workpeople in various parts of the country.

"During 1938 the work of training Canada's unemployed young men and women for employment was continued. An increased appropriation by Parliament made it possible for the Dominion Government to enlarge its allocations to the various provinces. Thus the way was opened for an increase in number and a wider variation of training projects administered by the provinces. The Dominion-Provincial Youth Training Program is giving help and hope to thousands of young Canadians, and its beneficial effects should be felt increasingly in the years ahead.

"At the last session of Parliament, legislation was enacted to expand the basis of federal assistance toward home building and rehabilitation, and at the same time to make available to municipalities loans for the construction of self-liquidating works. Not only have these measures stimulated the volume of employment in building operations and in the manufacture of building supplies, but their effect extends to many other branches of employment. The assistance in respect of building construction has contributed also towards the betterment of housing conditions and has furnished a notable incentive to home owning."

Reduction in Industrial Disputes.—"The time lost in industry through labour disputes during 1938 is much less than that which was reported in 1937. Not only so, but a gratifying feature of industrial relations in this country is the increased attention which is being given to the relations between employers and workpeople by the provincial authorities and by organizations of employers and workers. In this connection mention may be made also of the representative conferences on industrial relations problems which were convened during the past year under educational auspices in co-operation with representative bodies of employers and workers. Radio broadcasts are contributing, as well, toward the intelligent discussion of these matters. A notable absence in our country of widespread labour disturbances, such as have occurred elsewhere, speaks well for the good sense and good-will of Canadians of all groups.

"There is reasonable ground for expectation that through these and other activities, definite progress is being made toward the elimination of industrial conflict by a realization of

the fact that the interests of both employers and workers lie in the same, and not in opposite directions. In this connection it is gratifying to note the interest shown by an increasing number of employers in the establishment of retirement pension plans for their employees. While this interest was evident prior to 1938, more and more employers are availing themselves of opportunities provided in the Government Annuities Act to establish superannuation and pension plans for their employees. Several thousand employees of firms which have adopted plans can now look forward to a planned retirement on a Government annuity which their contributions, plus equal, or even larger, contributions by their employers, have purchased.

Importance of Industrial Relations.—"Here we have the spirit of co-operation in one of its most practical and beneficial forms. More and more we are learning that employees who are freed from constant worry about their declining years, are better able to do good work in their period of greatest strength and activity. A general adoption of retirement plans in industry would go far toward eliminating industrial unrest. Growth and extension of such plans is an encouraging feature of the year through which we have just passed.

"Peaceful relations between labour and industry must indeed march hand in hand with the efforts which are being made for the maintenance of world peace. All possible support is being given by the Government of Canada to measures for the pacific settlement of international problems and the restoration of normal trading activities between nations. The arrangements consummated recently between Great Britain, the United States and Canada in the direction of the removal of trade restrictions cannot but lead to the attainment of more normal trading relationships between these countries. Naturally, the beneficial effects of these measures will only be achieved gradually. It is to be hoped that the example thus set will be followed by other countries.

"And now we turn our eyes to 1939. None of us can tell what it will bring forth. But it is a new year, and Canada is a new country. We are fortunate to be living in a land of freedom and democracy—a country which seeks to live at peace and develop the most happy and harmonious relations with other countries. If we can hold to this course, if we can continue to develop a true spirit of co-operation, and if we can maintain that Canadian spirit of optimism and determination under all conditions, I feel that we can indeed look forward to a happy new year."

Working Conditions in Cleaning and Dyeing Industry in New York State

The results of a survey in New York State of working conditions of women and minors in the cleaning and dyeing industry have been given to the recently appointed wage board for that industry. This is the fourth wage board to be convened under the State Minimum Wage Law; the three previous boards were for laundry, beauty service, and confectionery occupations, and minimum wage rates were established for women and minors in these occupations.

The survey indicated that on an annual basis, data for 1,333 women were secured and this information showed that only 10 per cent earned in excess of $1,000 a year. The average woman worker earned $722.46 for the year, which was $336 less than the cost of living for a woman living with her family, and $470 less than the cost of living for a woman worker living alone, as determined by a recent study of cost of living made by the Division of Women in Industry and Minimum Wage.

Median hourly earnings were 32·8 cents for women and 29·9 cents for male minors in the cleaning and dyeing plants and stores in the State. Earnings of individual workers, however, showed wide variations. Eight and one-half per cent of the women earned less than 25 cents an hour, while 23 per cent earned 40 cents an hour or more. Foreladies, managers, and supervisors as a group had the highest median hourly earnings of 52 cents, whereas store clerks with a median of 29·6 cents received lowest hourly earnings. There was little variation in hourly earnings by size of community, however.

The 48-hour week was found to be the usual work week for store clerks, the largest single occupation for women workers in the industry. Hand pressers, who represent the second largest occupational group, worked an average of only 42 hours for the sample week. Nearly 62 per cent of the women in the industry are employed in these two occupations.

For the first time in making an industry study for a Minimum Wage Board, the Division of Women in Industry and Minimum Wage gathered data for office workers as well as plant and store employees. Two hundred and twenty-nine office workers in the cleaning and dyeing industry had median week's earnings of $16.93 and had a median work week of approximately 47 hours.

One of the problems in the industry, the report shows, is the short work week. Approximately 21 per cent of the women average only four days' work a week during the year.

Many women in the industry are subject to the dangers of exposure to high temperature and humidity, and fatigue induced by constant standing and foot pedal operation.

DOMINION LEGISLATIVE PROPOSALS OF CANADIAN LABOUR ORGANIZATIONS

Presentations of Trades and Labour Congress of Canada—Railway Transportation Brotherhoods—Federation of Catholic Workers of Canada—All-Canadian Congress of Labour—Canadian Federaton of Labour

ON December 15, 1938, the Trades and Labour Congress of Canada, the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, and the Federation of Catholic Workers of Canada, Inc., presented their annual memoranda relative to proposed labour legislation to the Dominion Government.

On January 6 the All-Canadian Congress of Labour submitted its memorandum to the Dominion Government, and on January 10 the Canadian Federation of Labour met the Cabinet for a similar purpose. Review of the proceedings on these various occasions and summaries of the memoranda presented appear herewith.

The submissions of the Trades and Labour Congress and the Railway Transportation Brotherhoods were received by the Prime Minister, Rt. Hon. W. L. Mackenzie King, and the following members of the Cabinet: Rt. Hon. Ernest Lapointe, Minister of Justice; Hon. Norman McL. Rogers, Minister of Labour; Hon. P. J. A. Cardin, Minister of Public Works; Hon. W. D. Euler, Minister of Trade and Commerce; Hon. Fernand Rinfret, Secretary of State; Hon. Ian A. Mackenzie, Minister of National Defence; Hon. J. L. Ilsley, Minister of National Revenue; Hon. J. E. Michaud, Minister of Fisheries; and Hon. J. G. Gardiner, Minister of Agriculture.

From the Department of Labour there were also present Mr. W. M. Dickson, Deputy Minister of Labour, and Mr. Gerald H. Brown, Assistant Deputy Minister of Labour.

In the absence of President P. M. Draper, the submission of the Trades and Labour Congress of Canada was presented by Secretary-Treasurer R. J. Tallon (International Association of Machinists). Associated with Mr. Tallon were Vice-Presidents P. R. Bengough (International Association of Machinists) and Raoul Trepanier (Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America), together with representatives of a large number of international and national unions affiliated with the Congress.

The memorandum of the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods was submitted by Mr. W. L. Best, Vice-President and National Legislative Representative, Brotherhood of Locomotive Firemen and Enginemen. Associated with Mr. Best were Mr. H. B. Chase, Assistant Grand Chief and Dominion Legislative Representative, Brotherhood of Locomotive Engineers, Mr. Thomas Todd, Vice-President and Dominion Legislative Representative, Order of Railway Conductors, Mr. A. J. Kelly, Dominion Legislative Representative, Brotherhood of Railroad Trainmen, Mr. W. H. Phillips, Vice-President, Order of Railroad Telegraphers, and Mr. W. V. Turnbull, Vice-President, Brotherhood of Maintenance-of-Way Employees.

In welcoming the delegations on behalf of the Government, the Prime Minister expressed regret at the unavoidable absence, through illness, of President Draper. He also referred to the great loss which the labour movement had suffered during the past year in the death of Mr. James Simpson, a former vice-president of the Congress. Commenting upon the two recent mining disasters, the Prime Minister emphasized the dangers to which many workers expose themselves in the course of their regular duties. Stating that in these critical times an attitude of understanding and co-operation is essential to the maintenance of a democratic society, he expressed pleasure at having the opportunity once again of meeting the representatives of organized labour and discussing with them problems of mutual concern.

Trades and Labour Congress of Canada

In reply Mr. Tallon thanked the Prime Minister for his references to President Draper and the late Mr. Simpson. He also pointed out that the mine disaster in Nova Scotia necessitated the absence of Vice-President D. W. Morrison, an official of the United Mine Workers of America. Before reading the Trades and Labour Congress memorandum, Mr. Tallon stated that it represented a condensation of more than 200 resolutions which had been passed by the recent convention at Niagara Falls, Ontario. He said that his delegation was representative of some 200,000 organized Canadian

workers and asked careful consideration by the Dominion Government of the views set forth in the memorandum.

The Employment Situation

Referring to "unemployment and under employment" as still being "Canada's most pressing problem" the Trades and Labour Congress' memorandum stated that: "While the last available figures issued by the Registration Branch of the Labour Department show a steady decline during the year in the number of unemployed persons receiving aid toward which the Dominion Government contributes, at the same time the indexes of physical production issued by the Bureau of Statistics for the first eight months of the year are lower than for the corresponding period of 1937, and particularly so in manufacturing and construction work upon which the industrial worker depends so much for employment. This would indicate that the progressive reduction in the numbers of those in receipt of unemployment relief is attributable in some measure to the increasing severity of the Dominion, Provincial and Municipal restrictions on the granting of aid and that the volume of employment has not materially increased."

Unemployment Relief.—Dealing with the problem of unemployment relief, the memorandum referred to a resolution adopted at the Congress' 1938 convention which registered opposition "to oppressive regulations which deny assistance to those in dire need," as well as "opposition to the governments taking any steps which lower the standard of relief."

Reference was also made under this heading to the 1935 declaration of the Trades and Labour Congress "that unemployment was a national problem and, therefore, that the Federal Government should accept, as a national responsibility, the payment of direct relief to the needy unemployed." The opinion was expressed in the submission that events since that time had emphasized the soundness of this view and it was urged that action be taken to give effect to this request.

Transient Labour.—The Congress requested that a survey be made as to the best means of providing transportation funds through recognized employment offices when employment involving travel is secured.

Unemployment Insurance.—The appreciation of the Congress was expressed for "the efforts made by the Government during the year to secure the consent of the Provinces to changes in the British North America Act, which would remove beyond a doubt any constitutional difficulties that may exist in reference to the power of the Federal authority to enact and administer unemployment insurance legislation, coupled with a national employment service." The memorandum registered the Congress' conviction that the enactment of this legislation should not wait until the consent of all provinces has been obtained and that it was not necessary to defer action until the Royal Commission on Dominion-Provincial Relations had made its final report.

Group Insurance.—Stating that "group insurance schemes result in employment policies which hinder older workers in securing jobs," it was requested that the matter be investigated "to ascertain if such barrier cannot be removed."

Provision of Work.—Reference was made to the various types of "planned work" which could be carried out by the Government such as "the elimination of level railway crossings, extension and improvement of the highways—especially in so far as they will encourage the tourist industry, erection and repair of public buildings of various categories, reforestation and conservation projects, clearing of slum areas and provision of decent homes, both in cities and rural areas, and other projects of a like character."

Training of Youth and Retraining of Older Workers.—The Congress commended the Government "for having made an increased appropriation to carry forward, in co-operation with the provinces, youth training projects which afford opportunity to young persons to equip themselves to participate efficiently in the country's industrial activities." Expressing satisfaction with the inclusion in the current year's appropriations of a sum to be spent in a similar manner for the retraining of older workers, the Congress suggested that money voted for these purposes should be made available for a period of not less than three years. If this was not done it was felt that it would be impossible to incorporate plans for apprenticeship training which must be extended over a period of years.

Co-ordination of Activities.—Concluding this section of the memorandum the Congress reiterated its recommendation "that the Government should continue to provide a suitable agency to carry forward the strides started by the National Employment Commission, with a view to applying broader remedies to unemployment than have so far been applied."

British North America Act

Under the heading "British North America Act," the memorandum referred to the Congress' brief submitted to the Royal Commission on Dominion-Provincial Relations, it being stated that the Congress "would

welcome an opportunity of further discussing with the Government the views expressed therein."

Reference was made to the cognizance taken at the Congress' 1938 convention "of the disruptive forces operating in Canada and a resolution adopted pledging our movement to oppose any activity which seeks to weaken the unity of the Canadian people."

Criminal Code Amendments

Strikes and Injunctions.—Stating that the practice still continued through the use of injunctions of denying the right to picket peacefully, the Congress reaffirmed its request of previous years that the Criminal Code be amended, or special legislation be passed if necessary, which would more clearly establish the right to picket peacefully during industrial disputes.

Right to Organize.—Referring to the Congress' action in securing legislative protection from the provinces for the freedom to organize it was requested that this provincial legislation be supplemented by an amendment to the Criminal Code which "would make it an offence to deny unjustifiably this right to workers."

As an additional assistance to ensure the right of workers to organize and bargain collectively it was urged that "a clause be inserted in all government contracts stipulating that the employers shall negotiate with the chosen representatives of the employees and sign collective bargaining agreements covering wages, hours and other conditions of employment in their respective industries."

The appreciation of the Congress was expressed for the legislation passed at the last session of Parliament which gave legal protection to trade union shop cards.

Seamen's Conditions

Based on resolutions dealt with at the Congress' recent convention, the following legislative requests were made concerning the working conditions of seamen:—

(1) Ratification of five I.L.O. conventions adopted at the 1936 Session of that body and dealing respectively with: Officers' Competency Certificates; Holidays with Pay for Seamen; Shipowners' Liability in Case of Injury, Sickness or Death of Seamen; Hours of Work and Manning, and revision of the 1920 convention on Minimum Age of Admission to Employment at Sea.

These have already been ratified by the United States of America, and under the British North America Act are within the competence of the Federal authority to deal with.

(2) That certificates of competency for watchmen and wheelsmen be issued only to such seamen as have served aboard vessels for at least twelve months and passed satisfactory tests by government examiners for eyesight, ability to steer a vessel and launch a lifeboat, and other essential qualifications of a competent seaman; and, further, that all ships of Canadian registry over three hundred tons shall carry, exclusive of licensed officers, at least four men holding such certificates.

(3) More strict supervision and enforcement of laws respecting first aid equipment, etc.

(4) Enforcement of laws governing lifeboat and fire drills and regular inspection of all life-saving equipment.

(5) Amendment of the Canada Shipping Act to provide for compulsory wireless equipment on all ships plying the Great Lakes.

(6) For the appointment of a competent inspector of gears, tackle, and working ways at the port of Halifax and at other ports where the same need exists.

(7) Employment of the maximum number of Canadians on the C.N.R. (West Indies) Steamship Service, in accordance with the recommendations made by the Standing Parliamentary Committee on Industrial and International Relations.

(8) The application of the Dominion Fair Wages Act to operations on sea and, particularly, to steamship companies receiving subsidies or subventions from the Government.

Civil Service Matters

Concerning employment in the Civil Service, action was requested upon the following proposals:—

(1) Public works office cleaners to be paid on an annual basis as permanent employees, conditions of employment to include holidays with pay, sick leave and retiring allowances.

(2) That in view of the arduous and responsible duties of letter carriers, they be reclassified at a higher rate of compensation for services rendered. Exclusion of the letter carrier service from the provisions of the Order in Council demanding a fixed number of employees to be classed as temporary and that all those filling full-time positions be classed as permanent employees. That in view of letter carriers now being called upon to work overtime at Christmas, statutory holidays and on Saturday afternoons, that such overtime be paid for in cash at the rate of time and one-half, or that an equivalent period of time and one-half be allowed off, instead of straight time as at present.

(3) That deck and engineer officers of Government ships be brought within the scope of the Superannuation Act.

Hours of Labour

The memorandum expressed the Congress' belief that "modern machine production makes possible, and indeed necessary, much shorter hours than are now worked if employment is to be equalized," and advocated a work-day of six hours and a work-week of five days without reduction in wage levels. It was contended that on government contracts and in employment over which the Dominion Government has jurisdiction, a lead should be given toward bringing the shorter work-day into effect.

Urging that every assistance be given by the Government towards securing the adoption of the shorter work-week in the textile industry, attention was directed to the approval given by Canada to the I.L.O. convention fixing forty hours as a maximum work-week in this industry and the recommendations respecting hours of labour submitted by the Royal Commission which investigated the textile industry.

The Government was also petitioned to support measures to provide holidays with pay for all workers.

Social Insurance

Old Age Pensions.—The Congress requested the substitution of a retirement scheme in place of the present system of old age pensions. It was proposed that such retirement scheme should apply "to all those who withdraw from industry or commerce at the age of 60 and that no deduction be made from the allowance fixed where the recipient's income is less than $1,000 per annum." It was also advocated that amounts paid under the present Old Age Pensions Act should be "substantially increased" in order that pensioners could be "fully self-sustaining." Concluding this section it was stated: "The increasing inability of workers past middle life to secure employment makes this matter of pensions for older people one demanding immediate attention."

Health Insurance.—In respect to health insurance the memorandum reiterated the Congress' request for a national health policy which would include a system of health insurance.

Housing

Pointing out that while regulations issued under Part II of the Dominion Housing Legislation provide for the observance of the Dominion Fair Wages Act, there are no such provisions for those participating in Part I of the housing legislation, the memorandum stated that "though there may be valid reasons why the individual builder of a small home should be exempt from the provisions of the Fair Wages Act, the same cannot, and should not, apply to large investors in apartment and multiple dwellings under Part I of the Act, who in many cases are exploiting labour in the construction of these blocks of dwellings."

The Congress' memorandum also requested that assistance be rendered "to the vast number of workers who are struggling to meet payments on homes built by them prior to the depression and who are still paying a high rate of interest on loans in that connection."

Public Ownership and Control

The Congress proposed the nationalization of the production of all war materials including military aeroplanes; the national control of the nickel industry; and reaffirmed its support of the policy of building up radio broadcasting as a nationally owned utility. Gratification was also expressed at the legislation passed during the last session of Parliament nationalizing the ownership of the Bank of Canada and it was suggested that "the Board of Governors be made more widely representative of the citizens of Canada." The Congress also reiterated its support of the maintenance of the Canadian National Railways as a publicly-owned utility and "urged that no action be taken which would in any manner weaken the position of this nationally-owned system."

Immigration

Expressing the opinion that any influx of immigrants into Canada would only add to the relief costs and complications of unemployment, the Congress urged the Government to continue existing immigration restrictions "until the present unemployment and agricultural depression has been effectively dealt with."

Taxation and Tariffs

Dealing with taxation and tariffs, the Congress repeated its opinion that the sales tax retards economic recovery by directly reducing purchasing power through the rise in prices which follow its imposition, and requested that the tax be replaced by taxation of a form which would not have the same adverse effect. Other requests were for the protection of Canadian registered vessels against the competition of ships of foreign registry presently using canals without charge; protection against "highgrading" and illegal purchases of gold; assistance for the printing industry by obtaining permission for the printing of copies of the Bible in Canada; amendment of the Copyright Act prohibiting printing from type not set, or printing plates not made in Canada; and restoration of protective tariff on importation of periodicals, magazines and literature from other countries. A material reduction in the tax on malt used in the brewing industry was requested "to encourage the consumption of light beers as a substitute for spirituous liquor."

The World Situation

Quoting a resolution passed at its recent convention, the Congress emphasized "that Canada should prepare to play its full part in any collective action taken through the League of Nations against aggression and international lawlessness and for the maintenance of world peace."

Reference was also made to another resolution adopted at its convention in which the Congress "expressed sympathy with the

peoples of Spain and China in their struggle for the defence of their countries, and urged that the Canadian Government place an embargo on the shipment of war materials to aggressor nations, while at the same time facilitating in every way possible trade relations with those friendly nations which are fellow-members of the League of Nations."

Railway Transportation Brotherhoods

Following the presentation of the Trades and Labour Congress, the delegation and memorandum of the Railway Transportation Brotherhoods was received by the Prime Minister and the Cabinet.

Mr. W. L. Best, vice-president and National Legislative Representative, Brotherhood of Locomotive Firemen and Enginemen who read the submission of the Dominion Joint Legislative Committee, associated himself with Mr. Tallon in thanking the Prime Minister for his words of welcome and said that his delegation appreciated the privilege of appearing with representatives of the Trades and Labour Congress of Canada before the Dominion Government.

British North America Act

The memorandum directed attention to the resolution of the Federal-Provincial Conference of 1935, that Canada should have the power to amend its own constitution, providing a method of procedure therefor satisfactory to the Dominion Parliament and the Provincial Legislatures can be devised. Reaffirming its accord with this resolution the Brotherhoods' memorandum stated "we are eagerly anticipating the report and recommendations of the Royal Commission on Dominion-Provincial Relations in the hope some direction may be given that will open the way to much-needed amendments to the British North America Act. In the meantime, we respectfully urge an early change that will restrict the powers of the Senate to veto not more than twice any bill passed by the House of Commons; this proposal being in harmony with the practice of the Parliament of Great Britain."

Transportation

Dealing with the subject of transportation the Brotherhoods recommended amendments to the British North America Act empowering "the Federal Parliament to control and regulate all commercial transport agencies as works for the general advantage of Canada, and to empower the Federal Parliament to enact social and industrial legislation of general interest and welfare to the people of Canada." It was further suggested that the Federal Parliament having obtained the necessary legislative competence "immediate measures be taken to so regulate common carriers of passengers or freight for hire, by air, water or highway, first to ensure a larger amount of revenue from these agencies and, second, to equalize the conditions under which these competitive agencies and railway transportation are carried on."

In this connection the Brotherhoods recommended that the identity of the two major railways be maintained and that the proposal for unified management be discarded "as contrary to human and national welfare," that "the present policy assigning to the Board of Railway Commissioners full authority to determine and finally decide what steam railway services shall be maintained as a public necessity and convenience, be continued, but no such powers should be given any government authority which would arbitrarily force upon one railway a co-operative or unification measure or line abandonment proposed by another railway."

It was also proposed that a committee or commission be appointed to continue a study of the whole transportation problem "until a practical and humane solution is reached, and also that provision be made thereon for a representative from railway labour."

Referring to certain recommendations submitted on behalf of labour to a Special Committee of the Senate during the last session of Parliament, it was suggested in the memorandum that immediate steps be taken "to ensure that any employee who loses his employment as a result of co-operative measures or any form of unification of railway services and facilities, shall be compensated for the loss occasioned by such displacement," and that "in consideration of any further co-operative measures at least sixty days' notice be given to the representatives of the employees directly concerned and also the right and opportunity of such representatives to meet in joint conference with the railways considering such co-operative measures."

Proposed Railway Act Amendments

Compensation for Loss of Property.—The Brotherhoods proposed that the Railway Act be amended to provide compensation to employees of the railway for the loss of property occasioned by the partial closing or partial abandonment of a divisional point or a station, or of a line abandonment, in the same manner as now provided for where a divisional point or station is completely closed or abandoned.

Automatic Application of Slow Order.—It was requested that certain sections of the Act dealing with the application of slow orders over railway crossings be repealed. The memorandum pointed out that in the light of present operating conditions on the railways such sections were quite obsolete and ineffective and of no safety value.

Other requested amendments to the Railway Act dealt with "riding back of tender"; that $500,000 per year be provided for the elimination of grade crossings instead of the present $200,000; and the defining of "working expenditure" to include "compensation for loss of employment."

St. Lawrence Deep Waterways

The Brotherhood again recorded its opposition to the deepening of the St. Lawrence Waterways for "transportation purposes." It was submitted that the expenditure involved could not be justified "on the grounds of national necessity or prospective transport requirements." The opinion was also expressed that the project would further accentuate the present transportation problem.

Income War Tax Act

It was requested that the Income War Tax Act be amended to provide that "the portion of the income paid on retirement pensions and to Provincial and Municipal Governments for taxation be exempted from further taxation under the Income War Tax Act."

Old Age Pensions

The Brotherhood again requested that the Old Age Pensions Act be amended to provide that 90 per cent of the pensions cost be paid by the Dominion Government, and that the qualifying age be reduced to 65 years.

Representation on Public Boards and Commissions

Reaffirming its declared policy in favour of labour representation on public boards and commissions, the Brotherhood expressed appreciation for the extent to which this policy had been given effect, including the re-appointment of Mr. B. L. Daly to the Board of Directors of the Canadian National Railways.

The Brotherhood also expressed its appreciation for the recognition given its Legislative Committee in the appointment of their nominee, Mr. H. B. Chase, as Technical Adviser to the Government delegate at the 1938 session of the International Labour Conference, and expressed the hope that the policy would be continued.

It was urged that at least two Technical Advisers be appointed annually with the Labour delegate to the International Labour Conference, as experience had shown that the number and variety of the social and industrial subjects placed on the agenda of the Conference would receive more mature consideration if more advisers were appointed to assist the delegate representing Canadian workers.

Unemployment Relief Measures

Disappointment and regret was expressed that the desired co-operation of Provincial authorities had not been forthcoming in sanctioning necessary amendments to the British North America Act to make possible the inauguration of unemployment insurance. It was stated that the Brotherhoods would follow with interest "any further progress made looking to a national contributory unemployment insurance measure" and would "appreciate an opportunity to consult with the Minister of Labour at his convenience regarding the details of the proposed plan, with particular reference to the terms and conditions respecting contributions which may be required from workmen."

Health Insurance

The Brotherhood solicited the co-operation and assistance of the Federal Government "to the fullest extent possible within its legislative competence towards formulating and adopting a national health policy."

Pensions for Harbours Board Employees

Reference was made in the memorandum to the Brotherhoods' previous submission in which it was urged that early consideration be given by the Government to the adoption of a contributory pension plan for employees of the National Harbours Board. It was stated that "the employees are anxiously awaiting the early announcement of a retirement pension plan being made effective."

Cost of Living Statistics

The Brotherhoods commended the Minister of Labour "for the study given by his department looking to a revision of the methods for compiling and computing cost of living statistics and for the survey being conducted by the Bureau of Statistics," and stated that they would appreciate an opportunity to review any contemplated changes with the officials of the department.

Reply of Prime Minister to Presentations of Trades and Labour Congress and Railway Brotherhoods

When Mr. Best had completed the reading of his memorandum, the Prime Minister asked for an explanation of the underlining of the words "transportation purposes" in the sentence "We desire to again record our opposition to the deepening of the Saint Lawrence Waterways for transportation purposes for the several reasons set out in our former submission." Mr. Best replied that he understood certain sections of organized labour favour such a scheme for power purposes. His delegation was opposed to it for transportation purposes, but he declined to express an opinion as to the merit of such a development for power purposes.

Commenting generally on the two memoranda, the Prime Minister complimented the delegations for the manner in which their presentations had been made and assured them that careful consideration would be given to their requests. With reference to the resolution adopted at the Niagara Falls convention of the Trades and Labour Congress of Canada, which had asked for the immediate convocation of Parliament in order that Canada's foreign policy might be made clear, the Prime Minister asked if such an action would have been the part of wisdom. He said that any government must weigh the possible effects of both what it does and what it does not do, and must take into consideration all the information at its disposal. The Prime Minister affirmed that his administration is still committed to the policy of convening Parliament before involving Canada in any war, but he contended that to have called Parliament during the recent European crisis would have been prejudicial to Canada's best interests.

In conclusion, Mr. Tallon replied that in the aforementioned resolution the Trades and Labour Congress of Canada had merely placed its opinion on record and had not endeavoured to make political capital of the situation. He again expressed appreciation that almost the entire Cabinet was in attendance and the hope that the Congress would receive the continued co-operation of the heads of all government departments.

Federation of Catholic Workers of Canada, Inc.

The annual memorandum to the federal Cabinet setting forth the legislative proposals of the Federation of Catholic Workers of Canada, Inc., was presented on December 15, 1938, by a delegation headed by President A. C. Charpentier and General Secretary Gerard Picard.

Representing the Dominion Government were the Prime Minister, Rt. Hon. W. L. Mackenzie King, and the following members of the Cabinet: Hon. Norman McL. Rogers, Minister of Labour; Hon. T. A. Crerar, Minister of Mines and Resources; Rt. Hon. Ernest Lapointe, Minister of Justice; Hon. P. J. A. Cardin, Minister of Public Works; Hon. W. D. Euler, Minister of Trade and Commerce; Hon. Fernand Rinfret, Secretary of State; Hon. Ian A. Mackenzie, Minister of National Defence; Hon. J. L. Ilsley, Minister of National Revenue; Hon. J. E. Michaud, Minister of Fisheries; Hon. C. D. Howe, Minister of Transport; and Hon. J. G. Gardiner, Minister of Agriculture. Mr. W. M. Dickson, Deputy Minister of Labour, and Mr. Gerald H. Brown, Assistant Deputy Minister of Labour, also were in attendance.

Welcoming the delegation, the Prime Minister stated that the Government was pleased to meet with representatives of organized labour in order to discuss problems of mutual concern. Emphazing the need for understanding and co-operation at this time, he said that the working people of Canada have shown an example to the world in their active interest in the problems of government.

Mr. Charpentier replied that his delegation greatly appreciated the opportunity of making representations to the Dominion Government and assured the Prime Minister of the continued co-operation of the Federation. He then called upon Mr. Maurice Doran to read the Federation's memorandum.

In commencing, the memorandum referred to the efforts made by the Dominion Government to improve conditions and drew attention particularly to the work of the National Employment Commission, the enactment of the Home Improvement Loan Act, the carrying out of public works in all parts of the Dominion and "the subsidies given to several important industries all of which, it was stated, have helped to stimulate business.

The Textile Industry

Under this heading the memorandum referred to the Royal Commission which enquired into the textile industry "and which acquainted the public with the deplorable situation of many of the workers in this industry, of its 'watered' capitalization and of

its exhorbitant dividends." Regret was expressed that "the Commission's findings were not followed up to the extent to which they could have been."

The Federation stated that one textile company was using the Canada-United States trade treaty as an excuse for reducing the remuneration of their employees or cutting down the number of workers employed. It was, therefore, requested that the Federal Government intervene, and if it was ascertained that the company had unjustly dismissed any of its employees it was suggested that the relevant clause of the Tariff Act be invoked for the protection of employees and consumers alike.

Communism

The Federation reiterated its request of last year that legislation be enacted by the Federal Parliament "to prevent the Communist party from enjoying a legal existence in Canada." In making this request the Federation urged the Federal Government "to prevent the spread of revolutionary propaganda by a party based on subversive doctrines. . . . "

Unemployment Insurance

The Federation again expressed itself as being in favour of unemployment insurance organized on a national, contributory basis and suggested that any scheme of unemployment insurance should include sickness and invalidity.

Foreign Wars

The memorandum recorded the Federation's opposition to Canadian participation in any foreign war.

Immigration

The Federation stated that it was opposed to the opening of Canada for immigration purposes, until such time as the unemployment problem has been satisfactorily solved It was also requested that the Federal authorities be more stringent in the "issuing of temporary permits to American workers, alleged experts, who are frequently the cause of disorder here."

Delegation to Geneva

Respecting the Canadian delegation to the annual International Labour Conference, the Federation suggested that a technical adviser be added to the labour group and that "this post be given to the delegate representing our organization."

Gratification was expressed for the Government's acceptance of a representative of the Federation as a member of the Canadian delegation to the I.L.O. Conference. In this connection, it was pointed out that "in many countries today, the Christian syndicates sometimes obtain a technical adviser to accompany the labour group and sometimes obtain the labour delegate himself."

Cost of Living

Reference was made to the cost of living survey being carried out in various centres throughout the Dominion and the Federation expressed the hope that the Government would continue this work and that official statistics would be published subsequently in the LABOUR GAZETTE including all items mentioned in the course of the enquiry in order that it would be possible to ascertain "with a greater degree of accuracy" the cost of living of an average family in Canada.

Sunday Work

In order "to avoid any ambiguity" in the enforcement of the Sunday Observance Act, it was suggested the Dominion Government list all industries in which it would be prejudicial to cease operations on Sunday, this list to be inserted in the Act.

Pulp and Paper Industry

The Government was requested to make a study of the problem of the periodic crisis of over and under production in the pulp and paper industry, with a view to regularizing employment in the industry.

Old Age Pensions

Expressing its support of contributory old age insurance, the Federation suggested that until such became possible pensions should commence at 65 years instead of the present qualifying age of 70 years.

Weekly Day of Rest

The Government was requested to enact legislation which would provide that any worker employed in an industry operating continuously would be entitled to one day of rest following six consecutive days of work.

Railroad Companies

It was requested by the Federation that the Government prohibit railway companies undertaking construction or repair work, from paying wages below those stipulated in collective labour agreements in localities where such agreements were in effect.

Permanent Inquiry Commission

The Federation proposed the establishment of a "Permanent Inquiry Commission" to be

given the powers of a Royal Commission, to compile all the data necessary on the living and working conditions of people employed in trade and commerce. It was suggested that the reports of such a Commission should be made public, and that such a body would eliminate "a certain number of abuses of which salaried workers are the victims and keep both the public and the Government informed of what is going on."

The Federation also made representations to the Government regarding the establishment of charges for contributory pension funds on a basis of rates laid down by Government actuaries, and favouring the prohibition of importing foreign-made footwear into Canada.

Replies of Prime Minister, Minister of Justice and Minister of Labour to Submission made by the Federation of Catholic Workers of Canada, Inc.

The Prime Minister thanked the delegation for the manner in which the memorandum had been presented and gave assurance that each recommendation would receive careful consideration. He then referred to the recent disaster at Thetford Mines and drew attention to the obligation and responsibility of the nation as a whole toward workers who make sacrifices and endure hazards in their daily work in order to promote the material progress of mankind.

Minister of Justice

At the Prime Minister's request, the Rt. Hon. Ernest Lapointe, Minister of Justice, spoke briefly in French. He associated himself with the Prime Minister's expression of sympathy in connection with the recent mining disaster at Thetford Mines and congratulated the delegation on their helpful and able presentation, assuring them their requests would receive serious consideration from the Government.

Mr. Charpentier thanked the Minister of Labour for having attended the recent convention of the Federation. He drew attention to the interprovincial nature of the textile industry and stated his opinion that the intervention of the federal Minister of Labour was essential. He also thanked the Minister of Justice for having previously given assurance that any constitutional amendment would not be at the sacrifice of their interests.

Minister of Labour

The Minister of Labour expressed his pleasure at having been able to attend the recent convention and also added a word of sympathy in connection with the Thetford Mines disaster. With regard to the suggestion that a tripartite conference be held looking to implementation of the recommendations contained in the report of the Royal Commission on the textile industry, he stated that efforts have been made in this direction but that as yet the governments primarily concerned with wages and working conditions have not given their consent. In conclusion the Minister declared that he fully agreed that there should be the closest co-operation of all concerned with a view to improving the condition of the worker.

The All-Canadian Congress of Labour

On January 6, a representative delegation of the All-Canadian Congress of Labour—headed by A. E. Mosher, president; C. A. Beattie, vice-president; N. S. Dowd, secretary-treasurer, and M. M. MacLean—presented its program of federal legislation to the Dominion Government.

The members of the Cabinet who received the delegation consisted of Hon. Norman McL. Rogers, Minister of Labour; Hon. P. J. Cardin, Minister of Public Works; Hon. Ian Mackenzie, Minister of National Defence; Hon. J. L. Ilsley, Minister of National Revenue; Hon. J. E. Michaud, Minister of Fisheries; and Hon. J. G. Gardiner, Minister of Agriculture.

From the Department of Labour, there were present in addition to the Minister, the Deputy Minister, W. M. Dickson, and the Assistant Deputy Minister, Gerald H. Brown.

In welcoming the delegation, Hon. Mr. Rogers stated it was impossible for the Prime Minister to be present, and that he had been asked to convey the regrets of the Prime Minister on his inability to attend and his best wishes to the organization. "You need no assurance from me," added the Minister, "to know his keen interest in labour problems. He has asked me to preside in his absence and to welcome you on behalf of the Government." The Minister assured the delegation that the memorandum would be brought to the attention of the Prime Minister and members of the Cabinet.

Mr. N. S. Dowd then read the memorandum of the All-Canadian Congress of Labour.

Emphasizing the Congress' view that the Federal Government should "accept responsibility for the establishment of peace, justice and economic security throughout the Domin-

ion, to the extent that policies affecting such matters come within its jurisdiction," the memorandum stated that if the British North America Act stands in the way, "then immediate steps should be taken, in the opinion of the Congress, to have it amended to meet present-day conditions."

Two Outstanding Problems

With reference to what the Congress considered the two most important problems before the nation,—those of national unity and the abolition of poverty, the memorandum declared that:

It is deeply to be regretted that the intervening year has seen little or no progress toward their solution, and that in some respects they have become intensified. Even though the report of the Royal Commission on Dominion-Provincial Relations could not yet be expected, in view of the broad scope of its investigation, the growing evidence of misunderstanding and even ill-will between the Federal and certain provincial governments has been a source of profound concern to the workers we represent, and it is felt that every endeavour should be made to establish the relationships between the various governments on a basis of friendship and co-operation.

The Congress believes that the citizens of Canada desire to live together peacefully, with the utmost freedom and tolerance for racial and religious differences, and that there is an underlying spirit of unity which serves as a firm bond between them. But there is a grave danger that, in view of the exacerbation of economic distress resulting from failure to undertake the task of ending poverty in the midst of plenty, the tendencies toward isolationist policies and consequent refusal to recognize the principles of democratic federalism will become dominant, and irreparable national disaster will ensue. . . ."

The Federal Government must bear a large share of responsibility for the continuance of unemployment, and for the loss of morale which is bound to occur when hundreds of thousands of workers are forced to eke out a bare existence on relief. In every city, homeless young men roam the streets, begging for food; and those workers who still have jobs are in constant fear that they will find themselves thrown on the scrap-heap. Good intentions are not enough; goodwill is not enough; surely the time has come for a national economic policy which will abolish starvation and unnecessary suffering in this richly-endowed country. After nine years of economic depression, only slightly relieved and for short periods, the Congress feels that the Government should be in a position to adopt definite and clear-cut policies of employment and economic reconstruction.

National Economic Survey

Referring to previous occasions upon which the Congress suggested the establishment of a Royal Commission to make an economic survey of the resources of Canada in raw materials, man-power, agricultural and factory equipment, and capital with a view to ascertaining the total productive capacity of the nation, the memorandum stated: "Nothing of the sort has been done, although it is generally believed that our production could be quadrupled if necessary. Such a Commission would be charged with the further task of studying the economic causes of poverty in Canada, and recommending measures whereby the people as a whole might benefit from their immense natural advantages. We feel that the present situation is an indictment of the collective intelligence of Canadians, and that they will not long remain complacent in the face of it. . . ." "Until some comprehensive scheme of economic planning is adopted, which will enable every citizen of Canada to enjoy the high standard of living which is warranted by the rich and varied resources of the nation, the political structure of Confederation will be increasingly endangered, and those democratic institutions which are a notable part of our heritage from the past cannot survive."

Right of Association

The Congress advocated the amending of the Criminal Code "in such a manner as to protect the right of association by employers and employees." Reference was made to the enactment of such legislation by various provincial governments; the Congress desired, however, that "there be uniformity both in the law itself and its administration." Expressing appreciation of the efforts of the Minister of Labour to prevent discrimination against workers who attempt to become organized the memorandum stated: "Even if at the outset the scope of the amendment were limited to those industries covered by the Industrial Disputes Investigation Act, this would be a great forward step, and the Government is urged to take action to remedy an obvious injustice."

Continuing the memorandum declared:

In this connection, it is felt that the Government should grant to its own employees the right to bargain collectively through the organization of their choice, and to negotiate agreements for the protection of wages and working conditions. Although the employees of the Canadian National Railways system in practically all its departments enjoy this right, it has been denied to certain groups in the Department of Transport and other departments of the Government. It may also be added that, while the railway industry comes within the scope of the Industrial Disputes Investigation Act, this does not apply to the employees of canals and other public utilities operated by the Government.

Unemployment Insurance

The memorandum expressed regret that the Government had not proceeded with the enactment of legislation providing a national

scheme of unemployment insurance, "as was forecast in the Speech from the Throne at the opening of Parliament last year, even though it was impossible to obtain the approval of the necessary amendment of the British North America Act from all the provinces. A majority of them were in favour of it, and it is felt that the Government would have been fully justified in going ahead with its plans." The opinion was expressed that:

> While it is little more than a means of alleviating the burden of temporary unemployment, it represents a measure of social justice which is long overdue. In view of the need for uniformity in this as in every other field of social legislation, the Federal Government should take action at the forthcoming session of Parliament rather than wait until public opinion has forced provincial governments to do so in their limited spheres.

Reiterating its view that in any scheme of unemployment insurance, workers who are receiving wages below a definite minimum should be exempted from the payment of premiums to the insurance fund in order to establish eligiblity for benefits, the Congress expressed the belief that:

> The wages paid in many industries are far too low to permit the maintenance of an adequate standard of living, and any deduction from such wages would involve a greater hardship than would be compensated by the provision of unemployment insurance. The Congress firmly believes that the cost of insurance should be a direct charge upon industry, but if it is impossible to adopt this policy in initiating the scheme, the workers in the lowest wage-categories should not be required to contribute toward it out of their grossly inadequate incomes."

Unemployment Relief

The Congress considered that the National Employment Commission had served a useful purpose in studying some of the aspects of the problem of unemployment "especially the provision of training and rehabilitation for certain groups of unemployed persons, and the classification of relief recipients." In this connection the Congress noted:

> That the Government has adopted some recommendations of the Commission, but it is urged that further action be taken in this respect, and particularly that the Government appoint an administrative committee to coordinate the various activities involved. However helpful the measures adopted may have been, and there is no desire to overlook them, the fact remains that the unemployment situation is still extremely serious, and overshadows every other problem in Canada.

Reference was also made to two resolutions passed at the Congress' convention, one favouring the federal administration of relief, "as a means of overcoming the wasteful division of responsibility in this matter," and another suggesting that "the whole burden of relief should be assumed by the Federal Government." The Congress also urged the Government "to provide a national employment service and facilitate the movement of workers from areas where employment opportunities have decreased to those where work may be available." The Congress expressed the view that the co-ordination of employment information should be carried out under federal auspices.

It was further advocated, in this connection, that the Government take action to open up avenues of employment by undertaking public works programs, slum-clearance, reforestation, highway construction, land settlement, etc.

The Congress again expressed its conviction that "the progressive reduction of the hours of labour is an essential factor in the solution of the unemployment problem. This should not, however, involve any decrease in wages, which are already on a level far below that warranted by the productive capacity of industry."

Regulation of Transport

The Congress commended the Government for the establishment of a Board of Transport Commissioners with jurisdiction over water, air and railway transportation. The hope was expressed that the authority of the Board would be extended to include all highway transport of an interprovincial or international character and "that ultimately it will be possible to regulate all competitive forms of transport in such a way as to prevent unfair competition." The Congress advocated, as a general principle, "that each form of transport be utilized within the field of its greatest usefulness," and expressed the belief that "only by a delimitation of their spheres of activity by legislation and regulation will the public interest best be served and the workers protected."

Referring to the St. Lawrence Waterways project the Congress reiterated its stand that such a large undertaking should be made the subject of nation-wide study and discussion "and receive unmistakable public approval, before anything further is done."

The Congress also registered its opposition to the proposal that firms be permitted to transport merchandise in bond throughout Canada from one United States point to another as such operations would be detrimental to the interests of Canadian railways and railway employees. The Government was urged to take a firm stand against such a scheme.

Railway Amalgamation

The Congress gave its "whole-hearted support to the attitude adopted by the Govern-

69800—4½

ment and especially by the Minister of Transport" in opposing "the various schemes of railway amalgamation, unification, joint management, etc., which are persistently advocated by propagandists for private interests."

Concluding this section of the submission it was stated that "In the event, however, that co-ordination of transport may ultimately be considered advisable in the public interest, the Congress believes that this should be effected on a comprehensive basis, and only as a part of a national system of public ownership of the means of production and distribution of the nation as a whole."

Old Age Pensions

The Government was requested to give careful consideration to the following proposed amendments to the Old Age Pensions Act: "1. That old age pensions become effective at the age of 60; 2. That the provisions requiring pensioners to assign their property to the Government be rescinded; 3. That the present residence qualifications be abolished; 4. That no deduction be made from pensioners whose income, including the pension, is less than $1,000 per year, and 5. That the present rates be increased."

Holidays with Pay

The Congress urged the enactment of Federal legislation obligating all employers to grant at least two weeks' holidays with pay, and drew attention to the fact that the Government's representatives at the 1936 International Labour Conference voted in favour of a convention along similar lines. The Congress felt that this could be made a subject of discussion with the provincial governments, in a similar manner to that adopted with respect to unemployment insurance.

The Congress contended that:

There can be no question as to the jurisdiction of the Government, however, so far as it applies to workers employed directly or indirectly in the government service, and to those employees of the Canadian National Railways who are not now granted holidays with pay. As has been pointed out on previous occasions, workers in the skilled trades are given holidays with pay, while the unskilled workers are forced to accept lay-offs without pay at the same time. This is so manifestly unfair that the Government is urged to investigate the situation and remedy this injustice.

National Housing Program

The Congress expressed "great satisfaction" for the attention which had been given by the Government to the problem of housing and suggested that the limitation of cost prevents any widespread utilization of the amendment made to the National Housing Act which reduces the down payment of 10 per cent on homes valued at $2,500 or less. Gratification was also registered for the tax exemptions under certain conditions, granted during the repayment period and the Minister of Finance was commended for his efforts to encourage building. In this connection particular reference was made to the exemption of building materials from the sales tax. The Congress' memorandum concluded this section by stating that "The progress made in this respect indicates, however, that much more generous provisions must be adopted if the great masses of the people with low incomes are to be enabled to occupy their own homes.

Canada's Tariff Policy

Expressing the hope that the trade treaties negotiated with the United States and Great Britain would be mutually advantageous, the Congress stated it believed "that trade consideration should not be permitted to influence the Government where the fundamental issue of the maintenance of democracy may be involved."

The Congress reiterated its recommendation that any tariff changes should be made "only after careful investigation of their consequences and on the basis of consultation with both employers and organized workers in the industries concerned."

Canada's Peace Policy

The Congress expressed its belief that at the next session of Parliament, Canada's foreign policy "should be enunciated as fully as circumstances permit," and that there "should be in particular no doubt in the minds of the people of Canada and of every other country that Canada is prepared to assume whatever obligations rest upon her as a member of the British Commonwealth of Nations to preserve and strengthen democratic principles."

It was also urged that the Canadian Government give it fullest support to the League of Nations "and that its efforts be directed toward maintaining the League as the only international body which can provide a basis for enduring peace."

The Congress also commended the League of Nations Society in Canada to the Government as an institution deserving continued and increased financial support.

Immigration

With regard to immigration and the refugee problem, the Congress believed that it would be unwise to admit people from other countries into Canada "if they are subsequently to be maintained at public expense or deported

because they cannot find employment." The Congress also contended that the possibility of immigration to Canada is a problem requiring serious study with a view to ascertaining the *optimum* population for the Dominion, and suggested that the national economic survey which had been advocated would provide a basis for a scientific approach to the question.

Referring to the refugee problem the Congress expressed the belief that Canada was "under a moral obligation to co-operate fully with all international bodies which are trying to relieve the situation, and also to provide a place of refuge within her own borders for an appreciable number of these refugees." It was further contended that "Even if it were necessary to maintain these immigrants, the cost to the nation would be infinitesimal in comparison with what war would have cost," and the Congress therefore urged that "the Government present to the forthcoming session of Parliament such amendments to the Immigration Act as will permit the admission of refugees, under adequate safeguards as to number, occupation, or other conditions and that it will assist in every possible way in the attempts which are being made to lessen the suffering of these unfortunate victims of inhuman and relentless persecution."

Government Employees

The Congress requested the cancellation of the Order-in-Council providing that not more than 80 per cent of any unit in the Civil Service shall be made permanent. It was contended that this has "the effect of keeping a large percentage of the service on minimum salary rates for an indeterminate period, and gives little incentive to efficient service."

The Congress also expressed the opinion that "the rates of wages paid to a large number of government employees are too low to permit the maintenance of proper living standards," and urged the Government to establish a minimum wage of $100 per month to all full time adult occupations in the Civil Service.

Reply of Minister of Labour to All-Canadian Congress of Labour

In replying to the Congress, Hon. Mr. Rogers observed that "if the Prime Minister had been here he would have thanked you for the form in which the memorandum had been prepared as well as for the manner of its presentation."

Indicating that the specific recommendations would be referred to the appropriate Departments, the Minister referred to the broader implications of the memorandum, thus: "You believe that the two chief objectives are national unity and the abolition of poverty, and I agree that these must be the constant objectives of Government."

In regard to unemployment, the Minister noted that the memorandum contained a mixture of commendation and criticism. "That is as it should be," he stated, "in regard to Governments representative of the people."

Referring directly to a statement in the memorandum concerning the continuance of unemployment and the loss of morale "when hundreds of thousands of workers are forced to eke out a bare existence on relief," the Minister directed attention to the actual situation as indicated by the latest returns received by the National Registration branch of the Department.

"According to these figures," he declared, "there are not 'hundreds of thousands eking out an existence.' On the contrary the number of employables unemployed is 125,000 and there has been a progressive improvement in the situation since the registration began two years ago."

The Minister added that the decrease in relief totals approximated as much as 40 per cent as between 1936 and 1938. He further emphasized that a primary factor in the relief problem has been the uncontrollable drought condition in Western Canada.

Substantial improvement, he pointed out, had now resulted in the drought areas with 40 per cent less receiving relief in Saskatchewan than one year ago. With improved crop conditions in Western Canada he considered there would also be improved industrial conditions in Eastern Canada.

During 1939, he believed "there is reason for confidence that there will be marked improvement in employment," and as a factor in this contemplated improvement he referred to the new trade agreement which would develop employment opportunities.

As regards action on the major problem of unemployment, the Minister stated that this was proceeding in two directions, viz.—the expansion of private employment through the stimulation of basic industries, and the expansion of necessary public projects.

In conclusion the Minister pointed out that relief administration must be dealt with in relation to the whole complicated structure of social services, which now lie largely under provincial jurisdiction.

The Canadian Federation of Labour

On January 10, a delegation from the Canadian Federation of Labour submitted a memorandum to the Dominion Government. The delegation was headed by Mr. Allan Meikle (One Big Union), president, Mr. Zenon David (Canadian Association of Railwaymen), vice-president, Mr. W. T. Burford (Electrical Communication Workers of Canada), secretary-treasurer, Mr. H. N. McMaster (Canadian Brotherhood of Ships' Employees) and Mr. R. B. Russell (One Big Union).

Receiving the delegation were the following members of the Cabinet: Rt. Hon. Ernest Lapointe, Minister of Justice; Hon. Norman McL. Rogers, Minister of Labour; Hon. W. D. Euler, Minister of Trade and Commerce; Hon. Fernand Rinfret, Secretary of State; Hon. J. L. Ilsley, Minister of National Revenue; Hon. C. D. Howe, Minister of Transport; and Hon. J. G. Gardiner, Minister of Agriculture.

Also present from the Department of Labour were the Deputy Minister, Mr. W. M. Dickson, and the Assistant Deputy Minister, Mr. Gerald H. Brown.

Welcoming the delegation, the Minister of Justice conveyed the regrets of the Prime Minister at being unable to attend. He gave assurance that all recommendations would receive the attention of the Prime Minister and other members of the Cabinet.

President Meikle expressed appreciation for the opportunity of presenting the views of the Federation to the Government and the hope that the recommendations of his organization would receive the same courteous consideration as in the past.

Unemployment

Dealing with the subject of unemployment, the memorandum stated that the Federation had watched "with interest and appreciation" the efforts of the Government to cope with unemployment and expressed the belief that the Government shared the Federation's view "that distress through lack of jobs remains Canada's most pressing social problem." Reference was made to the dissolution of the National Employment Commission and that "the projected constitutional amendment and bill to institute unemployment insurance" had not been introduced at the last session of Parliament.

Concluding the section on unemployment the memorandum stated:—

> It is believed that the very existence of a free and democratic Canada depends upon the solution of the unemployment problem, just as autocracy in other countries is buttressed by a vivid recollection of the involuntary idleness from which it gave escape. Diligent though the Government of Canada has been in applying palliatives for unemployment, the Federation feels that further efforts in that direction are urgently needed, and that there is even greater need for permanent provision against the chronic unemployment which afflicts great masses of workers with the fluctuations of the primary industries.

Immigration and Settlement

The Federation registered its opposition to "the proposed settlement in Canada of large numbers of immigrants from central Europe until provision for a livelihood is assured to the workers already in the country." Approval of the Government's attitude in not encouraging immigration in recent years was recorded. Considering that under-population is a national problem, the Federation expressed the belief that the solution of the problem was bound up in the solution of the problem of unemployment. Continuing, the memorandum stated:—

> There is abundant evidence that the solution of Canada's two major problems, unemployment and under-population, is to be found in the co-operative organization of production and distribution, and that in the quest for this solution Canada, as a country richly endowed with natural resources, has an opportunity to show that democracy can excel by voluntary effort anything autocracy can accomplish by compulsion and regimentation.

Building and Financial Policy

Stating that while the Government's assistance to the building industry through the housing legislation had been of great benefit, the memorandum declared that it had "not sufficed by a wide margin to make up the deficit" in building activity during the last nine years. Continuing on this subject the memorandum stated:—

> The opinion was expressed by the Federation a year ago that the recommendation of the National Employment Commission for the reduction of expenditure on public works was premature. It is believed that with the moderate stimulation of building that has been effected by the Government's financing facilities regard should now be had to the Commission's recommendation, and that there is less warrant than formerly for the construction of public works as an emergency measure of relief. There is great need, however, to continue and to extend all present schemes to assist and encourage house-building and private construction generally, and the Federation submits that the Dominion and Provincial Governments would be justified in subsidizing the construction of low-priced dwellings both on account of the over-crowding and slum conditions that prevail and in order to provide employment for building workers. . .

Social Reform

The Federation requested that the pensionable age under the Old Age Pensions Act be reduced to sixty and that more adequate pensions be provided on a contributory basis. The Government was also urged to institute legislation providing insurance against unemployment, sickness and invalidity.

National Defence

The Federation tendered

its cordial congratulations to the Government upon the restraint shown in external affairs during the Czechoslovakian crisis of last September, and particularly upon having refrained from commitments which Canada was not prepared to fulfil. Recognizing the inadequacy of Canada's defences to protect the country against foreign military aggression, and believing that our democratic institutions are worth preserving, the Federation has already urged the desirability of an extensive program of defence by air, land, and water, on a voluntary basis of recruitment. The Federation further recommends the enrolment of a citizen army by an enlargement of the Militia, and it believes that there would be no lack of volunteers for part-time service if reasonable allowances were paid and if such elementary provision were made as the equipment of the men with boots and winter clothing. In the matter of naval defence, the Federation recommends the institution of a naval training service in which Canadian seafarers would be given training and subsistence in the winter months.

Freedom of Association

The Federation listed a number of measures which it believed necessary to implement the right of Canadian workers to belong to the organizations of their choice. The proposed measures were as follows:—

I. Cancellation of the privilege accorded certain foreign unions, and denied Canadian unions, to conduct a large-scale insurance business in Canada without the security required of commercial insurance companies.

II. Amendment of the Criminal Code to make it an offence for any person to seek by intimidation or threat to compel any worker to join or refrain from joining any union or voluntary association of workers, or to picket premises where a strike or a lockout is not in effect.

III. Repeal of the 1920 amendment to the Industrial Disputes Investigation Act which makes perpetually renewable an agreement between a particular labour organization and a particular organization of employers in one industry only, whether or not such agreement represents the will of the majority of the workers (Clause 2 of Section 17).

IV. Amendment of the Immigration Act to cancel the special privilege accorded American unions to send agents to Canada while Canadian unions enjoy no reciprocal privilege.

V. Amendment of the Immigration Act to provide for deportation of temporary immigrants, such as theatrical performers, who decline to fulfil their engagements for reasons such as a difference between their own affiliation and those of other workers with whom their employment requires collaboration.

VI. Specific prohibition in all contracts for war materials of closed-shop agreements with American unions debarring the employment of members of Canadian unions.

VII. Refusal of facilities under the Industrial Disputes Investigation Act to Communist and other politically dominated groups which have shown by their actions that they do not respect the laws of Canada.

Discussion on Memorandum

Following the reading of the memorandum, President Meikle called upon Messrs. McMaster and Russell to elaborate on that section dealing with freedom of association.

In the course of his remarks Mr. McMaster recalled that he had appeared before the Government a year ago to seek protection for the members of the organizations which he represented. He stated that these organizations had signed agreements for the 1938 season with twelve Canadian inland shipping companies. Threats had subsequently been made by a rival international union, he alleged, to "exterminate" the Canadian organizations. At the beginning of the shipping season in mid-April, he said, crews had been "kidnapped" from their vessels at various inland ports and a "reign of terror" instituted. Transportation by water in Canada, he alleged, is "infested with Communism." He expressed the opinion that Canadian seafaring workers are entitled to state protection from "mob violence" at the hands of international trade unionists. An intolerable situation has arisen, he declared, in that Canadian trade and commerce are threatened by "mutiny" on Canadian ships. In conclusion he stated that a repetition of the 1938 experience faces Canadian seamen and shippers in 1939 and appealed to the Government to take steps to protect the interests of those seafaring workers who belong to Canadian unions.

Mr. Russell stated that a similar situation exists in the coalfields of southern Saskatchewan. He alleged that the United Mine Workers of America had recently practised "coercion and intimidation" upon Estevan coal miners who were already affiliated with the Canadian Federation of Labour. He alleged that this had been done in accordance with a tacit understanding which had been reached between the international organization and the operators in the richer coalfields of Alberta and southeastern British Columbia. A promise of twenty-five dollars per week strike pay had been made, he said, although no dispute existed as to wages, hours or working conditions. After the Estevan strike had taken effect, he stated, the United Mine Workers of America had applied for and been granted a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act. He protested that although in Eastern

Canada an inquiry had been instituted at the request of seamen belonging to an international union, the request of coal miners in Western Canada affiliated with the Federation had been refused. The members of Canadian unions, he stated, do not desire to resort to the violent tactics practised by the members of international unions. Accordingly, on behalf of the Western Canadian coal miners affiliated with the Canadian Federation of Labour, he appealed to the Dominion Government to conduct an investigation into the "subversive forces" that are at work among organized labour in Canada.

President Meikle again voiced the appreciation of the delegation for the opportunity of presenting to the Government the views of the Federation membership and expressed the hope that every effort will be made to safeguard democratic institutions in this country.

Replies of Minister of Justice and Minister of Labour to Submission of Canadian Federation of Labour

In reply the Minister of Justice congratulated the Federation upon the clear and concise manner in which its recommendations had been presented in the memorandum. He again assured the delegation that these recommendations would receive the careful attention and consideration of the Government.

The Minister of Labour also congratulated the Federation on the manner of presentation of its memorandum and upon the size of the delegation in attendance. He said that he would not make particular comment on any section of the memorandum but that he did wish to touch upon the questions which had been raised by Messrs. McMaster and Russell. These matters, he stated, have been and are being dealt with by officials of the Department of Labour. With reference to the Estevan situation he pointed out that a vote of the miners had been taken before the Board of Conciliation and Investigation was established. The Department of Labour, said Hon. Mr. Rogers, has had long experience in dealing with industrial disputes and makes a practice of treating each case on its own merits. With regard to the question of international unions, which had been referred to in the memorandum as "foreign" unions, he pointed out that the department looks upon all trade unions in Canada as organizations of Canadian workmen and therefore must accord equal consideration to all, whether their affiliation be national or international.

Canadian Construction Industry in 1937

A substantial improvement was recorded in the value of work performed in 1937 by the Canadian construction industry, according to figures released recently by the Dominion Bureau of Statistics the advance over the previous year being $93,833,714 or 36·4 p.c. The total was $351,874,114 in comparison with $258,040,400. The value of new construction work in 1937 amounted to $244,946,916, a gain of $74,301,092 or 43·5 per cent, while alterations, maintenance and repairs totalled $106,927,198, an improvement of $19,532,622 or 22·3 per cent.

The value of work performed in 1937 by general, trade and subcontractors, builders, etc., was $278,209,051, an increase of $81,471,608 or 41·4 per cent over 1936. New construction amounted to $205,335,133, representing an increase of $63,532,489 or 44·8 per cent over the 1936 valuation. Alterations, maintenance and repairs by this group accounted for $72,873,918 as against $54,934,799 in 1936.

Structural building together with the building trades totalled $178,554,764 in 1937 and of this, construction of new dwellings, duplexes and apartment houses amounted to $32,030,118. The corresponding total for 1936 was $24,774,308. Factories, warehouses and storehouses also showed a large increase, the respective figures for new work in 1937 and 1936 being $25,664,592 and $11,145,960.

In trade and subcontracting, plumbing, heating and sanitary engineering headed the list by a large margin, the 1937 value totalling $23,437,689 with that for 1936 being $19,476,547. Structural steel work was next with a value of $16,199,867 compared with $11,186,257 in 1936.

The cost of materials consumed by the construction industry in 1937 amounted to $175,844,435, representing an increase of $53,655,197 or 43·9 per cent over 1936. General, trade and subcontractors were the largest consumers, their consumption for Canada as a whole amounting to $151,804,667 in 1937 while it was only $104,809,637 in 1936.

The capital investment in the construction industry in 1937 was $176,971,223, a gain of $12,648,947 or 7·7 per cent over 1936. General, trade and subcontractors accounted for $143,347,454 in comparison with $132,449,927 in 1936. The average number of employees for the industry as a whole was 151,652, and the total in salaries and wages paid, $150,637,291. The increase in the number of employees during the year was 9,308, and the gain in salaries and wages paid, $37,790,907.

RECENT REGULATIONS UNDER LABOUR LEGISLATION

First Regulations under Canada Radio Act—Amended Regulations under the Alberta Boilers Act—Exemptions under Alberta Hours of Work Act—New Public Health Regulations in Manitoba—Electric lamp approved in Nova Scotia Mines, etc.

ORDERS recently made under legislation directly affecting workpeople include regulations providing for the licensing of radio operators under the Canadian Radio Act, a revision of the rules for the examination and licensing of stationary engineers, firemen and welders in Alberta, the exemption from the Alberta Hours of Work Act of certain classes of employees in the lumbering industry, a revision of the regulation as to extra assessment for an undue number of accidents in connection with workmen's compensation in Alberta, the approval by the Nova Scotia Minister of Mines of an electric lamp of certain design for use in gaseous mines and revised regulations in Ontario continuing the prohibition of employment of young persons in places authorized to sell or serve beer or wine.

Canada Radio Act, 1938

The first regulations under this Act, approved by order in council on November 29, were gazetted on December 10. They provide for the examination and licensing of radio operators in nine different classes. Persons qualifying for certificates of proficiency must pass written and oral examinations in the sending and receiving of messages by radiotelegraph and radiotelephone, principles of electricity, the theory, adjustment, operation and maintenance of modern radiotelegraph and radiotelephone apparatus, the international regulations applying to the exchange of radio communication, that part of the International Convention for the Safety of Life at Sea which relates to radiotelegraphy, the radio laws and regulations of Canada and several other subjects varying with the class of certificate. Candidates for any class must be at least 18 years of age and the hearing of candidates for commercial examinations must not be less than 75 per cent normal as measured on the Department's standard audiometer.

Only persons who are British subjects and holders of Canadian certificates of proficiency in radio work may work on the apparatus of any radio station. Exception is made for amateur and professional experimental stations, commercial stations, such as land stations, aircrafts and other mobile units except ships equipped for reception only, and for special stations or classes of stations designated by the Minister, when the Minister or his agent is of the opinion that the operators of such stations are capable and efficient even if they are not certificate holders.

All coast stations open for public correspondence and maintaining a continuous watch must carry at least three certificated operators, the officer in charge must hold a Canadian First Class Radiotelegraph Operator's Certificate and the other operators certificates of a class not inferior to a Second Class Radiotelegraph Operator's Certificate. All other coast stations, land and mobile stations must have operators holding such certificates as are specified in the licence issued to each station.

The Minister may withdraw, suspend or cancel any certificate of proficiency if it is proved to his satisfaction that the holder has neglected or failed to comply with the provisions of the International Telecommunication Convention and Regulation in effect or of these regulations or any other regulations which may be issued from time to time for the holder's guidance.

Alberta Boilers Act

An amendment of November 23 in the regulations governing certificates for stationary engineers relates to the issuance of special engineers' certificates. It is now stipulated that proof must be furnished to the satisfaction of the Minister that it is "convenient and proper" to issue a special certificate.

The regulations so amended were made on May 17 and lay down the qualifications for engineers, firemen and welders, fix fees for the registration of pressure vessels of all kinds and govern the construction, operation and maintenance of refrigerating plants. Monthly examinations are to be held by the chief inspector in the case of first and second-class engineers and by the district inspector, under the supervision of the chief inspector, for other engineers, firemen and welders. An appeal lies to the Minister whose decision is final. A special certificate for operating a steam shovel or a locomotive or portable or tractor boiler or hoisting engine, as well as a fireman's certificate may be issued at the discretion of the chief inspector.

To qualify as a first-class engineer a man must be at least 25 years of age, obtain 70 per cent on the examinations and have had certain specified experience; to be a second-class engineer he must be at least 22, make an average of 60 per cent and have had the

required experience. If his average is less than 60 but over 50, he may be granted a third-class (200 h.p.) certificate. For a third-class certificate, a candidate must be at least 19 with certain experience and must obtain 60 per cent on the examinations for that grade. If his average is 50 per cent he is entitled to a certificate (100 h.p.). Should he make only 35 per cent he may qualify for 50 h.p. engines or he may have a provisional certificate for 100 h.p. To obtain a traction engineer's certificate a man must be 20 years of age, obtain 50 per cent on the prescribed examination and be experienced as a fireman or engineer of tractor boilers. Should be obtain between 35 and 50 per cent he is entitled to a provisional certificate.

An examination for a special engineer's certificate for the operation of any special boiler or steam plant not exceeding 200 h.p. may be taken by a candidate who is 19 years old and has had at least two years' experience as fireman or engineer. For plants of higher power, more experience is required and in respect of all special certificates the amendment noted above applies. The chief inspector decides on the qualifications required for special hoisting engine certificates.

The regulations also set out the qualifications for firemen, oil well and steam traction engineers.

A candidate for a certificate authorizing him to repair boilers or other pressure vessels by welding must have been an apprentice to the trade for three years or have served for at least two years as boiler maker, machinist or blacksmith and in addition have been employed as a welder under a qualified welder of boilers or other fired pressure vessels for at least one year. Similar experience with unfired pressure vessels or fabricate pressure piping is required of a candidate for a certificate authorizing employment in repairing such vessels. A provisional certificate voted for one year may be granted in either case to candidates who make 50 per cent on a written examination and 75 per cent on the practical test. For a final certificate, a man must make 75 per cent on the written examination and 90 per cent on the practical test.

All welding on pressure vessels must be approved by the inspector. Except in the case of new boilers coming under the classification of sections U-68 or U-69 of the American Society of Mechanical Engineers, which are considered as meeting all requirements of the regulations, the inspector must be supplied with an affidavit signed by the welder, or the boiler or pressure vessel manufacturer and the shop inspector that the work was carried out so as to comply with the regulations. Every boiler or pressure vessel fabricated by fusion welding and all such piping used to carry any refrigerant, steam or boiler feed water or in the fabrication of an oil still under pressure exceeding 15 pounds per square inch or to carry pressure above 50 pounds per square inch must be inspected, and tested, in the case of the piping, by an inspector appointed under the Act or authorized by the Chief Inspector.

Duties of the chief engineer or engineer in charge of a steam plant include responsibility for the proper care and management of the boilers and machinery under his charge, reporting accidents to the district inspector, assisting the latter in examining pressure vessels and pointing out any known or likely defects and reporting such defects to the employer, examining, on assuming charge, all pressure vessels, engines and auxiliaries and, if necessary, reporting to the inspector. The engineer or firemen must see to it that at all times the safety valves release at the authorized working pressure allowed by the inspection certificate, and that other safety equipment, as well as the rest of the machinery, is in proper working order.

Provision is made for the cancellation and suspension of engineers' certificates upon evidence of negligence, violation of the Act, drunkenness while on duty or of damage to a boiler or engine.

Rules governing the inspection, construction, operation and maintenance of refrigerating plants specify the design and construction of these and the types of automatic bye-pass valves and safety valves required. Every refrigerating sysem must be provided with approved pressure gauges. Machinery rooms are to have adequate ventilation. Where a mechanical system of ventilation is used, it must be capable of producing a complete change of air once in every five minutes. A machinery room must have a direct exit to the open air or to a room or hall from which gases from the machinery room can be excluded by a close-fitting, self-closing door, and such door must open outwards. There must be at least two respirators or gas masks of approved type conveniently located and maintained in good condition.

Inspection certificates may be withdrawn or withheld where the inspector finds any refrigerating apparatus or equipment to be in an unsafe working condition. The apparatus in question may not be used until the condition is remedied and the inspection certificate returned or re-issued.

Alberta Hours of Work Act

Order 4 of the Board of Industrial Relations exempts for a period of six months, beginning November 30, 1938, certain employees in the lumbering, logging and railway tie industry in rural districts more than 10 miles from any city and in towns and villages of less than 1,000 inhabitants from the maximum working hours provisions of the Act. These maximum working hours are nine a day and 54 a week for males and eight a day and 48 a week for females. Cooks, night watchmen, and barn bosses may work longer hours than the daily and weekly maxima fixed by the Act and are not entitled to the weekly rest period of 24 consecutive hours prescribed by the Act. Blacksmiths, engineers, teamsters, truck drivers and millwrights are exempt from the daily and weekly hours provisions but must be allowed the weekly rest period.

An order of January 12, 1938, under the Male Minimum Wage Act, fixes a minimum wage of $30 per month plus board and lodging for all employees in these industries. (LABOUR GAZETTE, February, 1938, p. 174).

Alberta Workmen's Compensation Act

Regulation 10 of the Workmen's Compensation Board (LABOUR GAZETTE, 1938, p. 1234) was replaced on December 3. The new regulation provides that when in any year the amount chargeable to an employer's account for compensation exceeds by more than 5 per cent his ordinary assessment, he must pay, for that year, in addition to his ordinary assessment, an amount equal to the difference between the ordinary assessment and the amount chargeable to his account up to but not more than either one-third of the ordinary assessment for the year or 10 per cent of the accumulated excess of disbursements over receipts in his account.

Manitoba Public Health Act

An order of the Minister of Health and Public Welfare, dated November 14, 1938, amends regulations of November 26, 1934, and April 29, 1937, providing for medical services and hospitalization for employees in woodcutting, timbering, fishing, mining, construction and other industrial work requiring the housing of workers in camps. (LABOUR GAZETTE, 1934, p. 816; 1937, p. 650.) Camps not within the scope of the regulations may be included on the approval of the Minister. The new regulations define an employer as any person, firm or corporation engaged in the above industries and employing men directly or through a contractor or sub-contractor for the purpose of such industries.

As before, the Minister must be notified by the employer of the establishment of any camp and before the commencement of operations and annually thereafter he must be informed of the location of the camp, means of access, number of men employed and such further information as may be required. The employer is responsible for medical, surgical and hospital care of his employees including medicine and their removal to a hospital or other place of treatment when such services do not come within the Workmen's Compensation Act. The responsibility extends to employees becoming ill during employment or discharged or sent away from the camp as a result of illness. The employer is not liable, under the new regulations, in cases of non-industrial accidents, alcoholism, drug addiction or venereal disease and his responsibility for medical and surgical treatment and maintenance is not to exceed four months.

As amended in 1937, the regulations provided that an employer must contract with a legally qualified medical practitioner for the medical and surgical care of his employees and for this purpose he could deduct and retain a sum not exceeding $1 a month from the wages of any workmen entitled to the benefits of such a contract. These provisions have been re-enacted without substantial change. Under the new definition of "employer," where the work is carried out by a contractor or sub-contractor, the employer may deduct the above sums from the amounts payable to the contractor or sub-contractor who, in turn, may deduct such sums from the pay of the employee.

Medical contracts may now be entered into by the employer with hospitals as well as medical practitioners. Two provisions, included in 1937, enabling employers of less than 50 men to have an alternate arrangement with the approval of the Minister and stipulating that all sums deducted from wages for such care must be paid to the medical officer without rebate, are repealed. All contracts for medical and surgical treatment and hospitalization must be approved by the Minister and may be altered or amended by him. Copies of all such contracts are to be filed with the Minister.

Employers are not only responsible for carrying out these regulations but also the provisions of the Public Health Act and regulations thereunder. A new provision enables the Minister to take action to enforce the regulations where they are not complied with and the cost of inspection and enforcement is to be charged to the employer.

Other provisions remaining unchanged define the employer's responsibility to provide and maintain hospital buildings to the satisfaction of the medical officer and lay down rules governing sites and construction of camps, sanitary conditions and prevention and control of communicable disease.

Nova Scotia Coal Mines Regulation Act

The Minister of Mines of Nova Scotia approved on December 7, 1938, the Model K. Edison electric cap lamp for use in gaseous mines in Nova Scotia. This lamp has been approved by the United States Bureau of Mines. No lamps which differ from the approved design are to be sold or distributed with approval plate stamping until approval of the changes has been obtained.

Ontario Liquor Control Act

New regulations of December 15 replace similar regulations of July 10, 1934, and prohibit the employment of any person under 18 years of age in premises authorized to sell or serve beer or wine at meals and of any person except males over 21 years of age in beverage rooms.

LEAGUE OF NATIONS' INTERNATIONAL LABOUR ORGANIZATION

Death of Professor Ernest Mahaim

ON December 1 the death occurred at Liege of Professor Ernest Mahaim, who was one of the pioneers of the international movement for social progress, to which he devoted many years of his life before the foundation of the International Labour Organiaztion.

He was born in 1865 and after studying law and economics at several European universities, he specialized in the study of problems of labour law, which was then beginning to develop. In 1897 he was one of the organizers of the first International Congress on Labour Legislation, which resulted three years later, largely thanks to Ernest Mahaim's work, in the foundation of the International Association for Labour Legislation.

The authority which he had acquired, and the attention aroused by his teaching concerning the need for an international body to encourage and co-ordinate social progress in the various countries, led the Belgian Government to appoint him in 1919 as its representative on the Commission for International Labour Legislation at the Peace Conference, which drafted the Constitution of the International Labour Organization.

In the International Labour Organization, which he did so much to bring into being, Ernest Mahaim always played an outstanding part. He was Belgian Government delegate at all the ordinary sessions of the International Labour Conference from 1919 to 1938, and President of the 1930 Session. On the Governing Body of the International Labour Office he represented the Belgian Government from the beginning until 1935. In 1931, when the first Chairman of the Governing Body, Arthur Fontaine, died suddenly, the respect and affection which all members of the Governing Body felt for Ernest Mahaim led them to elect him as Chairman and he occupied that position until October, 1932.

In a tribute expressed by Mr. Harold Butler, Director of the International Labour Office, it is stated: "I doubt whether the International Labour Organization will ever command supporters in the future fired by a more ardent faith in the mission than that which inspired its early fathers such as Mahaim and Fontaine. They had fostered and fought for the cause of international social progress from its early beginnings as a small private organization till its blossoming into a powerful official institution. Certainly none of his successors will be more richly endowed with human kindliness and devotion. His memory will always be preserved in the annals of the I.L.O. as one of the foremost figures in the social movement of our times. Though his name may have been less familiar to the public than those of some others, none played a more genuine and worthy part in carrying the world forward from the national liberalism of the 19th to the worldwide social emancipation of the 20th century."

The World Coal Mining Industry

Under the above title the International Labour Office has just published a work in two volumes dealing with economic and social conditions in the coal-mining industry throughout the world.

In its original form this work was prepared and distributed in proof as a report intended to serve as a basis of discussion for the Technical Tripartite Conference on the Coal-Mining Industry, which was held in Geneva in May, 1938. The report is now reprinted, with such alterations as have been found necessary in the light of the discussions to which in its previous form it gave rise. It represents an effort to give a comprehensive picture of the economic and social conditions prevailing in the industry, especially in their bearing on the problem of hours of work in coal mines.

Volume I deals with economic conditions. It includes a historical survey of the "coal problem," discusses the place of coal in the industrial economy, and surveys in detail world production and consumption. Further chapters deal with the problem of "capacity";

the world trade in coal; factors in the competition for coal markets; prices, costs and labour standards; and the movement towards integration and regulation.

Volume II (Social Conditions) covers the social aspects of the industry and deals with labour supply, wages and earnings, employment and unemployment, social insurance, weekly rest, public holidays, annual holidays with pay, and hours of work. Statistical information is also given on the number of persons employed, employment and unemployment, and wages and hours of work.

The two parts make a comprehensive work of reference to information which is available elsewhere, if at all, only in various languages in a large number of scattered publications.

Investment of Funds of Social Insurance Institutions

From December 5 to 9 a Committee of Experts, under the Chairmanship of M. S. Mochanoff, Chairman of the Bulgarian Sobranié and a former Minister of National Economy and Finance, met at the International Labour Office to study the complex problems connected with the investment of the funds of social insurance institutions.

The participation at this meeting of specialists from extra-European, as well as European countries, shows the widespread interest in this question at the present time.

The investment of their funds is one of the principal occupations of social insurance institutions, as well as of all persons responsible for safeguarding the existing and future rights of those insured. The actuarial reserves of social insurance schemes often amount to tremendous sums for the payment of old age and invalidity pensions and widows' and orphans' pensions; and the fruitful utilization of such funds is of vital importance not only for the prosperity and the soundness of insurance institutions, but also because of their effect on the financial policy of the State and of its component parts (counties, boroughs, parishes, etc.) as well as on the national economy of the whole country.

The Committee first of all outlined the three basic principles of the sound investment of funds—safety, liquidity and yield; and it added that account should also be taken of the social and economic utility of investments.

An important part of the experts' work dealt with the classes of investments to be regarded as permissible—whether with fixed or variable yields, or in real or personal property. The appropriate distribution of the investments among the various classes of holdings was prescribed; and a clear definition was given of the conditions to be observed in their selection, and of the necessary principles to satisfy the condition of safety, for each class of investment.

The conclusions adopted by the Committee, which will be submitted to the Governing Body of the International Labour Office, emphasize the two chief aims of a proper policy of the administration of social insurance. In the first place, to safeguard pensions and allowances promised to the insured, it is not only necessary to conserve the insurance holding but to provide for its fruitful utilization. Secondly, the financial help of the insurance funds, co-ordinated with the economic and financial policy of the public authorities, can make a substantial contribution to the economic prosperity of the country and to the improvement of the standard of living of the workers, by the prevention of unemployment, improving health conditions and housing, and by the creation of new means of production.

Finally, the Committee stated that in the administration of the insurance it was expedient to call not only on the services of particularly qualified experts, but also on those of representatives of the employers and the workers.

Ontario Trade-School Regulation Act Proclaimed in Effect

In the LABOUR GAZETTE for May, 1938, at page 502, detailed reference was made to the Ontario Trade-School Regulation Act of 1938. Recently it was announced by Hon. Dr. L. J. Simpson, Ontario Minister of Education, that the Act would be in effect on and from January 2, 1939.

According to a press report administrative regulations have been drawn up under the Act, and require that all trade and correspondence schools as defined by the Act shall be registered with the Department of Education and that before registration of any school may be granted, certain definite information relating to courses, accommodation, teachers, salesmen, agreements, etc., must be filed with the department.

New provisions affecting the regulation of annual paid holidays in France empower the Minister of Labour to require undertakings belonging to the same branch of industry or commerce in a given locality to arrange a rotation system for the holiday period of the several undertakings, thereby minimizing the risk of disturbance of production in the branch of economic activity concerned.

ANNUAL REVIEW OF EMPLOYMENT IN CANADA, 1938

THE Dominion Bureau of Statistics issued its Annual Review of Employment for 1938, containing analyses of the situation in various industries and areas of population. The survey points out that employment during 1937 had reached a particularly high level, exceeded only by that of the boom year 1929; 1938 saw some slackening of this unusually great industrial activity, but employment was nevertheless maintained at a level higher than that of 1936 and previous years of the record, except 1929 and 1930. The fluctuations of employment varied in the year just passed from those of 1937, when general improvement had been indicated not only throughout a longer period, but also on a larger scale. The 1938 index gained little more than three points from the first of the year to its peak at October 1, while at the end of the twelve months it was only fractionally higher than it had been at the first of January. This situation compared unfavourably with the increase of some eight points indicated, on the average, from January 1 to December 1 in the years since 1920. In spite of this, the average for the twelve months was, as already stated, exceeded only by the average indexes for 1937, 1930 and 1929, while the latest index (for December 1) was higher than in any other December except that of 1937, 1929 and 1928.

Based on the 1926 average as 100, the 1938 index averaged 111·8, as compared with 114·1 in 1937 and 103·7 in 1936, the previous maximum since 1930. The 1938 index was calculated upon data received from 10,719 firms or branches, 128,628 individual reports having been tabulated, as compared with 122,519, or an average of 10,210 in 1937. The employees of the co-operating firms ranged between 1,001,970 at April 1, and 1,119,291 at the first of October, averaging 1,069,780 in the twelve months. In 1937, the variation in the payrolls was from 975,862 at March 1, to 1,197,647 at the beginning of November, the monthly average being 1,085,831.

In addition to the foregoing, statistics for some months of 1938 were collected from a number of banks, trust companies and brokers, whose employees numbered approximately 34,500. The report states that these returns will shortly be incorporated in the general index.

Levels of Employment by Industries

The review discusses the varying levels of employment in recent years in the main industrial groups and in all industries, and shows that manufacturing and transportation have been at a uniformly lower level than general industrial employment, although in the last two years the disparity of manufacturing has largely disappeared. Construction, governed to some extent by unemployment relief works has followed an erratic course. From a level greatly above the average from 1929 to 1931, it declined precipitately to a point below any other industrial division during 1933. Unemployment relief projects were largely responsible for the steeply upward movement shown by construction in 1934, but as these undertakings decreased with a revival of industrial activity, construction in 1935 and 1936 was at a lower level. However, 1937 saw a moderate resumption of activity in the construction industries; partly owing to the execution of work initiated in the preceding year, and partly to an increased program of public works, the volume of employment in 1938 averaged slightly higher than in the preceding year. Of the industries in which employment is above the general average, mining shows the greatest expansion in recent years. In trade and services, employment has also been maintained at a relatively high level, due partly to the stimulus of the tourist trade, but also reflecting the growing importance of these classes in the industrial distribution of the wage-earning population; this development has been evident in successive censuses. The employment figures for these three groups—mining, trade and services—have exerted a stabilizing effect upon employment in general, and have also had an important influence in raising it above the level of the manufacturing, construction, transportation and communications industries.

Employment Trends in Manufacturing

The review contains an analysis of the trends of employment in four great divisions of manufacturing, in comparison with that in manufacturing as a whole. These four industries—lumber, pulp and paper, textiles and iron and steel—together reported some 56 per cent of all persons employed by the manufacturing establishments co-operating in the Bureau's survey of employment for 1938. The lumber industries show sharper seasonal movements than any of the other three. Of the curves for these four industries, that in pulp and paper most closely approximates the general average, although in 1937 it did not show relatively so much improvement as the general curve, while in 1938 the falling-off was more pronounced. The contraction following the 1929 boom was particularly marked in iron and steel, which from a point decidedly above the manufacturing average in 1929, declined more or less continuously and precipitately

until 1932, during which period there was a reduction of over 50 per cent. The recovery movement beginning in 1933 gained momentum as it proceeded into 1937, but did not have sufficient force to raise the iron and steel index to a position equal to that of most other manufacturing industries in the Dominion. During 1938, there were losses which lowered the curve from its 1937 position, although it is still considerably above the level of other years since 1930. The textile industries, though subject to considerable seasonal variation, have exerted a stabilizing effect upon general manufacturing, both during the boom years and in the period of depression. Thus, the textile curve was lower than either the pulp or paper or the iron and steel curve from 1927 until 1930, since when it has been in a more favourable position, being also above the general average for manufacturing.

Comparison with United States

Another section of the report deals with the trends of employment in the United States and Canada, and points out that the course of employment in manufacturing in the two countries shows considerable similarity, although the Canadian curve is generally higher than that for the United States. It also shows that the downward movement in American industry, which set in during the summer of 1937, continued uninterruptedly until June, 1938, since when considerable recovery has been indicated. In Canada, manufacturing showed in 1937 almost continuous improvement until October 1. Although the tendency since then has been downward, the contractions in employment have been on a much smaller scale than in the United States. Thus, the index for manufacturing in the Dominion, averaging 111·0 in 1938, was three per cent less than in 1937. During the first eleven months of 1938, the American index was 19 per cent below the 1937 mean. A comparison of employment on steam railways in Canada and the United States is also given, showing that there has also been a similarity in the movements of employment in the two countries, but, as in manufacturing, employment in the latter during 1938 declined to a much greater extent than in the Dominion.

The Bureau of Statistics' comparison of the employment situation in Canada in 1938 and 1937 shows that the number on the payrolls of the co-operating establishments was higher until June, 1938, than in the same period of the year before, but from then on industrial activity was at a lower level. This deterioration was due rather to the failure in employment in 1938 to show expansion on a scale commensurate with that of 1937, than to any such curtailment from the beginning to the end of the year as had characterized the situation in the years 1930, 1931 and 1932. At December 1, 1938, employment was higher in relation to the 1937 level than in any other month since July.

Industrial Analyses of Employment

A summary of the industrial analyses shows that manufacturing gained only slightly from the beginning to the end of 1938, as compared with an average advance of nearly nine per cent from January 1 to December 1 in the period 1921-37. The index in this industry, while lower than in 1937, was higher than in 1936, or any other year since 1929. Most branches of factory employment reported that activity was reduced from the 1937 level, but the great majority afforded more employment than in 1936. Mining as a whole showed slight improvement over 1937, and employment in that industry was at its eighteen-year maximum; most of the advance took place in the metallic ore division. Logging, following the exceptional activity of 1937, was at a low level during the year just past. In the service group, consisting mainly of hotels and restaurants and laundries and dry-cleaning establishments, employment was slightly more active than in 1937, while the volume of employment in trade was practically the same as in the preceding year. Communications also showed little general change from 1937. There was a slight falling-off in that comparison in transportation, but the index for that industry showed a small fractional gain over 1936. Construction generally was rather brisker than in 1937, mainly due to the higher level of employment reported in the early months of 1938, although improvement over the same period of 1937 was indicated at November 1 and December 1. Building showed no general change as compared with the preceding year; highway work afforded more employment than in any other year since 1934, partly owing to unemployment relief projects. On the other hand, railway construction and maintenance provided work for a smaller number of men than in any of the four preceding years.

Employment in Provinces and Cities

Employment in the Maritime Provinces, Ontario and British Columbia was quieter than in 1937, while in Quebec and the Prairie Provinces the indexes averaged very slightly higher. In Quebec, the gain was mainly due to an increase in unemployment relief works, while that in the Prairie area reflected improvement in the agricultural situation. In all five economic areas, employment generally

was at a higher level than in 1936 and immediately preceding years. Throughout the various sections of Canada, manufacturing as a whole showed curtailment as compared with 1937, and mining was more active. Among the other industrial divisions, less uniformity was seen, but logging, transportation and construction in most areas did not afford so much employment. Trade and services generally showed a slightly upward movement.

Statistics are segregated for the eight leading industrial cities—Montreal, Quebec, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver. Of these, Montreal and Quebec showed improvement over 1937, due in the main to an increased program of unemployment relief works; while the activity connected with the Eucharistic Congress during the summer also helped the situation in Quebec. The remaining six of the above cities reported curtailment, the percentage losses varying from 0·6 in Toronto to 5·5 in Windsor. If the figures for the two Quebec centres are eliminated from the cities' total, the percentage reduction in the other municipalities closely approximates that in the Dominion as a whole. With the exception of Windsor, employment in each of these eight centres was below the general level in Canada, but this discrepancy was rather less in 1938 than it had been in 1937. The general index for 1937 had been lowered by the employment level in the cities, while in 1938 the reverse was the case, an index from which the cities' figures are excluded showing a falling-off of 4·1 points, as compared with that of 2·3 points in the general index. The general level of employment in manufacturing, communications, trade, services and construction in the larger cities, the report continues, has not yet reached a level equal to that in other parts of Canada; the most outstanding difference in this comparison, as in 1937, was in construction. On the other hand, the cities' employment index for transportation in recent years was above the Canada figure.

The *Annual Review of Employment*, containing considerable textual analysis of the situation in 1938, together with numerous charts and tables of index numbers, may be obtained from the Dominion Bureau of Statistics. The price is 25 cents.

Illness Among Employed and Unemployed Workers In U.S.A.

According to data recently released from the National Health Survey—a project conducted by the United States Public Health Service with financial aid from the Works Progress Administration—"workers who are unfortunate enough to be without jobs are under the additional handicap of having proportionately more illnesses than workers who have jobs." This is one of the important findings of the National Health Survey, preliminary tabulations of which reveal that unemployed workers (15-64 years of age) are twice as likely to be disabled by illness on a given winter day as are employed workers.

The following paragraphs are extracted from the summary of the report:

That illness is an important reason for loss of job is commonly recognized. Each year many workers are laid off as a result of industrial accident and chronic disease. It is also true that unemployment may result in illness. Illness, of course, results when unemployment leads to continued privation. But, even when unemployment does not result in privation, the change in pace, mental and physical, induced by such a state, as well as fears for the future, may have serious pathological consequences.

No attempt is made here to trace the causal relationship between illness and unemployment. It is obvious, however, that whether illness is the cause or the effect of unemployment, the excess of such illness among the unemployed constitutes a serious problem, especially since this group is least able to meet the cost of illness.

Nor is the excess of illness among workers without jobs confined to a few population groups. Such excess was found to obtain in high as well as in low income groups and among workers in professions as well as among unskilled laborers. Excessive illness was the lot of jobless workers whether young or old and of unemployed women as well as of unemployed men.

The highest illness rates were found among workers in the high age groups, in the low income classes, and among unskilled laborers. Yet in none of these groups was found the greatest proportionate difference between the illness rates of the unemployed and those of the employed worker. The difference in rates between employed and unemployed workers is proportionately greatest in the age group, 25-44; in the income class, $1,000-$2,000; and in the occupational class, dealers and other proprietors.

It is not surprising that common colds, bronchitis, and influenza, or the minor respiratory diseases (so-called), were responsible for one-third of all illnesses experienced on a given day by workers, employed and unemployed, in the winter of 1935-36. It is perhaps significant, however, that two jobless workers were disabled (on the day of the canvass) from these diseases for every employed worker so disabled. And although orthopedic impairments and nervous and mental diseases were responsible for relatively few illnesses among workers on the day of the canvass, these diseases respectively disabled 9 and 17 jobless workers for every two employed workers thus disabled.

The findings summarized above are derived from preliminary tabulations of the reports from eight large cities in various sections of the country; white workers only are considered in this bulletin.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, NOVEMBER, 1938

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on December 1 was 11,173, the employees on their pay-rolls numbering 1,096,434 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for November was 1,920, having an aggregate membership of 242,815 persons, 13·7 per cent of whom were without employment on December 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the beginning of December, 1938, as reported by Employers

Industrial employment has almost invariably shown a decline at December 1 in the years since 1920. The customary curtailment was indicated at the beginning of the present month, but this involved a percentage loss in personnel that was below the average in the experience of the last seventeen years, while the number of workers laid-off was also decidedly smaller than at December 1, 1937. Data were tabulated by the Dominion Bureau of Statistics from 11,173 employers, whose staffs were reduced from 1,102,679 in the preceding month to 1,096,434 at the beginning of December, 1938. This decrease of 6,245 persons lowered the index number from 114.6 per cent of the 1926 average at November 1 to 114·0 at the date under review, when it was slightly over six per cent below the December 1, 1937, index of 121·6. Since the falling-off from the preceding month was less than normal, the seasonally-adjusted index showed an advance, rising from 109·7 at November 1, 1938, to 111·3 at the beginning of December.

In recent years since 1920, the crude index at December 1 has been as follows:—1938, 114·0; 1937, 121·6; 1936, 110·1; 1935, 104·6; 1934, 98·9; 1933, 91·8; 1932, 83·2; 1931, 99·1; 1930, 108·5; 1929, 119·1; 1928, 116·7 and 1927, 108·1.

Manufacturing as a whole, (notably of food, lumber and textile products), communications, transportation and construction showed seasonal recessions at December 1, 1938, those in construction and maintenance being most pronounced; the shrinkage in factory employment was less-than-average, according to the experience of the years, 1921-1937. On the other hand, substantial improvement was recorded in tobacco and iron and steel works, and in logging, coal-mining and retail trade. The gains in the last three were seasonal in character.

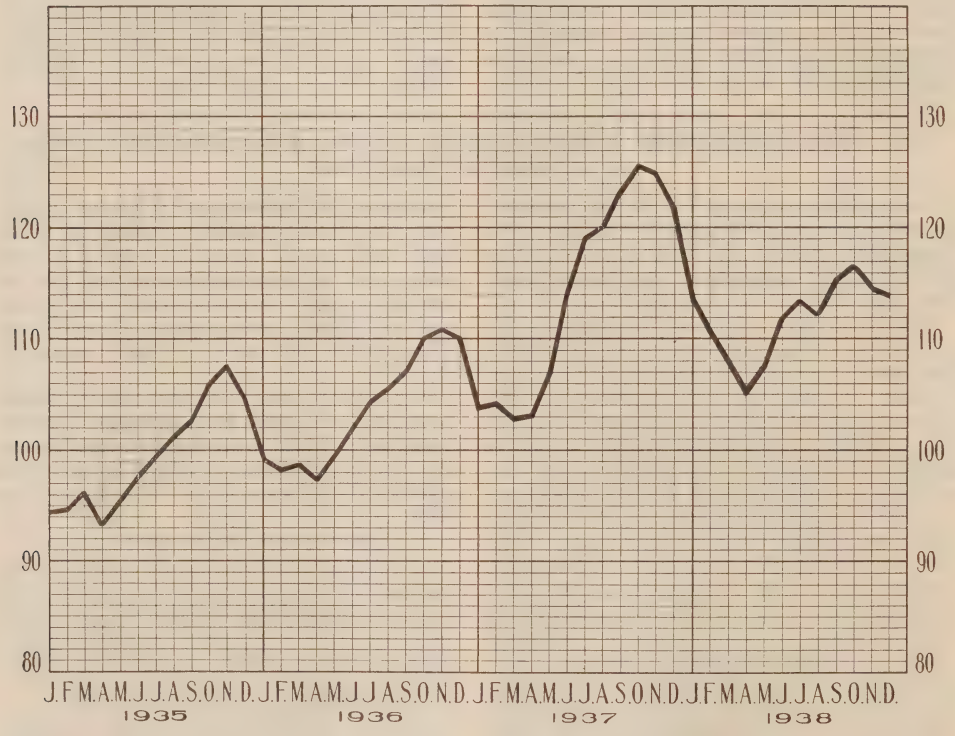
The staffs of the 10,459 firms making returns for December 1, 1937, had aggregated 1,159,727, a decline of 34,444 from the preceding month; the loss in employment in construction then recorded had been on a particularly large scale.

Employment by Economic Areas

In Quebec and Alberta the trend of employment was upward at December 1; firms in Saskatchewan laid off the largest number of persons. Except in the Prairie Provinces, industrial activity generally was less than at the beginning of December of last year.

Maritime Provinces.—In this area, improvement was indicated in iron and steel manufacturing and in shipping, railway construction and maintenance, trade and logging, but food, lumber and pulp and paper plants and building and highway construction reported curtailment, that in the last-named being most pronounced. Returns were furnished by 810 firms employing 80,560 workers, as against 82,592 at November 1. This loss was rather smaller than that noted at the same date in 1937, but exceeded the average recorded at December 1 in the years, 1921-1937. The index at the latest date,

standing at 109·8, was lower than at the beginning of December in either 1936 or 1937, but was higher than at that date in immediately preceding years.



At December 1, 1937, the 718 reporting establishments had 88,478 employees, as compared with 91,909 in the preceding month.

Quebec.—There was an advance in Quebec, according to statements from 2,810 employers of 344,421 persons, or 5,564 more than at the first of November. The index rose from 119·7 at November 1 to 121·7 at December 1, 1938, when it was nearly eight points lower than at that date in 1937. Manufacturing reported curtailment as compared with November 1, 1938; the largest losses were those of a seasonal character in the lumber and textile divisions, while tobacco and iron and steel factories were busier. Mining, services, transportation, building and railway construction were seasonally slacker. On the other hand, logging, trade and highway work recorded increased employment, that in the last-named being partly due to unemployment relief projects. The seasonal improvement in the logging industry was on a much smaller scale than at December 1, 1937. Statistics for that date had been tabulated from 2,513 firms in Quebec with a combined payroll of 361,048 persons; this was a decrease of 2,587 from their November 1, 1937, staffs.

Ontario.—Employment in Ontario showed a seasonal contraction at December 1, 1938, but this was on a much smaller scale than that noted at the same date of last year, being also below the average decline at the beginning of December in the years since 1920. Improvement was noted, on the whole, in manufacturing, largely in the tobacco and iron and steel industries, while there were contractions in lumber, food, textile, electrical appliance, electric light and power and some other divisions. Among the non-manufacturing industries, logging, metallic ore mining and trade reported increased employment. Communications, transportation and construction, however, showed seasonal curtailment. The 4,847 employers making returns for December 1,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

1938, had a staff of 448,275, compared with 450,703 at the beginning of November. The index, at 114·4, compared unfavourably with that of 125·8 at the same date in 1937; the 4,632 establishments whose reports were then compiled had 490,413 persons on their paylists.

Prairie Provinces.—Seasonal declines were indicated in the Prairie Provinces at the date under review, when the 1,572 co-operating firms reported they had released 5,915 workers, reducing their staffs to 132,411 at December 1; this reduction was smaller than at the same date in any of the three preceding years, but slightly exceeding the average loss indicated at December 1 in the period, 1921-1937. Retail trade, coal mining and logging showed seasonal improvement, and there was recovery in iron and steel plants, resulting in an upward movement in manufacturing as a whole. On the other hand, transportation and construction afforded less employment, the losses in personnel in the latter being considerable. Industrial activity at the beginning of December was at a rather higher level than at the same date in 1937; data were then received from 1,499 establishments with 128,315 employees, compared with 135,549 at the first of November, 1937.

British Columbia. — Further contractions were reported in British Columbia, in accordance with the movement almost invariably noted at the beginning of December in this record of eighteen years. There were gains in logging, shipping and retail trade, but manufacturing was slacker, chiefly in food factories, and mining and construction also released employees. A larger decrease had been noted at December 1, 1937, but the index was then rather higher. The 1,134 firms making returns for the date under review had 90,767 employees, as compared with 92,201 in their preceding statement. At December 1, 1937, 1,097 employers had reported a staff of 91,473 persons.

Table 1 gives index numbers by economic areas.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS
(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Dec. 1, 1921	88·3	100·4	79·8	91·5	94·9	78·9

Dec. 1	114·0	109·8	121·7	114·4	103·5	105·8
Relative Weight of Employment by Economic Areas as at Dec. 1, 1938	100·0	7·4	30·8	41·3	12·2	8·3

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review

69800—5½

Employment by Cities

Lessened activity was indicated in Montreal, Toronto, Ottawa and Hamilton; in Quebec City and Winnipeg little change on the whole was shown, while firms in Windsor and Vancouver reported increased employment, the gain in the former being considerable. The indexes in Montreal, Quebec and Vancouver were higher than at December 1, 1937; in Ottawa, the situation was practically unchanged, while in the other centres above enumerated, employment was at a lower level.

Montreal.—There was a considerable decline from the preceding month in the employment afforded in Montreal by the 1,623 co-operating firms, whose staffs were reduced by 1,477 persons to 163,574 at the beginning of December. Manufacturing on the whole reported a contraction, the losses taking place mainly in textile, clay, glass and stone and iron and steel plants. Construction work also showed curtailment, while there were substantial gains in retail trade. A larger decrease had been noted at the same date of last year, and the index of employment was then slightly lower than that of 106·2 at the latest date. The 1,418 establishments furnishing returns for December 1, 1937, had reported 156,790 men and women on their paylists.

Quebec.—Industrial activity in Quebec City showed little general change, according to the 200 employers whose returns were received, and who had 16,501 employees at December 1. There were contractions since November 1, 1938, in manufacturing, mainly of leather products, and transportation, services and building were also slacker. On the other hand, improvement was shown in road work and retail trade; the gain in the former occurred mainly in unemployment relief projects. A considerable recession had been indicated at the beginning of December in 1937, when the index was much lower; statements had then been received from 177 concerns with 13,248 persons on their payroll.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES
(AVERAGE CALENDAR YEAR 1926=100)

Dec. 1	106·2	119·2	108·8	105·6	102·4	148·2	94·6	110·6
Relative Weight of Employment by Cities as at Dec. 1, 1938	15·1	1·5	12·7	1·3	3·0	1·9	3·8	3·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Toronto.—Decreases in personnel were recorded in Toronto by 1,636 firms, who employed 137,443 workers, as compared with 138,451 at the beginning of November. Trade showed noteworthy improvement, and hotels and restaurants were also more active. Manufacturing as a whole, however, was seasonally dull, the textile and electrical apparatus groups reporting the greatest reductions; construction was also quieter. Similar losses had been registered at December 1 of last year, but the index of employment then was a few points higher than that of 108·8 at the latest date. For December 1, 1937, 1,562 establishments had made returns, showing that they employed 139,312 men and women, compared with 140,269 at November 1.

Ottawa.—There was a slight falling-off in Ottawa, where manufacturing, communications and services reported moderate curtailment. Trade, however, was rather busier. Two hundred and fourteen firms recorded a combined payroll of 14,190 workers, as against 14,272 in their last report. Employment was at approximately the same level as at the beginning of December, 1937, although the decline then indicated by 204 employers of 13,961 persons had been on a much larger scale.

Hamilton.—A decrease occurred in Hamilton, where an aggregate force of 32,944 employees was reported by the 310 firms furnishing data, who had a staff of 33,431 at November 1. Manufacturing as a whole was slacker, the losses taking place mainly in food and iron and steel plants. Transportation, trade and building, on the other hand, reported some improvement. The index, at 102.4, was decidedly lower than at the same date of a year ago, despite the fact that a much larger loss had then been recorded by the 294 co-operating establishments, whose payrolls had aggregated 37,466 men and women.

Windsor.—There was a further advance in Windsor, mainly in iron and steel works, while other divisions showed little general change.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES
(AVERAGE CALENDAR YEAR 1926=100)

——	All Industries	Manf.	Log.	Min.	Comm.	Trans.	Constr.	Serv.	Trade
Dec. 1, 1921	88·3	85·8	110·5	102·5	89·2	98·7	69·4	78·0	95·5
Dec. 1, 1922	96·3	94·9	152·9	107·5	87·2	106·5	75·2	79·9	96·2

Dec. 1	114·0	110·1	166·4	163·3	84·0	85·0	112·5	131·7	139·7
Relative Weight of Employment by Industries as at Dec. 1, 1938	100·0	51·7	4·4	7·0	2·1	9·4	11·5	2·6	11·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Statements were tabulated from 192 employers with 20,376 workers, compared with 17,953 in the preceding month. A slackening had been indicated at December 1, 1937, when statements had been received from 179 firms with 20,886 employees. The index then, however, was about five points higher.

Winnipeg.—Employment showed a small recession in Winnipeg, according to data received from 504 establishments employing 40,794 persons, as compared with 40,841 at November 1. A substantial reduction took place in manufacturing, mainly in food plants; there were also declines in communications, transportation and construction, while retail trade showed greatly heightened activity of a seasonal character, and services were also brisker. The general index, at 94·6, was fractionally lower than at the same date of last year, when a large decrease had been recorded by the 489 concerns furnishing data, whose working forces had aggregated 41,096.

Vancouver.—Employment in Vancouver was slightly brisker, according to 474 employers of 36,031 workers, as compared with 35,968 in the preceding month. Manufacturing reported some improvement, mainly in iron and steel and lumber products, and transportation and trade also afforded more employment; on the other hand, construction showed curtailment. A loss had been reported at the beginning of December, 1937, when 462 firms had employed 35,478 men and women; the index then was slightly lower than that of 110.6 reported at the latest date.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—A seasonal recession in employment was reported at December 1 in manufacturing establishments, 6,217 of which employed 561,191 operatives, compared with 565,527 at November 1. This decrease of 0·8 per cent was smaller than the average loss indicated at the beginning of December in the experience of the seventeen preceding years for which data are available. The index, after correction for seasonal movement, therefore showed an advance from the preceding month, standing at 111·4 at December 1, as compared

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (Average 1926=100)

Industries	[1]Relative Weight	Dec. 1 1938	Nov. 1 1938	Dec. 1 1937	Dec. 1 1936	Dec. 1 1935	Dec. 1 1934	Dec. 1 1933

Miscellaneous	0·5	139·1	146·0	133·2	133·5	125·0	119·2	103·6

[1] For explanation of term "Relative Weight", see footnote to Table III.

with the seasonally-adjusted index of 109·9 at November 1. On the other hand, the crude index, based on the 1926 average as 100, declined from 110·9 at the beginning of November to 110·1 at the date under review, when it was slightly over six points lower than at December 1, 1937; with this exception, the latest index is higher than at the same date in any other year since 1929.

Tobacco works reported considerably heightened activity at the beginning of December, and there was also important improvement in iron and steel plants. On the other hand, there were reductions (in most cases of a seasonal character) in the food, lumber, textile, electric light and power, clay, glass and stone, electrical apparatus and some other industries.

The unadjusted indexes of factory employment (based on the 1926 average as 100), have been as follows at December 1 in recent years: 1938, 110·1; 1937, 116·3; 1936, 107·0; 1935, 101·4; 1934, 91·3; 1933, 84·4; 1932, 80·3; 1931, 89·6; 1930, 100·6; 1929, 112·8; 1928, 112·9 and 1927, 104·3.

Animal Products—Edible.—There was a moderate increase in this industry, meat-packing factories and dairies being rather slightly slacker, while some improvement was indicated in fish-preserving plants. There was an advance of 87 in the staffs of the 308 firms making returns, who had 25,811 employees. Although this gain compared favourably with the decrease recorded at the same date in 1937, employment was then at a rather higher level.

Leather and Products.—Employment in this industry showed a loss at the beginning of December, occurring largely in boot and shoe factories. Statements were tabulated from 314 manufacturers, employing 21,527 persons, as compared with 21,739 at November 1. Much greater reductions had been noted at December 1, 1937, when the index was over two points lower.

Lumber and Products.—Seasonal curtailment of operations on a smaller scale than at the beginning of December, 1937, took place in this group; the reductions were principally in rough and dressed lumber mills, but vehicle and other wood-using factories were also quieter. Data were received from 904 lumber firms, whose staffs declined from 41,296 workers at November 1, to 38,375 at December 1. The index was lower than at the same date a year ago.

Plant Products—Edible.—There was a seasonal contraction of 3,991 employees in the vegetable food factories whose returns were received; they reported a combined working force of 36,913 operatives. The decrease took place chiefly in canneries, but flour and cereal mills and bread and bakery factories were also slacker. The largest losses, on the whole, were in Ontario. The index of employment at December 1, 1938, was fractionally lower than at the beginning of December, 1937.

Pulp and Paper.—Statements were received from 641 manufacturers in the pulp and paper industry, whose payrolls declined by 288 persons to 65,748 at the beginning of December. Employment was not quite so brisk as at the same date in 1937, although a larger loss had then occurred. Improvement took place at the date under review in printing and publishing establishments, while pulp and paper mills released employees. The largest reductions in personnel were in the Maritime Provinces.

Rubber Products.—Curtailment was reported in the rubber group. The working forces of the 54 co-operating establishments stood at 13,203, compared with 13,254 at November 1. A substantial decline had been shown at the corresponding date in 1937, but the level of employment was then higher.

Textile Products.—There was a seasonal recession in employment in these industries; most of this occurred in clothing, headwear and knitting factories, while cotton and woollen mills showed somewhat greater activity. Returns were compiled from 1,150 manufacturers employing 104,118 workers, or 2,232 fewer than in the preceding month. This was a rather larger loss than that recorded at the beginning of December, 1937, when the index was 6·6 points higher.

Tobacco.—Employment in tobacco factories greatly advanced. An aggregate payroll of 11,670 persons was indicated by the 45 co-operating firms, compared with 7,949 at the beginning of November. Smaller gains, on the whole, had been shown at the same date in 1937, but the index was then the same as at the date under review.

Beverages.—Moderate improvement was indicated in the production of beverages, according to 141 manufacturers with 8,951 employees, compared with 8,844 at November 1. Employment was rather more active than at the same date in 1937.

Clay, Glass and Stone Products.—Further seasonal reductions occurred in this industry, 473 persons being released by the 213 co-operating manufacturers, who had 9,453 on their payrolls. A downward tendency had also been in evidence at December 1, 1937, but the volume of employment then was greater.

Chemicals and Allied Products.—A falling-off was indicated in the chemical group at December 1, according to data received from 290 firms having 18,235 employees, as compared with 18,495 in the preceding month. A loss had also been noted at the beginning of De-

cember, 1937, when employment was at practically the same level as at the date under review.

Electric Light and Power.—There was a substantial decrease in employment in electric current plants, 99 of which had 16,661 employees, or 789 fewer than at November 1. A smaller recession had been reported at the beginning of December, 1937, but the index number then was a few points lower.

Electrical Appliances.—A decline was noted in electrical apparatus plants; 126 manufacturers employed 17,718 persons, as compared with 18,416 in their last report. Employment at December 1, 1937, was at a much higher level than at the date under review, although the reductions then reported had involved rather more workers.

Iron and Steel Products.—There was considerable improvement in employment in iron and steel factories; the rolling mill, heating appliance and sheet metal groups reported lowered activity, while automobile and other land vehicle, shipbuilding, general machinery, structural iron and steel, wire and some other plants were decidedly busier. There was an increase of 4,358 in the staffs of the 916 co-operating manufacturers, who employed 127,167. The general level of employment in this group was decidedly lower than at the same date in the preceding year, although curtailment had then been indicated.

Non-Ferrous Metal Products.—A slight decline occurred in this division at the beginning of December, according to data received from 184 employers of 24,442 persons, as compared with 24,490 in the preceding month. The index was rather lower than at December 1, 1937, despite the fact that larger loss had then been registered.

Non-Metallic Mineral Products.—There was a decrease in the manufacture of non-metallic mineral products; 101 firms employed 12,307 workers, or 307 fewer than at the beginning of November. Activity in this group was slightly higher than at December 1, 1937, when some improvement had been noted.

Logging

Continued advances were shown in logging, in which activity increased in all provinces. Statements were tabulated from 388 logging camps having 48,022 employees, or 10,274 more than in their last report. This gain was smaller than that registered at the same date in 1937, but approximated the average increase from November to December in the years since 1920. The index was decidedly lower than at December 1, 1937.

Mining

Coal.—Employment in coal mines increased at the beginning of December, 646 persons being added to the payrolls of the 106 co-operating operators, who had 26,007 employees. There was improvement in Saskatchewan and Alberta. A larger advance had been shown at the corresponding date in 1937, and the index number then was about three points higher.

Metallic Ores.—There was a decrease in employment in metallic ore mines; 394 workers were laid off since November 1 by the 233 employers from whom information was received, and who had 40,801 persons on their pay lists. A reduction had also been indicated in December, 1937, when the number on the staffs of the firms reporting in this division was decidedly smaller.

Non-Metallic Minerals other than Coal.—Curtailment in employment was noted in the extraction of non-metallic minerals, other than coal. In this division, 104 firms furnished data showing that they employed 8,805 persons, as compared with 9,116 at November 1. Activity was less than in the same month of 1937, although a rather larger loss had then been indicated.

Communications

Decreases in personnel were noted on telegraphs and telephones; 385 persons were released by the co-operating companies and branches, which had 22,441 employees at the date under review. The index was slightly lower than in the early winter of 1937.

Transportation

Street Railways and Cartage.—This division was seasonally quiet, the largest reductions in employment occurring in the Prairie Provinces. Data were compiled from 267 firms whose staffs declined from 28,518 at November 1, to 28,269 at the beginning of December. This loss was not so pronounced as that recorded at the same date in 1937, when the index was much lower.

Steam Railways.—The trend of employment in railway operation was downward, 100 employers and branches reporting 57,159 workers, as compared with 60,234 in the preceding month. There were decreases in Quebec, Ontario and the Western Provinces. The index number was lower than at December 1, 1937, when a much smaller contraction had been indicated.

Shipping and Stevedoring.—Further curtailment was registered in shipping; a decline of 188 persons was reported by the 124 co-operating employers, whose staffs aggregated 17,302. A large loss had been noted at

December 1, 1937, and the index then was several points lower.

Construction and Maintenance

Building.—Employment in building construction showed a pronounced, seasonal falling-off from the preceding month. Statements were compiled from 871 contractors employing 29,112 persons, as compared with 33,636 at November 1. The most extensive curtailment was in Quebec and the Prairie Provinces. Shrinkage on a rather smaller scale had been reported at December 1, 1937, when employment was in greater volume.

Highway.—Important reductions were noted in the staffs of the 406 highway contractors furnishing statistics, who employed 86,722 workers at December 1, as compared with 90,804 in the preceding month. Employment decreased in all five economic areas except Quebec. Much more extensive contractions had been noted in this group at December 1, 1937, and the index then was many points lower.

Railway.—Activity on railway construction and maintenance showed another seasonal decline, which involved more workers than that occurring at the same date in 1937; the index then was decidedly higher. Statistics were received from 35 contractors and divisional superintendents, whose staffs were diminished from 22,536 men at November 1, 1938, to 19,554 at the beginning of December. The most pronounced contractions were in Ontario and the Prairie Provinces, although there was general shrinkage except in the Maritime Provinces.

Services

Reductions were reported by the 553 co-operating firms, who had 28,572 employees, or 195 fewer than in the preceding month. Hotels and restaurants and laundries and dry-cleaning establishments were slacker. The employment index was about a point higher than at December 1, 1937; a rather smaller loss had been recorded at that date.

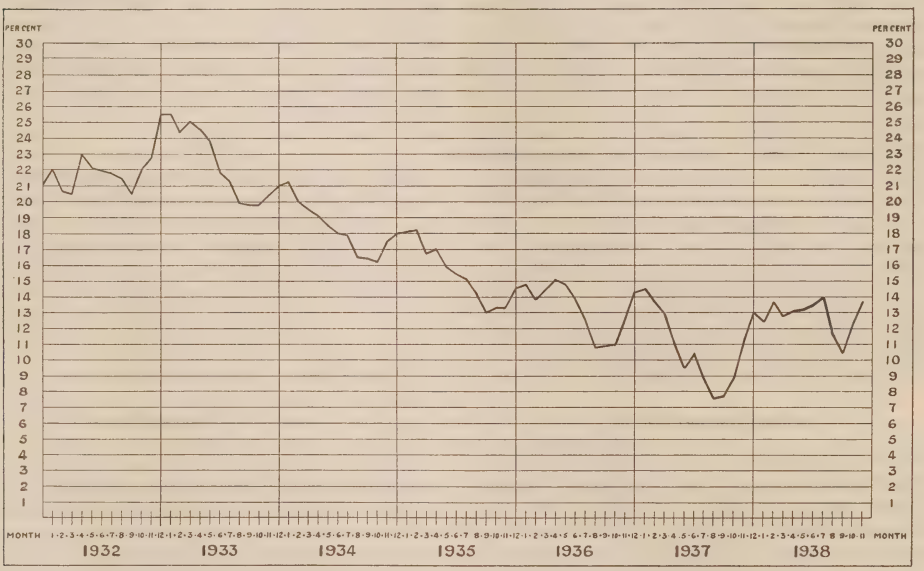
Trade

Important seasonal increases were again noted in retail trade, but wholesale houses released some employees. Returns were received from 1,683 trading establishments with 122,477 employees, or 3,556 more than at November 1. The index was practically the same as at the same date in the preceding year, being higher than in any other December on record.

Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of November, 1938



Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle due to illness are not considered as unemployed. Unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based it should be understood that such figures have reference only to the organizations reporting.

The present article on unemployment among local trade unions deals with the situation at the end of November and is based on the reports compiled from 1,920 labour organizations, involving a membership of 242,815 persons. For all occupations reporting, 33,387 or a percentage of 13·7 were without work at the close of the month as contrasted with an unemployment percentage of 12·3 in October. A less favourable employment movement also was reflected from November a year ago when 11·2 per cent of idleness was recorded. Curtailment of activity, particularly in the steam railway division in both Manitoba and Saskatchewan, was largely responsible for the quieter conditions prevailing in these provinces from October though contributing recessions in Manitoba were apparent in the garment trades. The tendency in Quebec and Ontario was adverse but the changes were small. In Nova Scotia, Alberta and British Columbia fractional recessions only were indicated. New Brunswick unions alone showed a nominally upward employment trend. In contrasting with the returns for November, 1937, noteworthy losses in work afforded were manifest by New Brunswick unions and declines of somewhat lesser magnitude were evident in Nova Scotia, Quebec, Ontario, Manitoba and Alberta. Minor contractions only were registered by Saskatchewan members. In British Columbia, however, the situation was moderately improved from November last year.

Reports on unemployment affecting local trade union members in the largest city in each province with the exception of Prince Edward Island are tabulated separately each month. Edmonton unions during November with a gain of over 3 per cent from October showed the greatest employment advancement of any of the cities used for comparison, and in Vancouver and Saint John lesser increases were noted. Of the reductions in activity reflected in the remaining cities that of over 2 per cent in both Halifax and Winnipeg was the most marked while in Montreal, Toronto and Regina the situation declined by over one per cent. When a comparison is made with the reports for November last year employment movement. In this upward trend the curve paralleled the course of the corresponding month in 1937 though the point reached at the close of the month under review was above that of November a year ago.

The manufacturing industries, with 555 local unions reporting at the close of November a total of 91,691 members, showed that 13,603 were without employment on the last day of the month, a percentage of 14·8 compared with percentages of 13·3 in October and 12·9 in November, 1937. Glass workers, whose membership included a small proportion of the total in the manufacturing industries, during November showed pronounced percentage gains in employment from October. Height-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Montreal members showed considerable curtailment in work available during the period surveyed and noteworthy recessions were apparent among Winnipeg unions. In Saint John, Toronto and Edmonton declines of more moderate proportions occurred, while in Halifax though the trend was less favourable, the change from November a year ago was but fractional. Conditions for Regina and Vancouver members, however, were somewhat better than in November, 1937.

Appearing with this article is a chart which illustrates the curve of unemployment by months from January, 1932, to date. The curve showed a slight rise in level throughout November when contrasted with the preceding month, a manifestation of a less favourable

ened activity, on a moderate scale, was indicated by metal polishers, jewellery and gas workers, and the situation tended favourably for printing tradesmen, meat cutters and butchers, and leather, cigar and tobacco, and iron and steel workers, and papermakers. Much quieter conditions, however, prevailed for general labourers and mill and smeltermen, and in the garment and textile trades appreciable losses were noted. Lesser declines occurred among wood workers, bakers and confectioners, and hat, cap and glove workers. The tendency for brewery and fur workers was toward retarded activity from October though the variations were quite slight. Contrasted with the returns for November, 1937, when 12·9 per cent of in-

activity was recorded in the manufacturing industries as a whole, leather and fur workers were decidedly better engaged during the month under review, and improvement on a much smaller scale though noteworthy was apparent among wood and hat, cap and glove workers, and metal polishers. Gains in employment of minor importance were manifest by papermakers, jewellery workers, meat cutters and butchers, and printing tradesmen. Severe losses in work afforded, however, as in the previous comparison were shown by general labourers and mill and smeltermen from November last year, and activity was substantially retarded among iron and steel, glass, brewery, and textile and carpet workers. Declines in employment were apparent also among bakers and confectioners, garment, and cigar and tobacco workers.

There was some improvement in the employment volume available to coal miners during November from the preceding month as reflected by the reports forwarded from 61 local unions with a membership aggregate of 24,029 persons. Of these, 1,250 or a percentage of 5·2 were idle at the end of the month in comparison with 7·3 per cent in October. The situation, however, remained unchanged in the industry as a whole from November last year when 5·2 per cent of inactivity also was recorded. Alberta, British Columbia, Nova Scotia and New Brunswick unions all participated in the better employment movement shown from October, Alberta members reporting the most noteworthy advancement. Decided employment recovery was reflected by British Columbia miners from November a year ago which was exactly counteracted by the recessions indicated in Alberta and in the Eastern coal fields. In addition to the total unemployment reported among the miners a number were shown as working at considerably reduced time.

The 217 associations of building and construction tradesmen making returns for November and combining a membership of 26,201 persons showed that 9,600 or a percentage of 36·6 were unemployed on the last day of the month contrasted with 31·8 per cent in October. Slacker conditions also prevailed than in November, 1937, when 28·3 per cent of inactivity was recorded. Painters, decorators and paperhangers during November suffered losses in employment from the previous month affecting the largest number of members. Steam shovelmen, and bridge and structural iron workers whose combined membership was rather small showed extensive percentage contractions in activity, and among hod carriers and building labourers considerably slacker conditions prevailed. A moderate drop in the level of activity was manifest by plumbers and steamfitters and tile layers, lathers and roofers, while bricklayers, masons and plasterers, and carpenters and joiners showed but a slightly adverse tendency. Electrical workers and granite and stonecutters, however, reported somewhat heightened employment. In making a comparison with the returns for November, 1937, a decidedly less favourable situation obtained for carpenters and joiners, painters, decorators and paperhangers, steam shovelmen, and tile layers, lathers and roofers during the month under review, and marked losses were noted by plumbers and steamfitters. Declines in activity, on a considerably smaller scale, were evident among bridge and structural iron workers, electrical workers, and bricklayers, masons and plasterers. Employment for granite and stonecutters showed a substantial rise from November a year ago and noteworthy improvement was recorded by hod carriers and building labourers.

A less favourable employment trend was noted in the transportation industries during November than in either the preceding month or November last year according to the returns tabulated from 831 associations with 65,912 members. Of these, 6,205 or a percentage of 9·4 were idle at the end of the month as compared with percentages of 7·8 at the end of October and 6·2 in November, 1937. Steam railway employees, whose returns included over 78 per cent of the entire group membership reported, were in both comparisons somewhat less actively engaged during November. Among teamsters and chauffeurs the level of employment was slightly lower than in October though minor increases in work afforded were evident from November last year. More favourable conditions prevailed for navigation workers during November than in the preceding month but substantial employment losses were noted over November, 1937. Street and electric railway employees showed a nominal rise in work afforded from October, the percentage for the month under review, however, remaining identical with that of November a year ago.

From unions of retail shop clerks 5 reports were received during November, embracing a membership of 1,811 persons, all of whom were busy on the last day of the month in contrast with an unemployment percentage of 0·3 in October and with a fully engaged situation in November last year.

Civic employees indicated little change in conditions in all three months used for comparative purposes, the 79 associations forward-

ing reports and involving an aggregate of 10,258 members showing that 209 were idle on the last day of the month, a percentage of 2·0 as contrasted with percentages of 1·4 in October and 2·3 in November a year ago.

Some improvement in the volume of work afforded members in the miscellaneous group of trades was apparent during November from the preceding month, the percentage of idleness standing at 10·6 in contrast with a percentage of 14·7 in October. This was evident from the reports tabulated from 134 local unions with a membership numbering 11,750 persons, 1,243 of whom were out of work on the last day of the month. A lower level of activity, however, was shown from November, 1937, when 6·4 per cent of unemployed members was reported. Employment for unclassified workers rose substantially from October and gains on a much smaller scale were registered by barbers, stationary engineers and firemen, and theatre and stage employees. Hotel and restaurant employees showed some slight falling off in work accorded. Inactivity for unclassified workers was the determining factor in the unfavourable employment movement reflected in the miscellaneous group of trades as a whole from November, 1937, though contributing declines were shown by hotel and restaurant employees. The tendency for theatre and stage employees, barbers and stationary engineers and firemen was toward heightened activity during the month under review, though the variations from November last year were quite small.

The situation for fishermen during November was much improved from either the previous month or November, 1937, the gains in the latter comparison being quite pronounced. This was apparent from the reports furnished by 6 associations of these workers, with 2,031 members, 11·7 per cent of whom were idle at the end of the month as contrasted with percentages of 20·1 in October and 37·4 in November, 1937.

Heavy increases in unemployment were reflected by lumber workers and loggers during November from the preceding month as manifest by the reports received from 3 locals embracing 2,039 members. Of these, 620 or 30·4 per cent were out of work at the end of the month contrasted with a percentage of 8·1 in October. Conditions were also much quieter than in November a year ago when 2·4 per cent of inactivity was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1919 to 1937 inclusive and also the percentages of unemployment by provinces for November of each year from 1919 to 1935 inclusive, and for each month from November, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

(3) Employment Office Reports for November, 1938

The volume of business transacted during the month of November, 1938, in offices operated by the Employment Service of Canada was 21 per cent more extensive than in October, according to the average daily placements made, and 22 per cent above that of November a year ago. In comparison with the preceding month noteworthy increases were recorded in farming and logging, augmented by one of fair proportions in services. A marked loss took place in construction and maintenance, but the decreases in trade, manufacturing, mining and transportation were not of the month, but declined slightly during the latter half. At the close of the period, however, the level of vacancies was slightly below, and that of placements somewhat above the levels attained at the end of November a year ago.

The ratio of vacancies to each 100 applications was 54·7 during the first half and 53·1 during the second half of November, 1938, in contrast with ratios of 52·0 and 53·4 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 53·1 and 52·0

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

large. When compared with November, 1937, pronounced gains were shown in farming, construction and maintenance and services, with a minor increase in mining. Declines, however, appeared in logging, manufacturing, trade and transportation, the largest being in the first named group.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of both vacancies and placements in relation to applications followed an upward trend during the first half as compared with 49·0 and 50·1 in the corresponding month of 1937.

The average number of vacancies reported daily by employers to the officers of the Service throughout Canada during November, 1938, was 1,755 as compared with 1,479 during the preceding month and with 1,494 in November a year ago.

The average number of applications for employment received daily by the offices during the month under review was 3,258 in comparison with 2,989 in October and with 2,835 during November, 1937.

The average number of placements made daily by the offices of the Service during November, 1938, was 1,712, of which 1,274 were in regular employment and 438 in work

of one week's duration or less, as compared with a total daily average of 1,414 during the preceding month. Placements in November a year ago averaged 1,405 daily, consisting of 1,048 placements in regular and 357 in casual employment.

During the month of November, 1938, the offices of the Service referred 44,289 persons to vacancies and effected a total of 42,783 placements. Of these, the placements in regular employment were 31,853, of which 24,585 were of men and 7,268 of women, while placements in casual work totalled 10,930. The number of vacancies reported by employers was 32,088 for men and 11,771 for women, a total of 43,859, while applications for work numbered 81,426, of which 60,950 were from men and 20,476 from women. Reports for October, 1938, showed 36,970 positions available, 74,715 applications made and 35,348 placements effected, while in November, 1937, there were recorded 37,348 vacancies, 70,860 applications for work, and 35,109 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:

Year	Placements		
	Regular	Casual	Totals
1928	384,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (11 months)	231,003	113,222	344,225

NOVA SCOTIA

There was an increase of nearly 16 per cent in the number of positions offered through employment offices in Nova Scotia during November when compared with the preceding month and of over 28 per cent in comparison with the corresponding month of the previous year. Placements also were 17 per cent higher than in October and nearly 27 per cent above November, 1937. The increase in placements over November a year ago was due to a substantial gain in the highway division of construction and maintenance, offset in part by a decline in logging. The changes in all other groups were quite small, the gains being about equal to the losses. Placements under construction and maintenance numbered 871 and in services 535. Of the latter, 420 were of household workers. During the month 674 men and 141 women were placed in regular employment.

NEW BRUNSWICK

Orders received at employment offices in New Brunswick during November called for over 2 per cent fewer workers than in the preceding month, but 44 per cent more than during the corresponding month of 1937. Placements were nearly 2 per cent less than in October, but nearly 45 per cent above the corresponding month of the previous year. As in Nova Scotia, placements on highway construction accounted for the gain over November a year ago for the province as a whole, although small increases were reported in all other groups except trade. There were 336 placements under construction and maintenance and 701 in services. Of the latter, 461 were of household workers. Regular placements numbered 27 of men and 98 of women.

QUEBEC

During the month of November, positions offered through employment offices in the Province of Quebec were over 2 per cent less than in the preceding month, but over 15 per cent above the corresponding month of the previous year. There was a decrease of nearly 3 per cent in placements when compared with October, but a gain of over 19 per cent in comparison with November, 1937. A substantial increase under construction and maintenance, made up largely of placements in the highway division of this group, accounted for the gain over November, 1937. There was an increase also in transportation. All other groups showed declines, the largest being in logging, with moderate losses in services, manufacturing, trade and farming. Placements by industrial divisions included manufacturing 83; logging 322; transportation 264; construction and maintenance 4,814, and services 2,679, of which 2,441 were of household workers. There were 5,325 men and 1,769 women placed in regular employment.

ONTARIO

Opportunities for employment, as indicated by orders received at employment offices in Ontario during November, were nearly 15 per cent less favourable than in the preceding month and nearly 23 per cent below the corresponding month of the previous year. There was a decrease in placements of over 15 per cent when compared with October and of over 20 per cent in comparison with November, 1937. All industrial divisions, except construction and maintenance, participated in the decrease in placements from November a year ago and although the gain in construc-

tion and maintenance was quite large, a substantial decline in logging more than offset this increase. Moderate losses were reported in manufacturing, farming, transportation and services. Placements by industrial divisions included manufacturing 587; logging 906; farming 595; construction and maintenance 3,299; trade 248, and services 3,441, of which 2,411 were of household workers. Placements in regular employment numbered 3,245 of men and 1,517 of women.

MANITOBA

Employment offices in Manitoba received orders for nearly 15 per cent fewer workers in November than in the preceding month and over 8 per cent less than during the corresponding month of 1937. There was a decrease also in placements of 14 per cent when compared with October and of nearly 11 per cent in comparison with November of the previous year. A decrease in placements under construction and maintenance was responsible for the decline for the province, as a whole, from November of the previous year, as losses in logging and trade were offset by gains in farming and services. The changes in all other groups were nominal only. The industrial divisions in which most of the placements were effected during the month were: logging 310; farming 1,715; construction and maintenance 914, and services 724, of which 580 were of household workers. There were 2,954 men and 354 women placed in regular employment.

SASKATCHEWAN

Positions offered through employment offices in Saskatchewan during November were nearly 207 per cent higher than in the preceding month and over 181 per cent above the corresponding month of the previous year. There was an increase also in placements of nearly 229 per cent when compared with October and of over 237 per cent in comparison with November, 1937. The exceptionally large increase over November a year ago was due to the placement of farm hands and farm domestics under the Farm Improvement and Employment Plan. The only other change of importance was a decrease in the highway division of construction and maintenance. There was a small decline in bush placements and minor losses in manufacturing and trade. Placements on farms numbered 7,767 and in services 2,452. Of the latter, 2,148 were farm domestics and 228 urban household workers. Regular placements numbered 7,428 of men and 2,680 of women.

ALBERTA

There was an increase of over 19 per cent in the number of positions offered through employment offices in Alberta during November when compared with the preceding month and of nearly 3 per cent in comparison with the corresponding month of the previous year. Placements also were over 44 per cent higher than in October and 13 per cent above November, 1937. Farm placements were considerably higher than in November a year ago, due to positions secured under the Farm Improvement and Employment Plan and there was an increase also in services, but these gains were partly offset by declines in logging and construction and maintenance. The changes in other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were farming 2,055; construction and maintenance 157, and services 567, of which 457 were of household workers. During the month 2,342 men and 409 women were placed in regular employment.

BRITISH COLUMBIA

During the month of November orders received at employment offices in British Columbia called for 39 per cent more workers than in the preceding month and 18 per cent more than during the corresponding month of 1937. Similar percentages of gain were reported in placements under both comparisons. The only change of importance in placements from November a year ago was a gain in the highway division of construction and maintenance. There were small declines in services, manufacturing, trade and logging and nominal increases in all other groups. Placements by industrial divisions included logging 1,787; farming 104; construction and maintenance 3,138 and services 681, of which 478 were of household workers. There were 2,590 men and 300 women placed in regular employment.

Movement of Labour

During the month of November, 1938, the offices of the Employment Service of Canada effected 31,853 placements in regular employment, 21,791 of which were of persons for whom the employment located was outside the immediate region of the offices at which they were registered. Of the latter, 454 were granted the Employment Service reduced transportation rate, 403 proceeding to centres within the same province as the despatching office and 51 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

* 125 Placements effected by offices since closed.

In Quebec during November, 17 certificates for reduced transportation were issued, one provincial and 16 interprovincial. The former was granted at Montreal to an engineer bound for Val d'Or. Transferred outside the province, 16 bushmen travelled at the reduced rate from Hull to employment in the Pembroke zone. Benefiting by the Employment Service reduced rate in Ontario during November, 347 persons were shipped to provincial employment. From Port Arthur, 204 bush workers, 2 mine employees and 2 truck drivers; from Fort William, 117 bush workers and one mine employee, and from Sudbury, 20 bush workers were carried to various centres within their respective zones. The Hamilton office assisted in the despatch of one machinist to Ottawa. The labour movement in Manitoba during November originated at Winnipeg and comprised the transfer of 58 persons, 23 within the province and 35 to employment outside the province. Provincially all workers were despatched to centres within the Winnipeg zone, included among whom were 8 bush workers, 5 farm hands, 4 miners, 4 saw mill labourers and 2 fishermen. Of the persons transported outside the province, 34 were bushmen and one a hotel general destined to situations in the Port Arthur zone. Those who availed themselves of reduced rate certificates in Saskatchewan during November numbered 6, all bushmen bound for employment in the Prince Albert zone. Of these, 4 were shipped by the Prince Albert office and 2 by the Saskatoon office. Alberta transfers at the reduced rate during November were 21 in number and effected by the Edmonton office which was instrumental in the despatch of 13 bush workers, 3 mine employees, 2 fishermen, one farm hand, one farm housekeeper and one millwright to various sections within the Edmonton zone. Workers taking advantage of the Employment Service reduced rate in British Columbia during November totalled 5 and included 4 mine workers and one cook-general who were granted certificates at the Vancouver office for transportation to employment at points within the Vancouver zone.

Of the 454 persons who travelled at the Employment Service reduced transportation rate during November, 180 were carried by the Canadian National Railways, 268 by the Canadian Pacific Railway, 4 by the Pacific Great Eastern Railway and 2 by the Northern Alberta Railway.

(4) Building Permits Issued in Canada During November, 1938

The aggregate value of the construction represented by the building permits issued by 58 cities during November was $4,687,296. This was a decrease of $4,900,166 or 51·1 per cent, as compared with the October figure of $9,587,462, while the total was also lower by $237,906, or 4·8 per cent, than in November, 1937, when the estimated value of the building authorized by these cities was $4,925,202. With this exception, the November, 1938, aggregate was the largest for that month in any year since 1931.

The value of the building permits taken out in the first eleven months of the present year was $57,384,055; this was higher than the aggregate of $52,288,022 reported in the period, January-November, 1937, and also substantially exceeded the total for the same months in any other year since 1931. However, the cumulative total in each of the last seven years has been very much lower than in preceding years since 1919; the wholesale prices of building materials have recently been lower than in the same period of 1937, although they continue higher than in any of the years, 1931-1936.

Some 50 cities furnished detailed statistics for November 1, 1938, showing that they had issued nearly 400 permits for dwellings estimated to cost more than $1,570,000, and about 1,800 permits for other buildings estimated at over $3,000,000. There were also two engineering projects, valued at $30,000. During October, permits were issued for the erection of about 500 dwellings and 2,500 other buildings, estimated to cost approximately $1,600,000 and $7,000,000, respectively.

Nova Scotia and New Brunswick reported increases over October in the value of the building authorized; these gains amounted to $297,683, or 384·3 per cent and $8,267, or 27·3 per cent, respectively. Reductions in this comparison were indicated in the remaining provinces, that of $2,538,767, or 55·8 per cent, in Ontario being most pronounced.

As compared with November, 1937, Prince Edward Island, Nova Scotia, Quebec and Manitoba showed increases, of which the greatest was that of $181,655 or 93·9 per cent in Nova Scotia. Of the declines elsewhere reported, those of $612,859, or 23·3 per cent, in Ontario and $328,300 or 46·6 per cent, in British Columbia were largest.

Of the four most populous centres, Toronto recorded a substantial increase in the value of the building authorized in November as compared with the preceding month, but the total was lower than in November of last

year. In Montreal and Winnipeg, the aggregate value was lower than in October, but higher than in November of last year, while Vancouver showed a reduction in both comparisons. Of the other centres, Halifax, New Glasgow, Fredericton, Sherbrooke, Westmount, Chatham, Guelph, Hamilton, Oshawa, Sault Ste. Marie and North Vancouver reported higher building authorizations than in either the preceding month or the same month of 1937.

The following table shows the value of the building authorized by 58 cities during November and in the first eleven months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The January-November index numbers of wholesale prices of building materials in these years are also given (average 1926=100).

Year	Value of permits issued in November	Value of permits issued in first eleven months	Indexes of value of permits issued in first eleven months (1926=100)	Average indexes of wholesale prices of building materials in first eleven months (Average 1926=100)
	$	$		
1938	4,687,296	57,384,055	39·6	90·0
1937	4,925,202	52,288,022	36·1	94·3
1936	3,097,508	38,043,527	26·3	85·1
1935	3,447,653	44,158,767	30·5	81·2
1934	2,622,534	24,935,704	17·2	82·7
1933	1,624,138	19,793,204	13·7	78·1
1932	2,553,373	40,750,142	28·1	77·4
1931	7,282,117	104,327,739	72·0	82·1
1930	11,821,292	150,939,044	104·2	91·4
1929	16,171,400	220,255,867	152·0	99·1
1928	15,830,836	203,010,555	140·1	96·9
1927	12,857,622	172,858,176	119·3	96·2
1926	9,975,451	144,877,789	100·0	100·1
1925	7,988,765	117,665,590	81·2	102·9
1924	10,212,908	120,119,829	82·9	107·1
1923	8,228,206	126,547,365	87·3	111·8
1922	11,182,030	138,698,005	95·7	108·6
1921	12,192,414	111,257,084	76·8	123·9
1920	5,627,949	112,175,268	77·4	144·3

The aggregate for the first eleven months of this year was higher by 11 per cent than in 1937, being also greater than in the same period of any other year since 1931. The average index number of wholesale prices of building materials, though lower than in 1937, was higher than in preceding years since 1930.

The accompanying table gives the value of the building permits issued by 58 cities in October and November, 1938, and November, 1937. The 35 cities for which records are available since 1910 are marked thus "*."

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF DECEMBER, 1938

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of December was reported by the Superintendents of the Employment Service to be as follows:—

Apart from regular chores and the delivery of firewood and of farm products to local markets, there was no active farming in the Maritimes. Apple shipments to the United Kingdom continued, but in much smaller quantities. The largest single shipment ever made, however, consisting of 33,000 barrels, was sent to Germany. A few logging camps had opened, but no call for lumbermen had been reported thus far, as colder weather was needed to make conditions in the woods more favourable. Fishing was somewhat less, owing to the holiday season, as well as to heavy gales, which resulted in loss of equipment. Coal mines in the New Glasgow area operated from 2¼ to 5 days per week, while those in Cape Breton and vicinity worked 3 to 6 days. Manufacturing was quieter and production somewhat curtailed, as factories which had been working overtime during the Christmas rush returned to normal. Staff reductions likewise had been effected by several concerns and some idleness also was reported in the iron and steel industry. Little new construction, either building or highway, was in progress, although numerous men found employment in snow shovelling and road maintenance. Passenger and freight holiday traffic was exceptionally heavy, but wholesale and retail trade was quiet, after a busy Christmas season. The demand for domestics remained steady in the Women's Division.

Farming in the Province of Quebec was very quiet and there was no improvement in logging, except at Chicoutimi, where pulpwood cutting was more active. Placements in mining at Val d'Or were normal, but there were no new prospects. Manufacturing plants at Chicoutimi, with one exception, were operating at full capacity. The production of papermills at Port Alfred had been reduced, but, at Hull, manufacturing concerns were very busy. Other localities, where factories were active, were LaTuque, Matane and Sherbrooke, but, at Rouyn, the situation was very quiet and at Val d'Or no advancement was likely to take place before spring. At Montreal, conditions in auto trades and oil refineries were better. Building, as well as highway construction, provided employment for a great number of workers, due to numerous and varied projects under way, although, at Montreal and LaTuque, building activities recently had decreased slightly. Trade during the holidays was good. No improvement, however, was noted in services.

The call for farm hands in Ontario was light, with more than the adequate supply of men available. Logging was similarly quiet and not many men, other than those for replacements of pulpwood cutters and teamsters, were sent out. In the North Bay zone a survey made revealed the fact that very few bushworkers absented themselves from the logging camps at Christmas. Such an unusual condition could only be explained by the fear of losing present employment, with the knowledge of lack of opportunities in other fields. A scarcity was also noted in some camps of experts—such as senders and top loaders,—necessary for the proper and efficient handling of a log haul and, therefore, it was felt that a demand for these men would be made later. Mining was very quiet. Manufacturing continued at about the same level, as no marked changes were recorded. Iron and steel establishments were still below production and staff levels, but textiles, for the most part, maintained a fairly steady output, although requiring no additional workers. Auto factories remained slow, but would soon be needing more help. Numerous other industries had closed down for Christmas week, or were working part-time with reduced staffs. Building was at rather a low ebb, except for government contracts. Highway work, also, had been reduced during the winter months. Railways, which had been busy with increased holiday traffic, were slacker, although recent heavy snow falls had provided work for additional shovellers on their yard crews. Trade had been good over the holidays. In the women's section, short time orders for all classes of house, day, hotel and restaurant workers during the Christmas season likewise were numerous, but the industrial and clerical sections were quiet. In the regular domestic field, however, the demand for cooks and cooks-general was well maintained.

Very few requests for farm help, other than those for the Farm Placement Plan, were listed in the Prairie Provinces. Extremely cold weather had also prevented men from being sent out into the country. Logging showed a little more activity, but was still much below normal. Improvement in coal mining was noticeable, as more orders had

come into the mines during the colder period. Smaller pick mines at Drumheller, which depended on local trade, also reported greatly increased business. Manufacturing was dull. Building construction was quiet, but snow clearance provided work for a number of unemployed. Wholesale and retail trade, which, on the whole, had been quite good during the holidays, was duller and extra staffs required for the Christmas rush were being laid off. Where trained domestics were available, they were much in demand for household service, but placements of female workers in the country showed a decrease.

There was no demand for farm help in British Columbia, except for the Farm Placement Plan. A snowfall had proven very beneficial to the orchards and apple packers were working periodically to fill orders. Nearly all logging camps remained closed and the number of applicants in this group was steadily increasing; sawmills also were not so busy. Mining showed little change. Factories in Nelson were operating on full time. Due to cold weather, all outside repairs and additions to business and residential properties had ceased, although some inside work was in progress. At Prince Rupert, a few extra men had been taken on at the shipyards, but the waterfront was quiet and, at Victoria, some longshore work was available. Trade showed the usual after-Christmas slackness. Transportation facilities, by bus and boat during the holidays, were taxed to the utmost and hotels and restaurants were also busy. Many of the seasonal commercial and postal staffs had been reduced, the former in many instances affecting the younger groups and in the women's department country orders were difficult to fill, as were also city vacancies requiring experienced help.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, December, 1938, summarized the employment situation as follows:—

Employment showed a decline between October 17 and November 14, partly due to seasonal causes. There was a decline in building and public works contracting, agriculture and horticulture, coal mining, iron and steel manufacture, hotel and boarding house service, the transport and distributive trades, and entertainments, sport, etc. On the other hand, employment improved in the cotton, woollen and worsted, and other textile industries, metal goods manufacture, and the motor vehicle, cycle and aircraft industry.

It is provisionally estimated that at November 14, 1938, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,258,000. This was 36,000 less than at October 17, 1938, and on a comparable basis, 150,000 less than at November 15, 1937.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at November 14, 1938, was 12·7 as compared with 12·3 at October 17. For November 15, 1937, the percentage (which excludes the classes brought into insurance in April, 1938) was 10·6. For persons insured under the general scheme the corresponding percentages were 13·0 at November 14, 1938, 12·7 at October 17, 1938, and 10·9 at November 15, 1937. For persons within the agricultural scheme the percentages were 5·7, 4·3 and 5·0 respectively.

At November 14, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,455,668 wholly unemployed, 305,496 temporarily stopped, and 66,939 normally in casual employment, making a total of 1,828,103; this was 46,876 more than at October 17, 1938, and 328,900 more than at November 15, 1937.

The total of 1,828,103 persons on the registers in Great Britain at November 14, 1938, included 1,060,693 persons with claims admitted for insurance benefit, 546,217 with applications authorized for unemployment allowances, 48,393 persons with applications for insurance benefit or unemployment allowances under consideration, and 172,800 other persons, of whom 40,935 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at November 14, 1938, was 1,911,293, as compared with 1,862,662 at October 17, 1938, and 1,579,914 at November 15, 1937.

United States

On December 22, 1938, Miss Frances Perkins, Secretary of Labor, announced that employment in non-agricultural industries continued to rise during November, contrary to the usual seasonal trend. Miss Perkins stated that reemployment since last June, including the November gain of approximately 30,000 workers, had returned about 1,000,000 persons to work. It was emphasized in the announcement that these figures were exclusive of employees on projects of the Works Progress

Administration and other Federal emergency agencies.

Approximately 150,000 workers found employment in November in retail and wholesale trade, factories, bituminous coal and metal mines, and brokerage offices. These gains were partially offset by declines, largely seasonal, on the railroads, which laid off 16,000 men, in water transportation, public and private building construction, in service and other non-manufacturing industries, and in casual work.

Factory employment and pay rolls continued to rise. The gain of 1·2 per cent in employment indicates the re-employment of approximately 90,000 factory workers between mid-October and mid-November. The rise was particularly significant as an indication of recovery in industrial activity, since factory employment usually declines by 1·5 per cent and pay rolls by 3·2 per cent from October to November. The uninterrupted succession of increases since June has raised the Bureau of Labor Statistics' factory employment index for November to 90·6 per cent of the 1923-25 average, the highest level since December 1937. As compared with November of last year, employment was 10·4 per cent lower.

The November gain of 0·2 per cent in factory pay rolls represents an increase of $350,000 in weekly pay checks of factory wage earners, and is noteworthy not only because it is contraseasonal but also because the national observance of Armistice Day for the first time would be expected to result in a relatively greater decline than in previous years. The Bureau's factory pay-roll index for November (84·1 per cent of the 1923-25 average), stands above the level of any month since December 1937, and is 9·5 per cent below the level of last November.

Fifty-six of the 87 manufacturing industries surveyed reported employment gains from October to November and 43 reported larger pay rolls. The major portion of the increase was in the durable goods group, in which employment rose by 3·8 per cent. In the non-durable goods group, employment declined 0·7 per cent, largely because of seasonal recessions in canning, in the clothing and shoe industries, and in confectionery.

The more important manufacturing industries in which substantial employment gains were shown and the estimated increase in number of workers were: automobiles (62,500), steel mills (17,100), cotton goods (12,400), woollen and worsted goods (12,300), electrical machinery (5,500), foundries and machine shops (5,100), meat packing (4,300), wirework (3,300), and radios (3,200).

Seasonal curtailments, resulting in substantial declines in employment were reported by the following manufacturing industries: canning (35,800), women's clothing (16,100), shoes (13,400), men's clothing (10,800), sawmills (6,200), millinery (5,600), stoves (2,100), and confectionery (1,700).

Among the non-manufacturing industries, employment in retail stores which showed the largest increase (1·1 per cent) accounted for 36,800 additional employees. Department stores, variety and general merchandise stores and mail-order houses taken as a group, showed a seasonal employment gain of 4·9 per cent. Wholesale trade establishments expanded employment in November, the gain of 0·9 per cent indicating 14,400 additional workers.

Employment in the private building construction industry decreased less than seasonally, by 4·1 per cent, and pay rolls declined 7·8 per cent, according to reports received from 13,057 contractors employing over 108,000 workers. All parts of the country reported declines with the exception of a small increase in the East South Central States. The reports received do not cover public construction projects financed by the Public Works Administration, the Reconstruction Finance Corporation, or by regular appropriations of the Federal, State, and local governments. In public construction there was a decline in employment, largely because of seasonal reductions in work on roads.

Industrial Relations in Great Britain is the title of a book by J. Henry Richardson, M.A., Ph.D., published recently by the International Labour Office. The report is a new edition to a study first published in 1933 and forms part of a program of research on industrial relations undertaken by the I.L.O. in accordance with a resolution adopted in 1928 by the International Labour Conference.

Industrial Injuries to Women and Men, 1932 to 1934 is the title of a bulletin published recently by the Women's Bureau of the United States Department of Labor.

In a letter transmitting the report to the Secretary of Labor, Miss Mary Anderson, Director of the Women's Bureau, states that industrial injuries to women "were an increasingly large part of the accident total in 1932 and 1933. Though in 1934, with the employment upturn in heavy industries, injuries increased more rapidly to men than to women, more than 4,000 women were injured in each of the important industrial States of Massachusetts, Missouri, New York, and Pennsylvania (1933), and in the 10 States reporting extent of disability about 150 women lost their lives in industry."

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is

vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Construction of a movable highway bridge over the entrance to Princess Louise Basin, Quebec Harbour, P.Q. Name of contractors, Dominion Bridge Co., Montreal, P.Q. Date of contract, December 21, 1938. Amount of contract, approximately $115,104.82. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters & joiners	0 60
Cement finishers	0 55
Cement & concrete mixer operators:	
Steam	0 60
Gasoline or Electric	0 55
Compressor operators (gas or elec.)	0 55
Crane operators (steam, gas. or elec.)	0 70
Compressor operators (steam)	0 60
Drill runners	0 50
Electricians	0 65
Engineers, operating, steam:	
Single or double drum	0 60
Three or more drums	0 70
Engineers on steel erection	0 75
Firemen, stationary	0 45
Hoist operators (gas or elec.)	0 55
Labourers	0 40
Machinists	0 65
Motor truck drivers	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 60
Painters (spray)	0 65
Painters & glaziers	0 55
Pipe fitters (surface—temp. work)	0 55
Pipe layers, caulkers & solderers	0 50
Conduit layers (steel or tile)	0 50

	Per hour
Plumbers & steamfitters	0 65
Pumpmen	0 50
Riggers (general)	0 50
Roofers—composition	0 50
Roofers—felt & gravel: patent	0 45
Rodmen—reinforcing steel	0 50
Sheet metal workers	0 65
Structural steel workers	0 75
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 50
Tractor operators	0 50
Watchmen	0 35
Welders and burners—acetylene or elec	0 60
Welders and burners—on steel erection	0 75

DEPARTMENT OF NATIONAL DEFENCE

Reconstruction of St. John Gate at Quebec, P.Q. Name of contractor, Mr. Emile Cote, Quebec, P.Q. Date of contract, December 5, 1938. Amount of contract, $33,973. A fair wages schedule was included in the contract as follows:

	Per hour
Blacksmiths	0 60
Blacksmiths' Helpers	0 45
Brick and Hollow Tile Layers	0 80
Brick and Hollow Tile Layers' Helpers (mixing and tempering mortar)	0 45
Cement Finishers	0 55
Cement and Concrete Mixer Operators—Gas or electric	0 55
Compressor Operators—gas or elec	0 55
Drivers	0 40
Drivers, horse and cart	0 55
Drivers, team and wagon	0 65
Electricians (inside wiremen)	0 65
Engineers on Steel Erection	0 75
Firemen—Stationary	0 45
Hoist Operators—gas or electric	0 55
Stonemasons	0 80
Stonemasons' Helpers (mixing and tempering mortar)	0 45
Motor Truck Driver	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Labourers	0 40
Ornamental Iron Workers	0 60
Painters	0 65
Rodmen-Reinforced steel	0 50
Sheet Metal Workers	0 65
Stonecutters	0 70
Structural Steel Workers	0 75
Watchman	0 35

Construction of a road to the Rifle Range at St. Bruno, P.Q. Name of contractor, Mr. J. F. R. Leduc, Longueuil, P.Q. Date of contract, December 1, 1938. Amount of contract, $3,750. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Blacksmiths	0 60
Blacksmiths' Helpers	0 45
Dragline operators (steam)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Driver, team and wagon	0 75
Drivers	0 40
Driver, team and scraper	0 75
Driver, team and plow	0 75
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Road grader operator:	
Horse-drawn	0 45
Including team	0 80
Gasoline	0 50
Steam shovel engineer	0 85
Steam shovel craneman	0 65
Steam shovel firemen	0 55
Tractor operators-gasoline	0 50
Watchman	0 35

Construction of earth traverses around Group III Magazine, Bedford Basin, N.S. Name of contractor, Mr. R. M. Hall, Halifax, N.S. Date of contract, December 28, 1938. Amount of contract, $6,300. A fair wages schedule was included in the contract as follows:

	Per hour
Blacksmith	$0 70
Blacksmiths' Helpers	0 45
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
Shovel operators (gas.)	0 85
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Watchmen	0 35

Conversion of power lines to underground cable circuits at the Joint Service Magazine, Bedford, N.S. Name of contractors, Arthur & Conn, Ltd., Halifax, N.S. Date of contract, November 30, 1938. Amount of contract, $7,200. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 70
Blacksmiths' helpers	0 45
Carpenters and joiners	0 65
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians	0 85
Labourers	0 40
Motor truck driver	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
Painters (spray)	0 65
Painters and glaziers	0 55
Plumbers and steamfitters	0 85
Watchman	0 35

Construction of a new stores and workshop building, alterations and additions to two existing buildings, and the construction of a concrete apron and slipway at the Royal Canadian Air Force Station, Aliford Bay, B.C. Name of contractors, Northern Construction Co. and J. W. Stewart Limited and E. J. Ryan Contracting Co., Ltd., Vancouver, B.C. Date of contract, December 29, 1938. Amount of contract, $119,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 65
Blacksmith's helpers	0 45
Brick and hollow tile layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operator:	
Steam	0 65
Gasoline or electric	0 50
Compressor operator (gasoline or electric)	0 50
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	20 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	7 00
	Per hour
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 45
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	1 12½
Electricians (inside wiremen)	0 75
Firemen, stationary	0 45
Insulation workers (asbestos and cork)	0 75
Labourers	0 45
Lathers, metal	0 70
Lathers, wood	0 65
Machinists	0 70
Motor truck driver	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 75
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Powdermen	0 50
Roofers, felt and gravel: patent	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 65
Shovel operators—gas	1 12½
Steam shovel engineers	1 12½
Steam shovel cranemen	0 90
Steam shovel cranemen	0 74½
Structural steel workers	1 12½
Welders on steel erection	1 12½
Watchman	0 40

Construction of a wharf and dredging work at Presqu'ile Point, Northumberland Co., Ont. Name of contractors, Russell Construction Co., Ltd., Toronto, Ont. Date of contract, December 2, 1938. Amount of contract, approximately $20,794.36. The General Fair Wages Clause was included in the contract for the dredging work, and a fair wages schedule in wharf contract as follows:—

	Per hour
Carpenters and joiners	$0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Compressor operators (gas. or elec.)	0 45
Crane operators (steam, gas or elec.)	0 70
	Per day
Divers (full day's pay to be allowed whether employed ful or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time	5 00
	Per hour
Drivers	0 35
Drivers, horse and cart	0 50
Driver, team and wagon	0 65
Engineers, operating, steam:	
single or double drum	0 65
three or more drums	0 75
Firemen, stationary	0 40
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
5 tons	2 90
Painters and glaziers	0 55
Pile driver foremen	0 75
Pile driver engineers	0 65
Pile driver firemen	0 40
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of an extension to the wharf at Winnipeg, Man. Name of contractor, Mr. Wm. J. Holmes, Winnipeg, Man. Date of contract, October 18, 1938. Amount of contract, approximately $8,885.38. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmith's helper	0 45
Carpenters	0 85
Engineer, operating, steam:	
Single or double drum	0 90
Three or more drums	0 95
Hoist operator (gas. or elec.)	0 55
Labourer	0 40
Pile driver foreman	1 05
Pile driver derrick engineer	0 95
Driver, team and wagon	0 80
Driver, horse or cart	0 55
Driver	0 40
Timberman and cribmen (measuring, scribing and, by the use of the axe, adze auger, etc., cutting and fitting timber)	0 60
Watchman	0 35
Motor truck driver	0 45
Motor truck driver & truck:	
1 to 2 tons	1 45
3 tons	1 95

Construction of a public building at Armstrong, B.C. Name of contractors, Pacific Engineers, Ltd., Vancouver, B.C. Date of contract, November 22, 1938. Amount of contract, $17,600 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Labourers	0 40
Lathers, metal	0 70
Lathers, wood	0 65

Construction of 18 sets of fixed aerial fittings for Wapiti aircraft. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, December 8, 1938. Amount of contract, $1,053.72. The preceding fair wages schedule was also included in this contract.

Constructing of winter landing gear for Wapiti aircraft. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, December 29, 1938. Amount of contract, $2,642.11. The preceding fair wages schedule was also included in this contract.

The major reconditioning of fuselage assembly of Fairchild 71 monoplane. Name of contractors, Fairchild Aircraft Ltd., Longueuil, P.Q. Date of contract, December 29, 1938. Amount of contract, $3,552.25. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Fishing

VANCOUVER, B.C.—CERTAIN WHOLESALE FISH DEALERS AND THE PACIFIC COAST FISHERMEN'S UNION (GILLNET HERRING FISHERMEN).

Agreement reached following strike reported on page 33 of this issue. Agreement to be in effect from November 23, 1938, to September 30, 1939, and covers the sale of gillnet herring for kippering purposes.

The fish dealers agree to pay a guaranteed minimum price of two cents per pound for herring used for kippering purposes only, and each dealer agrees to take a specified minimum amount of fish daily for five days weekly or to give 24 hours notice for any day he cannot take that amount. Over and above these amounts for freezing 1½ cents per pound. The minimum price does not affect the price paid to fishermen for herring to be used on the fresh fish market.

The fish dealers agree not to purchase any picked seine herring or to place picked seine herring on the market while sufficient gillnet herring of suitable size and quality are available.

Any minor disputes arising are to be referred to a joint committee for settlement.

Transportation and Public Utilties: Local Transportation

OTTAWA, ONTARIO.—A CERTAIN TRUCKING FIRM AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES, AUTOMOTIVE TRANSPORT SECTION (TRUCK DRIVERS AND MECHANICS).

Agreement to be in effect from July 1, 1938, to December 1, 1938, and thereafter, subject to notice.

No discrimination to be shown employees on account of union membership, nor for serving on employees' committees.

Hours: except in case of emergency, employees not to be required to work more than 60 hours in any week; those engaged in pick-up and delivery service not to be required to work beyond a spread of 12 hours within a 24 hour period; employees will not be required to take more than one hour for meal period. Employees called for duty to be paid for all time held at the regular pay, with a minimum of three hours' pay for each call.

Minimum hourly wage rates: drivers—35 cents during first six months, 40 cents thereafter; mechanics 50 cents.

Qualified employees senior in service to be given preference in promotion. In case of reduction in staff or taking on additional staff, qualified employees who are senior in service to be given preference of employment.

Employees will not be required to operate equipment that is unsafe or dangerous.

Where wages, hours and conditions are more favourable to the employee than those of this agreement, such wages, hours and conditions are not to be changed to adversely affect the employee.

Disputes which cannot be settled between the parties will be referred to arbitration.

Service: Business and Personal

VANCOUVER, B.C.—CERTAIN HOTELS AND RESTAURANTS AND THE HOTEL AND RESTAURANT EMPLOYEES INTERNATIONAL ALLIANCE AND BARTENDERS' INTERNATIONAL LEAGUE, No. 28 (COOKS AND WAITERS).

Agreement to be in effect from July 1, 1938 to July 1, 1939.

Only union members to be employed, if available. No discrimination against employees on account of union activities.

Hours: 8 per day, 6 days per week, a 48 hour week. No shift to be split more than once and all split shifts shall be worked within a spread of 12 hours.

Overtime: 45 cents per hour.

Wages per week in hotels and restaurants: counter men and women and cashiers $14 for week of 40 to 48 hours, $12 for week of 6 days, 6 hours per day; dining room men and women $12 per week of 40 to 48 hours, $11.10 when 6 hour day; busgirls and busboys $10.40 per week of 40 to 48 hours. Any of the above workers, employed less than 6 hours per day to be paid 35 cents per hour, with a minimum of 4 hours pay in any day. Those who work four days or less per week to be paid $2.50 for 8 hour day, $2 for 6 hour day, $1.50 for 4 hour day. Weekly wages for cooks, etc.: chef or first cook $25, night chef $22.50, second cook or fry cook $20, butcher and pastry cook $18, vegetable cook and pantry man $14, assistant pantry man and dishwashers $12, miscellaneous kitchen help $10.40.

Wages per week in cafeterias (skidroad restaurants): dining room and counter men and women $15 per week of 40 to 48 hours, $12 with 6 hour day; any of the above workers employed less than 6 hours per day to be paid 35 cents per hour; for cooks $21, baker $18, dishwashers $12, miscellaneous kitchen help $10.40.

Meals to be supplied employees with no deduction for wages: those working 7 hours per day and over or six hours with split shift, 3 meals; those working six hours per day straight shift, or less than six hours split shift, two meals; those working less than 6 hours straight shift, one meal.

All uniforms to be supplied and laundered free of cost to the employee.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938 issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agree-

ments affecting retail store employees at Quebec, garage and service station employees at Sherbrooke, barbers at Joliette and funeral undertakers at Montreal; amendments to the agreements affecting bakers at Quebec, can and metal utensil manufacturing in the province, building trades in Chicoutimi and Lake St. John district, and clerks at Magog; cancellation of agreements affecting bricklayers, plasterers and painters at Three Rivers, and clerks at Jonquière, all of which are summarized below. In addition, requests for the extension of new agreements affecting fine glove cutters, blockers and operators were published in the *Quebec Official Gazette* of December 10.

Manufacturing: Vegetable Foods

BAKERS, QUEBEC.—An Order in Council, approved December 7 and published in the *Quebec Official Gazette*, December 17, amends the previous Orders in Council for this trade (LABOUR GAZETTE, December, 1937, page 1385, and April, 1938, page 451) by excluding from the territorial jurisdiction the Island of Orleans.

Manufacturing: Metal Products

CAN, CONTAINER AND METAL UTENSIL MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, makes several amendments to the previous Order in Council for this industry (LABOUR GAZETTE, November, 1938, page 1298) which do not affect the summary as given in the LABOUR GAZETTE except that it is provided there shall be no reduction in wages unless authorized by the joint committee after studying each case.

Construction: Buildings and Structures

BUILDING TRADES, CHICOUTIMI.—An Order in Council, approved December 6, and published in the *Quebec Official Gazette*, December 17, amends the previous Order in Council for these trades (LABOUR GAZETTE, January, 1937, page 103) by providing that overtime not exceeding two hours per day may be worked at regular wage rates between April 1 and October 31; and by also providing that for trades requiring an apprenticeship, one apprentice allowed on a job employing one to five journeymen, and on larger jobs, one apprentice for each five journeymen.

BRICKLAYERS, MASONS AND PLASTERERS, THREE RIVERS.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, cancels from July 9, 1938, all the previous Orders in Council for these trades which were summarized in the LABOUR GAZETTE, October, 1934, page 912, March, 1935, page 241, August, 1935, page 733, and October, 1935, page 953. For the city of Three Rivers these trades are now included in the building trades agreement (LABOUR GAZETTE, August, 1938, page 944).

PAINTERS, THREE RIVERS.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, cancels from July 9, 1938, all the previous Orders in Council for this trade (LABOUR GAZETTE, January, 1935, page 26, August, 1935, page 733). For the city of Three Rivers, this trade is now included in the building trades agreement (LABOUR GAZETTE, August, 1938, page 944).

Trade

RETAIL STORE EMPLOYEES, QUEBEC.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, makes obligatory the terms of an agreement between La Section de la Nouveauté de l'Association des Marchands Détaillants du Canada, Inc. and le Syndicat National Catholique de la Nouveauté du district de Quebec.

The agreement applies to most of the retail trade in the city of Quebec except food, drug, jewellery and hardware stores. It is to be in effect from December 17, 1938, to December 16, 1939.

Hours: 49¼ per week, distributed between 8 a.m. and 6 p.m., except on Saturdays and eves of holidays when stores may remain open till 10 p.m. Every employee to have 1½ hours off for meals. No extra pay for evening work between December 20 and 31. No deduction from pay for holidays stores are closed. Delivery men and their helpers may work 60 hours per week at regular weekly rate.

Overtime: except for department heads and floor walkers, employees to be paid for overtime work up to 54 hours' work in the week at regular rate; for all time in excess of 54 hours in any week, time and one-half; work on Sundays, double time.

Minimum weekly wages: department head (male) $30 if annual sales of his department are $20,000 or more, $25 if annual sales are less; department head (woman) $25 if annual sales of her department are $20,000 or more, $15 if annual sales are less; floor walker $25, delivery man $18, messenger $6, errand boy $4.80; clerks (men)—60 per cent to be paid at least $20, another 25 per cent at least $15, the remaining 15 per cent $8; clerks (women)—60 per cent to be paid at least $11.50, another 25 per cent at least $9.60, and the remaining 15 per cent at least $7.25. Minimum hourly wage rates: extra clerks (men) 40 cents; extra clerks (women) 25 cents; supernumerary clerks (those taken on as additional help for work between November 1 and December 31) 25 cents for men, 15 cents for women. Minimum weekly wage rates: tradesmen $21, apprentice tradesmen $8; general work—senior employee $15, junior employee $8; night watchmen $18.

RETAIL CLERKS, JONQUIÈRE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA.—An Order in Council approved December 7, and published in the *Quebec Official Gazette*, December 17,

repeals the previous Orders in Council for these workers (LABOUR GAZETTE, December, 1937, page 1388, March, 1938, page 335, and October, page 1173).

RETAIL CLERKS, MAGOG.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, amends the previous Orders in Council for these workers (LABOUR GAZETTE, October, 1938, page 1173) by providing that stores may remain open till 10 p.m. on the eve of holidays and on the evening of pay days of the Dominion Textile Company.

BARBERS AND HAIRDRESSERS, JOLIETTE.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, makes obligatory the terms of an agreement between l'Association des Barbiers et Coiffeurs de Joliette, Berthier, l'Assomption et Montcalm (The Association of Barbers and Hairdressers of Joliette, Berthier, l'Assomption and Montcalm) and Le Syndicat Catholique et National des Employés Barbiers-Coiffeurs et Coiffeuses des Comtés de Joliette, Berthier, l'Assomption et Montcalm (The National Catholic Union of Employed Barbers and Hairdressers of the Counties of Joliette, Berthier, l'Assomption and Montcalm).

The Order in Council covers barbers and hairdressers in the towns of Joliette, l'Assomption, Laurentides and Berthier and the counties of Joliette, Montcalm, l'Assomption and Berthier, and is in effect from December 17, 1938, to December 16, 1939.

Hours: shops may be open at 7 a.m. every day and must close at 6 p.m. on Monday, 8 p.m. on Tuesday, Wednesday and Thursday, 9 p.m. on Friday, 11 p.m. on Saturday and eves of holidays; employees to have one hour off for dinner and one hour for supper; barbers and hairdressers to have six consecutive hours off during the week except the week when a holiday occurs.

Minimum wage rates: barbers and male hairdressers $12 per week plus 50 per cent of receipts in excess of $20 made during the week, from which $1.50 per week may be charged for lodging and $3.50 for board; female hairdressers $10 per week; extra employees 40 cents per hour. Those receiving higher than these wages when agreement made may not have their wage rates reduced. The joint committee may revise the wage rate for a handicapped worker.

A schedule of minimum prices which must be charged customers for each piece of work is included in the agreement.

Not more than one apprentice allowed in any shop, apprenticeship to consist of six months at an approved school and 2½ years in a hairdressing or beauty parlour, for which they are to be paid from $7.50 to $12 per week.

69800—7½

GARAGE AND SERVICE STATION EMPLOYEES, SHERBROOKE.—An Order in Council, approved December 7, and published in the *Quebec Official Gazette*, December 17, makes obligatory the terms of an agreement between la Section de l'Automobile des Cantons de l'Est de l'Association des Marchands Détaillants du Canada (the Automobile Section of the Eastern Townships, of the Retail Merchants Association of Canada) and l'Association des Employés de l'Auto-voiture des Cantons de l'Est (The Association of Auto Vehicle Employees of the Eastern Townships).

The Order in Council covers garage and gasoline service stations in the city of Sherbrooke and is to be in effect from December 17, 1938, to August 1, 1939, and if no new Order in Council is then made, will continue to December 16, 1939.

Hours: for journeymen and apprentices, 9 per day, 54 per week; for all other employees, 60 per week except for men on the night shift who may work 72 hours per week. Only service men and night watchmen may work on Sundays, Christmas or New Year's Day. Every employee entitled to a weekly day of rest (24 hours).

Minimum hourly wage rates for day work: journeymen electrician, blacksmith, machinist, mechanic, glazier, automobile painter, body man, upholsterer, radiator repairer, welder—first class 45 cents, second class 40 cents, third class 35 cents; apprentices to above trades—from 10 cents during first six months to 25 cents for third year; service man (journeymen) 20 cents, service man (apprentice) 10 cents first year, 15 cents second year, night watchman 20 cents; employee of auto parts department from 10 cents during first six months to 25 cents during third year; office employees (male or female) 22½ cents for first class, 18 cents for second class, 15 cents for third class. For work between 7 p.m. and 11 p.m. the above minimum rates must be increased 10 per cent, and for work between 11 p.m. and 7 a.m., by 50 per cent.

A schedule of minimum prices which must be charged customers for each piece of work is included in the agreement.

Unless 30 hours work in 6 days is guaranteed, any employee called to work to receive a minimum of four hours' pay.

One apprentice allowed for each two journeymen or service men, but establishments with only one journeyman or service man may have an apprentice.

FUNERAL UNDERTAKERS, MONTREAL.—An Order in Council, approved December 7 and published in the *Quebec Official Gazette*, December 17, makes binding for the Island of Montreal the terms of an agreement between La Section des Directeurs de Funérailles du district de Montréal de l'Association des Marchands Détaillants du Canada (The Funeral Directors Section of the district of Montreal of the Retail Merchants Association of Canada) and le Syndicat des Employés de Pompes Funèbres (The Union of Undertakers' Employees) from December 17, 1938, to December 16, 1939, and thereafter until a new agreement is approved.

Hours: the working week to be based on an average of 70 hours; for automobile mechanics and service men, hours are as provided in the garage and service station employees agreement (LABOUR GAZETTE, June, 1938, page 697, July, page 800, and November, page 1300).

Overtime: 50 per cent above the minimum wage rates.

Wages: embalmers—for those employed by the week, $25 per week, for others $5 for each embalming; extra employees 40 cents per hour with a minimum of $1.50 per call; mechanics and service men to be paid at same rates as provided in garage and service station employees agreement (LABOUR GAZETTE, June, page 697, July, page 800 and November, page 1300).

Vacation: after one year's service employees to be entitled to seven consecutive days' vacation.

Apprentice embalmers to serve an apprenticeship of six months during which no wages need be paid.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction: Buildings and Structures

BUILDING LABOURERS, OTTAWA.—An Order in Council, dated November 30, and published in *The Ontario Gazette,* December 10, with correction as published in the December 24 issue, makes binding in the city of Ottawa and adjacent suburban area the terms of a schedule for common labourers in the construction industry from December 20, 1938, "during pleasure."

The minimum wage rate for employees engaged in mixing mortar or carrying hods to be 45 cents per hour, and for all other work, 40 cents per hour. A special minimum rate of wages lower than these may be fixed by the advisory committee for any employee who is handicapped.

Service: Business and Personal

BARBERS, OTTAWA.—An Order in Council, dated November 30, 1938, and published in *The Ontario Gazette,* December 10, makes binding for the city of Ottawa (except that part lying east of the Rideau river) the terms of a schedule for barbers, to be in effect from November 7, 1938, "during pleasure."

This schedule is similar to the one previously in effect as summarized in the LABOUR GAZETTE, December, 1937, page 1390, with these exceptions:—

The minimum wage rates for those employed on Saturdays or the day before a holiday and on the previous evening only, $6 per week plus 60 per cent of proceeds in excess of $10 from the work of the employee; those employed from Saturday or the day before a holiday, $4 per day or part thereof, plus 60 per cent of proceeds in excess of $7 from the work of the employee; those employed on days other than Saturday or other than the day before a holiday, $3.25 per day or part thereof plus 60 per cent of proceeds in excess of $5.25 from the work of the employee. (These are decreases in wage rates for these part-time employees. The minimum price to be charged for a haircut is also reduced from 40 to 35 cents. For full-time employees the minimum rate continues at $25 per week or

$18 per week plus 60 per cent of proceeds in excess of $28.)

BARBERS, SMITHS FALLS.—An Order in Council, dated November 30, and published in *The Ontario Gazette,* December 10, makes binding for the town of Smiths Falls, the terms of a schedule of wages effective from December 20, 1938, "during pleasure."

Hours: the regular working period for all employers and employees are those during which barber shops are permitted to be open by municipal by-law, with no work on Sundays, on eight specified holidays, nor on Wednesdays after 12 noon.

Minimum wage rates for full time employees: $25 per week or (for those on commission) $18 per week plus 60 per cent of proceeds in excess of $28 from the work of the employee. Minimum rates are also set for part-time employees.

A scale of minimum prices which must be charged customers is also included.

Saskatchewan

Service: Business and Personal

BARBERS, WEYBURN.—An Order in Council, approved December 5, and published in *The Saskatchewan Gazette,* December 15, makes binding for the city of Weyburn a schedule of wages and hours for the barbering industry which is effective from December 25, 1938, "during pleasure."

The terms of this schedule are similar to those of the schedule previously in effect and summarized in the LABOUR GAZETTE, November, 1937, page 1277, with one change:

The wage rates for employed barbers is unchanged at $16 per week or 65 per cent of the amount taken in by the employee, whichever is greater. The weekly rate for master barbers is not now stated but all are governed by the minimum prices which must be charged customers. The 52-hour week remains in effect.

BEAUTY CULTURE INDUSTRY, WEYBURN.—An Order in Council, approved December 5, and published in *The Saskatchewan Gazette,* December 15, makes binding for the city of Weyburn a schedule of wages and hours for the beauty culture industry, which is to be in effect from December 25, 1938, "during pleasure."

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1937, page 1277, with an exception:

The wage rates for employees is unchanged at $13 per week of 48 hours or 50 per cent of proceeds, whichever is greater. The weekly rate for master beauticians is not now stated but all are governed by the minimum prices which must be charged customers.

BEAUTY CULTURE INDUSTRY, ROSETOWN.—An Order in Council, approved December 8, and published in *The Saskatchewan Gazette,* December 15, cancels the previous Order in Council for this industry (LABOUR GAZETTE, October, 1938, page 1177).

Alberta

Logging

LUMBERING INDUSTRY, FLATBUSH, CHISHOLM, SPURFIELD AND FAUST ZONES.—An Order in Council, dated December 13, and published in *The Alberta Gazette,* December 15, makes binding the terms of a schedule of wages and hours in the above zone from December 25, 1938, to May 10, 1939.

The schedule applies to all employees of sawmills, planing mills, box factories, woodworking plants, logging and railway tie contractors.

Hours: 10 per day, 60 per week, except for cooks, etc., night watchmen and barn bosses, blacksmiths, engineers, teamsters, truck drivers and millwrights, blacksmiths' helpers, lake and river drivers, tractor drivers, conductors, firemen, foremen and clerks.

Minimum monthly wages to be paid in addition to board and lodging: cooks $50 or $75 (depending on size of camp); assistant cooks $35; blacksmiths, engineers and foremen $50; truck drivers $45; edgermen $40; cross-cut filers, tractor drivers and canters $35; scalers and tallymen $32.50; top loaders, tail sawyers, trimmermen, handymen and barn bosses $30; sawyers $27; teamsters, skidders, roadmen, swampers, bull cooks, cookees, labourers, shipping and yard men $26; planermen $50. Log cutters may be employed on contract or piecework at not less than 3 cents per log. Those engaged on a piecework basis may be charged an amount not exceeding $1 per day for suitable board and lodging, or 35 cents per single meal.

Manufacturing: Miscellaneous Wood Products

SAW-MILLING, FLATBUSH, CHISHOLM, SPURFIELD AND FAUST ZONES.—Employees of sawmills are included in the schedule summarized above under "Logging."

Construction: Buildings and Structures

PAINTERS, EDMONTON.—An Order in Council dated December 8, and published in *The Alberta Gazette,* December 15, makes binding the terms of a schedule for the painting, decorating, paperhanging and glazing industry in the city of Edmonton and within 10 miles of the post office, from December 25, 1938, to April 10, 1939.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. In case of a night shift, 8 hours' pay for 7½ hours' work.

Overtime: time and one-half; work on Saturday afternoons, Sundays and four specified holidays, double time.

Minimum wage rate for journeymen painters, decorators, paperhangers and glaziers, 75 cents per hour.

A *bona fide* contractor, recognized as such by the Edmonton Master Painters' Association, to be allowed one apprentice for each three journeymen employed, apprentices to be paid from 25 per cent of journeymen's rate during first year to 70 per cent during fourth year.

PRICES, RETAIL AND WHOLESALE, IN CANADA, DECEMBER, 1938

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight. The cost per week, in terms of retail prices, of a list of staple foods, fuel and rent entering into a family budget and the Dominion Bureau of Statistics weekly index number of wholesale prices were both slightly lower than in the previous month.

The cost per week of a list of twenty-nine staple foods entering into the budget for a family of five in terms of average retail prices in sixty-nine cities was $8.33 at the beginning of December as compared with $8.38 for November; $8.78 for December, 1937; $8.36 for December, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.38 for December, 1929. Changes were of a minor character the most important being declines in the cost of meats, butter, bread and flour and an advance in potatoes. Including the cost of fuel and rent with that of foods the total cost of the list was $17.25 at the beginning of December as compared with $ 7.29 for November; $17.58 for December, 1937; $16.99 for December, 1936; $15.41 for June, 1933 (the low point during recent years); $22.11 for December, 1929; $20.97 for December, 1922; $26.92 for July, 1920 (the post war peak); and $14.26 for December, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of prices in 1926 as 100 changed little from week to week during the month. It was, however, 11·5 per cent lower than at the end of 1937. For the week ended December 30, the index was 73·5 as compared with 73·4 for the week ended December 2 and 83·0 for the week ended December 31, 1937. The low point for the year was reached in the week ended December 23 when the index was 73·2. The latest figures available on a monthly basis are for November when the index number was 73·5 as compared with 82·7 for December, 1937; 79·6 for December, 1936; 63·5 for February, 1933 (the low point during recent years); 96·0 for December, 1929; 96·4 for December, 1921; 164·3 for May, 1920 (the post war peak); and 66·4 for December, 1914. Of the eight principal groups of commodities in the classification according to chief component materials Vegetable Products, Non-Ferrous Metal Products and Non-Metallic Mineral Products were slightly higher at the end of December than at the beginning while other groups were somewhat lower. Grains, livestock, meats, raw rubber, raw sugar and potatoes showed the principal advances during the month while hides, lard, cheese and eggs were among the commodities recording declines.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of December of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such district with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which

figures were available when the publication of retail prices statistics was began, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and ligthing, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1938*

*The figures for "all items" were calculated by giving the following weights to each group; Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

Retail Prices

Meat prices were again slightly lower in the average, sirloin steak being down from 25·7 cents per pound in November to 24·9 cents in December, fresh pork from 23·1 cents per pound to 22·7 cents and breakfast bacon from 32·5 cents per pound to 30·9 cents. Lard averaged about one half cent per pound lower at 14·4 cents. Milk has been unchanged a an average price of 10·9 cents per quart for the last four months. The price of creamery butter was lower in nearly all localities, averaging 26·7 cents per pound in December as

compared with 27·3 cents in November and 30 cents in July. Cheese also was lower, averaging 23·2 cents per pound as compared with 23·4 cents in November. Declines in the price of bread were reported from several localities and the Dominion average price was fractionally lower at 6·7 cents per pound. Flour also declined gradually since March, averaging 3·2 cents per pound in December, 3·3 cents in November and 4·5 cents in March. Potatoes again advanced in price the Dominion average being up from $1.07 per 90 pounds to $1.18. Prices of this commodity have been considerably lower in the prairie provinces in recent months than elsewhere in the Dominion. United States anthracite coal was little changed at $14.62 per ton.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $13.50; Moncton, $16; Saint John, $14.50; Quebec, $14; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $15; Thetford Mines, $17.25; Montreal, $15.25 and $15.50; Ottawa, $16.50; Kingston, $15; Belleville, $15; Peterborough, $16.75; Oshawa, $15.50; Toronto, $15; St. Catharines, $15; Hamilton, $15 and $14.50; Brantford, $16.25; Galt, $16.50; St. Thomas, $16; Cobalt, $19.25; Timmins, $19.50; Port Arthur, $17.75; Fort William, $17.75; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries are included in "Prices in Canada and Other Countries, 1938" which will be issued shortly as a supplement to the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 98·4 for November as compared with 99·1 for October and 98·4 for September. The fall in November was entirely due to a decline of 2·2 per cent in food prices, those of industrial materials and manufactures showing no appreciable change in the aggregate. Compared with a year earlier a fall of about 9·5 per cent occurred in the general index, prices of food and industrial materials and manufactures declining by about 13·5 and 7 per cent, respectively.

The Statist index number, on the base 1867-1877=100, was 87·4 at the end of November as compared to 88·8 at the end of October, a decrease of 1·6 per cent for the month. The combined foodstuffs index declined 2·3 per cent during the month, while the "all materials" index declined 1·1 per cent. Compared with the corresponding figure for 1937, the general index for November, 1938, declined 9·6 per cent.

COST OF LIVING.—The Ministry of Labour's index number, on the base 1914=100, was 156 at the first of December, being the same as that for the first of November. During the month the index of food prices declined from 140 to 139 due to decreases in the average prices of eggs, bacon, butter and flour. All the other groups making up the index were unchanged. As compared with the general index for the same month last year, this year's figure showed a reduction of 2·5 per cent.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914 =100, was 657 for November as compared with 654 for October. The index of food prices declined from 635 to 634 during the month, increases in the prices of animal foods and in the sugar, coffee and cocoa group being more than offset by decreases in the prices of other vegetable foods. While there was a slight decrease in the prices of textile products during the month, the other groups entering into the all industrial materials index showed increases sufficient to increase this index from 672 to 678. The index based on gold currency, 1914=100, was unchanged from that for the previous month at 53.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·1 for November as compared with 105·7 for October. The index of prices of agricultural products increased from 105·7 to 106·8 due to increases in all its subgroups, the most important of which was one of 2·4 per cent in foods of animal origin. The index of raw materials and semi-manufactured goods was unchanged at 94·2 while that for manufactured goods decreased from 125·6 to 125·5.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 125·0 for November as compared to 124·9 for October. With the exception of the rent group which was unchanged, all groups showed small increases. The index of the heat and light group increased 0·3 per cent during the month, while those for food, clothing and sundries each increased 0·1 per cent.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 101 for September as compared to 100 for each of the four preceding months. The index of food prices increased from 100 in August to 104 in September while over the same period the prices of non-foods were unchanged at 99.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934=100, was 105 for October, 1938, showing no change from the indexes of the previous two months. An increase of 1·8 per cent was recorded in the food price index but this was counteracted by a decrease in the index of the sundries group.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 77·6 for October as compared with 78·3 for September, a decrease of 0·9 per cent for the month. Of the ten groups which make up this index, six showed decreases while four showed increases. The largest decrease was in the farm products group which declined 1·9 per cent; other de-

creases were as follows: fuel and ligthing materials, 1·6 per cent, foods, 1·3 per cent, housefurnishing goods, 0·6 per cent, chemicals and drugs, 0·3 per cent, and metals and metal products, 0·2 per cent. Hides and leather products increased 1·5 per cent, textile products 0·6 per cent, building materials and miscellaneous products, 0·3 per cent each. The general index for October was 9·1 per cent below the corresponding figure for 1937.

COST OF LIVING.—The index number of the Industrial Conference Board, on the base 1923=100, was 85·6 for November as compared with 85·8 for October. The index of food prices declined from 79·8 to 79·5 during the month. The general index for November was 3·8 per cent lower than that for the same month last year, 14·5 per cent lower than that for 1929, but 19·4 per cent higher than at the low point of 1933.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Employer Convicted of Violating Industrial Disputes Investigation Act by Changing Conditions without Required Notice

Under the Industrial Disputes Investigation Act charges were laid in September by the general representative of the Automotive Transport Section of the Canadian Brotherhood of Railway Employees against George Carr of Toronto carrying on a transport business under the name of "Carr's Transport and Movers" between Owen Sound, Toronto and Hamilton. The charges relating to employees of the defendant in Owen Sound and Hamilton were to the effect that the defendant had violated Section 58 of the Dominion Industrial Disputes Investigation Act by making effective a change in wages and hours without giving the thirty days' notice required by the Act.

An agreement had been entered into by Carr and the Automotive Transport Section of the Brotherhood on April 1, 1938, fixing a schedule of wages and hours as well as other working conditions from May 1 and providing for an arbitration committee to settle disputes between the parties to the agreement. Prior to the agreement, the men had been paid so much a trip; the agreement fixed hourly rates.

In Hamilton, the charge affecting the employees of the defendant in that Ctiy was dismissed by the magistrate without written reasons. It appeared in evidence that the provisions of the wage agreement had never been applied in Hamilton and there was therefore no change in the conditions of employment.

In Owen Sound, the magistrate's decision set out that the wage schedule contained in the agreement had been put into effect on May 1 and continued until August 20 when the defendant notified his employees that from August 22 all highway drivers would receive $18 a week for driving stake trucks and $20 a week for tractors. The defendant had refused the suggestion of the union's representative that the dispute should be referred to arbitration as provided in the agreement. The magistrate found the defendant owned and operated an agency of transportation, as defined in the Industrial Disputes Investigation Act, and that, since he employed more than ten men in his transport business, he was an "employer" within the meaning of the Act; that he failed to give the prescribed thirty days' notice of an intended change in wages giving only two days' notice to his employees and no notice to the union representative. A fine of $100 and costs or, in default of payment, imprisonment for thirty days was imposed. *R. v. Carr,* Hamilton, October 4, 1938; Owen Sound, November 28, 1938.

Alberta Trainman Cannot Claim Compensation for Accident after Action for Damages Fails and Judgment Applied

A claim for workmen's compensation under the Alberta Workmen's Compensation Act of 1908 was dismissed without costs by Mr. Justice Howson on November 22. The statute of 1908 provides for a system of personal liability on the part of the employer and was replaced in respect of most industrial workers in Alberta by the Workmen's Compensation Act of 1918 providing for a collective liability system similar to that in other provinces. As certain classes of railroad employees, however, preferred to remain under the earlier statute, the later Workmen's Compensation Act, as revised in 1938, stipulates that members of the Order of Railway Conductors and of the Brotherhood of Railway Trainmen are excluded from the Act.

The statute of 1908, following the English Workmen's Compensation Act of 1897, permits an action for damages for an accident to be brought either under its provisions or independently of it. It stipulates, however, that if an action is brought to recover damages independently of the Act and it is decided that the injury is not one for which the employer is liable in such action but

that he would be liable to pay compensation under the Workmen's Compensation Act, the action shall be dismissed but the Court in which the action is tried shall, if the plaintiff so chooses, proceed to assess such compensation. The Court, however, may deduct from such compensation all or part of the costs which were caused by the plaintiff bringing the action instead of proceedings under the Act of 1908.

In the case before the Court, the plaintiff trainman fell over some grain doors which he alleged had been negligently left beside the railway tracks and as a result he suffered injury. Mr. Justice Howson who heard the case without a jury gave judgment on September 2, 1936, dismissing the action with costs to the defendant railway company. On September 9, this decision was applied and formal judgment entered with the Clerk of the Court. Three days later the plaintiff made application to Mr. Justice Howson to proceed to assess compensation under the Workmen's Compensation Act, 1908, and on September 29 the plaintiff filed notice of appeal from the judgment.

The question for decision by the Court on the application was whether the action having been disposed of the plaintiff could take advantage of the Workmen's Compensation Act of 1908. Two English cases involving a similar provision, now in the English Workmen's Compensation Act of 1925, were referred to and following these judgments Mr. Justice Howson held that the plaintiff's rights under the Workmen's Compensation Act of 1908 must be determined while the action for damages is before the Court, that the application of the plaintiff for the assessment of compensation under the statute must be made before the decision of the judge in the action has been applied and while the action is still pending. In the case before him the action was no longer before the Court since the judgment had been entered and applied. He considered therefore that he had no power to hear the application for the assessment of compensation. *Engman v. Canadian National Railways,* (1938) 3 Western Weekly Reports, 516.

Appeals Against Judgment in Saskatchewan Awarding Damages for Death of Railway Employees Dismissed in one Case and Allowed in the Other

On November 7 the Saskatchewan Court of Appeal disposed of two actions brought under the Fatal Accidents Act by widows of two railway employees killed in the course of their employment.

In Saskatchewan, as in Alberta, certain classes of railway employees are not within the collective liability system of workmen's compensation but are within the scope of a Workmen's Compensation Act enacted earlier under which the employer is individually liable for compensation under certain conditions. The latter statute provides, however, that an injured employee or his representative may proceed under its provisions or independently of the Act. In the two cases, the plaintiffs brought action under the Fatal Accidents Act which, in fatal cases, gives certain relatives of the deceased the same right of action that an injured person would have at common law. Negligence on the part of the employer must be proved. Trial of an action under the Fatal Accidents Act may be before a judge and jury. Under the Workmen's Compensation Act, it must be before a judge alone.

In the first case, the workman was killed while pulling a truck piled with express goods across one of the tracks at a railway station. The plaintiff alleged that the accident was due to negligence of the company in not keeping the platform between the rails in proper condition, a projecting rail causing the truck to overturn. The jury found that there was negligence on the part of the company and estimated the damages at $12,000. Judgment was given for this amount with costs. On appeal, it was held that there was sufficient evidence before the jury to enable them to determine that the defendant company had been negligent and the appeal was, therefore, dismissed with costs. *McLaren v. the Canadian Pacific Railway Company,* (1938) 4 Dominion Law Reports, 620.

In the other case the jury found that the death of a trainman crushed between two cars was caused by a defect in the coupling apparatus and the damages were assessed at $8,000. The appeal court, however, following judgments in similar cases, held that the evidence regarding the accident, to which there were no witnesses, was equally consistent with the defendant's liability or freedom from liability and that in such a case it was not competent for the judge to leave it to the jury to find either alternative but that the defendant had the right to have the action dismissed. While there was undoubtedly a defect in the coupling it was possible that the trainman having noticed this, violated the rules by trying to connect the coupling instead of signalling the train to stop. Since any theory as to how the accident occurred was mere conjecture, the Court felt constrained to allow the appeal and dismissed the action with costs in both Courts. *Danley v. Canadian Pacific Railway Company,* (1938) 4 Dominion Law Reports, 628.

Saskatchewan Court Dismisses Appeal from Judgment Awarding Damages for Accident to Farm Labourer

On November 7, the Saskatchewan Court of Appeal dismissed with costs an appeal from a judgment awarding $545 to a farm labourer who suffered injuries when he was kicked by his employer's horse which he was required to look after. The trial judge held and the appeal court agreed, that the defendant was guilty of a breach of duty towards the plaintiff in not warning the latter of the horse's dangerous disposition of which he had had evidence on other occasions. The Court pointed out, through Chief Justice Turgeon, that "the essence of actions of this kind is knowledge of the danger in the master and want of such knowledge in the servant". *Stanker v. Anderson* (1938) 3 Western Weekly Reports, 529.

Alberta Male Minimum Wage Act held not to Apply to Janitor in School and Convent Building

In a claim for wages on October 28, the plaintiff employed as janitor and fireman, from January 1, 1937, to May 4, 1938, of the defendant's school buildings and a boarding house in connection with the school, based his action on a contract for $55 a month for the school months and $50 for July and August and made a further claim for the period from October 1, 1937, for the difference between the amount contracted for and what he would have been paid had he received the minimum rate of 40 cents an hour fixed under the Male Minimum Wage Act from October 1, 1937, and the overtime rate required under the Hours of Work Act. He alleged he worked for 13 hours on seven days a week and that the defendant had agreed to abide by the minimum wage regulations. The latter denied this and also that the plaintiff worked 13 hours a day. The defendant admitted liability for the balance due under the contract for the monthly rate and the costs of the statement of claim.

Chief Justice Harvey held that the Male Minimum Wage Act, 1936, did not apply to the plaintiff, that the work which was done by him was in the class expressly excepted by the Act, that of a domestic servant. He gave judgment for the amount admitted by the defendant and paid into court, less the latter's costs from the time the defence was filed. *Forgues v. Falher Consolidated School District,* (1938) 3 Western Weekly Reports 647.

Janitor's Claim for Wage-rate fixed by Manitoba Minimum Wage Board Dismissed by Appeal Court

The Manitoba Court of Appeal, on November 14, disallowed with costs an appeal from a judgment of the Winnipeg County Court dismissing a suit for wages at the rate of 25 cents an hour, the minimum fixed by regulation under the Manitoba Minimum Wage Act for employees 18 years of age and over in occupations not otherwise regulated. The plaintiff, a janitor in the defendant's apartment house, received the remuneration he had contracted for, $35 per month and heated living quarters and electricity but claimed an additional $554 being the difference between the cash received and the amount calculated at 25 cents per hour for 16 hours of work a day from January 1 to July 15, 1937.

The particulars of claim did not refer to the Minimum Wage Act or the regulation but on the conclusion of the plaintiff's evidence his counsel asked leave to amend the particulars to show that the claim was based on the Act and the Order made under it. This request was refused on the ground that the amendment would set up a new cause of action and the case was dismissed with leave to the plaintiff to take action under the Minimum Wage Act. The decision was appealed, the appellant asking leave to amend the claim and judgment for the amount.

On appeal, Mr. Justice Trueman approved the judge's ruling that where an action is for breach of a statute, the statute must be referred to in the statement of claim and the facts bringing the case within the Act set out. Mr. Justice Robson expressed no opinion on this point. Other members of the Court agreed in the result.

In the opinion of Mr. Justice Trueman, a more serious objection lay in the fact that the plaintiff had housing accommodation supplied by the defendant in addition to his salary and that its monetary value could not be ignored. Moreover, he considered that the wage order does not apply to janitors or caretakers of apartment blocks who are provided with living quarters.

Mr. Justice Robson was also of the opinion that the plaintiff was not an "employee" within the meaning of the Minimum Wage Act and that therefore he was not entitled to a minimum rate fixed under the authority of that statute. The Act defined an "employee" as

> a worker employed in any mail order house, office, place of amusement, shop or factory. . . or in any office, vocation, pursuit, trade, business, industry or calling brought within the scope of this Act under the provisions hereof, who is in receipt of or entitled to compensation for labour performed in his employment.

He considered, further, that—

> it was never within the object of the statute or the regulations that the rates fixed in them should apply to all the hours of a day

> a caretaker is on the owner's premises where, for the convenience of both parties, he has his home.

He pointed out that the plaintiff had been employed under the same contract from January, 1934, and had apparently been satisfied with it.

> To displace the terms of a contract fairly entered into and long in force between the parties and substitute for it the measure of remuneration named in the regulations requires clear and definite evidence as to the actual service rendered and the period occupied thereby. I think the evidence here does not come up to that standard.

Stinich v. Taback, (1938) 4 Dominion Law Reports 734.

Action for Judgment on Validity of Alberta Licensing of Trades and Businesses Act Dismissed

On November 5, 1938, Mr. Justice Howson of the Alberta Supreme Court dismissed an action for a declaration on the validity of the Alberta Social Credit Act, 1937, the Social Credit Realization Act, 1938, and the Licensing of Trades and Businesses Acts, 1936 and 1937.

As regards the Social Credit Act, 1937, the Court held that since it had been declared *ultra vires* by the Supreme Court of Canada and had been repealed and the plaintiff had not been affected in any way by its provisions, it was of merely academic interest and the case was therefore not a proper one in which to make a declaratory judgment. For the latter reason a declaration concerning the Social Credit Realization Act, 1938, was also refused.

The Licensing of Trades and Businesses Acts were reviewed in their relation to the plaintiff company which carries on a wholesale business and which refused to pay the prescribed fee and obtain a licence under the Act. The Licensing of Trades and Businesses Act, 1936, which gave to the Lieutenant-Governor in Council power to make regulations for its operation, was repealed by the Act of 1937 which empowered the Minister of Trade and Industry to make regulations for the carrying out of the Act.

The later statute provided that all orders made under the 1936 Act should continue in force until annulled or replaced. Under the 1936 Act an order in council designated the trade of wholesale dealer in any goods as a trade to which the Act applied and required every such dealer to obtain a licence which would expire at the end of the year and have to be renewed each year. It was held by the Court, however, that the order in council was now ineffective because unenforceable; all powers and penalties which could have been enforced against the plaintiff ceased to exist when the 1936 Act was repealed before the action was commenced. Mr. Justice Howson pointed out that the order in council is not made a part of the Licensing of Trades and Businesses Act, 1937, by the provision in the Act that orders are to remain in force. Under the 1937 Act the Minister and not the Lieutenant-Governor in Council has power to make orders. It was therefore held that where the legislation has been repealed and the order has become unenforceable, both to the knowledge of the plaintiff before commencement of action, no declaratory judgment should be made as to the validity or application of any of the measures. Since the letters written to the plaintiff by the Department of Trade and Industry incorrectly intimated that the latter was acting under the Act of 1937, no costs were allowed to the defendant. *Motor Car Supply Company of Canada Ltd. v. Attorney-General of Alberta* (1938) 4 Dominion Law Reports 489.

Appeal against Judgment Refusing Damages for Accident to Painter Dismissed in New Brunswick

On September 13 the New Brunswick Supreme Court affirmed the judgment of a lower court in an action for damages for injuries sustained by a workman dismissing the appeal with costs. The claim was based on sections 84 (1) and 85 of the New Brunswick Workmen's Compensation Act. These sections apply to industries which are not covered by Part 1 of the Act setting up a collective liability system of workmen's compensation. They provide that, where personal injury is caused to a workman by any defect in the condition or arrangement of the works, plant, etc., used in the business of the employer or where injury is due to the negligence of the employer or any person in his service acting within the scope of his employment, the workman or his legal representative has right of action against the employer. S. 85 provides that a workman is not to be deemed to have undertaken the risks due to the negligence of his fellow workmen and contributory negligence on his part is not a bar to recovering damages.

In the case before the Court, it had been found by the jury that the plaintiff and another had been engaged by the defendant, a dealer in paints, to paint a school house. The defendant was to supply the paints. There was no agreement between the plaintiff and the defendant that the latter should supply the equipment for the work but it was agreed that the equipment or staging should be supplied by the plaintiff and his fellow workman. The latter actually supplied the staging used and the accident was partially caused by the negligence of the plaintiff in not examining the staging before it was put up. Negligence was also found on the part of the other painter in the same respect. The plaintiff claimed that the staging was used in the business of the

employer and that this brought the case within s. 84 of the Act.

On appeal, it was held that the staging was used in the business of the plaintiff and his fellow workman and not in the business of the defendant. By the express terms of the contract between the plaintiff and defendant, the apparatus used was excluded from the defendant's business; he had no selection of or control over it. It is not necessary, according to authorities quoted, that the employer should be the owner of the ways, works, machinery, etc., mentioned in s. 84 (1) but it was pointed out that there was no case "in which he has had a connection with such things forced upon him without his knowledge. Reason and fairness requires that he should have some opportunity to set right anything which may be defective."

At the trial it was assumed that the relation of master and servant existed between plaintiff and defendant and, under these sections of the Workmen's Compensation Act, the employer is liable for an accident to his employees if the equipment is defective but there is nothing in the Act, in the opinion of the court, to prevent contracting out of it and by contracting for equipment not that of the employer, the court was of the opinion that the employer's liability was removed. Further, if the jury had awarded damages, the appeal court could review the deduction to be made for contributory negligence on the part of the worker. In this case the court considered that the contributory negligence "was practically total."

As regards the relation between the plaintiff and the defendant, Chief Justice Baxter stated that he did not concur in the view that the relationship was that of master and servant and quoted from an English authority stating—

> a servant is a person engaged to obey his employer's orders from time to time; an independent contractor is a person engaged to do certain work but to exercise his own discretion as to mode and time of doing it—he is bound by his contract but not by his employer's orders . . . so I am responsible for the domestic servants in my house but I am not responsible for a skilled artisan whom I engage to do a certain job in my house, for example, to paint it or mend a window.

In the case before the court, it was held that the defendant had made a bargain with the painters for the job and the fact that "their remuneration was to be by the hour does not imply any right on the part of the defendant to put an end to their employment at any time, when it was not merely their time which was bargained for but their equipment as well with all things needful to complete the painting job." *Russell v. Seeley* (1939) 1 Dominion Law Reports 60.

National Housing Act Loans

National Housing Act loans for the month of December, 1938, totalled $1,241,374, and provided housing accommodation for 377 families, according to figures released by the Hon. Charles A. Dunning, Minister of Finance. This brings the total of all loans approved under the National Housing Act and its predecessor, the Dominion Housing Act, to $27,678,002, and the total number of family housing units to 7,132 as at December 31, 1938. "It is apparent," said Mr. Dunning, "that the amended Act is producing the results we had hoped for. During the last four months of 1938, which are of course unfavourable building months, new loans approved aggregated $5,491,000. There is now every indication of a very large increase in the volume of lending activity during 1939."

Loans were made in eight new communities during the month, bringing the list of municipalities in which loans have now been approved to 293.

An additional twenty-one 90 per cent loans permissible on homes with a lending value of $2,500 or less brings the number of these loans to 103 in the 5 months since the National Housing Act came into operation in August. Loans in the smaller and more remote communities and special districts of larger centres, encouraged by special guarantee in the National Housing Act, show an increase of 40, bringing the number in this classification to 440.

Of the 377 family housing units financed during the month, 49 or 13 per cent were financed by loans of $2,500 or less; 135 or 35·8 per cent by loans ranging between $2,501 and $3,000; 100 or 26·5 per cent by loans ranging from $3,001 to $3,500; and 43 or 11·4 per cent by loans ranging from $3,501 to $4,000.

Provincially, Ontario recorded the greatest use of the legislation since its inception, 3,380 loans being financed thereunder amounting in total value to $12,917,420; Quebec followed with 1,744 units amounting in value to $7,521,461; British Columbia, 1,219 loans with a total value of $3,883,157; Nova Scotia registered 431 units valued at $1,830,960; Manitoba, 218 loans valued at $914,853; New Brunswick, 118 loans totalling $505,117; Prince Edward Island, 15 loans valued at $80,034; and Saskatchewan recorded 7 unit loans with a total value of $914,853. Alberta has not yet recorded any loans financed under the legislation.

DOMINION AND PROVINCIAL LABOUR DEPARTMENTS, BOARDS, COMMISSIONS, ETC., IN CANADA

Dominion

Department of Labour, Confederation Building, Ottawa, Canada:

Minister—Hon. Norman McL. Rogers, M.A., B.Litt., B.C.I. (Oxford).

VOLUME 39] FEBRUARY, 1939 [NUMBER 2

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment showed its customary seasonal contraction at the beginning of January, 1939, but the loss was below the average in the experience of the last eighteen years. The firms furnishing data laid off some 56,900 workers at the date under review, or 5·2 per cent of their December 1 payrolls, as compared with an average decline of about seven per cent recorded at January 1 in the years, 1921-1938. Returns were tabulated by the Dominion Bureau of Statistics from 11,210 employers whose payrolls aggregated 1,041,042 as compared with 1,097,953 in the preceding month. The index (average, 1926=100) stood at 108·1, compared with 114·0 at December 1, 1938, and 113·4 at January 1, 1938. The crude indexes for the beginning of January in preceding years are as follows: 1937, 103·8; 1936, 99·1; 1935, 94·4; 1934, 88·6; 1933, 78·5; 1932, 91·6; 1931, 101·7; 1930, 111·2; 1929, 109·1; 1928, 100·7 and 1927, 95·9.

After correction for seasonal influences, the January 1, 1939, index was 112·3, as compared with 111·3 at December 1, 1938; the seasonally-adjusted index for January was higher than in any other month since February, 1938.

Unemployment in Trade Unions.—At the beginning of January, 1939, the Department of Labour received reports from 1,960 local trade unions, combining a membership of 249,071 persons, 40,307 or a percentage of 16·2 of whom were out of work, as contrasted with percentages of 13·7 at the beginning of December, 1938, and 13·0 at the beginning of January, 1938.

Employment Office Reports.—Reports received from the offices of the Employment Service of Canada for December, 1938, indicated a decline in the volume of business from November, but a gain over that of the corresponding month a year ago, this comparison being based on the average number of placements effected daily throughout the Service. The major changes under the first comparison consisted of substantial losses in farming and logging and under the second, noteworthy gains in farming, construction and maintenance and services, the total of which much more than counterbalanced a heavy decline in logging, likewise shown under the latter comparison. Vacancies in December, 1938, numbered 39,006, applications 64,972, and there were 38,070 placements in regular and casual employment.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $17.18 at the beginning of January, 1939, as compared with $17.25 at the beginning of December, 1938. The slight decrease being due mainly to the lower cost of food. Comparative figures for certain earlier dates are $17.48 for June, 1938; $17.04 for January, 1937; $15.41 for June, 1933 (the low point during recent years); and $22.17 for January, 1930. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100, changed little during the month being 73·2 for the week ended January 27, 1939, as compared with 73·5 for the week ended December 30, 1938, and 73·4 for the week ended December 2, 1938. On a monthly basis the index number was 73·3 for December, 1938, as compared with 83·8 for January, 1938; 81·3 for January, 1937; 63·5 for February, 1933 (the low point in recent years); and 95·3 for January, 1930.

Business Statistics.—The latest figures available reflecting industrial conditions in Canada are given in the table on page 120. The index of the physical volume of business in December was 6 per cent lower than in the previous month which was the highest point recorded during 1938 and it was 5 per cent lower than in December, 1937. Most of the principal groups used in the construction of the index were lower in the month under review than in the previous month the exceptions being construction and trade employment both of which indicated improvement, the former because of a substantial advance indicated in the volume of contracts awarded. Mineral production and manufacturing in the same comparison were each about 11 per cent lower, the former due mainly to lower volume of exports of certain non-ferrous metals and the latter mainly because of decreases in the manufacture of foodstuffs and products of iron and steel. Improvement was indicated in the manufacture of textile products. Information available for January, 1939, shows considerable increase in exports both as compared with the previous month and with January, 1938, while employment was lower in both these comparisons.

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended January 27, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending January 28, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending January 28, 1939, and December 3, 1938; January 29, 1938, December 31, and December 4, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

Strikes and Lockouts.—The number of strikes and lockouts recorded for January was ten, involving 1,228 workers and resulting in a time loss of 8,047 man working days, as compared with eight disputes during December, 1938, involving 274 workers with time loss of 2,357 days. Most of the disputes in January involved small numbers of workers for short periods and two-thirds of the time loss was due to a strike of 700 coal miners at Blairmore, Alberta. In January, 1938, there were 24 disputes, involving 4,293 workers with time loss of 31,939 days, due chiefly to strikes of fishermen and fish handlers in Nova Scotia, pulpwood cutters in Northern Ontario and textile workers at Coaticook, P.Q. Of the ten disputes recorded for January, 1939, seven were terminated during the month, two resulting in favour of the employers affected, two in favour of the workers involved, a compromise settlement being reached in one case and the result of two disputes being recorded as indefinite. Three disputes involving 825 workers were recorded as unterminated at the end of January. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Proceedings under the Industrial Disputes Investigation Act

During the past month the department received reports from Boards of Conciliation and Investigation which dealt with disputes between (1) Motorways, Limited, and its drivers, warehousemen, checkers, loaders, etc., and (2) United Delivery, Limited, and its truck drivers and helpers. An interim report was received from the board established to deal with a dispute between various coal mine operators in the Estevan district of Saskatchewan and their miners. One application was withdrawn, two new applications were received and a board was established. A full account of recent proceedings under the Act appears at page 126.

Statistics of Material Aid Recipients for December

Substantial reduction in the numbers of farmers and their families on agricultural aid in comparison with the previous year was again indicated in early figures for December from the National Registration of persons on aid, issued on February 16, by Honourable Norman McL. Rogers, Minister of Labour. Although unemployed persons receiving aid showed the usual increase from November to December and brought the December total above that of the same month in 1937, the grand total of persons of all classes benefiting by aid showed a substantial decrease from the preceding year.

Preliminary figures from the December registration showed the Dominion total of unemployed but fully employable persons on aid in December this year at 159,000, an increase of 12 per cent from the November total of 142,000. The figure for December this year represented an increase of slightly more than 3 per cent over December a year ago.

A total of 592,000 persons were receiving non-agricultural aid in December this year, 11 per cent more than in the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of two per cent from the figure for December, 1937.

Some 62,000 farmers who, together with their dependents, account for a farm population of 279,000, were reported as receiving agricultural aid for subsistence in December. Of these persons 241,000 were located in the Province of Saskatchewan alone. The Dominion total on agricultural aid, while up by nearly 16 per cent in December over the November revised figure was 26 per cent less than in December, 1937. The December total of farmers and their families on aid in Saskatchewan, while continuing to hold the improvement over a year ago due to this year's crop, increased by 17 per cent over revised figures for November, 1938, but was still more than 27 per cent lower than in December a year ago.

The grand total of all classes of persons on urban and agricultural aid in December, according to these early figures, was 871,000, an increase of 12·9 per cent over the November figure as now revised, but 9 per cent less than in December, 1937.

Trades and Labour Congress of Canada Suspends C.I.O. Unions

On December 19, 1938, three members of the executive of the Trades and Labour Congress of Canada made a visit to Washington, where a conference was held with a committee of the American Federation of Labour executive.

Following this visit and the action of the A.F. of L. at its last convention (Labour Gazette, November, 1938, pages 1239-1243), the executive of the Trades and Labour Congress of Canada decided to take a vote of its officers on a proposal to suspend international unions in the Dominion affiliated with the Congress of Industrial Organizations.

The executive officers of the Congress decided to suspend members of C.I.O. unions, pending final decision by the next convention.

On January 19, 1939, notices of suspension from the Trades and Labour Congress of Canada were sent to all unions affiliated with the C.I.O.

Operation of Rehabilitation Unit of Lumbermen's Safety Association

During the past fifteen months the Lumbermen's Safety Association, organized under the authority of the Ontario Workmen's Compensation Act, has operated a Rehabilitation Unit just outside of Ottawa, at Billings Bridge.

The purpose of the Unit is to give badly injured workmen the type of treatment required after hospitalization has been completed and while they are still unfit for even light work.

Operated on a non-profit basis, the Unit is assisted by an allowance from the Ontario Workmen's Compensation Board of two dollars per day per man for every man out of class 1 (lumber industry) who is sent to the Billings Bridge rehabilitation centre. If it is possible to take any men from other classes under the Workmen's Compensation Act, this is done at the request of the Workmen's Compensation Board and an allowance of $3 per day is made for men from these other classes.

The buildings are located on a 20-acre parcel of garden land, which includes an orchard and a good-sized plantation of raspberries, strawberries and other fruit. There is plenty of light work for the men to do out of doors during the summer season when they get full benefit of the fresh air and sunshine. In the winter their outdoor work consists of shovelling snow around the buildings, sawing and splitting firewood, carrying water, etc. In addition to this, they have work in a gymnasium and workshop in a separate building which was erected last summer. In the winter months this gymnasium and workshop largely take the place of the field work which is done in the summer season.

The residence, or home, is a good-sized farm house which is large enough to accommodate 14 men, including the superintendent and the cook. The building has a good furnace, is hot air heated, wired for electricity, has hot and cold running water, bathroom and toilet. One room is used exclusively for giving massage and electrical treatments of different kinds and practically every man receives a treatment of this nature twice a day.

Dr. W. S. Barnhart, the Medical Superintendent of the Lumbermen's Safety Association, is in charge of the Unit. He sees the men daily and orders treatment and various activities which they should carry out. When necessary, consultations are held with other doctors, X-rays are taken of the affected parts, and regular reports are made to the Workmen's Compensation Board as to the progress which each case is making.

The Unit has been operating since November, 1937, and 42 men have passed through it in the fifteen months that it has been in operation.

Results of Nutrition Survey in Australia

The nutrition situation in Australia was reviewed in the LABOUR GAZETTE for November, 1938 (page 1196), this summary being based on five interim reports of the Advisory Council on Health, appointed in February, 1936, to advise on the state of nutrition of the Australian people and on any evidence that the Australian people were in any degree undernourished, or that their diet was improperly balanced or improperly prepared.

In view of the fact that nutrition surveys and new exploratory work in this field of public health are now proceeding in Canada (LABOUR GAZETTE, December, 1938, page 1325), and also since the Dominion Bureau of Statistics is conducting a large budgetary survey on the cost of living (LABOUR GAZETTE, September, 1938, page 967), the result of the investigation in Australia is of particular interest.

The New South Wales *Industrial Gazette* for October 31, 1938, contains a reference to the five interim reports and the final report of the Advisory Council, the latter containing the following conclusions: "(*a*) a majority of the families who submitted records of their diets, are receiving a sufficient quantity of food; (*b*) the diet of some is in excess of normal physiological requirements; but (*c*) some consume a less quantity of food than is required for normal physiological needs."

It is also reported that "Great difficulty was met by the Council in arriving at the number of families whose consumption was below normal requirements, but after specific examination of individual 'suspect' diets, it was calculated that of the 1,789 recording families, there were 105 which had an inadequate or undesirable diet."

At the final meeting of the Advisory Council the members welcomed the information and its proposal for the formation of a central co-ordinating committee had been adopted by the National Health and Medical Council. This proposal was contained in a resolution worded as follows:

"The Council, in consideration of—

(1) the vital importance to Australia as a nation of perfect health in the children of the nation; and
(2) the widespread evidences of mild ill-health produced by malnutrition which have been disclosed as a result of the inquiry of this Council,

recommends that a central co-ordinating committee acceptable to all States and the Commonwealth be appointed to foster—

(*a*) the general health of the rising generation;
(*b*) the correction of faulty dietary in a general sense by the publication of

sound propaganda and dietary advice from time to time;

(c) the investigation and rectification of specialized local defects, both physical and nutritional, by co-ordinated effort.

Report on national health insurance submitted to U.S. Congress

In his message to Congress on January 23, President Roosevelt transmitted the recommendations of the Interdepartmental Committee appointed by him in 1935 "to co-ordinate health and welfare activities." According to an Associated Press Report, the findings of this committee envisaged a program of federal-state health activities to cost $850,000,000 a year by 1949 and included provisions for a system of national health insurance. Without dealing with any specific recommendations contained in the report, the President referred to it as a program to reduce "the risks of needless suffering and death," and declared that "the health of the people is a public concern. Ill health is a major cause of suffering, economic loss, and dependency; good health is essential to the security and progress of the nation."

Linking the committee's proposals with the Social Security Act, the President added that it was recognized five years ago "that a comprehensive health program was required as an essential link in our national defences against individual and social insecurity."

(When the text of the Committee's report has been received, it is hoped to give a summary of its findings in an early issue of the Labour Gazette.)

Functioning of United States Wages and Hours Legislation

In his first report to Congress Elmer F. Andrews, Administrator of the Fair Labour Standards Act (Labour Gazette, July 1938, page 719), stated that Federal regulation of minimum wages and maximum hours had won public approval and caused no widespread layoffs. In this respect the report noted:

"Employers, employees and the public approve the purposes of the Act . . . . . and wish to see it become within the shortest possible time an integral part of the economic structure of this country.

"The long-time technological effects of the minimum wage may be expected to include some shifts from hand labour on simple tasks to better paid machine-tending jobs and some increased investment in machine installations. The more important consideration is the increased pay for employed wage earners in the low income group.

"For the present, the most noticeable immediate consequences of the Act have been adjustments in connection with the 25-cent minimum and a tendency toward increased employment resulting from the overtime provision."

The Administrator estimated that the 25-cent minimum wage affected about 300,000 workers who received less than that amount prior to last October 24, when the Act became effective. When the wage level goes to 30 cents an hour next October, he estimates 550,000 workers will be affected.

His report also estimates that 1,384,000 workers either received the benefit of a shortened work week to comply with the 44-hour maximum or are receiving overtime compensation.

Extension of Social Security benefits recommended in U.S.A.

On January 16, President Roosevelt in transmitting the Social Security Board's annual report, asked Congress to extend the benefits of the Federal-State unemployment compensation system to "all of our people as rapidly as administrative experience and public understanding permit."

Suggesting that increased protection be afforded to the aged, and to dependent children, the President reviewed the achievements under the Social Security Act (Labour Gazette, September 1935, page 801) stating that:

"This Act has amply proved its essential soundness.

"More than two and one-half million needy old people, needy blind persons and dependent children are now receiving systematic and humane assistance to the extent of a half-billion dollars a year.

"Three and a half million unemployed persons have received out-of-work benefits amounting to $400,000,000 during the last year.

"A Federal old-age insurance system, the largest undertaking of its kind ever attempted, has been organized, and under it there have been set up individual accounts covering 42,500,000 persons, who may be likened to the policyholders of a private insurance company.

"In addition there are the splendid accomplishments in the field of public health, vocational rehabilitation, maternal and child welfare and related services, made possible by the Social Security Act."

Among other recommendations contained in its report the Social Security Board suggested the extension of old-age insurance benefits to farm labourers, domestic servants, employees engaged in service performed for non-profit organizations, seamen, banking employees and persons employed in the service of the United States.

With regard to the "self-employed" it was stated that the Board was not yet prepared

to recommend "a practicable method of extending coverage."

It was also recommended that monthly old-age insurance benefits commence in 1940 instead of 1942.

Abolition of private employment agencies in Italy

According to a recent United Press report from Rome, the Italian government has issued a decree abolishing all private employment agencies. In future employers will be obliged to engage employees through the State Workers' Syndicate.

The new employment law, which is said to have been drafted because "giving jobs to workers is a public function in the interests of national production and of the state," allows employers to engage personnel directly, without applying to the syndicate only in cases of urgency or to avoid damage to their business.

Failure, however, even in these cases, to communicate the engagement of workers to the syndicate is penalized by fines.

To obtain positions all unemployed must register at the syndicate and the decree states that whenever jobs are to be assigned, local workers must be preferred.

Preference in engaging workers must be given to: Members of needy families; those who have been out of work for the longest period; syndicate members; Fascist party members; war veterans; and emigrants who recently have returned to Italy from abroad.

Progress of International Labour Organization in 1938

In a press release from the International Labour Office, reviewing the work of the International Labour Organization in 1938, it is stated that despite the political crisis the activity of the I.L.O. still further increased during the past year.

"Its June Conference, in which representatives of fifty nations and many European and overseas Ministers of Labour took part, was one of the best-attended and most interesting which have met at Geneva. Its good relations with Governments, employers' and workers' organizations have been kept up and developed through regular and fruitful collaboration.

"The International Labour Conventions ratified by States during the year 1938 were more numerous than in previous years; as were the requests of European and extra-European Governments for the technical assistance of the International Labour Office to prepare or revise their social legislation by taking into account the results achieved or experience gained by foreign countries. Finally, the International Labour Organization has carried on its regular work of research and information in all fields, continuing to study objectively the new problems everywhere created by the development of industry."

Particular emphasis is given to the appointment of Mr. John Winant as Director in succession to Mr. Harold Butler who resigned, and to the personal attendance at last year's Conference of Miss Frances Perkins. The significance of these features is stated as follows: "This appointment of Mr. Winant, who has played an important role in his country, as Governor of the State of New Hampshire and later as Chairman of the Social Security Board, emphasizes to the whole world the active participation of the United States in the Organization. The attendance at Geneva of Miss Frances Perkins, Secretary of Labour, at the 1938 Session of the Conference, and the fact that, for the first time, the United States has ratified International Labour Conventions (to the number of five, including that on hours of work on board ship), also contribute to show the vigorous collaboration of the great Republic of North America."

Survey of World Unemployment Situation

Industrial employment in the period July to December 1938 increased in comparison with the same period in the preceding year in 13 countries and decreased in 9 countries for which statistics are available, according to a quarterly report published in *Industrial and Labour Information* of January 16, issued by the International Labour Office.

Reductions in employment, though very small in some cases, were recorded in Belgium, Canada, Estonia, Finland, Great Britain, Luxemburg, Sweden, Switzerland and the United States.

With regard to unemployment the report shows that 11 countries registered an increase in unemployment as compared with a year ago, 11 a decrease, while in 2 countries (Sweden and Switzerland) there are two sets of statistics showing inconsistent trends. However as employment in these two countries declined during the period it is assumed that unemployment increased. The following countries reported increased unemployment, Belgium, Canada, Chile, Estonia, Finland, France, Hungary, Lithuania, Norway, Sweden, Switzerland, the United Kingdom, and the United States.

In presenting these statistics of employment and unemployment, the International Labour Office emphasizes the limitations of such figures, and states that they do not afford any comparison of levels of unemployment or employment in the various countries as methods applied in compiling such statistics differ from one country to another, and the figures only serve as an indication of the trend

of employment and unemployment in the countries concerned.

Statistics based on unemployment insurance schemes indicate declines in unemployment over the corresponding period of 1937, ranging from 0·8 in Czecho-Slovakia and 0·9 in Denmark to 2·1 in the Netherlands. Increases in unemployment were registered in Belgium 4·0, the United Kingdom 2·1, and Switzerland 0·9. Returns form trade unions show a decline in unemployment in Australia of 0·1, while statistics from this source showed an increase in unemployment of 3·4 in Canada, 2·1 in the United States, and 0·6 in Sweden.

Indices of employment computed from statistics obtained from the operation of social insurance schemes register improvement in employment conditions in the following countries: Czecho-Slovakia, 0·8; Germany, 7·2; Hungary, 7·7; Latvia, 5·1; Netherlands, 2·2; Yugoslavia, 5·9. Statistics of employment obtained from this source showed a decline of employment of 4·7 in Belgium.

Returns from selected establishments for the quarterly period registered declines in employment in Canada of 8·9; Estonia, 1·3; Finland, 5·0; Luxemburg, 2·2; Sweden, 1·5; Switzerland, 1·7; and United States, 9·9. Increases in employment were indicated in statistics obtained from this source in Australia, 1·3; France, 1·0; Italy, 3·9; Japan, 12·7; Norway, 1·0; Poland, 5·5; and South Africa, 5·9.

Note.—*More recent and detailed statistics dealing with the employment situation in Canada are given in the article (four sections) "Employment and Unemployment in Canada in December, 1938" to be found elsewhere in this issue.*

Statistics of Steam Railways in Canada, 1937

The Dominion Bureau of Statistics has recently issued its annual report on Statistics of Steam Railways of Canada,* covering the year ending December 31, 1937.

The report shows gross revenues in 1937 at $355,103,271, an increase of $20,334,714 or 6·4 per cent over the 1936 figure which was $334,768,557. This was the fourth consecutive year in which gross revenues showed an increase since 1933 when the low point was reached at $270,278,276. Operating expenses also increased from $283,345,968 in 1936 to $300,652,548. Net operating revenues were therefore higher at $54,450,723. The net corporate income of all railways as carried to the profit and loss account was a debit of $31,222,713 as compared with a debit of $71,675,697 in 1936, $83,606,925 in 1935 and $98,495,119 in 1933.

Tons of freight carried, excluding duplication where two or more railways carried the same freight, increased from 75,846,566 in 1936 to 82,220,374 in 1937. Compared with 1936 traffic, freight traffic for 1937 was heavier by 8·4 per cent in tons carried and 1·9 per cent in ton miles, while passenger traffic was 7·5 per cent heavier in number of passengers carried and 11·8 per cent higher in passenger miles.

The number of employees increased from 132,781 in 1936 to 133,467 in 1937 as compared with 121,923 in 1933. The total payroll was up from $182,638,365 to $193,335,584 as compared with $158,326,445 in 1933. The average daily wage for all employees on annual, monthly and daily rates increased from $5·390 to $5·583 in 1937, while the average hourly rate for those paid by the hour increased from 56·0 cents to 58·2 cents. The lowest average wage was 27·8 cents for labourers in maintenance of way and the highest was $1·564 for passenger engineers. Among those paid on a basis other than an hourly one, the lowest rate was for news agents at $2·255 per day, while messengers, office boys and miscellaneous trade workers averaged $2·414 per day. The highest average pay was $20·166 per day for executives, general officers and assistants. The average yearly compensation for all positions was $1,448.71.

The report contains a table showing by classes of employees the average number employed during the year, the total hours or days on duty, total salaries and wages paid, the average number of hours or days worked per employee in each class or occupation, the average earnings per hour or per day and also per year.

The figures as to numbers of employees in each class on hourly or equivalent rates, the average time worked and average earnings per hour and per year are included in the supplement to the Labour Gazette on Wages and Hours of Labour in Canada, 1929, 1937 and 1938, Appendix B.

Fatal accidents to employes numbered 59, in connection with the movement of trains, and 18 from other causes, while non-fatal accidents affected 1,082 employees in connection with the movement of trains and 4,692 employees in non-train accidents. The time lost by employees through injuries was 159,332 days.

The report contains figures for each railway as to capital, receipts, expenditure, traffic, track, equipment, etc.

*Price 50 cents.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

TWO applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From 125 checkers, coopers, etc., in the employ of various steamship companies at Saint John, N.B., a majority of whom are stated to be members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The request of these employees for an agreement covering wages and working conditions is given as the cause of the dispute.

(2) From sleeping car conductors and porters in the employ of the Canadian National Railways' sleeping and dining car services, being members of the Canadian Brotherhood of Railway Employees. The dispute grows out of changes made by the company in certain sleeping and parlour car runs, resulting in increased hours of service for certain employees and loss of employment to others. Two hundred and ten employees are stated to be directly affected by the dispute and 400 indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on February 4 to deal with a dispute between the Canadian National Railways and 350 trainmen in the Southern Ontario District, members of the Brotherhood of Railroad Trainmen. Messrs. Albert McGovern and C. F. Needham, both of Toronto, have been appointed members of the board on the recommendation of the employees and company, respectively, and will confer looking to a joint recommendation for third member, who will be chairman of the board. The application for a board in this matter was received on December 31 (LABOUR GAZETTE, January, 1939, page 8).

Settlements Effected

An agreement was concluded on January 12 between the Winnipeg Electric Company and Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers, which disposed of the dispute respecting wages of foremen, troublemen and linemen on emergency truck, sub-foreman, linemen journeymen and apprentices, meter installers and helpers, meter repairers and helpers, and cable splicers, dealt with recently by a Board of Conciliation and Investigation (LABOUR GAZETTE, January, 1939, page 10). The employees had requested cancellation of the existing wage deduction so as to leave a deduction of 3 per cent (instead of 6 per cent) in effect for the year commencing May 1, 1938, with complete restoration of former wage rates for the ensuing year. The report of the board, which was signed by the chairman, Honourable Chief Justice E. A. McPherson, and the member nominated by the employees, Mr. Fred Keeley, recommended a restoration of 1½ per cent in respect of the employees' wages; Mr. W. C. Hamilton recommended a wage increase of one cent per hour. The board's recommendations were not acceptable to the company and direct negotiations were renewed. The agreement which has been reached provides generally for an addition of one cent an hour to wage scales ranging up to 85 cents per hour, and one and one-half cents an hour to wage scales of 85 cents or more per hour.

The application for a board submitted by 130 telegraph messengers in the employ of the Canadian National Telegraphs at Toronto, members of Division No. 264, Canadian Brotherhood of Railway Employees (LABOUR GAZETTE, December, 1938, page 1331) was withdrawn on January 9, a settlement of the dispute having been effected through the mediation of officers of the Department of Labour.

Interim Report of Board in Dispute between Various Coal Mine Operators in the Estevan District, Saskatchewan, and Their Employees

An interim report was received by the Minister of Labour on January 23, 1939, from the Board of Conciliation and Investigation established to deal with a dispute involving various coal mining companies at Bienfait in the Estevan District, Saskatchewan, and their employees represented by the Bienfait Local Union of the United Mine Workers of America. The report is signed by all three members, Professor A. R. Greig, chairman, Mr. B. D. Hogarth, the employers' nominee, and Mr. A. J. Morrison, the men's nominee. The board has adjourned its hearings until May 15.

Following is the text of the interim report:—

Interim Report of Board

In the matter of The Industrial Disputes Investigation Act and of a dispute between: Western Dominion Coal Mines Limited, Manitoba and Saskatchewan Coal Company Limited, Bienfait Mines Limited, Lignite Mines Limited, Eastern Collieries

of Bienfait Limited, Baniulis Brothers Limited and Wilson Coal Company, Employers, and Their Employees, the majority of whom are represented by the United Mine Workers of America, Employees.

Regina, Sask., January 18, 1939.

The Honourable Norman McL. Rogers,
Minister of Labour,
Ottawa, Canada.

Sir:—The undersigned members of the Board of Conciliation and Investigation, appointed by you in the above matter, beg to make an interim report as follows:

The first meeting of the Board convened on Wednesday, the 4th of January, in Regina, when the oaths of office were completed by the Chairman and Members of the Board and the Board called upon the Attorney General, the Deputy Minister of Labour and the Coal Administrator for the purpose of getting such information and documents relating to the matters in dispute as might be found helpful in the matters being dealt with by the Board. It was also arranged with the Hon. Mr. Davis, Attorney-General, that Sydney Inch, Chief Reporter of the Court of King's Bench, should be loaned to the Board to serve in a secretarial capacity.

On Thursday, January 5, the Board proceeded to Estevan and spent Thursday afternoon in arranging accommodation and a visit to the Coal Administrator's local representative for the purpose of getting such information as was available from him. Friday and Saturday, January 6 and 7, the Board inspected five of the seven mines concerned in the dispute, the balance being inspected the following week, going into the mines, observing the men at work, the conditions under which they worked and their living conditions.

Monday morning, January 9, the Board held its first session at Estevan. The parties to the dispute were represented, the men by Patrick Conroy, Vice-president of the United Mine Workers of America, and a local committee representing the Bienfait local of the United Mine Workers of America, the operators being represented by Mr. C. Lynn Grant. Patrick Conroy presented a brief on behalf of the United Mine Workers of America outlining in general terms the demands of the miners. In accordance with section 24 of The Act the Board advised the parties that it was their desire that efforts be made to effect a settlement, and to that end they convened a conference of both parties in the hope of reaching an amicable settlement of the dispute. Joint conferences of the operators and their representatives and the representatives of the men, from which the press and public were excluded, commenced in the afternoon and continued until Monday, January 16. The Board attended all such conferences and also met with both operators and miners' representatives in separate conferences in an effort to reach a settlement.

A frank exchange of opinions and an apparent earnest desire on the part of both parties was manifest throughout. Several proposals and counter proposals were made, but the Board regrets that no settlement was arrived at. As a result of the said conferences the Board came to the conclusion at the session of Monday, January 16, that an adjournment would be in the best interests of both parties and accordingly made the following ruling:

> Upon the application of Patrick Conroy, of the United Mine Workers of America, the Board orders an adjournment of the hearings to May 15, or such other date as may be mutually agreed upon by the Board, it being understood that the Board will endeavour to procure the attendance of such other parties, as to the Board appear to be interested, to attend a conference at that time.
>
> The Board instructs the Mine Operators that there shall be no discrimination of any kind against any member of the United Mine Workers of America either in the matter of employment or re-employment. That the *status quo* at each mine as at the date of application for the Board be maintained.

In the interim it is the intention of the Board to arrange for a meeting, as referred to in the above order, and arrange, if possible, for the attendance of the other parties referred to.

The Board journeyed to Regina on Tuesday, January 17, and on January 18 had a conference with the Hon. Mr. W. F. Kerr, Minister of Natural Resources, who assured the Board of every possible co-operation.

Respectfully submitted,

(Sgd.) ALEX R. GREIG,
Chairman,

(Sgd.) A. J. MORRISON,
Board Member.

(Sgd.) B. D. HOGARTH,
Board Member.

Report of Board in Dispute between United Delivery, Limited, and Certain of its Employees

The findings of the Board of Conciliation and Investigation established in August to deal with a dispute between the United Delivery, Limited, and its truck drivers and helpers, members of the Canadian Brotherhood of Railway Employees, were received by the Minister of Labour at the end of January. The board's report was signed by the chairman, Mr. F. J. Hanna, and the member nominated by the company, Mr. Walter F. Schroeder. A minority report was submitted by the employees' nominee on the board, Mr. Clinton H. Dowd.

The texts of the two reports follow:—

Report of Board

Ottawa, January 20, 1939.

The Honourable
The Minister of Labour,
Ottawa, Ontario.

Honourable Sir,—

The Board of Conciliation and Investigation established in pursuance of Section 7 of the Industrial Disputes Investigation Act, having completed its inquiry into the dispute between United Delivery Limited and its truck drivers and helpers, respectfully submits, herewith, the report of the Board's proceedings and recommendations.

United Delivery Limited is a body corporate having its head office in the City of Ottawa, in the Province of Ontario, carrying on a parcel delivery and transfer business in and about the City of Ottawa. The operations of the company are carried on by means of motor trucks and the chief business of the company is the delivery of parcels and furniture for various merchants from the stores or shops of these merchants to their customers. The extent of the company's business requires the daily operation of about twenty-six trucks and for the purpose of operating these trucks the company regularly employs about twenty-two drivers and temporarily about twenty-two helpers. The maximum rate of pay of a driver has been $22.45 per week, and that of a helper twenty-five cents per hour to a maximum of $2.50 per day. The average working hours of a driver has been from 8.45 a.m. until after 7 p.m., with one hour off for lunch at noon only. The hours of the helpers are approximately the same as those of the drivers. On Saturdays, days before holidays, and in the holiday season, and also frequently when the merchant customers put on sales, the employees necessarily work until midnight and later without extra pay or overtime allowance. At no time except on statutory holidays have the employees been given leave of absence with pay. The driver in addition to operating his truck and being responsible for the delivery of parcels is responsible for collections made by him of money which he receives from customers on cash on delivery parcels. This money he is supposed to turn in to the employer's office on the same day or not later than the following morning.

Prior to the year 1938 the employees were not organized as such and no collective application had been made to the employer for increased wages, shorter hours, or better working conditions.

In an application for the establishment of a Board of Conciliation and Investigation, dated May 11, 1938, made by A. R. Mosher and M. M. Maclean, parties authorized in writing by a majority of union members affected, the dispute of the truck drivers and helpers was set forth as—

1. "The demand of employees for a collective agreement respecting wages and working conditions as per copy attached."
2. "The dismissal of an employee for an alleged irregularity whereas employees claim that the dismissal was because of the employee's activities as an officer of their organization."

The applicants further alleged that they had endeavoured to adjust the dispute having submitted a copy of the employees' demands to the employer and had endeavoured to arrange a conference. They further state that they were unable to get any response from the employer.

This Board having been properly constituted by order of The Honourable, the Minister of Labour, on August 11, 1938, and the individual members having taken their oath of office they proceeded to examine the cause of dispute on the 9th day of September, 1938.

The Board met the representatives of both parties and considered the agreement submitted with the employees' application in order to ascertain the issues seriously in dispute. The parties, in effect, agreed that the proposals in the employees' agreement, saving stipulations as to increased wages and shorter hours, presented no insurmountable difficulties. Mr. Ralph Smith, for the employer, stated that by reason of the nature of the business the working hours could not be shortened and the company was not in a financial position to increase the wages at the present time. No agreement could be reached on these points. On the dispute in connection with the alleged wrongful dismissal of an employee, Mr. Ralph Smith, for the employer, maintained that the dismissal was justified.

No settlement of the dispute having been arrived at by conciliatory efforts, the Board proceeded to investigate the complaint by hearing evidence touching on the financial condition of the company, the men's working conditions, and the alleged dismissal of the employee.

A formal objection to the appearance of Mr. James Warren York, K.C., as a representative of the employer, was made by the representatives of the employees on the ground that by Section 42 of the Act no counsel or solicitor was entitled to appear except with the consent of the parties to the dispute. The employees contended that they were not so represented and refused to consent to counsel appearing for the employer. The employer maintained that Mr. York was at that time, and had been for years, a Director of the employer company and did not appear as a Counsel, but as a Director, and could not be disqualified by reason of the fact that he was a practising solicitor. The Board is of the opinion that many solicitors are actively engaged as directors of incorporated companies in directing and administering the affairs of the company, occupying their office as directors not by reason alone of their legal abilities, but because of their general business acumen. The Board, therefore, considered that Section 42 of the Act did not preclude a director who was a practising solicitor from appearing as the representative of an employer which was an incorporated company and of which such solicitor was a director. The Board overruled the objection of the employees' representatives and permitted Mr. York to continue to represent the employer company at the sittings of the Board.

Evidence taken relevant to the dispute arising out of the alleged dismissal of an employee showed that this employee was a married man, 43 years of age, the father of six children, and had been employed by the company for seven years. His hours of work had ranged from ten hours per day in slack times to twenty hours per day at very busy times. He was dismissed on Monday, April 11, 1938, and was told the reason for his dismissal was that he had failed to turn in $4.05 which he had collected on a cash on delivery parcel on Saturday, April 9. The dismissed employee admitted that he had left the garage of the company on a Saturday night without turning in his cash and further admitted that he had spent the cash before Monday, April 11, knowing it to be the property of a customer of the employer. It was contended on behalf of the dismissed employee that the company made a practice of deducting $1 out of each driver's pay and this deduction was placed on the company's books to the credit of the employee in what was called the Boys' Bank. At the time of his dismissal the former employee had to his credit in this account the sum of $8.13. The evidence of the former employee was very unsatisfactory and it would appear from his own evidence that the idea of setting off his shortage against his credit on the books of the company did not occur to him before the time of his dismissal. In any event the funds which he collected on Saturday, April 9, were not funds of the company but of a customer of the company, and, therefore, could not properly be set off against any money the company might owe to him. The Board finds that this employee was discharged for good and sufficient cause and in view of the circumstances discrimination cannot be imputed to the employer, or its officers.

In connection with the charge of discrimination on the part of the employer against the dismissed employee, it was also alleged that the employer had threatened to discharge employees joining any organization. It was brought out in evidence and admitted by the employer that prior to the application for this Board a committee of employees had a lengthy meeting with Mr. Ralph Smith, Manager of the Company. At this meeting Mr. Smith endeavoured to dissuade the employees from forming an organization and strongly advised them not to do so. It is quite apparent that Mr. Smith strongly opposed the organization, and subsequently, at the time application was made to the Department of Labour for settlement of this dispute, the employees were asked to sign a document containing the statement that they were not in favour of the application being made. A number of employees were examined and they would go no farther than to say that Mr. Smith had advised them that they would be better off to let matters remain as they were at the time, and from their general attitude there was no indication that the actions of the employer even approached anything in the nature of intimidation.

The chief dispute before this Board was the demand of the employees for a collective agreement respecting wages and working conditions as set forth in a draft agreement attached to the application requesting the establishment of the Board. The Board at its preliminary meeting held on September 8, 1938, considered the application and the draft agreement submitted by the representatives of the employees. The first seven clauses of this agreement pertain to the application of

the agreement to the parties and generally deal with working conditions other than hours of labour and wages. The balance of the agreement dealing with hours of labour and wages in short fix an eight hour day, time and a half for overtime, and double time for work on Sundays and legal holidays, and the increase in the drivers' pay to $25 per week and helpers to $20 per week. The Board, after considering the application and draft agreement decided to call the representatives of the parties together in order to consider the agreement and ascertain the differences, if any, between them.

A meeting of the Board was held on September 13, 1938, at which Mr. Ralph Smith represented the employer, and Messrs. Mosher and Maclean represented the employees. The draft agreement submitted by the men was thoroughly considered, clause by clause, and no objection to the first seven clauses, subject to a slight amendment, was raised by either party. Mr. Smith, representing the employer, said that he could not speak for the company without first getting authority from the Board of Directors, but stated that owing to the nature of the company's business it was unable to limit the working hours of the employees to eight hours each day and that at that time the company was not in a financial position to increase wages. After discussing these matters at length it was suggested by the Board that the company should consider paying the employees time and a half for every hour worked in excess of eight hours, and that this scale should also apply on holidays and Sundays. The Board adjourned in order that this proposal might be placed before the Board of Directors of the Company.

The Board resumed its investigation in public on the 19th day of September, 1938, in the presence of representatives of both parties and the auditors of the employer company. Mr. Smith for the employer company reported that the Company could not agree to the proposal of the Board to a modified agreement on the grounds previously stated and in addition maintained that owing to the financial condition of the Company the best interests of both parties would be served by leaving the working conditions as they were at the time; moreover he felt that the men were well satisfied with their treatment. The Auditors of the Company explained the capitalization of the Company and explained the reason for the inability of the Company to pay increased wages. Several additional modifications of the proposed agreement were suggested, but the parties could not agree on any one of the proposals. Mr. Mosher, for the employees, stated that if the employer company would agree to a closed shop agreement the employees would be satisfied with greatly modified terms. After considerable discussion it appeared that all efforts for settlement of the dispute had failed. The Board then decided to investigate the affairs of the Company and take evidence of the employees. Representatives of the employees requested that a financial statement for the past five years of the Company be supplied to the Board and the representative of the employer company volunteered to submit this. The hearing was then adjourned for one week for the purpose of allowing the preparation of financial statements and the notification of witnesses to be called.

The Board examined on oath four drivers, one former driver employed by the Company and five helpers, also the Cashier of the Company, the Foreman of the garage, and the Manager of the Company. The financial statement supplied by the Company, and certified by its Accountant, showed that during the period September 1 to 15, 1938, twenty-two drivers were employed with pay ranging from $2.65 per day to $3.45 per day. On examination of the drivers it appeared that increases had been made in pay since the inception of this investigation, but the increases were small and not general. The drivers are paid every two weeks and out of each pay $2, or $1 per week, is held back by the Company. This deduction is held by the Company to the credit of the employee and the employee can withdraw all money held back in excess of $5. On September 20, 1938, the Company under this system held to the credit of the employees affected the sum of $199.05. The drivers when questioned did not complain of this deduction, nor was there evidence of difficulty in receiving the excess from the Company on demand. The drivers wear uniforms and are obliged to pay for two-thirds of the cost of a Cap, Jacket and Trousers. The cost to the driver is about $22 and is taken out of his pay from time to time. The helpers appear to be in a different position from the drivers as the majority of them do not work a full day. According to the Company's statement during the period September 1 to 15, 1938, twenty-two helpers had been employed at the rate of 25 cents per hour to a maximum of $2.50 per day. Only one of these helpers had worked the full thirteen days during that period. There were no deductions from wages and the helpers examined appeared satisfied with the pay and working conditions. The evidence of the employees was consistent in that they had no complaint as to the treatment which they had

received from the Company, but the drivers all agreed that they could use a little more money and that the hours which they worked were at times extremely long.

The evidence of the former driver was to the effect that the hours were too long and that the pay was insufficient. He considered that a driver on a furniture truck should get $25 per week and his helper $21 per week, and that the driver of a parcel truck should get $23 per week and his helper $20 per week, and that in all cases the men should be paid extra for any time they worked over eight hours. Mr. James Warren York, K.C., representing the employer company, requested the Board to summon witnesses to show what wages were being paid by other delivery companies in the City of Ottawa, but the Board declined to do so on the grounds that the Company admitted that it wanted to pay increased wages and the Board, therefore, felt that its investigation should be confined to the ability of the Company concerned to increase the wages of its employees.

The representatives of the men objected to the financial statement submitted by the Company as being only an operating statement and not showing the true financial condition of the Company. After considerable discussion it was agreed that an Auditor appointed by the employees should investigate the books of the Company and report confidentially to the Board. This report was made by Mr. H. A. Watson and in it he expressed the opinion that it would be impossible for the Company to pay increased wages at the present time, and that the only objection which he took to the operating statement submitted by the Company was that there was possibly too great an amount allowed for depreciation on trucks. In considering this objection the Board felt that any alteration in the item of depreciation would not materially affect the wages of the employees.

During the investigation different proposals were made with a view to settlement of the differences between the parties, but none was acceptable to both parties. At a meeting held on November 10, 1938, final representations and arguments were made to the Board, and the representatives of the employees urging the adoption of an agreement, and the employer company maintaining that conditions should remain as they were. Before the meeting adjourned Mr. Maclean, representing the employees, stated that they would be willing to enter into an agreement embodying the seven clauses tentatively suggested as satisfactory in the early stages of the investigation and to leave the matter of hours of work and wages remain as they are for a period of one year. The Board requested that a draft of this proposed agreement be furnished to the employer and to the Board. This was received by the Chairman of the Board and a copy forwarded to the employer company on November 25, 1938. A copy of this agreement is appended to this Report for purposes of reference. By letter to the Chairman dated November 29, 1938, the employer company put itself on record as declining to enter into the agreement proposed.

The Chairman and Walter F. Schroeder, K.C., two of the members of the Board, are of the opinion that the employer company, United Delivery Limited, is not in a position to increase the wages of its employees nor decrease the hours of labour worked at the present time. This conclusion is strongly supported by the statements and reports of the Auditors appointed by each party who made a thorough examination of the financial condition of the employer company and reported that any increase in the expenses of the employer company would seriously impair its financial standing and might lead to the eventual dissolution of the Company. Under the present operating conditions this Company is just able to continue business and as it is employing a number of men who might very easily find themselves unemployed if this Company should cease to do business, we, the majority of the Board, do not feel inclined to impose upon this Company any conditions which might lead to that disastrous result. Therefore, having regard to all the facts and circumstances hereinbefore set out and for the reasons already set forth, we do not feel that this Board is justified in recommending any alteration in the rate of wages or in the working conditions of the men concerned in this investigation.

All of which is respectfully submitted.

(Sgd.) F. J. HANNA,
Chairman.

(Sgd.) WALTER F. SCHROEDER,
Member of the Board.

Proposed Agreement

AGREEMENT governing rates of pay and working conditions of the employees of United Delivery Limited, Ottawa, members of the Canadian Brotherhood of Railway Employees.

Effective this 1st day of November, 1938.

1. The following rates of pay and rules shall govern the service of the employees of United Delivery Limited, Ottawa, hereinafter referred to as the "Company."

2. Employees will not be discriminated against for membership in the Canadian Brotherhood of Railway Employees, nor for serving on

committees representing the employees covered by this agreement.

3. Employees will be granted the necessary leave of absence, without pay, to serve on committees representing the employees, or to attend meetings of the Brotherhood.

4. A seniority list of all employees covered by this agreement shall be posted each year in the month of January, showing the name of each employee and the date of his last entry into the service of the Company. This list shall be open for correction for a period of sixty days, and shall be corrected on proof of error submitted by the employees, or their representatives.

5. In the event of a reduction of staff, the employees who are senior in the service of the Company, and who have the necessary ability to perform the duties required, shall be retained. Employees who have been laid off will be re-employed when the staff is increased, in accordance with their seniority in the Company's service.

6. Any employee who has been dismissed shall be entitled to an investigation, at which investigation a representative of the employee, at his option, shall be present, and be given full opportunity to examine all charges against the dismissed employee, and to offer such evidence and argument as he may consider necessary for the defense of such employee.

7. Should any employee covered by this agreement believe that he has been unjustly dealt with, or that there has been non-compliance with any of the provisions of this agreement, the Employees' Committee, or his representative, may appeal to the higher officers of the Company, in their regular order.

8. The hours of service of all employees shall remain as established on the date of the signing of this agreement.

9. The wages of all employees shall not be less per day or per week than those set out in the "Drivers and Helpers Payroll" for the period September 1-15, 1938, submitted to the Board of Conciliation on September 22, 1938.

10. Employees will not be required to suspend work without pay during the period their trucks are being serviced or repaired.

11. Employees shall be permitted to erect a bulletin board for their own purposes, at the Company's garage.

12. This agreement shall remain in effect for one year from November 1, 1938, and thereafter, unless revised or superseded on thirty days' notice from either party.

Signed on behalf of the Company:	Signed on behalf of the Employees:

Minority Report

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between United Delivery Limited, employers, on the one hand, and the drivers, warehousemen, checkers, loaders, mechanics and helpers of the United Delivery, Limited, on the other hand.

To the Honourable the Minister of Labour,
Department of Labour,
Ottawa, Ontario.

Sir:

The Board of conciliation and investigation was authorized by you on the 6th day of August in the year 1938 to inquire into the dispute between United Delivery Limited and its truck drivers and helpers.

The matters in dispute as set forth in the application for the present Board of Conciliation and Investigation were:—

1. "The demand of employees for a collective agreement respecting wages and working conditions as per copy attached."

2. "The dismissal of an employee for an alleged irregularity whereas employees claim that the dismissal was because of the employee's activities as an officer of their organization."

At a subsequent meeting of the Board, on the 13th of September, Mr. Ralph Smith appeared for the Company and Mr. A. R. Mosher and M. M. Maclean on behalf of the men. The various clauses of the proposed agreement were discussed in detail and it appeared that Mr. Smith had no objection to the first seven clauses dealing with the right of collective bargaining subject to a slight change of paragraph 6.

With regard to the matter of hours and wages, he was unable to agree to the terms proposed. The Board suggested, as a compromise, that Mr. Smith submit to his Company a proposal to the effect that the employees be granted time and a half for overtime after eight hours.

At the next meeting of the Board, which was open to the public, Mr. Smith appeared with his auditors, who explained to the Board that the position of the Company financially was so precarious that it could not increase wages. The employees representative then asked that the Company furnish a financial statement for the past five years.

When the Board next convened Mr. Smith was accompanied by Mr. J. W. York, K.C., and the auditors of the Company. Objection was taken to Mr. York being present by the representative of the employees on the ground that Section 42 of the Industrial Disputes Investigation Act precludes the appearance of, or the right to have counsel or solicitor except with the consent of the parties to the dispute. Mr. York argued that, as he was a director of the Company, he had a right to be present and the Board sustained Mr. York's contention. From the standpoint of any hope of conciliation this was regrettable. Any subsequent attempt on the part of the Board to conciliate the dispute was frustrated and the Board was subject to be called to account by Mr. York if the members deviated from the strictest of legal questioning, thus seriously hampering the work of the Board, which recognized that it was not required to follow legalistic procedure.

Mr. York took charge of the Company's part of the discussion and the President, who had hitherto shown some spirit of conciliation, had nothing further to say. It is felt that the Government should consider the Amendment of Article 42 in the order to guard against such an abuse of the spirit of the Act. Otherwise it is a simple and quite legal procedure for any Company to add its counsel or solicitor to the Board of Directors just before the establishment or even during the sittings of a Board of Conciliation and Investigation and thus take advantage of a loophole which virtually permits representation by cousel at Board proceedings.

The Board then proceeded with the examination of some of the employees, including four drivers, one driver formerly employed by the Company, and five helpers. This examination disclosed the following conditions:—

1. *As to Rates of Pay*

Drivers—

The wages of the drivers vary from $2.65 to $3.45 per day. The rates of pay include small increases given since the Board had been established. Drivers are paid every two weeks. Several of the drivers suggested that increases in salary were warranted.

Helpers—

Helpers are paid 25 cents an hour for the number of hours worked up to ten hours; if they work more than ten hours in any one day they are paid only for ten hours. There is no provision made to pay a minimum amount if the helpers are called out for duty.

2. *As to Hours*

Drivers—

The evidence revealed that the men were working extremely long hours. Most of the men are at the shop in the morning at twenty minutes to nine and their work is not completed until about eight to nine o'clock at night. On Saturday, of course, these hours are even longer. Some of the men stated that they were not finished until eleven o'clock. Furthermore the men stated that they were busy practically all that time with the exception of the lunch hour. One of the men, on being asked, stated that he never could go to any entertainment since, as soon as he got home he had to go to bed to rest up for the next day. The character of this work which these employees carry on is more or less exhausting and they have apparently so much to do that they must work very fast in order to get through their day's work even with the late hours which they must work. The Company endeavoured to show that the long hours which the men worked were due to the fact that its clients insisted on delivery of parcels bought late in the day. However, no evidence was shown to the effect that these men were not busy during the earlier part of the day, and it was obvious that the men were being asked and forced to work far beyond the ordinary hours with no increase in pay or allowance for overtime of any kind.

I am unable to agree with the Majority Report that the evidence of the employees was "that the hours were, *at times*, extremely long," the evidence, in my opinion, was that the hours, *at all times*, were extremely long. Of course, the hours during the holiday season such as Christmas and New Year's and before Thanksgiving were in most cases inhuman. Some of the men stated that they worked 20 hours at a stretch. It is rather astonishing that the Company pays for the gas and oil which it uses to drive its trucks after six o'clock and that the depreciation on the wear and tear of the Company is most carefully figured out by the Company's accountants, whereas the employees are forced to work overtime without remuneration.

3. *As to Uniforms*

The Company pays one-third of the cost of the uniforms and the men two-thirds. Inasmuch as the Company uses practically all the waking hours of the men, I am of the opinion that the drivers are being asked to pay too great a proportion of the cost of the uniforms.

4. *Re Deductions from Pay*

It appears that the Company has been in the habit of deducting $1 per week from the employees' envelopes and putting it into what was called the "Boys' Bank." It was understood that the employees could draw out the balance over $5. Apparently no trust account was ever established or has ever been established to handle this money and the employees have no control over it. One of the drivers stated that he usually got his money when he asked for it. The Company apparently arrogates to itself the right to withhold this money from the employees, and, in my opinion, the deduction is unjustified if not actually illegal. I would recommend that this practice be discontinued in future.

5. *Intimidation and Discrimination*

The evidence of the employees, which was not contradicted by Mr. Ralph Smith, showed that the Company was not in sympathy with the organization of the employees in a union. There apparently was, on one occasion, a lengthy meeting in the Company's office when the matter was discussed, and I agree with the majority report in the statement that "Mr. Smith strongly opposed the organiza-

tion." Subsequently at the time application was made to the Department of Labour for the appointment of the Board, the employees were asked to sign a statement that they were not in favour of the application. Certainly, Mr. Smith did everything he could to prevent the dispute being referred to the Board.

With the exception of the evidence of the former employee, whose case will be dealt with later, only one of the employees claimed that there had been discrimination against him because of any union activity and this occurred when he was laid off work. However, it was apparent that Mr. Smith was not at all in sympathy with the idea of the employees joining any organization, and furthermore, the attitude of the Company as disclosed by its representatives, revealed in my opinion, a most virulent antipathy towards the union organization. It apparently never occurred to the Company's representatives that the employees might have the right to join a labour organization in the same way as employers join trade associations or lawyers become members of bar associations.

The Board asked for and was given, with some reluctance, by the Company a financial report for the past five years. In 1937 the helpers earned from $3 to $784. One helper earned $784, three over $500 and four between one and two hundred dollars, and the balance less than $100 during the year. It is perfectly obvious that these wages are ridiculously low.

On the suggestion of the employees' representatives the Board agreed to allow an auditor, Mr. H. A. Watson, to investigate and report, after having had access to the Company's books, as to the accuracy of the financial statement supplied to the Board. Mr. Watson in his report agreed that the report was accurate insofar as the items were concerned. However, he questioned the amount set aside for depreciation on the trucks of the Company. This item of depreciation on the trucks is used quite legally but with great effectiveness by the Company to offset profits earned.

Again it is apparent that this Company is more interested in providing depreciation on its equipment than in the humanitarian objective of giving its employees a decent living wage. I am unable to agree with the Majority Report when it states "The Board felt that any alteration in the item of depreciation would not materially affect the wages of the employees." As compared with a payroll of approximately $103,000 for the past three years, there has been a depreciation allowance on trucks of approximately $14,000. If the Company thought as much of its men as it does of its trucks it could cut the depreciation reserve in two and allow the men a little more of the fruits of their own labour. The attitude of the Company is that it will pay full price for everything it requires with the exception of its labour.

From the evidence and the general discussion it was disclosed that the Company is doing a large volume of business on an extremely small margin, resulting in low wages and long working hours. In effect, what happens is that the employees are deprived of a living wage in order to subsidize the clients of the Company. This is the more obvious when the financial statement of the Company shows that every other item of expense is carefully charged against operating costs. I am of the opinion that the rates charged by the Company are too low, but that condition being beyond the control of the employees should not be used to force the employees to work longer hours and receive less than a living wage.

Early in the discussion the Company disclaimed any desire to prevent the men's joining a union organization and stated that if an agreement as to wages and hours could be arrived at the other clauses which had reference to the collective bargaining agreement would prevent no difficulty. In a spirit of conciliation, representatives of the employees offered on November 10, 1938, a compromise agreement, offering to leave the matter of wages and hours as they were for one year, but incorporating the clauses regarding the collective bargaining rights of the men. The Board as a whole and particularly the members signing the Majority Report were very insistent in advising the Company representatives that this compromise be accepted. The Company refused, however, to do so.

It is impossible for me to understand or explain the attitude of the majority of the Board in not recommending the acceptance of this compromise offer in its report. If it was fair and reasonable when the Board strongly counselled the Company to accept it, is it not fair and reasonable now? No further evidence was heard, and I know of no reason which would alter the opinion of the Board. I suggest that if such a recommendation for the settlement of the dispute was in accordance with the merits and substantial justice of the case at that time, nothing has since transpired which has altered the situation.

I must also take issue with the statements contained in the last paragraph of the report of the majority as to the inability of the employer to increase the wages of the employees or decrease the hours of labour. As I have pointed out above, by reducing its depreciation reserve, it can very easily

increase the wages of its employees. It is not a question of increasing the expenses of the Company so much as the proportion of the expenses as wages which should go to the employees. At present the Company is paying about 50 per cent of its revenue as wages, whereas it was pointed out by the employees' representatives that other transport concerns pay about 70 per cent of their revenue in wages. Again, the Company has no right to deprive its employees of a living wage because it does business at such a low rate as to be actually a subsidy to its clients.

I am quite unable to agree with the conclusions of the Majority Report as to the probability of the eventual dissolution of the Company and resultant unemployment for its employees. Any Company which provides handsomely for depreciation each year, which persists in doing business at too low a figure, all at the expense of its employees, is not liable to cease doing business, and if it did the loss to the community would not be irreparable. In the circumstances, I would recommend that the agreement covering wages and working conditions, as submitted by the representatives of the employees to the Board, be accepted by the Company.

With regard to the case of the employee who was dismissed for an irregularity, I find myself unable to agree with the Majority Report. The evidence showed that this employee worked seven years for the Company and, of course, handled thousands of dollars for the Company without any trouble. Considering the trifling amount involved and his long and faithful service, I consider that the employee should have been suspended for a reasonable period but not discharged. I am further convinced, after noticing the attitude of the Company, as disclosed by its representatives, toward the union of its employees, that the position of the employee discharged was certainly not bettered by the fact that he was an officer of the employees' organization. I would therefore recommend that he be reinstated in his employment.

All of which is respectfully submitted.

(Sgd.) CLINTON H. DOWD.

Dated at Ottawa, Ontario,
February 4, 1939.

Report of Board in Dispute between Motorways, Limited, and Certain of its Employees

The Board of Conciliation and Investigation established in September last to deal with a dispute between Motorways, Limited, and its drivers, warehousemen, checkers, loaders, mechanics and helpers, as represented by the employees' committee, Automotive Transport Section, Canadian Brotherhood of Railway Employees, submitted its findings to the Minister of Labour at the close of January. The board's report was signed by the chairman, Mr. A. Gordon McDougall, K.C., and the member nominated by the company, Mr. Duncan A. McIlraith. The employees' nominee on the board, Mr. Clinton H. Dowd, presented a minority report.

The texts of the two reports follow:—

Report of Board

In the matter of a dispute between Motorways Limited, employer, and its drivers, warehousemen, mechanics, checkers, loader and helpers, employees.

To the Honourable the Minister of Labour:

The Board of Conciliation was authorized by order of the Honourable the Minister of Labour under date the fifth day of October, 1938, to inquire into a dispute between Motorways Limited, and its drivers, warehousemen, mechanics, checkers, loaders and helpers.

A number of meetings of the Board have been held, at which Mr. George Hall, General Manager, represented Motorways Limited, and Mr. A. R. Mosher, of the Automotive Transport Section of the Canadian Brotherhood of Railway Employees, was present on behalf of the men. Mr. M. M. Maclean, of the same organization, was also present at one meeting.

Conditions of employment and wages were discussed at these meetings and the draft agreement as suggested in the application filed herein, under date April 29, 1938, was discussed in detail.

It appeared from the discussions and from statements made by Messrs. Hall and Mosher that the conditions of employment of the employees of Motorways Limited correspond very closely to the requirements of the proposed agreement. Rates of pay at present existing are equal or better than the rates set out in the proposed agreement and in one particular conditions are superior to the proposed requirements, that is, on long hauls, between Ottawa and Toronto, two men are engaged to operate the truck instead of only one man.

There is, at the present, no provision for the settlement of disputes between the parties hereto as outlined and proposed in articles 7, 12A, and 15, of the proposed agreement.

While the representative of the Company was not entirely in accord with several other minor details of the agreement, he did not take any very decided objection to them, or to the agreement as a whole. He, however, declined to enter into any agreement, or to consider entering into one, stating that he felt that the employees themselves did not desire the agreement and that they were not, as a body, supporting the application to the Union Officials.

It appeared that, if Mr. Hall, or if the Company, was proposing to sign an agreement, he would have no very definite objection to any of the terms contained in the proposed agreement.

No further evidence was offered by either of the parties and no witnesses were called to give sworn evidence. Mr. Mosher was invited to bring witnesses, or to submit a list of those whom he wished to call, and the meeting was adjourned for this purpose. Mr. Mosher, at a subsequent meeting, advised the Board that he did not desire to call any witnesses and contended himself with submitting a list of operators of Transport Companies who have signed an agreement similar to the one proposed in this case. Mr. Hall then stated that he did not desire to call any witnesses.

In the absence of any evidence as to the existence of abuses of any kind, or as to objections by the employees as to conditions and rates of pay, the Board did not feel impelled to call any witnesses.

The situation therefore appears to the Board to be that these employees are working in conditions and at rates of pay which are as good as, or superior to, the minimum requirements of the proposed agreement. The only request of the applicant was that the Company should enter into an agreement with the Automotive Transport Section of the Canadian Brotherhood of Railway Employees, and, while the proposed agreement was discussed, no witnesses were called to support the application, and, in the absence of evidence of the existence of abuses, the Board does not feel that it should make any recommendations.

Dated at Ottawa, this twenty-eighth day of January, A.D. 1939.

(Sgd.) A. Gordon McDougall,
Chairman.

(Sgd.) Duncan A. McIlraith.

Minority Report

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Motorways Limited employers, on the one hand, and the drivers, warehousemen, checkers, loaders, mechanics and helpers of Motorways Limited, on the other hand.

To the Honourable the Minister of Labour,
Department of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation and Investigation authorized by you on the 5th day of October, 1938, to inquire into the dispute between Motorways Limited and its drivers, warehousemen, checkers, loaders, mechanics and helpers, convened on October 11, 1938, at the office of the Chairman of the Board.

Subsequently the Board held several meetings at the office of the Chairman, at which Mr. George Hall was present on behalf of Motorways Limited, and the men were represented by Mr. A. R. Mosher, of the Automotive Transport Section of the Canadian Brotherhood of Railway Employees, at each meeting, and he was accompanied by Mr. Maclean at one meeting.

The dispute is based on the demand of the men for the signature by the Company to an Agreement respecting wages, hours and working conditions as shown in the schedule attached to the application.

At each meeting of the Board efforts were made to bridge the difficulties existing between the Company and the employees, but unfortunately no agreement was possible, as the Company persistently refused to sign any Agreement.

In an endeavour to narrow down the dispute to certain articles of the proposed agreement, the Board discussed the draft agreement in detail, and Mr. Hall, on behalf of the Company, appeared to find nothing unreasonable in the articles of the proposed agreement, and even admitted that some of the articles corresponded more or less closely with the actual practice of his Company.

With regard to rates of pay, it was ascertained that the Company does not use the system of hourly wages, but pays on a trip basis. In actual practice, it appeared that the hourly rate proposed in the Agreement would closely approximate the rate of wages presently received by the men, provided there were no unusual delays or a lack of business which would preclude the making of the trips.

After several meetings of the Board had been held, Mr. Mosher informed the Board

that he had not asked any employees of the Company to appear as witnesses, as he believed that they would be discriminated against by the employer if they appeared before the Board. He also expressed the opinion that there was no need for further evidence, inasmuch as the representative of the Company had agreed that the terms of the proposed agreement were fair and reasonable.

Subsequently, I suggested to the Board that witnesses be summoned in order that the Board might secure any further evidence required before arriving at a decision, as I was of the opinion that the Board was obligated to inquire into all the aspects of the dispute which might have a bearing on the demand of the employees for an agreement and that if the employees were summoned by the Board there could be no question of discrimination by the employer. This request was overruled by the majority of the Board.

In my opinion, the Board did not carry out the requirements of Section 26 of the Industrial Disputes Investigation Act, which reads as follows:—

"If a settlement of the dispute is not arrived at during the course of its reference to the Board, the Board shall make a full report thereon to the Minister, which report shall set forth the various proceedings and steps taken by the Board for the purpose of fully and carefully ascertaining all the facts and circumstances, and shall also set forth such facts and circumstances, and its findings therefrom, including the cause of the dispute and the Board's recommendation for the settlement of the dispute according to the merits and substantial justice of the case."

No attempt was made by the Board to obtain evidence from the employees affected, or to investigate the dispute, apart from hearing Mr. Hall, Mr. Mosher, and Mr. Maclean. There was no evidence to justify the statement contained in the Majority Report to the effect that "these employees are working in conditions and rates of pay that are as good or superior to the minimum requirements of the proposed agreement." I further suggest that the majority of the Board is quite in error in making the statement "that the only request of the applicant is that the Company should enter into an agreement with the Automotive Transport Section of the Canadian Brotherhood of Railway Employees," when, as a matter of fact, the Agreement is proposed on behalf of the *Employees,* that is, the drivers, warehousemen, checkers, loaders, mechanics and helpers employed by Motorways Limited.

The majority of the Board appeared to take the attitude that the Board was appointed to act as a court and its report seems to place the onus on the employees of proving that a dispute actually existed when, in reality, the granting of the Board determined that a dispute existed and it was the duty of the Board when so established to carry out the provisions of the Act by fully and carefully ascertaining, on its own initiative, all the facts and circumstances which gave rise to the dispute.

The Majority Report of the Board concludes by stating that "the Board does not feel that it should make any recommendation" whereas the provisions of the section quoted above call upon the Board to make "a recommendation for the settlement of the dispute according to the merits and substantial justice of the case."

In the circumstances, I have no alternative but to recommend that the Board be discharged, and a new Board appointed which will undertake to carry out the duties imposed upon the Board by the Industrial Disputes Investigation Act.

All of which is respectfully submitted.

(Sgd.) CLINTON H. DOWD.

Dated at the City of Ottawa,
Province of Ontario,
January 30, 1939.

Unemployment Insurance in New York State in 1938

New York State distributed $87,330,639 in unemployment insurance benefits during 1938, but it still owed $13,000,000 to jobless workers at the end of the year, according to a report made public recently by Miss Frieda S. Miller, State Industrial Commissioner. When all delayed and disputed claims are settled, total payments will exceed $100,000,000, Miss Miller said.

The 3 per cent payroll tax on employers of four or more workers brought $125,238,151 into the unemployment insurance fund in 1938 and interest added $2,450,309 more, Miss Miller reported. The excess of tax deposits over benefit withdrawals raised the reserve from $97,831,974 at the beginning of the year to $138,189,795 on December 31, but the report noted that "in excess of $10,000,000" would be deducted by mandatory refunds to some employers and by the final payment of 1938 benefit claims.

A total of 2,557,069 applications for unemployment insurance was received last year. Of these 2,178,316 were fully disposed of and the remaining 378,753 were carried over into 1939 for final determination. Miss Miller said the volume of claims and of tax collections was about 25 per cent above expectations.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1939

THE following table shows the number of disputes, workers involved and time loss for January, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Jan. 1939	10	1,228	8,047
*Dec. 1938	8	274	2,357
*Jan. 1938	24	4,293	31,939

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of disputes, the number of workers involved and the time loss in man working days were greater than in December, 1938, most of the disputes involved a small number of workers and caused little time loss. A strike of 700 coal miners at Blairmore, Alta., accounted for two-thirds of the time loss for the month. In December, 1938, most of the time loss was due to a dispute of lime plant workers at Blubber Bay, B.C., and to one involving leather goods workers in Montreal, P.Q. All figures were much smaller than in January, 1938, when most of the time loss was due to strikes of fishermen and fish handlers in Nova Scotia, loggers in Ontario and in Alberta, coal miners in New Brunswick and textile factory workers at Coaticook, P.Q.

Two disputes, involving 152 workers and causing a time loss of 1,300 man working days, were carried over from December, 1938, and eight disputes commenced during the month. Of these ten disputes recorded for January, seven were terminated during the month, two resulting in favour of the employers affected and two in favour of the workers involved, while a compromise settlement was reached in one case and the results of two disputes were recorded as indefinite. At the end of January, therefore, there were three strikes and lockouts on record, namely: coal miners, Blairmore, Alta., cap and glove factory workers, Windsor, Ont., and lime plant employees, Blubber Bay, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938; and dressmakers, Montreal, P.Q., January 20, 1939, one employer, this last being added to the list this month.

The dispute involving winery employees in one establishment at Toronto, Ont., commenced October 3, 1938, and recently added to the above list, is reported by the union to have been called off early in January, 1939, and has consequently been removed from the list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute in the city of Quebec reported too late for inclusion in the January issue of the LABOUR GAZETTE involved thirty-three workers employed by a chemical fertilizer company, members of the International Union of Chemical Fertilizer Workers, who ceased work on December 5 demanding increased wages and improved working conditions. The strikers resumed work on December 7 with an increase in wages of five cents per hour.

A minor dispute involved ten labourers employed by one contractor on the construction of a school building in Forest Hill Village near Toronto, Ont., on January 18 in a stoppage for three hours, demanding an increase in wages from 40 cents per hour to 50 cents. It was reported that the contract provided for prevailing rates for labourers and the men returned to work pending arrangements between the school board and the contractor for increased rates.

A strike of 125 loggers at Fire River, near Hornepayne, Ont., about January 28 for in-

creased wages and improved conditions has been reported in the press but particulars as to the dispute have not yet been received.

A number of plasterers and helpers employed by a contractor for a building at Toronto, Ont., ceased work on January 30 for one day in support of the painters' union which was picketing the job to secure the employment of union painters, none of whom were on strike. Under an arrangement in the building trades the plasterers and their labourers have agreed not to pass through picket lines of other unions affiliated with the Building Trades Council. As the unions of plasterers and helpers have an agreement with contractors providing for two days' notice before a strike, the painters withdrew the pickets and the plasterers and helpers resumed work next day.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to January

Leather Goods Workers (Handbags, Etc.), Montreal, P.Q.—A settlement of this dispute, involving members of the International Ladies' Handbag, Pocketbook, and Novelty Workers' Union of United States and Canada employed in one establishment, demanding a closed shop union agreement, increased wages, the forty-four hour week, etc., was reached on January 11 as a result of conciliation by an official of the provincial Department of Labour. A union agreement giving preference in employment to union members was signed, provision being made for a shop committee and for the arbitration of any disputes.

Lime Plant Workers, Blubber Bay, B.C. —This dispute which commenced in June was unterminated at the end of January. Twenty-three employees of the company charged with unlawful assembly in connection with the disturbance on a dock at Blubber Bay in September, 1938, involving strikers, pickets and employees of the company, were up for trial during January. Charges against thirteen were withdrawn and against the other ten were dismissed. A number of strikers had been convicted in December of unlawful assembly, etc., and sentenced to imprisonment.

Disputes Commencing During January

Coal Miners, Namao, Alta.—A number of coal miners in one colliery ceased work on January 2 demanding an agreement with the United Mine Workers of America, increases in wages to the union scale in the Edmonton district and in protest against the laying off of certain employees, allegedly because of union activity. Work was resumed on January 4 pending a settlement but some miners ceased work again next day in protest against the lay-off of five miners alleged to be contrary to the tentative arrangement. The strikers remained on the premises until the next day. In the meantime the employer sought a court order for their eviction but withdrew the application after the miners had vacated the premises. An agreement with the union was signed on January 10. Wages were increased by six to ten per cent to the union scale and all striking employees were to be re-engaged as required in the order of seniority.

Coal Miners, Blairmore, Alta.—Miners in three collieries operated by two companies in the vicinity of Blairmore ceased work on January 16, having failed to reach an agreement with the operators as to the rates of wages for contract mining. An amendment to the Alberta Coal Mines Regulation Act had provided that, in any mine without an agreement as to contract rates, the contract miners were to be paid by the ton. The agreements for these mines had expired on March 31, 1938, but operations were carried on under the agreement terms pending the report of a Board under the Industrial Disputes Investigation Act for the bituminous mines in Alberta and southeastern British Columbia. The Board recommended increases in datal rates but no increases in contract rates. (Labour Gazette, January, 1939, pp. 12-29). The operators and the miners represented by the union accepted this decision. In the mines near Blairmore the contract rates have been chiefly by the yard instead of by the ton and in making a new agreement the miners proposed to base the tonnage rates on those in certain other mines which the operators claimed would involve increases. The operators' association proposed that the dispute should be dealt with under the arbitration clauses of the agreement. The Alberta Minister of Mines proposed that work should be continued on the yardage basis for a time, the coal to be weighed in order to determine the proper tonnage rates. This was not accepted and the miners ceased work. After conciliation by the western representative of the Department of Labour an arrangement based on the Minister's proposal was reached, subject to approval by the union locals concerned. This provided for the immediate resumption of work at the same rate per ton as was being paid per cubic yard prior to the strike, pending an investigation to ascertain equitable equivalents in tonnage rates to those in effect on a yardage basis, the findings to be reported to the Board of Conciliation and Investigation which would be re-convened. These proposals were rejected by a vote of the miners' locals on February 1.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to January, 1939.				
MANUFACTURING—				
Fur, Leather, etc.—				
Leather goods workers (handbags, etc.), Montreal, P.Q.	1	48	300	Commenced Oct. 8, 1938; for closed shop union agreement with increased wages, reduced hours, etc.; terminated Jan. 11, 1939; conciliation (provincial); compromise.
Non-Metallic Minerals—				
Lime plant workers, Blubber Bay, B.C.	1	104	1,000	Commenced June 2, 1938; *re* application of conciliation board (provincial) award as to reinstatement of certain employees; unterminated.
(b) Strikes and Lockouts commencing during January, 1939.				
MINING, ETC.—				
Coal miners, Namao, Alta.	1	12	60†	Commenced Jan. 2; for union agreement, increased wages and against lay-off of certain employees; terminated Jan. 9; negotiations; in favour of workers.
Coal miners, Blairmore, Alta.	3	700	6,000	Commenced Jan. 16; *re* contract rates (per ton instead of per yard, etc.); unterminated.
Coal miners, Ellerslie (Edmonton), Alta.	4	45	400	Commenced Jan. 16; for increased wages and union agreement; terminated Jan. 27; return of workers and replacement; in favour of employer.
Coal miners, Ellerslie (Edmonton), Alta.	2	30	15	Commenced Jan. 16; for increased wages and union agreement; terminated Jan. 16; negotiations; in favour of workers.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	1	137	60	Commenced Jan. 13; against allegedly reduced earnings under new system of operations; terminated Jan. 13; negotiations; indefinite.
Textiles, Clothing, etc.—				
Textile factory workers, Montreal, P.Q.	1	24	96	Commenced Jan. 3; against changes in production methods and wage system; terminated Jan. 7; conciliation (provincial); indefinite.
Women's clothing factory workers (dressmakers), Montreal, P.Q.	1	107	53	Commenced Jan. 20; for increase in piece rate earnings and against dismissal of union employees; employment conditions no longer affected by Jan. 20; replacement; in favour of employer.
Cap and glove factory workers, Windsor, Ont.	1	21	63	Alleged lockout, commenced Jan. 27; *re* reinstatement of workers, union agreement, etc.; unterminated.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

† Work resumed one day, January 4.

Coal Miners, Ellerslie (Edmonton), Alta.—Miners in four collieries in the Rabbit Hill area near Edmonton, Alta., members of the United Mine Workers of America, ceased work on January 16 when their demands for union recognition and the union scale of wages for the Edmonton district were refused. It was reported that the miners did not leave the bunk houses on the mine property immediately but were ordered out by the operators at two of the mines. Some of the strikers were replaced and others resumed work by January 27, not having secured their demands, and the strike was called off.

Coal Miners, Ellerslie (Edmonton), Alta.—Employees in two mines, members of the United Mine Workers of America, secured union agreements as a result of a stoppage on January 16, lasting one-half hour in one mine and one-half day in the other.

Rubber Factory Workers, Kitchener, Ont.—A number of employees in the footwear department of one establishment, members of the United Rubber Workers of America, ceased work on January 13 in protest against a change in the wage payment system for certain workers. The management explained the change to the employees and work was resumed on the same day, a satisfactory settlement having been reached.

Textile Factory Workers, Montreal, P.Q.—A number of doffers, members of the Canadian National Textile Workers' Union, employed in one establishment ceased work on January 3 in protest against a change in production methods and wage rates alleged to reduce earnings. It was reported that the new system had been tried out for two weeks and that the management had refused to adjust it. The employees took the matter up with the provincial Fair Wage Board and were informed that a new order for the cotton textile industry was in preparation. A conciliation officer dealt with the dispute and work was resumed on January 9, the provincial officer to continue his investigation as to adjustments to be made.

Women's Clothing Factory Workers (Dressmakers), Montreal, P.Q.—Employees of one establishment, members of the International Ladies' Garment Workers' Union, ceased work on January 20 for an increase in piece rates and against the dismissal of two union employees. The union claimed that piece rates were not in accordance with the union agreement and the employer alleged that the workers had slowed production. The employees remained on the premises until expelled by the employer. It was also reported that the strikers were replaced and work resumed on January 23, the next working day, but the union claimed the strike was still in effect.

Cap and Glove Factory Workers, Windsor, Ont.—Employees in one establishment became involved in a cessation of work on January 27, several striking when others were laid off. A local of the United Hatters, Cap and Millinery Workers' Union, affiliated with the American Federation of Labour, was in process of organization and the union claimed that the employees had been locked out. The employer stated that the lay-off was seasonal and refused to enter into an agreement with the union. The plant was picketed as a number of employees continued to work and the employer had stated that those on strike would be replaced. At the end of the month negotiations were in progress and on February 1 a union agreement was signed.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the March, 1938, issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1937. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in the monthly articles are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is obtained for the most part from newspaper reports which at times are uncertain or incomplete.

Great Britain

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes beginning during December was 30 and 11 were still in progress from the previous month, making a total of

41 during the month, involving 9,200 workers with a resultant time loss of 29,000 man working days.

Of the 30 strikes which began during December, four arose out of demands for wage increases and six were over other wage questions; 12 were over questions respecting the employment of particular classes or persons, four were over questions respecting working arrangements and four were over questions of trade union principle.

Final settlements reached during December numbered 25. Of these four were settled in favour of the workers, 13 were settled in favour of the employers and eight resulted in compromises. In the case of six disputes work was resumed pending negotiations.

The largest strike reported to the Ministry of Labour during December was one which involved 795 carpenters, steel workers and building labourers at London. These employees ceased work on December 8 in protest against the dismissal of a number of carpenters whom the employers claimed were not needed. Work was resumed on December 14 and a meeting was arranged between the employing firm and the trade union to discuss their differences.

A strike of carpenters and building labourers occurred at Runcorn near Liverpool on December 6 when about 450 employees ceased work demanding an increase in wages of 2d. per hour on a certain contract. The National Joint Council for the Building Industry awarded them an increase of 1d. and work was resumed on December 16.

At Chorley in Lancashire 450 electricians were on strike from November 30 to December 2 in protest against the employment of non-unionists and against the dismissal of a number of workers. The non-unionists involved were employed by contractors other than those for whom the strikers worked. Work was resumed on the advice of the strikers' union.

Belgium

The monthly labour review of Belgium reports eight strikes as beginning in September which with four unterminated at the end of the previous month made a total of 12 strikes in progress. The number of workers directly involved was 3,460 and the resultant time loss was 58,479 man working days. During the month eight strikes were settled; one was settled in favour of the workers, five in favour of the employers and two resulted in compromises.

Three strikes began in October which with four unterminated at the end of September made a total of seven in progress during the month. The number of workers involved was 2,614 and the resultant time loss 4,222 man working days. All of the seven strikes were terminated before the end of the month, two being settled in favour of the workers, four in favour of the employers and one resulted in a compromise.

United States

Preliminary estimates of strikes in November, 1938, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 185 strikes as beginning during the month, which with 135 unterminated at the end of October, made a total of 320 in progress during the month. The number of workers involved in these disputes was 65,000 wtih a resultant time loss of 575,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 335 strikes in progress involving 100,000 workers with a resultant time loss of 900,000 man working days.

On January 3, taxi drivers in New York, numbering 11,000 together with 2,000 maintenance men ceased work on the expiration of their previous agreements. Their demands included an increase in drivers' commissions from 42½ per cent to 50 per cent, vacations with pay, a closed shop, no discrimination against negro drivers, a nine hour day or a ten hour night, no dismissals without union consent, hiring halls and better health conditions. Twenty-eight companies were involved. As a result of mediation by the Mayor the men agreed to return to work on January 6 and an election was held by the State Labour Relations Board to determine what organization would represent the men in further negotiations..

On January 4, more than 5,000 truck drivers employed by about 400 firms at Boston ceased work when negotiations between their employers and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers broke down. Soon after the strike began the union announced that 32 companies had signed agreements and 800 men returned to work. The handling of foodstuffs was seriously affected and although the union threatened that violence on the part of its members would be punished by expulsion there were some disorders. One man was reported to have died as the result of a beating at the hands of a group of pickets. Through the mediation of the governor of the state, the strikers and their employers were brought together and agreed upon an increase in wages to $39 for a six day week of 48 hours; the workers had sought $40 for a 40 hour week. Work was resumed on January 10

TRADE UNIONISM IN CANADA

Summary of the Twenty-seventh Annual Report on Labour Organization

THE annual report on Labour Organization in Canada, recently published by the Labour Intelligence Branch of the Department of Labour, is the twenty-seventh in the series issued since 1911. The aim of the publication is to present as accurately as possible the standing of the various labour bodies in the Dominion at the close of 1937. To a large extent the particulars presented in this report have been obtained from the officers of the various organizations concerned, but where this was impossible the information was secured from departmental records or other reliable sources.

As has been previously stated, there are two main classes into which labour organizations in Canada are divided: (1) local branches of international unions having membership in the United States and Canada; and (2) labour bodies the members of which are wholly in Canada. The report also indicates the two principal types of labour organization, viz., craft unions, which include workmen in a single craft or a number of related crafts or trades, for example, bricklayers and stonemasons; and industrial unions, which have members in the various occupations in a particular industry, for instance, in coal mining. There is also another type of organization which organizes workers in all industries under one general union, centrally controlled, usually with subdivisions by industries and localities.

Previous Record in Membership Exceeded.—According to the figures compiled for this report, the aggregate membership of the various trade unions in Canada at the close of 1937 has exceeded the previous record of the peak year of 1919, when there were 378,047 organized workers in the Dominion.

The total membership of all classes of trade unions in Canada in 1937 was 384,619, an increase of 62,146 over the previous year, comprised in 3,258 locals, a gain of 372 as compared with the figures for 1936.

An analysis of the returns received in the department shows that the international union group, consisting of the Canadian members of 96 organizations, 8 more than recorded in 1936, had 2,048 branches in the Dominion, an increase of 152, with a combined membership of 217,465, a gain of 42,696.

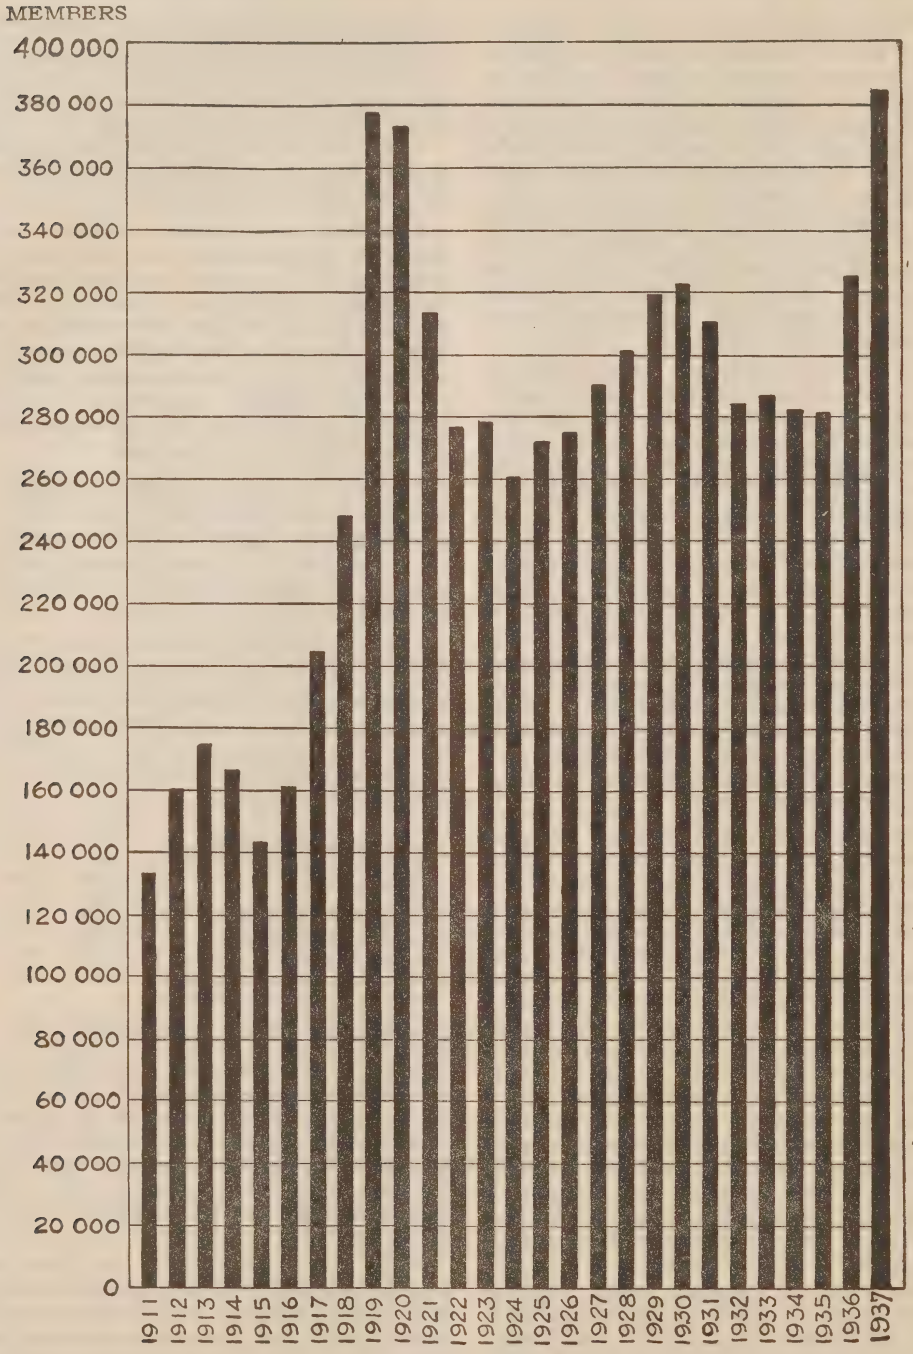
The group of Canadian central organizations, which numbered 31, an increase of 3, had 853 branches, a gain of 113, with a combined membership of 98,633, a gain of 14,792.

The National Catholic group consisted of 285 unions, a gain of 95, the total membership as supplied by the secretary of the Confederation of Catholic Workers of Canada being 52,000, an increase of 7,000.

There were 72 independent units, 12 more than in 1936, the membership as reported by 67 being 16,521, a loss of 2,342.

Percentage of Trade Unionists and Organized Wage-Earners to Population.—According to the latest estimate of population (June 1, 1937), trade unionists in 1937 represented 3·45 per cent of the total population of Canada; adding 116,904, the number of members in the non-trade union associations, the organized wage-earners in the Dominion at the close of 1937 represented 4·5 per cent of the population.

Twenty-seven Years of Trade Unionism in Canada.—The accompanying chart based on the membership figures, indicates at a glance the fluctuations which have occurred in the standing of organized labour in the Dominion for the past twenty-seven years.



Union Membership by Industrial and Trade Groups.—The division of union membership among the various industries and trade groups is shown in the accompanying table. The membership of each central body is included in the trade groups in which most of its members are employed.

Groups of Industries	Membership	Percentage
Mining and quarrying	26,909	7.00
Building	30,408	7.90
Metal	38,318	9.97
Printing and paper making	24,273	6.31
Clothing, boots and shoes	28,830	7.50
Railroad employees	79,347	20.63
Other transportation and navigation	35,161	9.14
Public employees, personal service and amusement	37,106	9.64
All other trades and general labour	84,267	21.91

Trade Union Branches by Provinces.—The division by provinces of the 3,258 local branch unions of all classes is as follows: Ontario, 1,205; Quebec, 707; British Columbia, 328; Alberta, 294; Saskatchewan, 196; Manitoba, 195; Nova Scotia, 178; New Brunswick, 143; and Prince Edward Island, 12.

Trade Union Membership in Canadian Cities.—Canadian cities having not less than 20 trade union branches each numbered thirty-four, 4 more than the number recorded in 1936. The 1,944 branches in these 34 locali-

TWENTY-SEVEN YEARS OF TRADE UNIONISM IN CANADA

ties represented about 60 per cent of the local branches of all classes operating in Canada. The 1,688 reporting branch unions in these cities represented approximately 62 per cent of all the reporting branches and they also contained about 61 per cent of the entire trade union membership in the Dominion.

Unions Having Large Memberships in Canada.—Of the 96 international organizations with branches or members in Canada, there were 16 with 5,000 or more members, 6 of these being composed of employees who are identified with railway operations. In the Canadian group, there was one body with over 5,000 members, being also a railway organization. The combined membership of these 17 organizations was 156,173 (comprised in 1,181 local branches), and represented approximately 40 per cent of the total membership and about 36 per cent of the total trade union branches.

Trade Union Benefits.—In a chapter dealing with the beneficiary features of labour organizations, it is indicated that of the 31 Canadian central organizations, 6 reported expenditures for benefits, the total amount disbursed being $47,657.78, a decrease of $20,331.39 as compared with the figures furnished by five organizations in 1936. Of the 96 international organizations operating in Canada, 58 reported having expended for benefits to their members in the United States and Canada a total of $20,906,473, an increase of $678,295 as compared with the amount for 1936. The disbursements in 1937 for the various classes of benefits were:—

Death benefits	$ 11,650,299
Unemployed and travelling benefits	171,883
Strike benefits	1,006,764
Sick and accident benefits	3,593,239
Old age pensions and other benefits	4,484,288

In addition to the expenditure made by the central organizations, benefit disbursements by local branch unions to their own members are included. The aggregate amount of such expenditure by 811 local branch unions in Canada was $323,562, a decrease of $88,345 as compared with the disbursements made by 717 local branch unions in 1936. The outlay for 1937 by the local branches for the classes of benefits named was:—

Death benefits	$ 42,909
Unemployed benefits	64,979
Strike benfits	65,360
Sick and accident benefits	103,626
Other benefits	46,688

Non-Trade Union Associations.—Besides information respecting organizations connected with the trade union movement, the report contains a chapter dealing with associations which cannot be included in the category of trade unions, but whose importance warrants some reference to them being made. These include 126 organizations, chief of which are associations of school teachers, government employees and commercial travellers, with a combined membership of 116,904.

Complete Labour Organization Directory.—As in previous issues, the twenty-seventh annual report on Labour Organization in Canada includes a complete labour directory, containing not only the names and addresses of the chief officers of local branch unions and delegate bodies in the Dominion, but also those of the central organizations with which the Canadian trade unionists are identified. The names and addresses appearing in this directory have been corrected to the date of printing.

A chart indicating the structure of labour organization in Canada will be found opposite page 119.

Copies of this report may be obtained from the Department of Labour at a nominal charge of 50 cents per copy.

Characteristics of Paid-Vacation Plans in U.S.A.

According to the results of a survey published in the December issue of the *Monthly Labor Review*, official publication of the United States' Department of Labor, the 1-week annual vacation for wage earners and the 2-week vacation for salaried workers, both given after 1 year of company service, are typical provisions of regulations governing vacations with pay in American manufacturing and extractive industries. A great many of the programs, particularly among the larger companies, provide vacation periods which vary in length with length of service. Approximately 85 per cent of the plans provide for continuous plant operation during the vacation season. The usual rate of pay for wage earners during the vacation period was the regular hourly rate for full time and, for piece workers, an amount which approximated average full-time earnings.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at December 31, 1938

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at December 31, 1938. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE, for April, 1927, page 375 and the new regulations were reviewed in the issue for March, 1938, pages 286-288).

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937, (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in *The Canada Gazette,* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT DECEMBER 31, 1938

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

YOUTH TRAINING IN CANADA

Proceedings of Dominion-Provincial Conference

WITH an attendance of approximately fifty Dominion and provincial officials engaged in the administration of youth training throughout Canada, a conference, called by the Minister of Labour, Hon. Norman McL. Rogers, was held in the Parliament Buildings at Ottawa from January 17 to 19.

In opening the conference Hon. Mr. Rogers referred to the pleasure which he felt at seeing so many representatives present and spoke of his very keen interest in the successful operation of the Dominion-Provincial Youth Training Program. A conference which brought together representatives from all over the Dominion could not fail to be of value. One of its important and valuable features was that it provided an opportunity for exchange of views among persons actively engaged in Youth Training projects across the Dominion.

This conference, the Minister said, was the first of its kind, but he hoped it would be followed by others of a similar nature. While he would be unable to attend all its sessions, he would be present when opportunity afforded and would follow its deliberations with the greatest interest.

The Minister told the conference that, based on a paragraph in a Speech from the Throne, a measure would be introduced in Parliament to provide for continuing the program over a three-year period. This period, when associated with the two years during which the program had already been in operation, would constitute a continuous period of five years.

The importance of co-operation, not only co-operation among those actively engaged in the program, but also among those who might be stimulated to interest in the plan, was stressed by the Minister. Development of interest and support for the program were of vital importance. It was also important to emphasize to the young people participating in the program that it was a national movement. He felt it would be a stimulation to them to understand that they were a part of a country-wide program and that it was not merely of local significance. The Minister concluded his speech with best wishes for the success of the conference.

The conference then elected Dr. G. Fred McNally, Deputy Minister of Education for the Province of Alberta, chairman.

The morning session was occupied with representatives from all Provinces reviewing, for the benefit of the conference, the progress of the Youth Training Program in their own sections. At the conclusion of these statements, the conference divided into four sections, dealing with Rural Training, Urban Training, Work Training Projects, and Women's Courses. The women's section did not hold its meeting until Wednesday morning, as its members were interested in work of other sections and wished to attend their meetings.

Reports from the various sections to the main conference were submitted as follows: Rural Courses, Urban Courses, Work Training Projects, and Women's Courses. They follow in order.

Recommendations from Rural Section

1. We, the rural section of the Youth Training conference, agree that the principle of rural agricultural short courses is sound and that they should continue to be recognized as an important and effective means of encouraging young people to look to the farm rather than the city as a means of making a living, and we further recognize that they provide an economical means of raising living standards and enriching rural life.

2. That in order to get the greatest possible value from the rural short courses we should organize projects to follow and supplement these courses. Such projects might be in the nature of assigned projects such as projects in horticulture and home beautification, bee-keeping, fruit raising, seed plots, pure bred livestock, poultry, handicrafts, canning, etc. These projects to be dealt with through the medium of public lectures and demonstrations, and field days organized on a community basis.

3. Recognizing that in courses of up to four weeks' duration, it is only possible to give inspiration and perspective on the subject matter discussed, we agree that the principle of selecting promising students to go on for further training should be encouraged. This further training to be in the nature of:—

(*a*) Agricultural, household science, farm mechanics, and other courses of from six weeks' to five months' duration.

(*b*) Special leadership training courses of from six weeks' to five months' duration which are complementary to the agricultural, household science and other courses, but whose main emphasis is on community leadership in the broadest sense of that term.

4. In view of the fact that some provinces have been interested in training urban youth for agricultural placement and have found this practice to be entirely feasible for general farming and specialized farms such as fur farms, poultry farms, dairy farms and others and in addition, certain other specialized agricultural opportunities are to be found in bee-keeping, market gardening, creamery work, poultry and egg grading, all of which can be undertaken with a minimum investment and which have distinct possibilities from the standpoint of enabling the trainee to become, eventually, self-supporting, this conference suggests that where practicable this type of training be extended.

5. That in order to avoid confusion in understanding and evaluating the work carried out

under the various schedules in the provinces, this conference recommends the adoption of a uniform system of nomenclation for schedules throughout the Dominion.

6. That some method of recording and evaluating the contribution of the Youth Training Program to the nation should be developed.

7. That the principle of self-help on the part of trainees should be encouraged wherever possible.

8. That the value of visual aids in Youth Training be recognized and that wherever possible such aids should be used and that the cost of this equipment should be shareable.

9. That where this has not been done and in order to co-ordinate all Youth Training projects with other educational agencies and local organizations in operation in the various provinces, the matter of establishing supervisory and co-ordinating committees in each province should be considered.

10. That where this has not already been arranged for, steps should be taken to ensure the necessary supervision and care of Youth Training beneficiaries in order that the money and effort so far expended be not lost to the state.

Recommendations from Urban Training Section

Placement.—Whereas placement of the youth of Canada in gainful occupation is one of the major objectives of the Dominion-Provincial Youth Training Program.

Therefore be it resolved that we urge that each province organize in accordance with local conditions, to give adequate vocational guidance, training and placement service to the young people of the Dominion.

It is also recommended that steps be taken to institute and maintain a continuous national labour market survey. And in order to be effective that the Youth Training Program be accepted as a permanent national policy.

Tools.—Whereas a certain minimum supply of tools is essential for the use of trainees when placed in many occupations.

Therefore, be it resolved that we believe that the provision of such necessary tools should be a shareable charge under the program, provided that these basic tools are deemed necessary by the Provincial Director of the project.

Aircraft Industry.—Whereas there is being planned an extensive and definite program for the manufacturing of aircraft in Canada to meet Empire and National needs.

And whereas this creates new demands for training and employment of skilled craftsmen peculiar to this industry.

Be it resolved that this conference urge that unemployed youth shall have due consideration in any training and employment opportunity in this enterprise.

And further resolved that the Dominion Government delay acceptance of definite restriction regarding apprenticeship quotas until the enterprise is regularly established.

And further resolved that the youth of the entire Dominion be accorded opportunities for training and employment in the industry on some fair basis of the respective population of the provinces.

Recommendations from Works Projects Section

The meeting of Section 3 reports and submits the following:—

1. The meeting heard with satisfaction the announcement of the Minister of Labour that steps will be taken to assure the continuity of the Youth Training Program for a period of three years.

2. This section believes that value of Youth Training should be judged not only from the standpoint of placement statistics, but also from the benefits in physical and mental reconditioning derived therefrom.

3. Whereas the forests of Canada comprise one of our greatest natural resources and one of our greatest sources of employment. As crops they require management and protection. Closely associated with them are our fish, game and other attractions favourable to the building up of our tourist trade.

And whereas the suitability of forestry projects has been demonstrated as a means of rehabilitating young men, giving them valuable training and experience, at the same time accomplishing work of direct value to the nation.

We, therefore, recommend the continuation and extension of the forestry projects where circumstances permit, as a factor in the Youth Training Program.

4. Many of our young men must eventually seek employment in the great mining industry of Canada, and there is need for more trained prospectors and new mines.

This section believes prospecting and mining projects have demonstrated their suitability for the training of youth in these occupations. Therefore, we recommend their continuation and extension wherever practicable.

5. In the opinion of this section, the enlarged program should include more complete co-operation on the part of employers. To this end we feel that plans should be devised whereby leaders in industry should assist more fully in the planning of courses and, if possible, be induced to assume a definite responsibility for the employment of a larger proportion of these trained youths and, further, that the Department of Labour be urged to supplement the staff of the Youth Training Program in forestry and mining, to co-ordinate that work on a national basis.

Recommendations from Women's Courses

We, the members of the section on Women's Urban Courses, recommend the following in two main divisions:—

1. *Urban Training in General*
   - (i) All women's projects should be planned and executed in consultation with women.
   - (ii) Where not already in operation, and wherever possible, women's projects should be more diversified by means of a new effort to include industrial, commercial and semi-professional training.

2. *Household Training*
   - (i) That training centres throughout the Dominion be uniformly named, Home Service Training Schools.
   - (ii) Since carefully chosen advisory committees are essential to the success of Home Service Training, these committees should be used extensively in consultation.
   - (iii) Advisory Committees should encourage the raising of standards of work, hours and wages in the home.
   - (iv) A very careful selection of applicants is essential.
   - (v) To insure the retention of a greater number of applicants after probation and to produce greater permanency of employment, a period of physical and mental

adjustment be offered under qualified supervision and make use of existing facilities such as school labs., church or Y.W.C.A. rooms, etc.

Discussion on Rural Courses

These reports were submitted to the conference on Wednesday afternoon and Thursday. The report from the section which dealt with Rural Courses was first considered. The first eight clauses of this report met with the approval of the main conference, but opposition developed to Clause 9, which advocated consideration of the establishment of supervising and co-ordinating committees in each Province. Mr. R. F. Thompson suggested that the advisability of such a co-ordinating committee might depend on the progress which the program was making in any particular Province. If, for instance, it was thought that the program was too narrow in its scope, the advice of such a committee might be valuable. Some of the delegates referred to conditions prevailing in their own particular Provinces. After discussion, Mr. Dupuis moved and Mr. Ross seconded an amendment that Clause 9 be struck out. The amendment carried unanimously.

Clause 10 of the report was also rejected by the conference after some discussion. This clause asserts that steps should be taken to insure supervision and care of Youth Training beneficiaries, "in order that the money and effort so far expended be not lost to the state." Discussion of this proposal developed the information from various quarters, that a follow-up system already prevailed. Mr. Marsh expressed the opinion that it was part of the program, as at present understood, to operate a follow-up system. Mr. Elliott stated that he found it absolutely necessary to visit boys who had passed through a training course, at intervals during the year. Mr. Jacob said that trainees in Manitoba reported each month. He was of the opinion that this matter of follow-up should be left to the discretion of each Province to carry on according to the methods which were found most suitable.

Visit of Prime Minister

The conference was then honoured by a visit from the Prime Minister, who was introduced by the Minister of Labour. Mr. Mackenzie King spoke briefly, expressing his great interest in youth training. He told of experiences which he had in social work many years ago and referred to his connection with the Department of Labour, first as Deputy Minister and then as Minister in charge of the Department. Mr. King referred to the announcement of the Minister of Labour at the opening session, that registration would be introduced, continuing the program for three years. The government, he said, had decided on this course, in view of the interest in the program and the success achieved.

Discussion on Urban Training

Recommendations from the section dealing with Urban Training were next discussed. Recommendation 1, dealing with placement, was carried. Recommendation 2, dealing with tools, also passed without alteration. Some discussion arose on this section, Mr. Marsh and others advancing the view that trainees should supply their own tools. The sponsors of the resolution said that it was not their intention that tools be supplied in all cases, but only where custom in the industry required that applicants for employment have their own tools. It was further pointed out that the issuance of such tools should be at the discretion of the project supervisor and that only essential tools be supplied. When the third recommendation was reached, discussion developed and the fourth paragraph was finally eliminated, the report passing with this change. Mr. Thompson stated that under the terms of the Fair Wages and Hours of Labour Act, the Dominion Government was concerned with the wages and ratio of apprentices, while employed on Federal contracts. He could not agree to that clause in the recommendations asking that the ratio of apprentices to journeymen be discontinued, particularly as at a recent meeting of aircraft manufacturers with the Minister, the great majority of the manufacturers themselves had been strongly in favour of a ratio being maintained. He asked that this clause in the recommendation be dropped. Mr. Marsh preferred that the ratio be not insisted on for the time being.

The report from the Women's Committee was approved, section by section, with little opposition developing. Explanations of some of the sections were requested, but after these were made, the conference approved the entire report.

New Projects

When reports from the sections had been disposed of, the conference proceeded to a consideration of matters under the heading of "New Projects." Some delegates from the Provinces referred to certain projects which they had in mind. Mr. MacKay stated that Nova Scotia was planning one or two new projects, but particulars would be revealed to the Dominion later on. Messrs. Dupuis and Levesque referred to a delegation from universities in Montreal regarding the provision of post-graduate scholarships to enable

young people to study abroad prior to entering industry. They stated that employment was assured for such graduates by certain industrial corporations.

Mr. Thompson replied that he did not feel that such a project could be included within the scope of Youth Training, as the provision of scholarships at the universities, either for undergraduate or post-graduate work, was not felt to be a responsibility of the Federal Government. Mr. Marsh called attention to the fact that in the Ontario program, special provision was made, by the appointment of a placement officer under the Technical Service Council, to place in employment technically trained young men from the universities.

Mr. Marsh referred to a new course in connection with the receipt and transmission of radio messages. Professor Ramsay said the Province of Saskatchewan might do something in the way of a woodlot project. Mr. Ross stated that Alberta had a similar plan to that of Ontario. Mr. Dupuis suggested the exchange of French and English boys, which would be advantageous to both from a language point of view. French-speaking boys might be sent to a course in Quebec and English-speaking from Quebec to Ontario.

Definition of Unemployed Youth

The use of the word "necessitous" in connection with Youth Training Agreements was discussed at some length, and it was decided to drop this word. It was suggested by Mr. Thompson that the existing definition of unemployed young people in the present agreements might be altered to read:

> The term unemployed young people shall mean male or female individuals of any age between 16 and 30, inclusive, not gainfully employed and whose families are not in a position to pay the full cost of their training. They must be (*a*) registered with the Employment Service of Canada, or (*b*) certified as eligible by the clerk of the individual's home municipality or an appropriate provincial authority or (*c*) deserving transients certified as eligible by an appropriate provincial authority.

During the discussion, it was stated by some of the participants, that a stigma attached to the use of the word "necessitous." On the other hand, certain delegates were of the opinion that usage had taken the sting out of this word. Dr. Sexton suggested the phrase "those who are not in affluent circumstances" might be substituted. Mrs. W. J. Lindal approved the clause suggested by Mr. Thompson, while Colonel Fairey felt that the Province should have discretion in this matter. He approved Mr. Thompson's new wording, however, and moved its adoption. Mr. Eisenhardt suggested leaving the wording as it was, and Messrs. Manning and MacKay saw no reason why "necessitous" should not be retained.

Mr. Thompson referred to the fact that the word "necessitous" had to be interpreted at the discretion of authorities who were familiar with the circumstances. "Necessitous" did not mean that the families had to be on relief but that they could not afford to pay for the training required.

Mr. Marsh said that he thought the word "necessitous" had served its purpose, and that all young people should be given an opportunity under the plan.

Training Centres

In the course of the discussion, some references were made to the new legislation, and Mr. Thompson stated that it must be clearly understood that transients are eligible for Youth Training if they are in the age group. Mr. Levesque took exception to the present wording of Clause 6, dealing with selection of centres where training is to be given, particularly the last part of the clause which gives the Dominion Government the right to refuse continued contributions to any centre not being conducted with reasonable economy. He felt that if the province submitted full details about any centre in advance and received approval, the Dominion Government should be obligated to share in any expenditures subsequently made, and that a representative of the Dominion auditors in the province should sign such a commitment in advance.

Mr. Thompson pointed out that such a procedure would be impossible as no auditor could authorize payment in advance of such expenditures being incurred. He further pointed out that this clause was primarily designed to meet the case of any centre where attendance of trainees decreased below a minimum number. Moreover, the expenditures for any centre would be governed by the clauses of the Agreement and the regulations of the schedules concerned.

The chairman stated that, as no other province had experienced any difficulty with this clause, the matter raised by Mr. Levesque might properly be taken up by him with the Dominion Supervisor.

Mr. Levesque raised the point that Clause 11 of the agreement covering trainees' travelling expenses made no provision for the payment of the cost of meals or room in those cases where trainees had to stay at a hotel during the course of their journey from their home to a class or on their return trip. The conference approved the idea that such payment should be shareable.

72003—3½

Machinery and Equipment

The conference discussed the question of Dominion contribution to the cost of machinery and equipment, which had been embodied in resolutions from the sectional groups. It was generally felt that the present provision of a Dominion contribution to the purchase of new machinery on a basis not exceeding ten per cent of the purchase cost, if specially purchased, and in all other cases on the present value, was not adequate. The Dominion Supervisor pointed out that, following representations from some of the provinces, this clause had been amended for the four Western Provinces and the three Maritime Provinces, to provide for the Dominion sharing in the net purchase price of machinery and net rentals paid to third parties up to an amount not in excess of ten per cent of the estimated total cost for each schedule, with provision made for increasing this percentage in exceptional cases. He further stated that although this did not provide for the Dominion sharing in the rental of equipment at present owned by the province, nor in the cost of repairing equipment, it did eliminate the taking of an inventory to estimate residual value, and all equipment purchased would remain the sole property of the province.

Mr. Manning agreed with the desirability of eliminating an inventory.

Following discussion, Dr. Cameron moved that on all machinery and equipment the Dominion Government should pay 50 per cent of purchase cost, 50 per cent of all rentals, 50 per cent of repairs and maintenance charges, subject to a refund of 50 per cent of the residual value. The motion carried on a majority vote.

Establishment of Committees

The conference discussed establishment of both National and Provincial Advisory Committees. Mr. Thompson pointed out that he would be very glad to have the advice of a National Advisory Committee on broad lines of policy. Mr. Marsh feared delay if proposals had to go before an Advisory Committee prior to action being taken. Mr. Thompson made it clear that he did not intend to consult such a committee on details, but rather wished to have its views on lines of general policy.

Finally, it was moved by Mr. Cameron, seconded by Dr. McKechnie, and approved by the conference, "that we commend to the Minister of Labour, the creation of a National Advisory Committee."

Immediately after, it was moved by Dr. Cameron and seconded by Dr. Sexton, that "in the opinion of this conference, it would be wise for the Provinces to appoint Provincial Advisory Committees." This motion carried after an amendment moved by Mr. Marsh and seconded by Dr. Peacock "that the members of the conference go back and discuss the development of local committees with their Ministers" had been withdrawn.

Mme. Cormier moved that the Provinces, in allocating funds next year, consider the establishment of physical training. This was seconded by D. Cameron and carried.

Publicity

The conference discussed publicity. Mr. Thompson, after referring to the importance of publicity suggested the possibility of motion pictures as a medium for interpreting the program to the public. The suggestion met with strong approval and Dr. Sexton moved, seconded by Dr. Cameron, that "in addition to the publicity already given to the Youth Training Program, it is highly advisable that further publicity be used in the form of motion pictures." This motion carried.

The conference took no action on suggestions by Mr. Eisenhardt that each Province produce a bulletin to be circulated among the other Provinces; that each trainee wear a pin or badge; and that teachers and instructors be exchanged wherever possible.

The Dominion Supervisor asked that, in order to assist the Dominion Government in passing on industrial occupational projects which might be submitted by the provinces, the conference express its opinion on the advisability of recognizing projects submitted which only provided for attendance at evening classes for a few hours a week.

Many members of the conference expressed their opinion, and it was generally agreed it would be inadvisable to recognize such projects except as supplementary or refresher courses.

A motion was placed on the record thanking the Minister of Labour for calling the conference.

In connection with the conference a largely attended public meeting was held in the Railway Committee Room of the House of Commons on the evening of January 18. This meeting followed a dinner at which the Minister of Labour was host to the delegates, after which Mr. Eisenhardt showed motion pictures of some of the physical training projects in British Columbia.

List of Delegates

The following were the delegates in attendance:—

PRINCE EDWARD ISLAND

Rev. J. A. Murphy, President of St. Dunstan's College, Charlottetown.
W. R. Shaw, Deputy Minister of Agriculture, Charlottetown.

NOVA SCOTIA

J. P. Bell, Dominion Representative, Unemployment Relief Branch, Department of Labour.
A. E. Cameron, Deputy Minister of Public Works and Mines, Halifax.
Mrs. L. G. Ferguson, Dominion Adviser, Women's Courses, Westville.
A. R. Lawrence, Director, Mine Apprentice Project, Halifax.
R. H. MacKay, Deputy Minister of Labour, Halifax.
T. D. A. Purves, Supervisor, Unemployment Relief, Halifax.
Dr. F. H. Sexton, Director of Technical Education, Halifax.

NEW BRUNSWICK

L. D. Black, New Brunswick Forest Service, Fredericton.
Dr. F. Peacock, Director of Education, Fredericton.
J. C. Veness, Dominion Forest Service, Fredericton.
J. L. Wood, Poultry Superintendent, Dept. of Agriculture, Fredericton.
W. J. Wright, Provincial Geologist, Fredericton.

QUEBEC

Mme. I. L. Cormier, Dominion Adviser, Women's Projects, Montreal.
R. Dupuis, Supt., Schedule "D," Youth Training Department, Quebec.
A. Levesque, Director, Youth Training Projects, Quebec.

ONTARIO

F. H. Avery, Supervisor, Apprenticeship and Learnership, Toronto.
Mrs. L. Kennedy, Placement Officer, H.S.T. Schools.
Miss Ruth Low, Dominion Adviser, Women's Projects, Kitchener.
J. F. Marsh, Deputy Minister of Labour, Toronto.
J. McCulley, Dominion Advisory Representative, Newmarket.

MANITOBA

Geo. Collins, Secretary, Youth Training Commission, Winnipeg.
Hon. Douglas Campbell, Minister of Agriculture.
Robt. Jacob, Chairman, Commission for Employment of Single Men and Youth Training, Winnipeg.
R. J. Johns, Department of Education, Winnipeg.
C. S. Landon, Technical Adviser, Unemployment Relief Branch, Department of Labour.
Mrs. W. J. Lindal, Dominion Adviser, Women's Projects.

SASKATCHEWAN

H. C. Bingham, Dominion Representative, Unemployment Relief Branch, Department of Labour.
Mrs. A. J. Currie, Dominion Adviser, Govan.
R. McGregor, Supervisor, Urban Women & Men, Saskatoon.
J. H. McKechnie, Deputy Minister of Education, Regina.
Miss B. G. Oxner, Director of Rural Women's Projects, Saskatoon.
R. D. Ramsay, University of Saskatchewan, Saskatoon.

ALBERTA

Donald Cameron, Director, Department of Extension, University of Alberta.
W. J. Elliott, Youth Training, Department of Agriculture.
M. M. MacKinnon, Dominion Representative, Unemployment Relief Branch, Department of Labour.
Dr. G. F. McNally, Deputy Minister of Education, Edmonton.
J. H. Ross, Director of Youth Training (Urban).

BRITISH COLUMBIA

Ian Eisenhardt, Director of Physical Education, Vancouver.
E. T. Fairey, Director of Vocational Education, Victoria.
E. C. Manning, Chief Forester, Victoria.
Also present were: D. A. Macdonald, Assistant Dominion Forester, Ottawa; J. Smart, Assistant Controller, National Parks, Ottawa; R. F. Thompson, Dominion Supervisor of Youth Training; and Ray Brown, Public Relations Representative, Dominion Unemployment Relief Branch.

Recovery of "Back Wages" in U.S.A.

Assistance to workers in obtaining back wages is given in several of the United States through the statutory power given to the state Labour Commissioner to receive an assignment of any wage claim and bring action against the employer to recover the wages. A law to this effect is in force in eleven States and in a number of States the labour department can prosecute the employer for violation of the law concerning the payment of wages.

RECENT REGULATIONS UNDER DOMINION-PROVINCIAL LABOUR LEGISLATION

Canada Shipping Act—Licensing of Trades and Businesses Act, and Tradesmen's Qualification Act (Alberta)—Orders of Quebec Fair Wage Board, Etc.

UNDER the Canada Shipping Act, regulations have been made to give effect to the International Labour Convention for the protection of workers engaged in loading and unloading ships. Under the same statute, rules have been made governing radio operators on ships.

Regulations under provincial statutes include an extension of the British Columbia Apprenticeship Act to cover persons entering the drug trade and govern working conditions in the manufacture of wine in Ontario as well as general regulations under the Alberta Licensing of Trades and Businesses Act. Quebec regulations fix minimum wage rates in the leather industry, brick and tile manufacture, taverns and in the manufacture of doors, sashes and wood building products, deal with apprenticeship in the moving picture industry, the licensing of plumbers and steam fitters and the safety of window washers in public buildings.

Canada Shipping Act

Regulations approved by order in council (P.C. 3120) December 14, 1938, give effect to the draft convention of the International Labour Conference of 1929 for the protection against accidents of workers employed in loading and unloading ships. The convention was revised in 1932.

The regulations do not apply to ships propelled by mechanical power and not exceeding 150 tons gross, to ships while employed in fishing, to vessels not exceeding 500 tons gross and not propelled by mechanical power or employed in fishing, or to any ship where, on account of the small quantity of cargo handled at any one time, not more than 10 workers are employed and the weight hoisted at any one time does not exceed 1,000 pounds.

Provision is made for the fencing of breaks, corners and other dangerous parts or edges of a dock and for efficient lighting of all working places and approaches. The facilities required for the rescue of workers from drowning and for rendering first-aid are set forth in detail. Where a ship is loading from a boom, raft, or crib, a suitable boat is to be kept in readiness equipped with oars, boat hook, and a serviceable lifebuoy with 90 feet of heaving line. A sufficient number of first-aid boxes or cupboards of a prescribed standard must be maintained in good order and used for no other purpose. Boxes must be plainly marked and in charge of a responsible person who must be always readily available during working hours. Except where the total number of workers at any time does not exceed 50, the person in charge shall be trained in first-aid. Where the number of workers exceeds 20, provision must be made for obtaining prompt ambulance service unless a suitable ambulance is maintained at the dock. Notice must be posted in a prominent place giving the position of the first-aid box and the place where the person in charge may be found, the location of the nearest telephone or, if an ambulance is provided at the dock, of the ambulance.

Gangways or ladders, constructed and secured according to rules laid down, are to be provided to permit ready access to ships, and hatches and hatchways must be properly protected. All lifting machinery and equipment must be tested at prescribed intervals and machinery must be operated in accordance with the rules laid down.

The precautions to be taken to facilitate the escape of workers employed in a hold or on 'tween decks and safety rules to be observed in the handling of cargo are set out. No person under 16 years of age and no person who is not competent and reliable may be employed as driver of a crane or winch or to give signals to a driver or to attend to cargo falls on winch-ends or winch-bodies. Where cargo is being loaded or unloaded by a fall at a hatchway, a signaller or hatch tender shall be employed and where more than one fall is being worked a signaller or hatch tender shall be employed at each fall. This regulation does not apply, however, to the loading or unloading of a barge, lighter, or similar vessel if the driver of the crane or winch has a clear view of those parts of the hold where work is being carried on or where the Chairman of the Board of Steamship Inspection is satisfied that such provision is not necessary for safety and gives a certificate to that effect subject to such conditions as he may specify. Measures for the protection of the signaller or hatch tender are set out in the regulations. Vessels used to transport workers to or from a ship must be in charge of a competent person, not overcrowded and properly equipped for safe navigation.

It is forbidden to remove the fencing, gangways, appliances or other things required

to be provided except under certain conditions and workers must use the means of access provided. No employer may require workers to work in holds or other spaces which have been fumigated until a certificate is produced from the fumigating officer showing that the holds or other spaces may be entered without risk. Rules are laid down also for the protection of workers handling dangerous goods. Employers must not allow workers to use machinery or gear which does not comply with the regulations or require them to work in holds with hatches off while other work or loading or unloading is proceeding above unless conditions are such that they are not liable to injury from any object falling from an upper deck. As soon as possible after any serious accident to workers, the employer must make a report to the Inspector of Ships' Tackle at the port where the accident happened or, if there is no inspector, to the Chairman of the Board of Steamship Inspection. The register of examination, testing, etc., of hoisting machinery and special gear required to be kept must be produced on demand of an Inspector or other person authorized by the Minister. Disputes arising out of the regulations may be referred to the Minister of Transport whose decision is final.

Radio regulations for ship stations issued under this Act and gazetted December 24, 1938, specify the safety equipment necessary. For the protection of the radio operator it is provided that the ship's radio station must be in the upper part of the ship in a position of the greatest possible safety and as high as practicable above the deepest load line. Storage batteries used in ship stations must be provided with adequate ventilation to the open air to prevent the discharge of fumes detrimental to the operator's health.

Ships compulsorily fitted with radiotelegraph installation must carry two operators in the case of passenger ships over 3,000 tons gross tonnage and cargo ships over 5,500 tons gross tonnage if these ships are being navigated more than eight hours a day. In all other cases where radiotelegraph installation is necessary one operator must be carried.

Ship stations classified for purposes of handling public correspondence must carry one operator if more than eight hours a day watch is required. If the duration of radio service is continuous one operator must be a holder of a first-class radiotelegraph operator's certificate and the second a holder of a first or second class certificate. Where the watch does not exceed eight hours per day, the one operator required on ship stations classified for purposes of handling public correspondence must have either a first or second-class certificate.

Only persons holding Canadian certificates of proficiency in radio may work on ship stations on vessels registered in Canada. However, holders of certificates issued in accordance with the provisions of the Telecommunication Convention or under the law of any British country according similar privileges to Canadian operators, are entitled to act as operators of ships registered in Canada.

Seven kinds of certificates in radio proficiency are provided for, first, second and temporary second class radiotelegraph operators' certificates, watchers' certificates, general and restricted radiotelephone operators' certificates and emergency certificates. The qualifications required and the examinations to be taken are set out in regulations of November 29, 1938, issued under the Radio Act, 1938. (LABOUR GAZETTE, January, 1939, p. 55.)

Alberta Licensing of Trades and Businesses Act, 1937

General regulations setting out forms of application for licences and new orders fixing the fees for licences were made under this Act on December 9 as a result of a judgment of the Alberta Supreme Court upholding the validity of the 1937 Act but declaring ineffective because it was unenforceable an order in council applying to the wholesale trade. (LABOUR GAZETTE, January, 1939, p. 114.)

All licences issued pursuant to the 1936 Act expire on March 31, 1939. Instead of application being made to the Lieutenant-Governor in Council as under the 1936 Act, the Deputy Minister of Trade and Industry is responsible for issue of licences. Slight changes have been made in definitions in some orders and the licence fees in the case of larger flour mills have been revised downward. The new orders which are practically identical with the former orders apply to the automotive industry, auctioneers, bakers, barbers, cleaners and dyers, flour and feed millers and meat packers, funeral directors, hawkers and pedlars, junk dealers, photo finishers, commercial printers, restaurants, retail and wholesale establishments and trade schools.

Alberta Tradesmen's Qualification Act

Following a 1938 amendment in this Act which allows the Lieutenant-Governor in Council to prohibit any person engaging in a trade designated as one to which the Act applies in any area designated for the purpose unless he holds a certificate of proficiency for that area, an order in council of December 1 designates certain trades as those to which the Act applies throughout the province. These trades, which were formerly designated by special orders, and examinations and licences provided for, include barbers, elec-

tricians, gas and steam fitters, plumbers and mechanics engaged in electric or acetylene gas welding, in the construction, building and repair of automobile engines, internal combustion engines, motor vehicles, boilers, refrigerating machines, refrigerators, steam engines or radios. The order prohibits any person from engaging in these trades in any part of the province unless he holds a certificate of proficiency in respect of the trade issued pursuant to the Act.

British Columbia Apprenticeship Act

An order in council of January 6 brings the trade of druggist within the scope of the Act.

Ontario Public Health Act

An order in council of December 16, 1938, respecting the manufacture of wine, stipulates that the Minister may order a wine manufacturer to maintain satisfactory ventilation and sanitary conditions in his premises and to provide, in addition to an opening of sufficient size at the top of the wine storage tanks, a "man hole" near the bottom for protection of workers and to facilitate washing. Sanitary conditions must be satisfactory to the inspector who has right of entry at any time.

Quebec Fair Wage Act

An amendment in Order 18 concerning funeral casket manufacture (LABOUR GAZETTE, 1938, p. 1352) in effect from December 17, 1938, decreases the rates of pay for men working in the furniture department. The new rates are: in Zone I a 35 cents hourly average and a minimum of 25 cents, and in Zone II an average rate of 25 cents with a 20 cent minimum.

Orders 21, 22, 23 and 24 of the Fair Wage Board applying to the leather industry, brick and tile manufacture, taverns, and the manufacture of doors, sashes and wood building products respectively, have been gazetted and are to remain in force for 12 months from date of publication and for another 12 months if no orders to the contrary are issued. The Order governing taverns was published on January 21 and the other three on December 31. All the orders stipulate that, where not incompatible, the provisions of Order 4 (LABOUR GAZETTE, May, 1938, p. 512) are to apply to the industries covered by them.

For the purpose of fixing wage-rates, all but the order governing taverns divide the province into zones. The Board may transfer a municipality from one zone to another or exempt it from the order altogether.

The first three orders, like Order 4, prohibit the reduction of wages of employees who were, on January 1, 1938, receiving a higher rate than that fixed by the order unless the rate set by the latter is at least $200 a month.

Workers are divided into different categories and minimum wage rates are fixed for each category applicable to the specified number of hours. In most cases overtime rates of time and a half must be paid for work beyond these hours. In taverns the rate is time and a quarter. Overtime worked by stationary engineers is governed by Order 6 (LABOUR GAZETTE, 1938, p. 624). In the leather industry, "overtime" includes work on Sundays and holidays, except for watchmen. In brick and tile manufacture, in taverns and in wood products, overtime is defined as time in excess of the specified weekly hours, or in excess of a 10-hour day when weekly hours do not exceed the specified number, or in excess of a 12-hour day at any time. But it is stipulated that in brick and tile making extra work required to be done to make up for interruptions due to trouble with machinery or to *force majeure* is not to be considered overtime.

LEATHER INDUSTRY

Order 21 governs those engaged in tanning leather, currying hides and other operations with hides and leather. It divides the province into three zones: Zone I, the Island of Montreal and Quebec City, and municipalities within a ten mile radius of either city; Zone II, any other towns with a population of 10,000 or more; and Zone III, the remainder of the province.

For office employees in this industry throughout the province, the rates apply to a working week of 55 hours. Beginners are to receive at least 15 cents an hour for the first year; during the second year they must be paid not less than 20 cents, 18 cents and 17 cents in Zones I, II and III, respectively. In the third year, the minimum rates rise to 25 cents, 22 cents and 21 cents. For messengers, the minimum hourly rate is 10 cents for a week of 55 hours.

Managers, foremen, overseers and others in supervisory positions may make agreements with the employer concerning wages, provided that for a 72-hour week, they do not fall below $22 in Zone I, $20 in Zone II and $18 in Zone III. For the same work-week, watchmen must be paid not less than 25 cents an hour in Zones I and II and 20 cents in Zone III. Chauffeurs and drivers must be paid a minimum of 32 cents, 28 cents and 25 cents in Zones I, II and III respectively, and their helpers at least 20 cents, 18 cents and 16 cents for a 60-hour week.

Stationary enginemen are governed as to wages and hours by Order 6 as indicated

above. Maintenance men, until the Board makes a special ruling, are to be paid wages according to a section in Order 4 covering wage-earners in occupations not classified. That section divides the province into 4 zones, fixing hourly, weekly, monthly and yearly rates for each. The weekly rates apply to a 60-hour week.

All other wage-earners in the leather industry are divided into three classes for each sex for which a minimum hourly rate is fixed in each zone, the regular rate applying to a 55-hour week. Not less than 60 per cent are to be in Class A, at least 25 per cent in Class B and not more than 15 per cent in Class C. The minimum hourly rate for Class A is 40 cents, 37 cents or 32 cents according to the zone. For Class B, the rates are 30 cents, 28 cents and 23 cents and for Class C, 20 cents in Zones I and II and 16 cents in Zone III.

Notwithstanding the provision in Order 4 for a weekly rest day, workers in the beam house may work up to four hours on their weekly day of rest.

Brick and Tile Manufacture

Order 22 concerns workers engaged in the manufacture of bricks, building blocks, terra cotta tiles, farm tiles and all similar products. The order provides for two zone, Zone I including the Island of Montreal, Quebec City and municipalities within a ten mile radius of the two cities and Zone II, the remainder of the province.

The minimum hourly rate fixed for batchers, kiln dischargers, locomotive engineers, kiln setters and dischargers, operators of concrete block machines, mixers, presses, brick machines, electric cranes and shovels is 35 cents an hour in Zone I and 31½ cents in Zone II. Unless the Board makes a special ruling to the contrary these rates are also to apply to maintenance men. Shovel operators are to receive 45 cents in Zone I and 40·5 cents in Zone II and machinists 44 cents or 40 cents. Minimum rates of 30 cents and 27 cents an hour are fixed for screen operators, transfer operators, dry press truckers, moulders, machine operator helpers, truck loaders, hopper men, brakemen, pitmen, chauffeurs and drivers, dryer firemen, coal men, labourers and other workers not specified. For concrete wheelers and operators of pug mills, rolls and pens, the minimum is 32 cents in Zone I and 29 cents in Zone II. Off bearer operators, brick burners and gas makers must be paid 33 cents in Zone I and 30 cents in Zone II; day watchmen 27 cents or 24 cents an hour. For night watchmen weekly rates of $20 and $18 are set for Zones I and II, respectively. Messengers are to be paid 15 cents an hour. The wages of stationary enginemen are governed by Order 6.

For office workers in the industry hourly, weekly, monthly and yearly minima are fixed, the rates being in Zone I, 25 cents, $12, $52 and $625 respectively, and in Zone II and in Quebec City, 22½ cents, $10.80, $47 and $560.

As in the order concerning the leather industry, managers, etc., may contract with the employer for the salary or wages to be paid but the weekly rate may not fall below $22 in Zone I and $20 in Zone II.

The weekly hours to which the minimum rates apply in the case of brick burners, gas makers, dryer firemen, coal men, day and night watchmen are 84; for maintenance men, chauffeurs and drivers, 72; city office workers and city messengers 48 hours; and all other classes covered by the order, including office workers and messengers, 60 hours. The provision in Order 4 that a worker required to wait on the premises must be paid for the time so spent is declared not to apply to the brick and tile industry.

According to Order 4, piece workers must receive for each period specified the minimum rate but Order 22 permits the employer at any time to modify the piece rates, provided he notifies the Board. The latter has power to establish piece rates if there is abuse in the matter of piece work. The weekly day of rest provided for by Order 4 may, in the case of watchmen, brick burners, dryers and dryer firemen not be granted but the employer must compensate for this by allowing holidays during the week.

In addition to the deductions from wages allowed by Order 4, the employer may deduct the rent for houses he leases to his workers. Wages must be paid at least fortnightly.

Taverns

Order 23 applying to taverns in Montreal, in the cities and towns on the Island of Montreal and within a five-mile radius of the Island, divides the employees into four classes: bartenders, waiters, cleaners and temporary employees of these three classes. Bartenders are to receive at least 35 cents an hour if regularly employed and 43 cents for temporary employment. All cleaners, whether employment is permanent or not, and waiters in regular employment receive not less than 25 cents an hour. Waiters employed temporarily are entitled to 32 cents an hour.

These wage-rates relate to a work-week of 54 hours with overtime at the rate actually paid increased by one-quarter.

Unless he has refused to work a bar-tender or waiter called to work must be paid for at least three hours. The same rule applies also to cleaners temporarily employed. When a

bar-tender or waiter is required to work for less than 30 hours in a week he is to be paid the minimum rate increased by one-quarter. Exceptions to this punitive rate are permitted in the same cases as allowed by Order 4, including special regulations and in cases where the wage-rate received by an employee on January 1, 1938, is made the minimum by the Order and is at least 15 per cent higher than the prescribed rate.

Every wage-earner is entitled to an hour's rest after six consecutive hours' work. No females may work as waiters and only the wife and daughters of the proprietor may act as bar-tenders.

Manufacture of Doors, Window Sashes, etc.

Order 24 governs the manufacture of wooden works to be incorporated in buildings such as mouldings, stairways, radiator covers, mantelpieces, beams, wall fixtures, show-cases and cupboards; also wooden doors and sashes and any similar work or products.

This order divides the provinces into three zones: Zone I, the Island of Montreal, Quebec City and municipalities within a ten mile radius of either; Zone II, establishments in other municipalities of 5,000 or more employing at least 10 wage-earners during at least six months of the year; Zone III, all other establishments.

Apprentices in the industry must serve four years including all time spent in work in any establishment subject to the order. The number of apprentices must not exceed one for every six wage-earners employed in the same establishment excluding special classes of workers. For the first year, an apprentice must be paid not less than 15 cents an hour; for the second year, 20 cents, 18 cents and 17 cents in Zones I, II and III respectively; for the third year, 25 cents, 22 cents and 21 cents, and for the fourth year, 32 cents, 28 cents and 25 cents depending on the zone. The last mentioned are also the minimum rates for labourers, chauffeurs, drivers and their helpers. Apprentices must be between 16 and 25 years of age and a record of apprenticeship is to be kept.

Office employees with less than one year's experience are to receive a minimum of 17 cents an hour in Zone I and 15 cents in Zones II and III. With more than one but less than two years' experience, they are entitled to 20 cents, 18 cents or 17 cents according to the zone. Those with over two years' experience receive at least 25 cents, 22½ cents or 20 cents an hour. The minimum for messengers is 10 cents an hour.

Managers, foremen, etc., may also in this industry agree with their employers on the rates they are to receive but the minimum is $22 weekly in Zone I, $20 in Zone II and $18 in Zone III. Watchmen in Zones I and II receive 25 cents an hour and in Zone III, 20 cents. Maintenance men and stationary enginemen have the same conditions as in the leather industry. Measurers or scalers must be paid 40 cents, 38 cents or 35 cents an hour according to the zone. The hourly rates fixed for wage-earners other than those mentioned are 38 cents, 34 cents and 32 cents in Zones I, II and III, respectively.

These minimum rates apply to a 60-hour week in the case of chauffeurs, drivers and their helpers, managers, foremen, etc.; to a 56-hour week in the case of maintenance men, and to a 50-hour week for all other classes in the industry except watchmen and stationary engineers. Overtime as indicated above must be paid beyond these hours. Watchmen may be employed for 72 hours a week and stationary engineers are governed by Order 6. Embodied in this order is the provision of Order 4 that a workman called to work must be paid for at least three hours unless he has refused to work.

Quebec Electricians Act

A regulation under the Electricians and Electrical Installations Act in force from December 31, 1938, has to do with apprenticeship. It adds to regulations made on September 3, 1933, a section providing that an apprentice preparing himself for a moving-picture machine operator's "D" licence must be registered by the board of examiners. The board is to furnish him with an apprenticeship booklet in which each employer enters the date of commencement of work and the leaving date if necessary.

Apprenticeship is to be for at least one year, at the end of which the candidate may apply to undergo an examination before the board with which he may register on payment of 25 cents. The existing by-laws provide that the Canadian Electrical Code is to serve as a basis for examination for electricians' licences and in order to obtain a journeyman electrician's licence an apprentice may be asked by the board to qualify on both a practical and theoretical examination.

Quebec Pipe-Mechanics' Act

Amendments were made on December 22 last in the regulations issued under this Act on May 16, 1934, which replaced those made on June 27, 1933. (Labour Gazette, 1933, p. 702). A further classification of licences for contractors and workers is provided for. Contractors licences are classified as ordinary licences for commercial work and licences for special technical work in a particular industry. There are four grades for journey-

men's licences, two related to each of the contractor's licences. After four years' apprenticeship and on passing an examination, a man receives an improver's licence for one year, then by passing a second examination he may qualify for a journeyman's licence for ordinary commercial work or for technical work in a particular industry according to the training he has had. In addition, there is a licence for journeymen charged with looking after the plumbing, heating, refrigerating and sprinkling works in certain public buildings and industrial establishments.

An apprentice must be at least 16 years of age. A new section provides that an "apprenticeship booklet" issued at the same time as the apprentice's licence and containing the record of his employment is to be kept by the employer as long as the apprentice is with him and then returned to the apprentice.

A contractor employing three journeymen may also employ an improver. If he employs five journeymen, he may employ a second improver and one for each five thereafter. No change is made in the fees charged for licences.

Quebec Public Building Safety Act

An amendment of December 22 in the safety regulations of May 15, 1914, for persons washing windows from the outside allows the use of either safety-belts or a solidly built platform balcony designed to prevent accidents. It is no longer necessary to have both. The anchors or hooks required by an amendment of September 15, 1938, are necessary only when there is no safety platform.

LABOUR LEGISLATION IN BRITISH COLUMBIA IN 1938

THE British Columbia Legislature, which was in session from October 25 to December 9, 1938, enacted a number of measures of labour interest including new statutes dealing with superannuation of municipal and certain other public employees, the regulation of public utilities and assistance to municipalities in respect of certain public works. Laws were amended relating to workmen's compensation, coal mines, apprenticeship, trade schools, hours of labour in fire departments, conciliation and arbitration in industrial disputes, mechanics' liens and the determination of residence of beneficiaries for purposes of relief and social assistance.

Workmen's Compensation

The Workmen's Compensation Act was amended to raise the scale of benefits and to extend the scope of the provision relating to compensation in case of accidents happening outside of the Province when the workman is a resident of the Province and the nature of the employment is such that it requires him to be both within and without the Province. Formerly compensation was payable only if the accident happened on a steamboat, ship or vessel or on a railway. It is now payable if the accident happens on an aeroplane, flying machine, truck, bus or other vehicle used in transportation of passengers or freight.

The increased compensation scale is to apply only to accidents occurring after January 1, 1939. Burial expenses are now payable up to $125 instead of $100 and compensation to a widow or invalid widower has been increased from $35 to $40 per month. Payments in respect of children under 16 and invalid children over that age remain at $7.50 per month, but the maximum total compensation payable to a widow or invalid widower with children is raised from $65 to $70. A similar increase is made in the maximum total in cases where the workman leaves dependent parents in addition to a widow or invalid widower or orphan children. In cases of disability, the amount of compensation payable is increased from 62½ per cent to 66⅔ per cent of the workman's average earnings.

Another amendment relates to the disposal of surplus funds accumulated by reason of the lower rate of benefit paid to alien dependents residing in countries where the cost of living is lower than in Canada. Such surplus is to be used to pay an additional sum to each dependent widow to increase her compensation to $40 per month and to pay the sum of $7.50 per month to each dependent child under 16 years of age and to each invalid child over that age and $15 per month to each orphan child under 16 (or over if an invalid) in cases where such persons, by reason of the limitations on total compensation imposed by the Act, are not receiving the compensation to which they would otherwise be entitled. Formerly such surplus was to be distributed every six months, and payments made therefrom to dependent children under 16 years of age resident in Canada sufficient to bring their compensation up to the amount to which they would have been entitled except for the limitations above mentioned. After such dependent children were provided for, any undistributed accumulation was to be applied to increase the sum payable to dependent

widows residing in Canada, to increase pro tanto their monthly payments up to but not exceeding $50 per month and to children dependents residing in Canada up to but not exceeding $10 per month for each child. The remainder was to be applied to increasing compensation to other dependents, such increase not to exceed 50 per cent of the previous award and any amount remaining was to be added to the undistributed accumulation available for distribution during the next six months' period.

Coal Mines

The Coal Mines Regulation Act was amended to provide that, without affecting the rights of persons employed in the mine as otherwise provided for in the Act, such persons may select one of their number to accompany the mine manager or inspector on an inspection following an unusual occurrence or a fatal accident.

Apprenticeship and Trade Schools

The Apprenticeship Act was amended with reference to the employment of minors in trades designated as within the Act. As formerly a minor under 16 years of age may be employed in a designated trade under a contract of apprenticeship which was in effect prior to the coming into force of the Act or before the designation of the trade as a trade to which the Act applies or under a contract made under the Act. A new provision forbids employment of a minor 16 years of age or over in a designated trade except under certain conditions. Where employment is preliminary to entering into a contract of apprenticeship under the Act and he has obtained a written permit in prescribed form from the director, such a minor may be employed for a period or periods which may not, unless an extension is granted by the Provincial Apprenticeship Committee, exceed a total of three months. When the committee grants an extension, which it may do as often as it thinks proper, the director is to issue a permit extending the period of employment for such additional time as may be approved by the committee. Where a minor 16 years of age or over has entered into a contract of apprenticeship in accordance with the Act, he may be employed in a designated trade during the term of apprenticeship and when he has completed such term he may be employed in the trade in which he has served his apprenticeship. The provisions relating to minors do not apply to common labourers nor to minors who, before the coming into force of the principal Act, completed the period of apprenticeship customary in the designated trade.

An amendment in the Trade Schools Regulation Act provides a penalty for failure to comply with regulations under the Act. The maximum penalty is, in the case of a corporation, $500 and, in the case of a natural person, $250 and, in default of payment, imprisonment for not more than three months.

Hours of Labour—Fire Departments

The Fire Departments Two-Platoon Act was amended to make it apply to every municipality and every place in which there is a paid fire department or a paid fire brigade. "A paid fire department" or "paid fire brigade" is defined as a fire brigade of which, exclusive of the fire chief, one or more members are in receipt of remuneration for full-time service. Formerly the Act applied only to the Cities of Vancouver, Victoria and New Westminster.

Conciliation and Arbitration

Clauses relating to collective bargaining in the Industrial Conciliation and Arbitration Act, 1937, were amended to provide that if the majority of the employees of an employer were, on December 7, 1938, organized in a trade union, it shall be lawful for such employees to bargain collectively with their employer through the officers of such union. Where employees were not so organized on that date, collective bargaining is to be conducted, as formerly, through representatives of employees duly elected by a majority vote of the employees affected. An employer refusing to bargain with employees as provided by the Act is liable, as heretofore, to a penalty not exceeding $500 for each offence.

A private member's Bill, which failed to pass, would have amended the Act to declare it lawful for "members of an organization of employees to conduct such bargaining through the organization and through the duly chosen officers of such organization" and would have required, under the penalty in the Act, every employer to "recognize and bargain collectively with the members of a trade union representing the majority choice of the employees eligible for membership in said trade union." Where no such organization existed an employer would have been required to "recognize and bargain collectively with representatives of employees duly elected by a majority vote of employees affected." The Bill would also have prohibited a change in wages or hours being made effective without the consent of the employees or a strike or lockout after an application had been made for appointment of a Conciliation Commissioner, instead of prior to such application, as at present. A further change would have been

the repeal of those clauses requiring application for a Conciliation Commissioner to be made by the party proposing the change in wages or hours and prohibiting the parties doing anything in the nature of a suspension of work pending application for the appointment of a commissioner.

Mechanics' Liens

A change in the Mechanics' Lien Act provides that an affidavit of lien may be made by the claimant or his agent not only as to facts within the personal knowledge of the person making the affidavit but, also, if such person gives the source of his information and states that he believes the facts to be true, as to facts of which such person is informed.

Relief and Assistance—Residence Qualifications

Amendments in the Residence and Responsibility Act include the addition of a clause defining "social assistance" as aid in money or in kind granted to a person on account of his needy circumstances to provide him with the necessities of life, by the Government of the Dominion or of the Province or by any municipality, in the form of unemployment relief, poor relief, mothers' allowance, pension on account of old-age or blindness, maintenance of a neglected child, war veterans' unemployment assistance, or in pursuance of any other public measure to aid destitute persons, or that is granted to a person by any private association or agency designated for purposes of this clause by the board of arbitration established under the Act; also care provided for any person in any institution or foster-home catering to the needs of the indigent, sick, or infirm, wholly or partially at the public expense or at the expense of any private association or agency designated for that purpose by the board of arbitration where such person is unable to meet the charges for such care.

The section which provides that time during which a person has lived in a local area in an institution supported wholly or partly by public funds or in a monastery, convent or similar institution or in a foster-home where he is maintained at public expense, shall not be deemed to be a period of residence in that area, was amended to add time spent within a work camp operated by the Dominion or Provincial Government as an unemployment relief or youth training project. This section does not apply in the case of a person who is a regular member of the paid staff, such as manager, director, or foreman, graduate nurse, orderly, skilled mechanic or office worker of the institution, foster-home or work camp in which he lives or to the first three months of the period during which a person lives as a patient in a hospital.

Another amendment relates to a person who has moved from one local area to another. Such person, upon compliance with the conditions prescribed by the regulations, is to be granted by the local authority of the area to which he has moved, unemployment or poor relief or any form of social assistance administered by that local authority on the same terms and conditions as residents of that local area unless the regulations provide to the contrary. As formerly the costs of such assistance, exclusive of the costs of administration, are to be payable by the local area of which such person is a resident.

Motor Vehicles

The Municipal Act was amended by the addition of a clause enabling municipal councils to pass by-laws for regulating and licensing motor vehicles carrying passengers and plying for hire in the municipality, and their owners, drivers and attendants, and for suspending or cancelling such licences.

Municipal Employees' Pensions

The Municipal Superannuation Act, which will come into force on April 1, 1939, repeals the Superannuation Act passed in 1921. The repealed Act applied to employees of municipalities, school boards, and private employers who made agreements with their employees to take advantage of the Act. The new law does not relate to employment in private industry. It applies to employees, other than pensionable teachers, of municipalities and school boards which had adopted the provisions of the former Act or which adopt those of the new statute by a two-thirds majority of the council or board; to every person paid by the municipality and appointed to office by the Lieutenant-Governor in Council and to whom the Act is declared to apply by by-law of the municipal council; to employees, other than casual workers, of the Greater Vancouver Water District and the Vancouver and Districts Joint Sewerage and Drainage Board; and to hospital employees, except casual employees, to whom the Act is declared to be applicable by the Provincial Secretary and on the joint request of the governing authority of the hospital and a majority of its employees.

Provision is made for revising the allowances granted under the earlier statute to municipal and school employees to bring them into line with the new Act and for trans-

ferring an employee's contribution to his new account, if he desires that to be done.

Under the new Act a Municipal Superannuation Fund is to be established made up of contributions from employers and employees. The employee's contribution is 4 per cent of salary to be deducted by the employer and paid by him to the Commissioner of Municipal Superannuation appointed under the Act. The employee may make a larger contribution after giving a written notice to that effect. The employer's contribution is 7 per cent of the aggregate salaries of employees to whom the Act applies but the rate may be reduced if the state of the fund permits. The actuarial solvency of the Fund is to be maintained and if necessary advances may be made from the Consolidated Revenue Fund to be repaid without interest when there is a surplus of contributions over expenses.

Employees, other than policemen and firemen, are entitled to a superannuation allowance at the minimum age of 60 years or the maximum of 65 years, in the case of men, or the minimum of 55 or the maximum of 60 years, in the case of women. In calculating an employee's length of service, the total number of months worked is to be divided by 12, the resulting number being deemed to be the number of years of service. The maximum retiring age does not apply to police magistrates but they are entitled to an allowance at 65, unless disabled at an earlier age. For firemen and policemen, the minimum retiring age is 55 years and the maximum 60. The Act is not to apply to any person who is over 30 when he enters employment except in the case of professional and executive officers or, in other special cases, with the approval of the Commissioner.

An employee may not remain in service after reaching the maximum retiring age, but except in the case of firemen and policemen this provision will not come into operation until April 1, 1942. Except with written approval of the Commissioner, an employee who has reached the minimum retiring age may not be retired before reaching the maximum retiring age. These provisions do not, however, prevent an employer from retiring an employee who has reached the maximum retiring age. No employee who enters service after the commencement of the Act is entitled to superannuation unless he has served at least 20 years prior to reaching the maximum retiring age. Any person in service at the commencement of the Act who cannot complete his 20 years' service prior to reaching the maxmium retiring age is not entitled to superannuation until he reaches that age except on the ground of total and permanent disability. In determining an employee's period of service, all service rendered to any employer to whom this Act or the former Act applied is to be taken into account.

The superannuation allowance consists of two parts, a service pension provided from the contributions of the employer and a retirement annuity purchased by the contributions of the employee. The service pension is a minimum amount on the single life plan of $360 per annum for 20 years of service or a proportional amount in the case of an employee who was in the service at the commencement of the Act and who attains the maximum retiring age without completing 20 years' service. An additional service pension on the single life plan is payable to men other than firemen and policemen and to women at the rate of one dollar per annum for each month of service over 20 years and to firemen and policemen at the rate of $13.50 per annum for each complete year of service over 20 years and, in the case of additional service less than a complete year, $1.10 per annum for each complete month of such additional service. The retirement annuity is such amount as the employee's contributions will provide according to prescribed tables and the plan selected.

The superannuation allowance may be granted on the single life plan, payable for the life of the employee, or on the single life guaranteed plan, payable for the life of the employee or for a term of not less than five years certain, whichever is longer, or on the joint life and last survivor plan payable during the joint life of the employee and any person nominated by him prior to the granting of the allowance and during the life of the survivor or such combination of these two plans as the contributor, with the approval of the Commissioner, may request. Where no selection is made the allowance is to be on the single life guaranteed plan for a term of ten years certain. In the case of an allowance on the single life guaranteed plan for a term of years certain, provision may be made that, if the beneficiary dies before the expiration of the term, the allowance may be paid for the remainder of the term to a person nominated by the employee prior to the granting of the allowance. In such case if the person nominated survives the beneficiary the allowance does not form part of the estate of the beneficiary.

An employee who becomes totally and permanently disabled, before reaching his minimum retiring age is entitled to receive during disability an allowance on the single

life plan comprising one-half of the service pension, computed on the single life plan, which the employer would have had to provide had the employee remained in the service until his minimum retiring age, together with a uniform annual increase for each year of service of one-half of the service pension divided by the difference between the employee's minimum pension age and his age at the time he entered the service, and one-half of the retirement annuity computed on the single life plan, which the employee's contributions would have provided if he had remained in service until his minimum retiring age, together with a uniform annual increase for each year of service of one-half of the retirement annuity divided by the difference between the employee's minimum retiring age and his age on entering the service. Such disability allowance may be granted on any of the plans given above for superannuation allowances. In cases of total and permanent disability arising out of and in the course of his employment, an employee is eligible as from the date of entering employment to receive that part of the disability allowance consisting of one-half of the service pension provided from the employer's contributions; plus the annual increase; in cases of disability not so arising he is not eligible to receive that part of the disability allowance unless disability commences after he has served for at least ten years under this Act or under the former Act and this Act.

In case of death before superannuation, an allowance is granted on the single life plan to any dependent relative who applies therefor, who is not in receipt of a pension under the Old Age Pension Act and who has been nominated by the employee in writing and with the approval of the Commissioner. If there is no such relative the allowance is to be granted to the widow of the employee. The allowance consists of one-half of the service pension, computed on the single life plan, which would have been provided from the employer's contributions had the employee lived to minimum retiring age and one-half of the retirement annuity which the employee's contributions would have provided had he lived to minimum retiring age. Where the allowance is granted to a widow or female relative, the portion provided by the employer's contributions ceases in the event of her remarriage or marriage. Where, on the death of a person to whom an allowance is granted under the above provision, the amount in the employee's contributory account at the time of his death exceeds the aggregate of the payments made to such person arising from that account, the amount of the excess is to be paid to the personal representatives of the employee. Where the employee dies, except from accidental causes, within five years of the date on which he entered service no dependant's allowance is payable.

An employee dismissed after completing 20 years' service and before reaching his minimum retiring age, is entitled, on reaching that age, to an allowance from the employer's contributory account equivalent to the service pension which would have been payable to him from that account had he retired in the ordinary way but such allowance is not payable to a person who is entitled to a service pension in respect of service with another employer under the Act.

An employee resigning or dismissed before reaching his minimum retiring age is entitled to a refund of the amount at the credit of his contributory account but he may leave it in the Fund until he reaches his minimum retiring age, in which case he is then entitled to the retirement annuity which his contributions will provide granted in the same manner as retirement annuities of those retiring in the usual way.

Subject to the provisions relating to dependants' allowances, if an employee dies before being granted a superannuation allowance, the amount at his credit is to be paid to any person nominated by him in writing and if there is no such person to the widow or, failing nominee or widow, to the personal representative of the employee. Where such amount is payable to a person nominated by the employee or to his widow, it is not to be subject to the control of the creditors of the employee or form part of his estate.

Superannuation allowances are to be paid monthly and may not be assigned, charged or attached by process in any Court. Where the employee has been granted an allowance on the single life plan guaranteed for a term of years certain he may bequeath it in the event of his death for the remainder of the term.

A superannuate may engage in paid work for any employer but where the aggregate of his monthly service pension and his monthly salary exceeds $100, if he is married, or $75, in the case of a single person, widow, or widower, the service pension provided by the former employer is to be reduced by the amount of the excess. Nothing in the Act is to prevent an employer from supplementing a superannuation allowance.

The Act is to be administered by the Provincial Secretary who is to report to the Legislature within 15 days after the opening of each session. The Lieutenant-Governor in Council is to appoint a Commissioner of Municipal Superannuation and not more than

three trustees of the Fund. An actuary is to be employed by the Commissioner to make valuations of the assets and liabilities under the Act of each employer three years and six years after the date of commencement of the Act and quinquennially thereafter. The Act is not to affect the right of any employer to dismiss any person. The Commissioner, with the approval of the Lieutenant-Governor in Council, may make regulations for carrying out the Act, including the manner of making application for allowance, inspection of payrolls, reports to be made by employers and the rate of interest to be allowed in respect of contributions of employers and employees.

Public Utilities

The Public Utilities Act provides for a commission of three members to regulate certain public utilities including railways, street railways, tramways or ferries, toll-bridges, telephone and telegraph services, production and sale of gas, electricity or steam, public water supply and transportation of persons or property by motor vehicle. "Public utility" does not include services furnished by a municipality within its own boundaries; services or commodities furnished by any person to his employees or tenants, when such services or commodities are not resold; the Greater Vancouver Water District; any Improvement District or Water-users' community constituted under the Water Act; a person operating a taxicab; or the Pacific Great Eastern Railway.

The commission may make orders and regulations dealing with various matters, including equipment and safety devices and may require public utilities to file reports of accidents which endanger the safety, health or property of any person. A public utility receiving an order of the commission must notify forthwith each of its officers and servants affected by delivering to him a copy of the order or by posting it in some conspicuous place where his work or duties or some of them are to be performed. Any officer, agent or employee of a public utility who fails or refuses to furnish information or make a report when required by the commission to do so is liable to a penalty.

Construction Industry

The Municipal Improvements Assistance Enabling Act, 1938, which is retroactive to June 25, 1938, enables the Province to take advantage of the Dominion Municipal Improvements Assistance Act, 1938. The latter Act (LABOUR GAZETTE, 1938, p. 893) authorizes the Dominion Minister of Finance to make loans, not exceeding in the aggregate $30,000,000, to municipalities for the purpose of constructing or making extensions or improvements to or renewals of a municipal waterworks system, gas plant, electric light system or other municipal project. One of the conditions of the loan is that the work is urgently needed and will assist in the relief of unemployment in the municipality.

The British Columbia statute enables municipalities in the Province, with the consent of the Lieutenant-Governor in Council and on terms laid down by him, to enter into an agreement with the Dominion Minister of Finance to borrow, under the Dominion Act, the sums approved and to give security therefor. The Lieutenant-Governor in Council may, on the recommendation of the Provincial Minister of Finance, approve an application by a municipality for a loan under the Dominion Act and of the project to be financed and may guarantee payment of interest on, and amortization of, the loan. If a municipality fails to make such payments, the Lieutenant-Governor in Council may require the municipal council to pass a by-law to raise the necessary money by a tax on rateable land, or on rateable land and improvements, or he may appoint a receiver of the project financed out of the proceeds of the loan, or appoint a commissioner for the municipality. If the Dominion Minister of Finance grants a loan to any public body not included in the definition of a municipality, the public body and the Lieutenant-Governor in Council are to have the same powers as in relation to a loan granted under the Dominion Act.

Credit Unions

The Credit Unions Act, in force by Proclamation on January 31, 1939, provides for incorporation of credit unions for the purpose of raising a fund by subscriptions of the members and by other means provided in the Act and of making loans to its members. Any ten or more persons may submit a constitution and rules for a credit union to the Registrar of Companies who is to issue a certificate of incorporation if the constitution and rules comply with the Act and if the Inspector of Credit Unions appointed under the Act is satisfied that the subscribers and proposed directors are residents of the Province and qualified to establish and conduct a credit union.

The capital of a credit union is to consist of an unlimited number of shares of $5 each. The union may, by resolution of not less than three-fourths of the members entitled to vote, at a meeting called for the purpose, reduce its share capital in any way authorized by the Companies Act for the reduction of share

capital, with the sanction of the Court, and the provisions of the Companies Act are to apply to such reductions. The liability of a member is limited to the amount unpaid on the shares held by him.

A credit union is to be managed by a board of at least five directors, who must be members. Every union must also have a credit committee of not less than three and a supervisory committee of three members. A director may be a member of the credit committee, but neither a director nor a member of the credit committee may be a member of the supervisory committee. Directors and members of committees receive no remuneration. The supervisory committee must examine the accounts of the union at least annually and report to the members. It must also make an inspection of the affairs of the union at least quarterly and may at such time audit the accounts. It may at any time call a general meeting to consider its report or any other matter.

The credit committee is to supervise the loans, which may be made only to members and only for a provident, productive or merchandising purpose, but it may make a loan only if a majority of the committee is present at the meeting and unanimously approves the loan. No loan exceeding $100 may be made without security and where security is required the committee may accept a note endorsed by the borrowing member or an assignment of his shares in, or of moneys deposited by him with, the credit union. Loans to a director or member of a credit committee or of a supervisory committee, if the amount exceeds the total value of his shares and deposits, and loans to a credit union or co-operative association must be approved by at least two-thirds of the directors and the credit committee. Loans to credit unions and co-operative associations must also have the written consent of the Inspector. Interest on loans may not exceed 1 per cent per month, inclusive of charges for making the loan, and is payable only on the unpaid balance.

A credit union may receive from its members only money on deposit and may allow interest subject to conditions laid down in the Act, may borrow and raise money in such manner as it thinks fit, and in particular by the issue of debentures, and may secure payment of such money by mortgage or charge on real or personal property, including sums unpaid on its shares. The total amount of such borrowings at any time outstanding may not exceed 25 per cent of its assets, exclusive of sums unpaid on its shares and of the value of property already mortgaged or charged.

In the apportionment of the net earnings, not less than 20 per cent must be set aside annually as a reserve fund until that fund is equal to 20 per cent of the share capital paid up at the date of the apportionment. A dividend may be paid of 6 per cent per annum or an amount recommended by the directors whichever is the less. Not more than 5 per cent of earnings may be devoted to the promotion of thrift and the propagation of co-operative principles. After these payments are provided for, all or any portion of net earnings may be distributed among such members or such class of members as the union may, subject to its rules, determine.

The Lieutenant-Governor in Council may cancel the incorporation of a credit union for cause or where such union has less than ten members. He may also make regulations for carrying out the purposes of the Act including matters for which no provision or only partial provision has been made in the Act.

Bills not Passed

In addition to a Bill to amend the Industrial Conciliation and Arbitration Act noted above, several Bills of labour interest were introduced but failed to pass.

A Government Bill which was dropped would have amended the Hours of Work Act to enable the Board of Industrial Relations to investigate and deal with undertakings considered to be designed to defeat the purpose of the Act even in cases where the persons engaged in them were members of the same family. The Board would have been authorized to make a regulation declaring any party to such an undertaking to be an employer and the other parties his employees for purposes of the Act.

A Bill respecting Industrial Settlements would have provided that whenever, by reason of the presence or operations of any factory, cannery, logging camp, mine, sawmill or other manufacturing concern, there was a concentration of population, outside a municipality, of fifty or more persons in an area of one square mile or less, such area should be deemed to be a public settlement, its roads and streets public thoroughfares, and the employees of the person or company conducting the enterprise who lived on the property of the employer, whether in individual houses, bunk-houses or boarding-houses, to be tenants of the employer with all the rights and privileges of tenants.

Other Bills introduced but not passed would have extended the Female Minimum Wage Act to include farm-labourers, fruit-pickers and domestic servants, amended the Hospital Act to provide for an eight-hour day and 44-

hour week for nurses and other members of the staff with the exception of superintendents and revised the Woodmen's Lien Act to require any logging operator who was not the owner of the land on which operations were being conducted to deposit with the Government Agent for the district and maintain, during the continuance of the work, adequate security for the semi-monthly payment of the wages of his employees.

Resolution on Old Age Pensions

On December 9 a resolution concerning old age pensions was agreed to in the following terms:

Whereas it is becoming increasingly difficult for elderly persons to find employment;

And whereas a large number of persons of all ages still seek profitable employment;

And whereas the Government of British Columbia has urged upon the Federal Government the desirability of reducing the age at which old-age pensions shall become payable;

Therefore be it resolved, That this House commends the Government for the above-mentioned representations to the Federal Government;

And be it further resolved, That this House recommends to the Dominion Government that legislation be enacted to provide for: (1) a reduction of the age of eligibility for old-age pensions as soon as may be possible; and (2) the regulations under the Old-Age Pensions Act be modified to eliminate existing hardships encountered by the aged people in obtaining pensions; and (3) initiate a national compulsory contributory insurance scheme for retirement allowances.

LEGISLATIVE PROGRAMS OF PROVINCIAL LABOUR ORGANIZATIONS

RECENTLY several provincial labour organizations presented programs of proposed labour legislation to their respective governments. On December 21 the Saskatchewan Provincial Executive of the Trades and Labour Congress of Canada met the Saskatchewan government; while on December 30, a joint delegation of the Manitoba Provincial Executive Committee of the Trades and Labour Congress of Canada, the Legislative Committee of the Winnipeg Trades and Labour Council, and the Legislative Committee of the Railway Transportation Brotherhoods, met the representatives of the Manitoba government. In the January issue of the LABOUR GAZETTE the memoranda of proposed legislation presented to the Dominion Government by various national bodies were reviewed.

(Owing to the limitation of space in this issue, summaries of the presentations of the Saskatchewan and Manitoba organizations only are presented herewith. Reviews of submissions to their respective governments by the Alberta Federation of Labour, the New Brunswick Federation of Labour, the Ontario Executive of the Trades and Labour Congress, and the Confederation of Catholic Workers will appear in the March issue.)

Saskatchewan Provincial Executive of the Trades and Labour Congress of Canada

The Provincial Executive of the Trades and Labour Congress of Canada presented its memorandum of proposed labour legislation to the Saskatchewan government on December 21, 1938. The delegation from the Provincial Executive comprised Alex. M. Eddy, Saskatoon, Chairman; Albert Mose, Moose Jaw; Harry Davis, Prince Albert; and Alex. Cockrane, Regina, together with prominent workers in the trade union movement. Members of the Cabinet present to receive the delegation were Hon. W. J. Patterson, Premier; Hon. T. C. Davis, Attorney-General; Hon. J. M. Uhrich, Minister of Public Health; Hon. W. F. Kerr, Minister of Natural Resources; Hon. J. W. Estey, Minister of Education; Hon. J. G. Taggart, Minister of Agriculture; Hon. R. J. M. Parker, Minister of Municipal Affairs; Hon. A. T. Proctor, Minister of Highways; and Hon. E. M. Culliton, Provincial Secretary.

The following requests were made:

That the Government institute a works program to relieve unemployment; establishment of regulations governing the wages and working conditions of bus and truck drivers; institution of a civic employees' superannuation plan; amendments to the Industrial Standards Act with respect to materials used, and that some of the powers of the Commission administering the Act be transferred to its advisory boards; amendments to the Workmen's Compensation Act to widen its scope so that all workers would be covered to give 100 per cent compensation; also to increase children's age limit to 18 years and increase the pension allowance to children and widows; amending the Fire Fighters' Two-Platoon Act to make it applicable in cities of over 10,000 population instead of cities of 15,000 as at present; amending the One Day's Rest in

Seven Act to extend its jurisdiction to cover an area 5 miles from the city limits; inclusion of domestic workers under the Minimum Wage Act; standardization of school text books; workers representation on the Milk Control Board; establishing a permanent commission to handle all provincial labour legislation.

Manitoba Executive Committee of the Trades and Labour Congress, Legislative Committees of the Winnipeg Trades and Labour Council, and Railway Transportation Brotherhoods

On Friday, December 30, 1938, a joint delegation of the Manitoba Provincial Executive Committee of the Trades and Labour Congress of Canada, the Legislative Committee of the Winnipeg Trades and Labour Council and the Legislative Committee of the Railway Transportation Brotherhoods, submitted a memorandum of proposed legislation to the Manitoba government. Members of the Cabinet present were: Hon. W. R. Clubb, Minister of Labour, Hon. Ivan Schultz, Minister of Education, Hon. W. J. Major, Attorney-General and Hon. J. S. McDiarmid, Minister of Mines.

The delegation consisted of R. Hewitt, Chairman, R. C. McCutchan, D. S. Lyons, and L. V. Guberman of the Provincial Executive Committee, with Grant McLeod, Joseph Starr, C. W. Foster and Charles Watson of the Winnipeg Trades and Labour Council Legislative Committee, and Messrs. Ross, McKechnie, Moore and Tisdale for the Railway Transportation Brotherhoods. Messrs. Sorowski, Simpkin and Mrs. Miller of the Trades and Labour Council were also in attendance.

The memorandum expressed the delegation's appreciation of the provincial government's action of last session, modifying the "Special Income Tax Act" and for the extension of the "Fair Wage Act." Reference was also made to the satisfactory adjustment of certain complaints which had been made to the provincial Department of Labour concerning the application of the "Act to Prevent Strikes and Lockouts."

Regulation of Commercial Highway Traffic

Dealing with the question of regulation of commercial highway traffic, the memorandum advocated as it did in the submission of the previous year, viz: that any regulations formulated should be equitable as between the various forms of transportation, and uniform throughout the Dominion as far as practicable, in order to eliminate "destructive competition."

It was stated that existing regulations dealing with safety and efficiency of highway transport were "entirely inadequate as to effective control and supervision, largely due to inefficient enforcement." Expressing the belief that "greater safety on our highways requires a higher standard of qualifications for operators of all motor vehicles," the memorandum strongly urged the Government "that all operators of all motor vehicles be required to pass a qualifying physical examination as to visual acuity, colour perception and hearing, as the making of our streets and highways safe is entirely in the hands of the motorist."

The memorandum reaffirmed the delegation's endorsation of the resolutions adopted at the 1935 Federal-Provincial Conference.

The "fullest restriction" of the use of trucks on Sunday was urged, "because of the additional hazard caused by heavy passenger motor traffic on that day." It was also suggested that the licence fees of trucks and buses be substantially increased; "also a division on an equitable basis with the municipalities of all motor licence fees and gasoline taxes"; that not more than one trailer be allowed to operate behind any commercial truck or bus; and that distinguishing lights be adopted for trucks carrying a trailer, etc.

The memorandum advocated the continuance of the policy of eliminating all level railway crossings and pending such action the erection of warning signals was recommended. It was also emphasized that the observance of warning and stop signals should be rigidly enforced.

Wage Tax

The delegation urged "complete repeal" of wage taxation in the following terms:

"It is nothing short of confiscation for a Government to extract a part of the wages of labour before those who have earned it have access to it. We have said repeatedly that nothing short of repealing this Act will meet the situation, or remove the hostility and hardship that now exists as a result of it. We earnestly urge the Government to reconsider its position in regard to this Act."

Provincial Income Tax Act

The memorandum proposed that an amendment be made to the Income Tax Act providing that the statutory exemption apply "to all dependent children regardless of age." It was further advocated that the statutory ex-

72003—4½

emptions under the Act "should be the same as under the Dominion Income Tax Act in order to be uniform and that pensions should be exempt from all taxation when not in excess of $1,800 a year."

Health Insurance

The memorandum expressed the delegation's belief that "the time is most opportune to recommend action looking to the establishment of a system of health insurance, keeping in mind the desirability of such legislation later becoming national in its scope." It was urged that the Government immediately take the necessary steps to formulate and adopt legislation to this end.

Unemployment

Expressing the belief "that unemployment on the part of employables can and should be eliminated, at least temporarily, by means within the power of government to create employment" the following suggestions were submitted for the government's consideration:

1. A survey of all industries coming within the scope of the Province with the object of ascertaining the number of man-hours of employment that could be made available by:—
   (*a*) The restriction of the hours of labour per week to a maximum number.
   (*b*) A statutory two weeks' holidays with pay per annum for all workers.
   (*c*) A reduction in the pensionable age from 70 to 60 years.
   (*d*) An increase of one year in the school leaving age.

And the necessary legislation at the coming session of the Legislature to give effect to such of the above as may be deemed warranted as a means of making provision to guarantee the workers against any reduction in weekly or monthly earnings as a result of the lesser number of working hours. Even though such legislation was adopted with the provision that it would not be proclaimed until certain of the other Provinces were prepared to take similar steps, it would at least give a lead in the much desired and necessary direction.

2. Undertaking in co-operation with the Dominion Government, a program of slum-clearance and housing, making the fullest possible use of the Dominion Financing Scheme, as a means not only of creating employment, but also of providing suitable and sanitary housing conditions for the people of this Province. We would, however, urge that in any such undertaking the following principles be embodied:—
   (*a*) All work under the program to be compensated at union rate of wages.
   (*b*) Organized Labour should be represented on all commissions that may be appointed in connection with the carrying out of the program.

3. Undertaking in co-operation with the Dominion Government a program of necessary public works, including reforestation, and the elimination of level crossings.

Concerning relief, it was urged that the Government "adopt a more humane and a more economically sound attitude in the formulation of such regulations."

Right to Organize

Stating that the "Strikes and Lockouts Act" did not afford the worker the necessary protection in the exercising of his right to organize, the delegation considered that "a special Act of the Legislature dealing specifically with the right to organize is the only method of affording the workers protection in the exercise of that right; making it mandatory for employers to enter into collective bargaining with the labour union selected by the majority of their employees, and prohibiting 'company unions.'"

Injunctions in Labour Disputes

Protesting against the use of court injunctions in labour disputes the delegation's memorandum recommended that the Government "give serious consideration to the enactment of legislation that will restrict and curtail the promiscuous issuance of injunctions by local judges, until both sides in the dispute have been afforded an opportunity to be heard."

Fair Wage Act

Concerning the operation of the Manitoba Fair Wage Act it was stated that "experience since 1934 when the Act was amended to apply to private construction, shows that a certain class of builder has sought out and found loopholes which defeat the very purpose of the Act. . . ."

Continuing the memorandum declared:

"With regard to the part of the Act as it applies to printing trades, barbering and dyeing and cleaning industry, we find from experience that as far as the barbering industry is concerned, that the Act has little or no effect as a remedy for the evils that it purports to remedy, for the reason that it fails to regard the prices charged by one-chair and small shops, as wages. To fulfil the purpose of the Act it will be not only necessary to establish a Fair Wage paid by the employing barber to his employees, but also to establish a fair price paid by the public to the employer, particularly the small shop where the receipts from the public actually constitute his wages.

"We would further respectfully urge that those engaged in the cutting of wood for domestic use he brought within the Act, at their request, with the object of regulating not only the wages paid to the employees of the machine owners, but also the prices charged the public by the owners."

Strikes and Lockouts Prevention Act

The amending of Section 25 of the Strikes and Lockouts Prevention Act was re-

quested, it being suggested that this section of the Act could be considerably strengthened if a time was set following the report of the Board to the Minister "during which both parties shall advise the Minister of their acceptance or rejection."

Old Age Pensions Act

Stating that "the time is long overdue" for the revision of the Old Age Pensions Act the following changes were proposed:

1. Payment of pensions at 65 years of age.
2. Removal of the stipulation that calls for the signing over of property to the Government before a pension is given.
3. That the only residential qualification required be 15 years in Canada.
4. That no deductions be made on account of income of less than $1,000 a year.
5. That a substantial increase be made in the present rate.

Unemployment Insurance

Dealing with the subject of unemployment insurance the memorandum stated:

"We are fully in accord with the principle of unemployment insurance being national in scope and character, and while we are not unmindful of the fact that your Government has expressed a willingness to co-operate to this end with the Dominion Government, we would urge that immediate steps be taken to the end that no time will be lost in making such legislation as may be adopted by the Dominion Government applicable to this Province. We are, however, more concerned with 'job assurance' than with 'unemployment insurance', and we believe that our program of proposals for the creation of employment will minimize the cost of unemployment insurance to the State, except for unemployables."

Other Proposals

Other proposals in the memorandum requested: increasing the minimum wage rate of 25 cents for men to 40 cents; legislation protecting workmen's wages against attachment for a period of one year after leaving relief to engage in a gainful occupation; reduction of interest rates on all public and private debts; prohibition or restriction of night work in bakeries; abolition of small factories in private homes, in the rear of stores, or in other unsanitary premises; that no less than one projectionist be employed for each moving picture machine at all times while performances are being given to the general public; prohibition of the operation of public bathing beaches without the regular employment of one or more life guards; the denying of government patronage to firms "which do not recognize the rights of its workers to bargain with it collectively for the establishment of conditions of employment, wages, etc."

CANADIAN CONSTRUCTION ASSOCIATION

Summary of Proceedings at Annual Convention—Address and Resolution on Youth Training

WITH a large attendance of delegates representative of the construction industry from coast to coast in all its sections, the twenty-first annual convention of the Canadian Construction Association was held in Winnipeg from January 10 to 12.

The action of the convention on questions coming within its purview are reflected in the following adopted resolutions:

Sales Tax Exemption.—The incoming president was instructed to convey to the Minister of Finance, Hon. C. A. Dunning, the appreciation of the construction industry for his action in eliminating the sales tax on construction materials, thereby very appreciably reducing the cost of construction and giving much needed impetus to the industry.

Real Estate Taxation.—The president was also asked to point out to the Dominion Government "that the construction industry can see no relief in sight until some action is taken to revise the method of taxation on real estate in order that new construction may be economically sound," and the incoming executive were requested to study the possibility of fixed assessments on real estate for a definite period of possibly five years, and that consideration should also be given to the possibility of taxing real property on a revenue-bearing basis.

Dominion Housing Act and Home Improvement Plan.—The executive were recommended to appoint a standing committee to give publicity to the advantages of the National Housing Act and the Home Improvement Plan, and also to issue a warning to all trade and supply contractors and material supply men concerning the dangers apparent in the "hold-back" of money under the Dominion Housing Act until an apartment is 90 per cent rented.

Credit.—The president was requested to appoint a committee under the chairmanship of some member experienced in credit practice

with a view to studying the present credit system within the construction industry.

Bureau of Statistics.—The Dominion Bureau of Statistics was commended for "the splendid work being done in the publication of construction statistics for Canada."

Non-Resident Taxation.—The new executive was instructed to make a study of the question of the imposition of non-resident taxation upon contractors, sub-contractors and workmen. This resolution declared that "these taxes have been very onerous to the construction business and their reduction or their entire elimination should be urged."

General Manager's Report

Reviewing in retrospect the work of the organization during 1938, the general manager, Mr. J. Clark Reilly, summarized the various phases of Association activity. Under the heading of "parochialism," the general manager cautioned against its intrusion as follows:

"There still remain many evidences that a spirit of parochialism, evident in many other lines, is not absent from the sphere of construction. In a great many towns and municipalities, vexatious regulations and taxes have been allowed to spring up by which manufacturers and contractors from the 'outside' are penalized. Unless checked, this will lead to further discrimination, retaliation and harm to the unity of the industry."

Youth Training

Featuring the addresses at the convention was that on youth training given by Mr. J. M. Pigott, past president of the Association. Outlining the successful functioning of the Ontario Apprenticeship Act, Mr. Pigott concentrated on the present position of Canadian youth in relation to employment. He referred to the action of the Dominion Government in allocating specific sums in 1937 and 1938 for training youth, and observed:

"What strikes one as most significant about this legislation is the fact that in spite of the vast sums of money spent on education of our Canadian youth it was necessary for the Government to step in and spend additional money to make the product of our schools employable. It was a move in the right direction but did not attempt to deal with the causes of unsatisfactory or insufficient training, but merely the results. . . ."

He considered as an "obvious fact" that "our system of education, which has changed but little in the last thirty years, has failed to keep pace with industry and that the product of our educational machinery does not meet the needs of industry or business in this country."

While expressing this criticism, Mr. Pigott declared that "even if one were tempted to be critical of the academic nature of our educational institutions, it is difficult to see in the absence of direction or demand from employers what other course our system of education could have followed, so that we must not make the mistake of rushing into denunciations without full consideration of all the facts."

Dealing with technical schools, he stated: "Technical schools have been set up in every province in the past with substantial aid from the Dominion Government; they were not built for the purpose in view of creating trade schools; they were built with the idea that they would co-operate with industry. That these technical schools have missed their proper function is due far more largely to the ignorance of employers to the opportunities presented there than to the lack of intention on the part of government or of educational authorities."

Mr. Pigott than discussed the nature of Canadian education with its academic and cultural emphasis. He considered that the cultural and professional concepts of education were "so deeply rooted that it is hard to know how to deal with it," and declared:

"From a practical standpoint there is no reason why education in the fullest sense of the word should not take any of a dozen different roads. It seems to me from what I have been reading on the subject over some years now that Canada lags sadly behind other countries in realizing the absurdity of such an attitude, particularly in a country such as ours. We must realize as business men and employers that drastic changes must be made and they can only be made with our help."

After an analysis of the results in other countries in the direction of more practical trends, Mr. Pigott in concluding stated:

"If these countries referred to have found their changing economic conditions demanding of them this type of education so that their people may be skilled and, therefore, employed, with how much more force the argument will apply to Canada, a young country, still one might say in its early stages of development.

"Returning to our problem and suggesting to your minds again the success of the apprenticeship work in the building trades in Ontario and giving full weight to its influence on a solution to the youth employment emergency which exists, can we not with reason make some definite recommendations? I believe that this Association could do no greater service to the country generally than to take the initiative in formally requesting the Governmental authorities, either Dominion or Provincial as may be deemed best, to investigate the condition of affairs without loss of time with a view to setting up proper vocational machinery which will bring about the proper and necessary co-operation between industry and the schools under some form of control and administration which will find industry and employers fully represented and which will give their practical ideas the fullest possible scope."

The convention subsequently decided to have the incoming executive "make suitable petition to the Dominion and provincial governments to assist in organizing a committee

to examine into the subject covered by Mr. J. M. Pigott's address with the object of securing substantial revision in our educational system, to the end that business and industry will work in closer harmony in the training of Youth."

Among others who addressed the convention were: C. D. Harrington, president of the Association; F. W. Nicolls, Director of Housing, Finance Department; V. C. Nauman, Assistant Commissioner of Excise, Department of National Revenue; A. F. Gill, National Research Council of Canada; Humphrey Mitchell, Director of Labour Transference, Department of Labour; Hon. W. J. Major, Attorney-General of Manitoba; F. G. Rutley, past president, Canadian Construction Association; Rev. Dr. W. C. Graham, principal, United College, Winnipeg; Philip N. Gross, Director, Construction Safety Association of Ontario.

CO-OPERATION IN GREAT BRITAIN

Review of Activities of Co-operative Societies in 1937

THE January issue of the British *Ministry of Labour* Gazette contains a review of the development and activities during 1937 of various co-operative societies. The statistics in the survey are based on statutory returns made to the Chief Registrar of Friendly Societies.

At the end of 1937 there were 1,252 registered industrial co-operative societies in Great Britain mainly engaged in the supply of commodities, or 9 less than in 1936. Of these 1,252 societies, 1,133 were retail societies and 119 were wholesale and productive societies. These figures are exclusive of agricultural societies and relate only to societies which are co-operative in character and therefore only deal with the transactions of societies operating within the co-operative movement.

According to tabular statistics in the article, 1,133 retail societies above referred to, had a total sales volume amounting to £248,273,000 in 1937 compared with total sales of £232,317,000 in 1936.

The number of persons employed in distribution by the retail and wholesale and productive societies was 202,000, and the amount paid in salaries and wages was £26,717,000. Corresponding figures for 1936 were: employees 192,000 and salaries and wages £25,281,000.

Retail Societies

The sales of the general supply stores (including revenue from service departments) totalled £247,888,000 and represented an increase of £15,922,000 over 1936. These societies had 8,002,000 shareholding members at the end of the year, with share capital amounting to £148,511,000. They returned an aggregate surplus on the year's working of £29,665,000, of which £5,002,000 was distributed as interest on share capital and £22,953,000 as dividends on sales. Their investments totalled £134,997,000, of which £97,492,000 was invested in other co-operative societies, mainly in the Co-operative Wholesale Society, Ltd.

The dividends on sales distributed by the general supply stores in 1937 averaged 1s. 10½d. in the £, compared with 1s. 10½d. in 1936.

Wholesale and Productive Societies

There were 119 wholesale and productive societies at the end of 1937. The bulk of the business of the group, however, was conducted by the Co-operative Wholesale Society, Ltd., the Scottish Co-operative Wholesale Society, Ltd., and the English and Scottish Joint Co-operative Wholesale Society, Ltd.

The sales of the three wholesale societies in 1937, exclusive of goods invoiced by the joint society to the two parent societies, amounted to £143,505,000. The societies had a total shareholding membership of 1,813, of which 1,255 were retail societies and 558 were employees of the Scottish wholesale society, an aggregate share capital of £16,597,000 (excluding £2,409,000 share capital provided by the English and Scottish wholesale societies for the joint society), loan capital of £79,472,000 and a balance of reserves and undivided profit amounting to £11,034,000.

The total number of persons employed in distribution by the three wholesale societies was 14,700 and their total salaries and wages amounted to £2,433,000.

A dividend of 4d. in the £ on sales was distributed by the English wholesale society for 1937, together with an additional dividend of 3d. in the £ on sales of its own products. The Scottish wholesale society distributed a dividend of 5d. for the first half of 1937 and 4d. for the second half of the year, as compared with 6d. for the whole of 1936. The dividends in 1937 of these two societies amounted to £2,786,000.

Production.—There were 966 societies whose activities in 1937 included the production of commodities. The number of persons employed in production was 108,000, the salaries and wages paid amounting to £14,499,000, while the value of productions, including the cost of materials was £99,513,000.

The productions of the retail and wholesale societies differ in character and those of the wholesale societies cover a wider field of operations than those of the retail societies. In the retail societies, the dominating productive operation is baking, which in 1937 accounted for about one-half of the aggregate net value created. In the wholesale societies the outstanding productive department is that of milling, which accounted for nearly one-eighth of the aggregate net value. Some of the productive operations of the wholesale societies which are either not undertaken by the retail societies at all or only to a negligible extent are tea and coffee; oil and cake; soap, candles and starch; chemicals; margarine and lard, and textiles.

Farming.—Farming is carried on by a number of retail societies. During 1937 there were 89 societies undertaking farm operations, apart from those which maintained land for accommodation and grazing purposes only. In only 40 cases did the operations of these societies result in a surplus. The surpluses returned aggregated £20,000, as compared with £13,000 in 1936; the losses aggregated £39,000 as against £29,000 in 1936. The total acreage of farms of retail societies was 30,000 as compared with 34,000 in 1936, and the total capital invested in farm land and buildings, implements, stocks, etc., was about £1,328,000. The sales or transfers of farm produce, etc., totalled £554,000, or £8,000 less than in 1936.

Share of Employees in Membership, Capital and Management of Societies

In the retail societies generally, employees have no prescribed right as employees to share in the capital and management of the societies, although they may become shareholding members (with full rights as such) in the ordinary way. In the wholesale and productive societies (other than the three principal wholesale societies), however, the registered rules frequently provide for the employees, as such, not only to share in the capital but also to become members of the committee of management. Employees shared both in capital and in management in 50 of these societies. These 50 societies whose sales in 1937 amounted to £2,901,000, had a total shareholding membership of 14,792, of whom 5,745 were employees. Of the 437 committeemen of these societies, 240, or 55 per cent were employees, 132, or 30 per cent, were other individual members and the remaining 65, or 15 per cent, were representatives of societies. The total share capital of these societies amounted to £514,000, of which 29 per cent was held by the employees who also held 27 per cent of the aggregate loan capital of £440,000.

Services

As indicated in the report, services provided by the co-operative movement are varied in character, but the principal are banking, insurance and laundering.

Banking.—The Co-operative Wholesale Society, Ltd., has as a separate department a bank which provides all banking services and conducts the banking business of almost all the societies in the co-operative movement in England and Wales. Receipts on deposit and current account in 1937 totalled £391,355,000 (excluding a transfer from current to deposit account), and the aggregate balances of deposit and current accounts at the end of the year amounted to £85,558,000 and £18,388,000 respectively.

Insurance.—The Co-operative Insurance Society, Ltd., is owned by the Co-operative Wholesale Society, Ltd., and the Scottish Co-operative Wholesale Society, Ltd. The society does extensive business in all the main branches of insurance with the exception of marine risks. The total premium income for all departments in 1937 amounted to £8,416,000, an increase of £721,000 over 1936. More than one-half of the premium income was in respect of industrial assurance. Collective life assurance, which is undertaken largely in conjunction with the retail societies, accounted for £529,000 of the premium income. The total of the insurance funds at the end of the year was £26,047,000 and the increase for the year was £2,811,000. Profit on the year's working amounted to £187,000, of which £1,000 was allocated as interest on shares to the two constituent societies and £46,000 as dividends on premiums. Salaries and wages payable in 1937 totalled £530,000 and commission £1,564,000, compared with £405,000 and £1,544,000 in 1936.

Laundering.—Many retail societies themselves undertake laundering, but others have combined to form separately registered federal laundry societies to perform this service in the areas covered by the retail societies concerned. At the end of 1937 there were 16 such societies, with 421 shareholding members. Charges for work done in 1937 amounted to £1,413,000, and resulted in an aggregate net surplus on the year of £163,000. Share, loan and reserve capital totalled £1,568,000. Salaries and wages amounted to £680,000.

Miscellaneous.—The retail and wholesale and productive societies in 1937 provided miscellaneous services yielding revenue amounting to £2,011,000, and employed in service departments 7,000 persons whose salaries and wages totalled £780,000. Corresponding figures for 1936 were: revenue, £1,431,000; employees, 5,800, and salaries and wages, £656,000.

UNEMPLOYMENT IN CANADA AS REPORTED BY TRADE UNIONS FOR THE YEAR 1938

REPORTS are forwarded to the Department of Labour each month by local trade unions throughout the country reflecting their membership and the number of members unemployed and from this data a monthly compilation is made, enabling the Department to have a comprehensive progressive representation of conditions for organized labour throughout the year. On an average during the year 1938 there were 1,895 local unions making returns to the Department each month, with an aggregate membership involved of 226,048 persons, 13·1 per cent of whom were on an average without employment.

Industrial conditions in 1938 were not maintained at the high level shown during 1937, which was the best year for organized workers since 1930. The month of September, when 10·4 per cent of idleness was registered, marked the peak of activity, while the percentage of 16·2 in December represented the greatest degree of unemployment.

The manufacturing industries in the early months showed some fluctuation, January and March indicating improvement over the corresponding months in 1937, while in February the trend was slightly less favourable. During the balance of the year, however, a somewhat lower level of employment was maintained. The garment trades, while more active in the first quarter, indicated retarded activity from then onward and in the iron and steel trades the January returns alone showed a better employment volume. Among pulp and paper makers curtailed activity was evident in the first half of the year, though some pick-up was noted in the other months. The building and construction trades, while showing somewhat improved conditions in January and February, reflected increased slackness during the remainder of the year. Transportation was somewhat quieter in 1938, the steam railway division manifesting a less favourable situation for practically the entire year, while in the navigation division variations were noted, January to the end of May and the month of August reflecting a better volume of work, while in the other months some employment cessation was apparent. Retail trade was quite active throughout the year, as in 1937, and in the communications division the tendency was, for the most part, in a favourable direction. The services group recorded some employment advancement in January and February over the corresponding months of 1937, while in April and May an unchanged situation was noted, the remaining months showing some falling off in activity. In governmental services heightened employment was recorded in all months with the exception of September and December, while in the unclassified section January, February, April and May were the only months to indicate employment betterment. A higher level of employment was maintained in coal mining during ten months of the year, October and December returns reflecting a slightly adverse tendency. Activity for fishermen was uniformally better than in 1937, March and May being the only months to reflect any slowing up in employment. Slacker conditions, however, prevailed for lumber workers and loggers in all months, which were more particularly accentuated toward the close of the year.

Fractional gains in employment were reported during January in the country as a whole from December, 1937, the manufacturing industries, particularly the garment and iron and steel trades, and the pulp and paper industry showing a higher employment level. The February situation declined slightly from January, the majority of trades and industries participating in this unemployment increase. In March the tendency was again more favourable, Quebec, Ontario, British Columbia and Nova Scotia unions showing an upward employment movement. During the following four months there was a general and continuous lowering of the employment volume, between season dullness in garment establishments affecting the situation to some extent, though contributing recessions were apparent in a number of trades. August conditions, however, were improved from July, the manufacturing industries, especially the garment trades, and the coal mines and transportation industries combining to effect a favourable balance for the month. This better employment movement manifest in August continued throughout September. In October seasonal influences in the majority of trades and industries had an adverse effect on the unemployment total for Canada as a whole, and further restriction in industry was apparent until the close of the year.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OCTOBER TO DECEMBER, 1938

THE work of the offices of the Employment Service of Canada during the quarter October to December, 1938, as indicated by orders received and placements effected, was nearly 7 per cent higher in volume in the first instance and nearly 10 per cent more in the second, than during the corresponding quarter of 1937. A heavy loss was recorded in logging placements and one of smaller proportions in manufacturing, but these were

more than offset by substantial gains in construction and maintenance, farming and services. A minor increase also was reported in mining and moderate losses in transportation and trade. Provincially, the Maritimes, Quebec and Saskatchewan recorded more vacancies and placements than in the fourth quarter of 1937, while the remaining provinces, with the exception of Manitoba, reported fewer. Manitoba showed little change, a slight gain being shown in positions offered and a small loss in placements effected. Saskatchewan showed the highest gain in placements, largely in the farming group, where many persons had been sent out under the Farm Improvement and Employment

Plan sponsored by the Government. Ontario registered the greatest loss, which occurred chiefly in logging. The accompanying table gives the vacancies and placements of the Employment Service of Canada by industrial groups in the various provinces during the period October to December, 1938.

From the chart appearing elsewhere in this issue which accompanies the article on the work of the Employment Service for the month of December, it will be noted that the curves of both vacancies and placements in relation to applications showed a downward trend during the first part of October, followed by an upward course until the middle of November, when a slight downward trend was again followed for the ensuing half month. In December, however, the course was distinctly upward, although, at the close of the quarter under review, the levels attained were still about five points lower than those recorded at the end of December a year ago.

During the period October to December, 1938, there was a ratio of 54·2 vacancies and 52·6 placements for each 100 applications for employment, as compared with 58·1 vacancies and 54·8 placements during the corresponding period of 1937.

The average number of positions offered daily during the quarter under review was 1,577, of applications registered 2,910, and of placements effected 1,529, in contrast with a daily average of 1,476 vacancies, 2,542 applications and 1,393 placements in regular and casual employment during the last quarter of 1937.

During the three months October to December, 1938, the offices reported that they had referred 120,457 persons to positions and had effected a total of 116,201 placements of which 79,906 were in regular employment and 36,295 in casual work. Of the placements in regular employment 60,906 were of men and 19,000 of women, while casual work was found for 24,380 men and 11,915 women. Comparison with the same period in 1937 showed that 105,823 placements were then made, of which 73,136 were in regular employment and 32,687 in casual work. Applications for employment during the period under review were received from 165,609 men and 55,504 women, a total of 221,113, in contrast with a registration of 193,122 persons during the corresponding period of 1937. Employers notified the Service of 119,835 vacancies, of which 85,697 were for men, and 34,138 for women, as compared with 112,174 opportunities for work during the last quarter of 1937.

A report in detail of the transactions of the Employment Service for the month of December, 1938, will be found elsewhere in this issue.

ANNUAL REVIEW OF BUILDING PERMITS ISSUED IN CANADA DURING 1938

THE value of the construction work represented by the building permits taken out in 58 cities was 8·9 per cent higher in 1938 than in the preceding year, according to the *Annual Review of Building Permits* issued recently by the Dominion Bureau of Statistics. Revised figures furnished by municipal officials show that the estimated cost of the building work authorized last year was $60,817,332, an increase of $4,972,333 over the 1937 figure of $55,844,999. Last year's total was the highest since 1931, exceeding the annual average for the period, 1932-1937, by 55·1 per cent. In these years, however, construction was at a low level as compared with preceding years since 1920, when the record for these cities was commenced.

In the eighteen years, 1920-1937, the value of the building authorized in the co-operating municipalities was estimated, on the average, at $115,338,950 annually, of which the 1938 total constituted only about 53 per cent. In the first twelve years of this period, the estimated cost of the construction work for which permits were taken out averaged $153,401,364. Beginning with 1932, there was a sharp decline in building authorizations, and in the six years to 1937 the average value was only $39,214,122; while the inclusion of the 1938 figure raises the annual average since 1931 to $42,300,295, this was only some 27·6 per cent of the average for the years, 1920-1931, when building activity was, on the whole, at a more normal level. The recent improvement indicated in construction in the 58 cities has therefore had little effect upon the reserve of building work accumulating therein.

The review contains charts and numerous tables giving detailed information as to the extent of building activities throughout the Dominion, statistics being shown for building activities by provinces, cities and types of buildings. Some paragraphs from the report are as follows:—

Wholesale Prices of Building Materials.—The wholesale prices of building materials in 1938 were lower than in 1937, but exceeded those for any other year since 1930. They

were, however, less than in the period, 1920-1930, being also below the average for the eighteen years to 1937. The index of wholesale prices of construction materials, as calculated in the Internal Trade Branch of the Dominion Bureau of Statistics on the 1926 average as 100, averaged 90·0 in the year under review, as compared with 94·3 in 1937, while the average index in the years, 1920-1937, was 97·8. The cost of building labour in 1938 was slightly higher than in the preceding year, according to the Department of Labour index of wage rates, based on the 1913 average as 100. This index was 169·4 last year, compared with 165·3 in 1937. During the nineteen years for which building permits figures are available for the 58 centres, the maximum wages index was 203·2 in 1930, while the minimum was in 1913, the basic year.

Home Building and Repairs.—In 1938, the work authorized in connection with dwellings was valued at $20,073,597, an increase of $2,222,386, or 12·4 per cent as compared with the 1937 total of $17,851,211; this advance was not so pronounced as that of 18·5 per cent recorded in 1937 over 1936. There was a moderate increase in the number of permits issued for new construction or for repairs and alterations to houses and apartments, while the average value of the building represented by the individual permit advanced from approximately $2,955 in 1937 to $3,095 in 1938; in 1936, when the residential building authorized in the 58 centres was estimated at $15,070,135, the average value per permit was $3,230.

Construction Contracts.—The MacLean Building Review makes a monthly tabulation of the value of construction contracts awarded throughout the Dominion; during 1938, the total was $187,277,900, compared with $224,056,700 in 1937, $162,588,000 in 1936, $160,305,000 in 1935, $125,811,500 in 1934, $97,289,800 in 1933, $132,872,400 in 1932 and $315,482,000 in 1931. This record shows that construction reached its maximum activity in 1929, when the contracts awarded were valued at $576,651,800, while the minimum was in 1933, the contracts let then amounting to not quite 17 per cent of the 1929 figure. The decline from 1937 in the MacLean's estimate of construction work undertaken in 1938, was 16·4 per cent, but with that exception, last year's total was the highest since 1931. As already stated, there was in the year under review a gain of 8·9 per cent over 1937 in the value of the building authorized by the 58 cities. In comparing the figures of contracts awarded and building permits issued, it may be noted that in 1938 there was from 1937 a decrease of only 2·1 per cent in the value of contracts awarded for residential building, while the business buildings for which contracts were let were 14·5 per cent higher in value in 1938 than in 1937. These classes figure prominently in the building authorization of the cities.

The value of the building permits issued by the 58 centres in 1938 constituted 32·5 per cent of the total value of construction contracts awarded throughout the Dominion, while in 1937, this proportion was 24·9 per cent and in 1936, 25·4 per cent. The percentages in the last few years were lower than in any of the eighteen years for which figures for the 58 cities are available. In 1921, when these centres reported their highest proportion of total building work in the country, the percentage was 48·6, while the average ratio in the years, 1920-1938, was 39·4 per cent.

Building Activities by Provinces.—During 1938, the value of the authorized building was higher than in 1937, in New Brunswick, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia, while in Prince Edward Island, Nova Scotia and Ontario, the co-operating cities showed declines. The largest gains were in Quebec and Alberta, where the 1938 authorizations were higher by 28·2 per cent and 115·0 per cent, respectively.

Building in the Four Largest Cities.—The anticipated cost of building in Montreal for which permits were issued was $10,205,422, an increase of 24·2 as compared with the 1937 authorizations of $8,217,344. The 1938 total was also higher than in any other year since 1932. Approximately 39·9 per cent of the aggregate for last year represented residential building, as compared with 46·0 per cent in the preceding year; however, the aggregate value of authorizations for dwellings during 1938—$4,067,720—compared favourably with the 1937 total of $3,781,127. The permits issued for industrial and other buildings, were also higher in value, standing at $6,137,702, as compared with $4,436,217 in 1937.

During 1938, there was a decrease of $2,723,499, or 24·2 per cent in the Toronto building authorizations, which were valued at $8,535,401, as against $11,258,900 in 1937. Just over 18 per cent of the construction undertaken in 1938 was listed as residential, as compared with 17 per cent in 1937 and 28 per cent in 1936. The value of the dwellings for which permits were taken out in 1938 was $1,572,600, showing a decline as compared with the 1937 total of $1,939,740; there was a larger reduction in non-residential building, which was valued at $6,962,801, as compared with $9,299,160 in the preceding year.

In Winnipeg there was a decrease from 1937 in building, where the estimated cost of the work undertaken in 1938 was

$1,985,900; as compared with $2,152,100 in the preceding year, this was a loss of 7·7 per cent. In the adjacent city of St. Boniface, the value of the construction work represented by the permits taken out was $1,037,190, an increase of $703,041 over the 1937 total of $334,149.

The municipality of Greater Vancouver issued permits for building valued at $8,224,300; as compared with the 1937 total of $6,760,880, this was an advance of $1,463,420, or 21·6 per cent. The aggregate for 1938 was also higher than in any other year since 1931.

Statistics for 1938 are also given in the annual review for fifty-four other cities as well as statistics indicating building activities by months; types of buildings; and in 35 cities with comparisons from 1919; and in the four largest cities with comparisons from 1917.

Canada's Tourist Trade

Tourists from other countries spent a total of $269,000,000 in Canada during 1938 and the expenditures of Canadian travellers abroad aggregated $120,000,000, according to a preliminary estimate issued by the Dominion Bureau of Statistics. Corresponding estimates for 1937 were $290,000,000 and $124,000,000, respectively. The favourable balance to Canada on its international tourist account may be placed at about $149,000,000 in 1938 as compared with $166,000,000 in 1937.

The volume of motor travel to Canada declined in 1938, the total number of automobiles entered for touring purposes being 4,346,645 in comparison with 4,511,840 in 1937. The number of automobiles entering on 48-hour permits totalled 3,081,559 compared with 3,127,352; 60-day permits, 1,263,509 compared with 1,383,130; and six-month permits, 1,577 compared with 1,358. The estimated expenditures in Canada of motor tourists were $178,000,000 in comparison with $181,332,000 in 1937.

Tourist entries into Canada by rail, as reported by immigration officers, numbered 757,860 in 1938, a decline of 137,097 from 1937. The expenditures of rail travellers in 1938 are estimated at $47,000,000 compared wtih $49,000,000 in 1937.

Entries by boat numbered 218,545 in 1938 compared with 267,566 in 1937, and their expenditures are estimated at approximately $11,000,000 compared with $16,000,000. Visitors by bus, ferry and plane totalled 2,500,000 and their expenditures $19,000,000 compared with 3,500,000 visitors and expenditures of $27,000,000 in 1937.

Canadian travel to overseas countries declined in 1937. Canadians returning via ocean ports numbered 27,753 as compared with 32,559 in 1937. Expenditures involved in this travel are estimated at $17,000,000 compared with $22,000,000 in 1937.

While the volume of motor tourist travel from the United States to Canada declined in 1937 that of Canadians to the United States increased. Canadian automobiles proceeding to the United States for touring purposes in 1938, as reported by customs officers, numbered 788,291 compared with 756,429. The total expenditures remained at approximately the same level as in 1937, namely, $49,000,000. Travellers by rail or boat numbered 493,230 and spent an estimated $29,000,000 as compared with $24,000,000 spent by over 403,000 travellers in 1937. Other Canadian visitors to the United States spent about $25,000,000 in 1938 as compared with $29,000,000 the previous year.

Correction—Re Labour Legislation Report

In last month's issue of the LABOUR GAZETTE (page 6) reference was made to the report on Labour Legislation in Canada issued by the Department of Labour. It was incorrectly stated in the reference that "free distribution of the report is made to a limited mailing list, including trade unions and educational institutions."

The free distribution does not include "trade unions and educational institutions," but is restricted to the chief representatives of international and national labour organizations and to public and university libraries, etc. In other cases there is a nominal charge of One Dollar.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, DECEMBER, 1938

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on January 1 was 11,210, the employees on their payrolls numbering 1,041,042 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for December was 1,960, having an aggregate membership of 249,071 persons, 16·2 per cent of whom were without employment on January 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of January, 1939, as Reported by Employers

According to the records of the Dominion Bureau of Statistics, industrial activity at the beginning of January in the years since 1920 has invariably declined, the average change in employment from December to January in this period being a decrease of about seven per cent. There was the customary curtailment in operations at January 1, 1939, but this was on a scale decidedly smaller than the average at that date in the experience of the last eighteen years, the employment loss being also considerably less than that reported at the beginning of January in 1938. Statements for January 1 of the present year were furnished by 11,210 employers, whose payrolls aggregated 1,041,042; as compared with 1,097,953 at December 1, 1938, this was a reduction of 56,911 persons, or 5·2 per cent.

Based on the 1926 average as 100, the crude index at January 1 stood at 108·1 as compared with 114·0 at December 1 and 113·4 at the beginning of January in 1938. The falling-off in the latter comparison was 4·7 per cent, but the index at the latest date was 4·1 per cent higher than at January 1, 1937, and was also higher than at the same date in any other year since 1930. After correction for seasonal influences, the January 1, 1939, index was 112·3, compared with 111·3 at December 1, when a less-than-normal reduction in employment had also been recorded. The seasonally-corrected index at the beginning of January was higher than in any other month since February, 1938.

The following shows the unadjusted indexes as at January 1 in the years since 1927, (1926=100):—1939, 108·1; 1938, 113·4; 1937, 103·8; 1936, 99·1; 1935, 94·4; 1934, 88·6; 1933, 78·5; 1932, 91·6; 1931, 101·7; 1930, 111·2; 1929, 109·1 and 1928, 100·7.

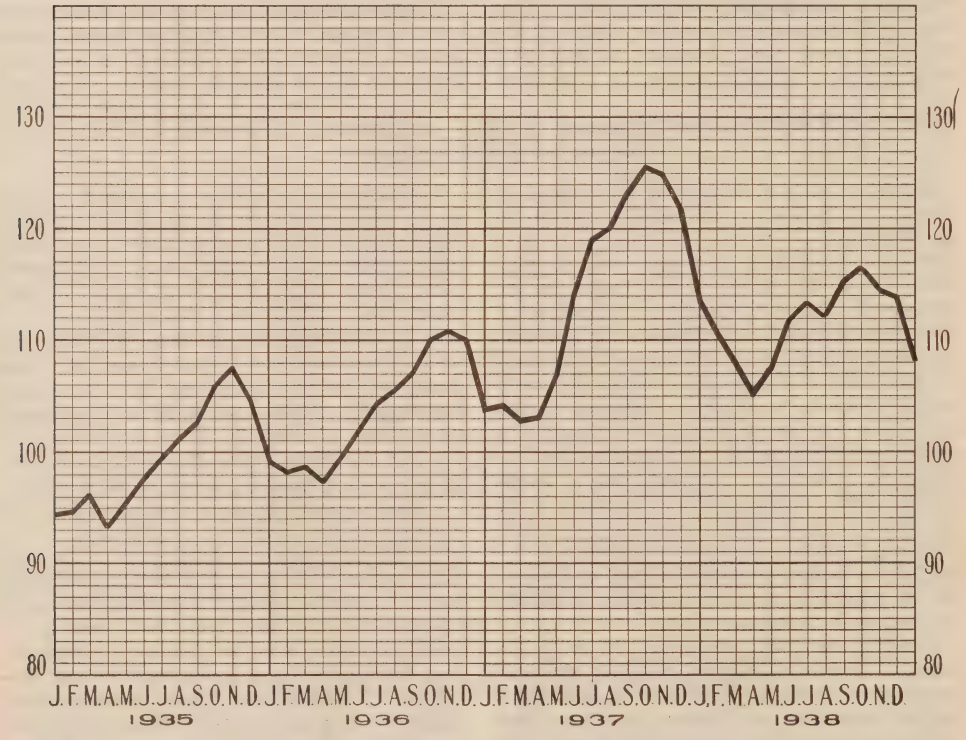
As is customary at the time of year, the contractions in many instances resulted from shutdowns for inventory and over the holiday season, with the anticipation of an early resumption of activity. The experience of the last eighteen years shows that usually, though not invariably, there is at February 1 a partial recovery from the general losses recorded at the beginning of January.

The most pronounced curtailment at the date under review was in transportation, construction and manufacturing; the losses in personnel reported by the employers co-operating in these industries were as follows: transportation, 6,229 or 6·1 per cent; construction, 19,700 or 14·5 per cent, and manufacturing, 29,537 or 5·3 per cent. These reductions, though they involved the release of a considerable number of persons, were less-than-average in the experience of the years, 1921-1938.

The decline in manufacturing constituted not quite 52 per cent of the total decrease indicated in all industries at January 1, 1939, as compared with an average proportion of 56·2 per cent in the period since 1920. The year-end recession in manufacturing has in former years invariably been followed by a revival in succeeding weeks, although in no

case has the recovery indicated at February 1 equalled the contraction noted at January 1. The largest losses in manufacturing at the date under review were in iron and steel, textile, food, lumber, pulp and paper and clay, glass and stone works, but the tendency was generally downward except in tobacco factories, which showed important seasonal improvement.

Among the non-manufacturing industries, there were pronounced seasonal decreases in transportation and construction, as already mentioned, while there were contractions on a smaller scale in logging, mining, communications and wholesale trade. The falling-off in logging rather exceeded the average indicated at January 1 in the years, 1921-1938. On the other hand, there was a moderate gain in hotels and restaurants; the track departments of the railways reported somewhat larger staffs due to maintenance work, while retail trade showed substantial improvement. The increase in the last-named was seasonal in character, but greatly exceeded the average gain at January 1 in the experience of past years.



For January 1, 1938, 10,437 employers had made returns showing that they had an aggregate staff of 1,081,471 men and women; as compared with 1,159,759 in the preceding month, this was a reduction of 78,288 or 6·8 per cent. The largest losses had then taken place in manufacturing and construction.

Employment by Economic Areas

All provinces except Prince Edward Island recorded seasonally reduced activity; the moderate gain indicated there was mainly due to track-clearing operations on the railways. Employment in three of the five economic areas was quieter than at the beginning of January of last year, the exceptions being the Prairie Provinces and British Columbia, where little general change was shown in that comparison. Except in the Maritime Provinces, the general level of employment was higher than at January 1, 1937, and immediately preceding years. In

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

the Maritimes, the index was fractionally lower than at January 1, 1937, although it was higher than at the same date in other years since 1932.

Maritime Provinces.—Most of the contraction in employment in the Maritime Provinces at January 1 occurred in manufacturing and construction; within the former, textile, pulp and paper, iron and steel and food factories recorded the greatest losses. Mining and trade were also slacker. On the other hand, logging and transportation showed heightened activity, that in the latter resulting from the re-opening of the winter ports. Increased activity in the track-maintenance departments of the railways caused an increase in employment in Prince Edward Island, but there was a small loss in Nova Scotia and a somewhat larger falling-off in New Brunswick. Statements were received from 805 firms employing 80,157 persons, compared with 80,619 at the beginning of December. While the general decline at the date under review was seasonal in character, it was smaller than the average decrease recorded at January 1 in the period, 1921-1938, and was very considerably less than that noted at the beginning of January of last year. The index then, however, was 5·7 per cent higher than at the latest date. A total of 718 employers had furnished data for January 1, 1938, showing payrolls aggregating 83,692 workers, compared with 88,484 in the preceding month.

Quebec.—The curtailment indicated in Quebec at the beginning of January was less than average, according to the experience of the years since 1920, being also decidedly smaller than the loss noted at January 1, 1938. The index, at 114·9 at the latest date, was, however, 4·1 per cent lower than at the beginning of 1938. Manufacturing (notably in textile, iron and steel, pulp and paper and food plants), logging, transportation and construction reported the most pronounced losses, but the tendency was also downward in mining and communications. On the other hand, moderate improvement took place in hotels and restaurants and retail trade. In many cases, operations will have been resumed early in the New Year in the establishments closed over the holiday season and for purposes of inventory. The labour forces of the 2,815 co-operating employers aggregated 325,598 workers, as against 344,908 at December 1, 1938.

For January 1, 1938, 2,511 firms had reported a staff of 333,464 men and women, compared with 361,018 in the preceding month; the index then stood at 119·7.

Table I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(Average Calendar Year 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Jan. 1, 1927	95·9	101·8	93·6	96·8	99·9	87·7
Jan. 1, 1928	100·7	97·1	99·6	101·9	107·5	91·4

Mar. 1	107·8	108·3	110·1	113·7	92·2	96·2
Apr. 1	105·0	103·6	107·4	109·6	89·4	100·2
May 1	107·4	107·3	112·6	109·9	91·5	102·8
June 1	111·9	110·9	120·4	112·5	97·0	105·1
July 1	113·5	116·7	119·9	114·0	99·8	108·0
Aug. 1	112·1	112·6	117·8	111·2	104·9	107·1
Sept. 1	115·1	113·2	118·1	115·0	112·2	112·0
Oct. 1	116·7	114·5	121·6	115·8	113·2	111·3
Nov. 1	114·6	112·6	119·7	115·0	108·1	107·5
Dec. 1	114·0	109·8	121·7	114·4	103·5	105·8
Jan. 1, 1939	108·1	109·2	114·9	108·8	97·1	98·0
Relative Weight of Employment by Economic Areas as at Jan. 1, 1939	100·0	8·0	31·2	40·9	11·9	8·0

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Ontario.—Manufacturing showed considerable curtailment in Ontario, that in textile, food, iron and steel, lumber and pulp and paper factories being most noteworthy; on the other hand, increased activity of a seasonal character was indicated in tobacco works. In the non-manufacturing industries, there were large contractions in mining, transportation and construction, while logging and retail trade showed further improvement. A combined payroll of 426,576 persons was employed by the 4,875 firms whose returns were received, and who had 448,885 employees at December 1. This loss of 22,309 persons, or five per cent, was smaller than that recorded, on the average, in the years since 1920, being also decidedly less than the reduction which took place at the same date of last year. The index, at 108·8 at the latest date, was 7·4 per cent lower than that of 117·5 at January 1, 1938, but it was higher than at the beginning of January in other years since 1930. The employers furnishing data for January 1, 1938, had numbered 4,620 and their employees, 458,090, as compared with 490,242 in the preceding month.

Prairie Provinces.—Declines on a larger scale than at the opening of 1938 were noted in the Prairie Provinces at January 1, 1939, when statistics were tabulated from 1,594 employers of 124,563 workers, or 8,193 fewer than at December 1. This shrinkage also exceeded that average loss at the beginning of January in the experience of the years since 1920. The index at the date under review stood at 97·1, as compared with 96·2 at January 1, 1938. Manufacturing, transportation and construction reported the most marked reductions at the beginning of January, 1939; in the first-named division, the largest losses were in food, leather and textile plants. On the other hand, employment increased in logging, coal-mining and retail trade.

For January 1, 1938, 1,504 firms had reported an aggregate working force of 122,786, which was smaller by 5,565 than in the preceding month.

British Columbia.—The recession in British Columbia involved fewer workers than that indicated at the beginning of January of last year, but it rather exceeded the average decline at January 1 in the period, 1921-1938. The 1,121 establishments furnishing data reported 84,147 employees at the date under review, as against 90,785 at December 1, 1938. Lumber and food factories, logging, mining, construction and transportation recorded curtailment, that in the lumber industries being most pronounced. Communications, services and retail trade, however, showed moderate improvement. The general situation was much the same as at January 1, 1938, when the 1,081 co-operating establishments had employed 83,228 men and women; the index then stood at 97·8, compared with 98·0 at the opening of 1939.

Index numbers of employment by economic areas are given in Table 1.

Employment by Cities

There were contractions in six of the eight cities for which separate tabulations are made, firms in Montreal, Toronto, Ottawa, Hamilton, Winnipeg and Vancouver reporting reduced employment, while there was a small increase in Quebec City and Windsor. In Montreal, Quebec and Windsor, employment was rather brisker than at January 1, 1938; in Toronto, Ottawa, Winnipeg and Vancouver the indexes were slightly lower, while Hamilton showed a considerable reduction in that comparison. Except in Hamilton and Winnipeg, employment in these centres was slightly more active than at January 1, 1937, and immediately preceding years.

Montreal.—The recession in Montreal involved a much larger number of workers than that indicated at January 1, 1938, but it was nevertheless smaller than the average decline at that date in the period for which statistics are available. Statements for the latest month were received from 1,628 establishments with 154,710 employees, as compared with 163,750 in the preceding month. Marked curtailment was shown in manufacturing, in which the losses in iron and steel, food, textile and leather plants were greatest. Transportation and building were also slacker. On the other hand, employment on the streets and roads and in retail trade was more active, the gains in the latter being considerable. The index, at 100·4, was 1·4 points higher than at the beginning of January in 1938, when 1,415 firms had reported payrolls aggregating 148,791 persons, compared with 156,798 in the preceding month.

Quebec.—Shipping reported a seasonal contraction; manufacturing showed a slight gain on the whole, while services and trade also afforded more employment. The 202 co-operating employers in Quebec City enlarged their staffs from 16,533 persons at December 1, to 16,598 at the beginning of January. This advance was rather smaller than that noted at January 1, 1938, but compared favourably with the average decline noted at January 1 in preceding years of the record. The 178 establishments making returns for the beginning of January, 1938, had employed 13,369 men and women, and the index then was considerably lower.

Toronto.—Toronto firms showed a decidedly smaller seasonal reduction in personnel at January 1, 1939, than at the same date in 1938, and the decrease was also below the average at the beginning of January in the years for which data are on record. The index, at 107·3, was, however, slightly lower than at January 1 of last year, when it stood at 108·4. As compared with December, there were important losses in manufacturing at the date under review, the most noteworthy being in the textile, food and pulp and paper groups; construction and transportation were also quieter, while retail stores reported pronounced, seasonal improvement. Returns were tabulated from 1,648 employers with 135,660 workers at January 1, compared with 137,648 in their last report; at the same date of last year, 1,566 firms had employed 134,860 men and women, a decline of 4,368 from the preceding month.

Ottawa.—A moderate falling-off was indicated in Ottawa; manufacturing showed a recession, and building was also slacker. On the other hand, retail trade was more active. The result was a slight decrease in general employment in the city, according to the 215 reporting establishments, whose staffs aggregated 14,028 persons, as compared with 14,217 in the preceding month. A smaller reduction had been recorded at the same date of last year, when the index of employment was fractionally higher. Statements had then been furnished by 204 employers with a combined payroll of 13,923.

Hamilton.—Data were received from 310 firms in Hamilton employing 31,489 workers, as against 32,941 in the preceding month. Manufacturing showed most of the curtailment, which occurred chiefly in iron and steel, non-ferrous metal and food factories; construction was rather dull, while the fluctuations in other industries were slight. At January 1, 1938, the 294 co-operating establishments had reported 35,390 men and women on their staffs, and the index was nearly twelve points higher.

Windsor.—There was a slight gain at the beginning of January in the number employed in Windsor, most of which was in manufacturing (notably in the iron and steel industries). Trade was also brisker. On the other hand, construction and transportation were quieter than at December 1. Returns were compiled from 191 employers with 20,639 persons in their employ, as compared with 20,375 in the preceding month. Activity was rather greater than at January 1, 1938, when a reduction had been reported by the 180 firms making returns, whose payrolls had included 20,160 employees.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

Relative Weight of Employment by Cities as at Jan. 1, 1939	14·9	1·6	13·0	1·4	3·0	2·0	3·8	3·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

72003—5½

Winnipeg.—Employment in manufacturing and trade declined in Winnipeg, while other groups showed only slight changes on the whole; within the former, the losses in food, textile and leather factories were largest. The 503 co-operating establishments reported 39,070 employees, compared with 40,796 in the preceding month. This contraction involved more workers than have been laid off, on the average, at January 1 in the last sixteen years, also exceeding the loss recorded at the same date in 1938. The index then was slightly higher. Data for the beginning of January of last year had been tabulated from 492 employers of 39,668 men and women.

Vancouver.—Reduced activity was indicated in Vancouver, according to returns from 472 firms employing 34,808 persons, as compared with 36,055 at December 1. The decrease noted at the same date of last year had been smaller, and the index then was 1·6 points higher. There were losses in manufacturing at the date under review, notably in the food, lumber and non-ferrous metal divisions, and construction and transportation were also slacker than in the preceding month; on the other hand, communications and services showed improvement. For January 1, 1938, 462 establishments had reported 35,128 men and women on their paylists, compared with 35,476 in the preceding month.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—As already stated, the recession in employment in manufacturing was below the average indicated at January 1 in the last eighteen years, there being as compared with December 1 a loss of 5·3 per cent, while the average reduction in this comparison since 1920 has been 7·5 per cent. The contraction at the date under review, as in other years, was partly due to comparatively brief shutdowns for inventory and over the holiday season. In each of the preceding years for which data are now available, employment has shown partial recovery in the weeks succeeding January 1; on the average, this has amounted, up to the date of the next report, (February 1), to rather less than 50 per cent of the shrinkage indicated at the opening of the year.

The manufacturers making returns for January 1, 1939, numbered 6,213 and their payrolls aggregated 532,012, compared with 561,549 at December 1. The index declined from 110·1 in the preceding month to 104·3 at the date under review. As compared with 108·6 at January 1, 1938, there was a falling-off of four per cent, but the latest index was nearly two per cent higher than at January 1, 1937, and was also higher than in January of other years since 1930.

After correction for seasonal influences, the index for January 1, 1939, was practically unchanged, at 111·3, compared with 111·4 at December 1; the factors used in making this

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

——	All Industries	Manf.	Log.	Min.	Comm.	Trans.	Constr.	Serv.	Trade
Jan. 1, 1927	95·9	94·7	136·1	104·7	99·6	99·1	73·1	96·7	109·9
Jan. 1, 1928	100·7	97·9	163·2	112·6	102·9	99·4	78·6	105·3	120·4

Dec. 1	114·0	110·1	166·4	163·3	84·0	85·0	112·8	131·7	139·7
Jan. 1, 1939	108·1	104·3	150·6	160·4	83·3	79·9	96·4	131·7	144·8
Relative Weight of Employment by Industries as at Jan. 1, 1939	100·0	51·1	4·2	7·1	2·1	9·3	11·1	2·8	12·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns at the date under review.

adjustment reflect the experience of the years 1929-1937, which differs slightly from that of the period, 1921-1938, as mentioned above.

The most extensive reductions at the date under review were in food, textile, iron and steel, lumber, pulp and paper and clay, glass and stone factories, but the fur, leather, rubber, chemical, electric light and power, electrical apparatus, non-ferrous metal and miscellaneous manufacturing industries also recorded important curtailment. On the other hand, tobacco works showed improvement, as has often been the case at the beginning of January.

The index numbers of factory employment at the first of January in the years since 1928 are as follows: 1939, 104·3; 1938, 108·6; 1937, 102·4; 1936, 96·8; 1935, 87·4; 1934, 80·0; 1933, 74·4; 1932, 83·9; 1931, 93·7; 1930, 106·5; 1929, 107·3 and 1928, 97·9.

The 5,997 manufacturers making returns for the same date in 1938 had employed 552,144 men and women, a decline of 38,836 or 6·6 per cent from the preceding month.

Animal Products, Edible.—Declines were reported in all branches of this division—dairies, meat packing and fish-preserving plants. Statements were received from 305 manufacturers with 24,902 workers, as compared with 25,814 at the beginning of December. This loss was smaller than that recorded at January 1, 1938, when the index number was slightly lower. All five economic areas reported lessened employment, the greatest contractions being in the Maritime and Prairie Provinces.

Leather Products.—There was a seasonal falling-off in the leather industries at the beginning of January. The shrinkage involved a rather larger number of employees than that indicated at the same date last year, but the index then was about one point lower. A combined working force of 20,629 persons was registered by the 313 firms making returns, as compared with 21,529 in the preceding month. Most of the loss occurred in Quebec and Ontario.

Lumber Products.—Seasonal curtailment was noted in lumber mills, 899 of which reduced their payrolls from 38,390 at December 1 to 36,237 workers at the beginning of January.

Table IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (Average 1926=100)

Industries	[1]Relative Weight	Jan. 1 1939	Dec. 1 1938	Jan. 1 1938	Jan. 1 1937	Jan. 1 1936	Jan. 1 1935	Jan. 1 1934
Manufacturing	51·1	104·3	110·1	108·6	102·4	96·8	87·4	80·0

Miscellaneous	0·5	129·2	139·1	125·5	123·2	116·8	113·4	97·8

[1] For explanation of term "Relative Weight", see footnote to Table III.

Employment was in somewhat smaller volume than at the corresponding date of last year. Sawmills registered the most pronounced decreases, but there were also contractions in furniture, vehicle and other wood-using industries. There were marked recessions in Ontario and British Columbia, while the tendency in the Maritime Provinces was upward.

Musical Instruments.—Thirty-seven manufacturers of musical instruments reported a combined staff of 1,382, which was 54 less than in the preceding month. A much greater loss had been noted at January 1 a year ago, when the index number was lower.

Plant Products, Edible.—There were important seasonal reductions in employment in all branches of the vegetable food group, the largest being in canning, sugar and syrup, bakery, chocolate and confectionery factories. The working forces of the 518 co-operating employers totalled 32,005 persons, as compared with 36,913 in their last report. While the movement was generally unfavourable, the most pronounced contractions were in Ontario. The declines noted at the beginning of January last year were rather more extensive, and the index number then was about a point lower than at the date under review.

Pulp and Paper Products.—The shrinkage at the beginning of January, 1939, rather exceeded that indicated at the same date in 1938, when employment was in greater volume. Statistics were received from 652 firms, whose staffs aggregated 63,280 workers, or 2,752 fewer than in their last report. There were considerable losses in Quebec and Ontario. Pulp and paper mills reported a large share of the reduction, but there were also declines in plants producing paper goods and in printing and publishing houses.

Rubber Products.—Rubber factories showed a decrease which was decidedly smaller than that noted at January 1, 1938; 54 plants had 12,794 employees at the date under review, as against 13,203 at the beginning of December. Most of the recession took place in Quebec and Ontario. The index number, at 102·4, was several points above that of 97·8 at the same date of last year.

Textile Products.—The 1,148 textile firms furnishing data released a smaller proportion of their total operatives than was the case among the establishments making returns at the beginning of January, 1938; the index then, however, was rather higher than at the date under review, when it stood at 113·6. The reported payrolls included 98,565 persons at January 1, 1939, as against 104,159 in the preceding month. Quebec and Ontario recorded the bulk of the shrinkage, which was especially marked in the hosiery and knit goods, cotton, woollen, garment and personal furnishing and headwear divisions.

Tobacco.—There was a large seasonal increase in employment at the beginning of January in the tobacco group. Statements were tabulated from 45 manufacturers in this group, employing 13,094 workers, or 1,424 more than at December 1. The advance took place in Quebec and Ontario.

Beverages.—Moderate curtailment was indicated in beverage manufacturing at January 1, when 141 establishments reported 8,761 employees, compared with 8,951 in their last return. Little general change was noted in these industries as compared with January, 1938.

Chemical Products.—Employment in chemical and allied products showed a contraction at January 1 from the preceding month, 585 persons having been let out from the labour forces of the 290 reporting plants, which had 17,650 employees. Similar declines had been noted at the corresponding date a year ago, but the index number was then slightly lower.

Clay, Glass and Stone Products.—Further seasonal recessions in employment occurred in the production of these goods; 213 works reported an aggregate staff of 8,335, as compared with 9,453 in the preceding month. All provinces shared in this curtailment, which, however, was most marked in Ontario. Brick and stone yards recorded important losses; on the whole, these were on a rather smaller scale than those of January 1, 1938, but employment then was generally in greater volume.

Electric Light and Power.—Employment in electric current plants again declined, according to statistics from 99 producers, employing 16,163 workers, or 498 fewer than at December 1. Quebec firms reported the greatest contraction. A larger reduction had been noted at the beginning of January of last year, when the index was some four points lower.

Electrical Apparatus.—Slackening in industrial activity was indicated by the 126 co-operating electrical apparatus factories, whose labour forces aggregated 17,164 at January 1, as compared with 17,716 in the preceding month. Employment was much slacker than at the same date of 1938, although the falling-off then recorded had been on a greater scale.

Iron and Steel Products.—The crude, rolled and forged, machinery, automobile, railway car and locomotive, heating appliance, steel

shipbuilding, sheet metal and other divisions reported curtailment. The payrolls of the 917 firms furnishing data in the iron and steel industry totalled 118,406, against 127,184 at December 1. The decline, seasonal in character, was proportionately rather smaller than the average reduction at January 1 in the years since 1920. The largest losses at the date under review occurred in Ontario. The iron and steel index was lower than at January 1 of 1938 or 1937, but it was higher than at that date in immediately preceding years.

Non-Ferrous Metal Products.—There was a decrease in non-ferrous metal products; although this involved the release of fewer workers than that indicated at January 1, 1938, employment was then in rather greater volume. Returns for the date under review were compiled from 184 employers of 23,745 persons, as against 24,440 at the commencement of December. Most of the reduction recorded was in Ontario. An analysis of the data by industries shows a slackening in the precious and the base metal groups.

Mineral Products.—Lowered activity was noted in these industries, in which a larger recession had occurred at the beginning of last year. A combined working force of 12,119 persons was employed by the 101 establishments whose returns were received, and which had 12,307 employees at December 1. The index was fractionally higher than at January 1, 1938, standing at 150·0 at the latest date, as against 149·1 in the same month of last year.

Logging

Bush operations on the whole showed a considerable falling-off at January 1. The experience of the years since 1920 shows that there is customarily an exodus from logging camps over the holiday season, but the general movement in the present year was more pronounced than usual. Improvement was shown in the Maritime and Prairie Provinces and Ontario, while in Quebec and British Columbia large reductions in staff were noted. Employment was quieter than in January of any other year since 1933; the index stood at 150·6, compared with 166·4 at December 1, 1938, and 323·6 at January 1, 1938. A combined working force of 43,535 was reported by the 406 co-operating firms, who had 48,049 employees in the preceding month.

Mining

Coal.—Slight improvement was indicated in coal mines, 105 of which enlarged their staffs from 26,007 at December 1, to 26,156 at the beginning of January. There were gains in Alberta and British Columbia, but the tendency was downward in Nova Scotia. The index number at January 1, 1938, was slightly higher, although employment had then shown a falling-off from the preceding month.

Metallic Ores.—A pronounced decrease was noted in metallic ore mines, according to data from 231 mines employing 39,922 persons at the beginning of January, as compared with 40,801 in their last report. The index was decidedly higher than at the same date of last year, when a more extensive recession had occurred.

Non-Metallic Minerals (Other than Coal).—The trend of employment in this division continued seasonally downward; the reductions were on a smaller scale than at January 1 a year ago, and the index was then a few points lower. Statements were received from 102 employers with 8,174 workers, as compared with 8,800 in the preceding month. There were general losses, those in Ontario being greatest.

Communications

A further decrease took place in telephones and telegraphs; the index was rather lower than at the same date in 1938, when a slightly larger falling-off had been noted. The payrolls of the companies and branches furnishing data declined from 22,441 at December 1, to 22,241 at the beginning of January.

Transportation

Street Railways and Cartage.—Local transportation firms reported a seasonal contraction in personnel, involving many more workers than that noted at January 1, 1938; the index then, however, was lower by over eight points. A combined staff of 27,607 persons was employed by the 270 co-operating firms, who had 28,313 workers in the preceding month. The largest reductions were in Ontario.

Steam Railways.—Employment in steam railway operation showed a decided decline, seasonal improvement in the Maritime Provinces being more than off-set by contractions in the other areas. The payrolls of the 100 companies and divisional superintendents furnishing returns aggregated 56,468 persons, as against 57,159 in their last report. A slight gain had been recorded at the same date last year, when the index was four points higher than that of 71·0 at January 1, 1939.

Shipping and Stevedoring.—On the whole, there was a large, seasonal reduction in employment in water transportation; curtailment was indicated in Quebec, Ontario and British

Columbia, while an important increase, also seasonal in character, was noted in the Maritime Provinces. The general curtailment greatly exceeded that indicated at January 1, 1938, when the index was several points higher. Returns for the date under review were compiled from 126 employers of 12,469 men, compared with 17,301 in the preceding month.

Construction and Maintenance

Building.—Continued seasonal curtailment of operations was shown in building construction; 846 contractors reduced their staffs from 29,181 at the beginning of December to 22,414 at January 1. The most pronounced declines were in Quebec and Ontario, although there were general losses throughout the Dominion. Larger decreases had been indicated at January last year, but the index was then rather higher.

Highway.—Statements were received from 389 firms employing 73,181 workers, or 13,530 fewer than at December 1. Important curtailment took place in all five economic areas. Road construction generally afforded more employment than in the winter of 1937-38.

Railway.—An upward movement was shown in this division, in which 34 employers reported 20,151 persons on their payroll, as compared with 19,554 in the preceding month. The index was some ten points lower than at January 1 of a year ago, when improvement had also been noted. There were increases in employment in Quebec and British Columbia at the date under review.

Services

Little general change occurred in services, in which 565 firms employed 28,701 persons, practically the same number as in the preceding month. There was an increase in hotels and restaurants, while laundries and dry-cleaning establishments were slacker. An advance had been shown at the beginning of January, 1938, when the index was fractionally higher.

Trade

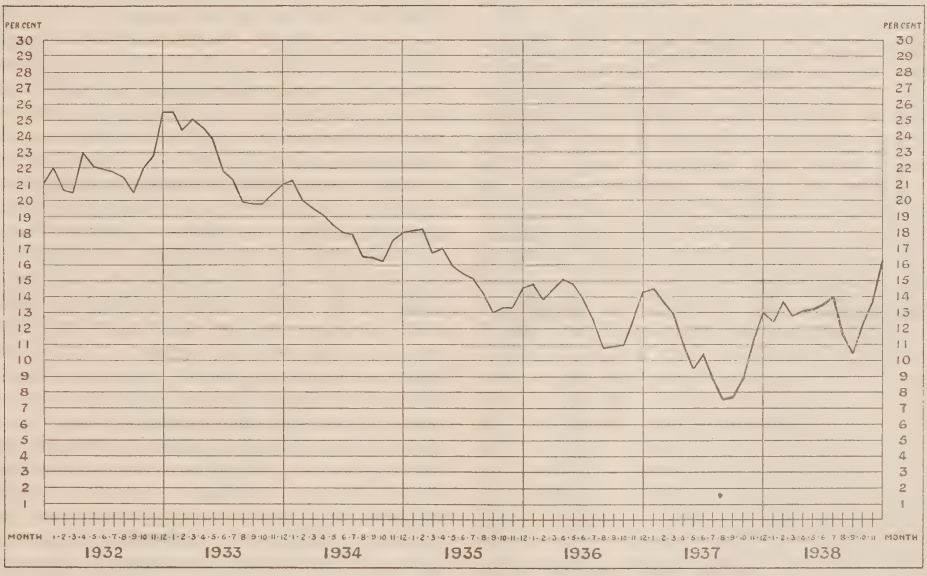
Trade afforded considerably more employment than at December 1; the increase in personnel, on the whole, exceeded the average gain indicated at the beginning of January in the preceding years for which statistics are available. There were moderate seasonal losses in wholesale establishments, but the additions to staffs in retail stores were large. The 1,737 co-operating employers had 128,011 persons on their staffs, compared with 123,400 in their last report. The index stood at 144·8, as compared with 139·7 in the preceding month, and 141·7 at January 1, 1938.

TABLES

The accompanying tables give index numbers of employment by economic areas, leading cities and industries. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date indicated.

(2) Unemployment in Trade Unions at the Close of December, 1938

The term unemployment as used in the accompanying article has reference to involuntary idleness due to economic causes. Persons who are occupied at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that all figures have reference only to the organization reporting.



The local trade union situation at the close of December was less favourable than in November, the usual depression in industry incidental to the holiday and following season and the custom of taking inventories in a number of lines of business toward the close of the year affecting conditions adversely. Reporting for December were 1,960 labour organizations, comprising a membership of 249,071 persons, 40,307 of whom were unemployed on the last day of the month, a percentage of 16·2 contrasted with 13·7 per cent of idleness in November. Losses in employment were noted also from December, 1937, when 13·0 per cent of the members reported were out of work. The percentages of unemployment recorded in all provinces, with the exception of New Brunswick, during December exceeded those registered in the preceding month, while in that district the improvement was merely nominal. Manitoba and British Columbia unions reflected declines in activity of over 6 per cent and of over 4 per cent, respectively, unemployment in the manufacturing industries of Manitoba, particularly the garment trades, seriously affecting the situation, while in British Columbia the recessions were more wide-spread, the majority of trades and industries sharing in the unemployment increase. In Quebec a 3 per cent drop in activity was manifest, important factors in this unfavourable movement being the slack-

ness evident in the textile and leather trades and among building and construction workers. Ontario and Nova Scotia unions showed recessions of minor importance. In Saskatchewan and Alberta the tendency was toward retarded activity, though the variations were but fractional. Contrasting with the returns for December, 1937, a considerable drop in the volume of work afforded members in Nova Scotia, New Brunswick, Quebec and Manitiba was evident during the month under review and activity for Alberta members was moderately curtailed. In Ontario, Saskatchewan and British Columbia employment was but slightly restricted.

A separate tabulation is made monthly of unemployment in the largest city in each province except Prince Edward Island. Action remained unchanged from December, 1937.

The chart which appears with this article illustrates the trend of unemployment by months from January, 1932, to date. The course pursued by the curve during January, 1938, tended downward from that indicated at the close of the previous year, though the projection was slight, an evidence of a more favourable employment movement. In February, however, the reverse was the case, unemployment reflecting a small increase. The level of activity in March, as represented by the chart, was slightly above that of February, but in April a period of diminishing employment set in, which continued until the close of July. The changes from month to month, however, were quite small, the varia-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

tivity for Winnipeg members was substantially reduced in December from the previous month and noteworthy declines were manifest by Vancouver unions. Quieter conditions also prevailed for Montreal, Toronto, Regina and Edmonton members. In Halifax and Saint John nominal employment advancement was noted. When comparing with the returns for December, 1937, Montreal members, with a drop in activity of over 6 per cent, reflected the most important losses and in Winnipeg and Edmonton curtailment of slightly lesser degree was apparent. Some lowering in the employment volume available was also indicated by Halifax, Toronto, Regina and Vancouver unions. In Saint John the situation from April to May being practically negligible. The August returns showing an improved situation caused a halt in this unfavourable direction and in September further gains were noted. With October curtailment, chiefly seasonal in character, was recorded, the curve again extending upward, in which course it continued throughout November and with somewhat greater impetus during December. From the beginning of April onward to the end of the year, the percentage of idleness reported for Canada as a whole at the end of each month was in excess of that indicated in the corresponding month of 1937. In January and March, however, a better volume of employment was accorded, the

February level remaining identical with that of February, 1937. The best situation for the year prevailed in September, when 10·4 per cent of idleness was registered while the percentage of 16·2 indicated at the close of December constituted the maximum of unemployment during 1938.

Inactivity in the manufacturing industries was more pronounced during December than in the preceding month according to the reports received from a total of 564 unions with 97,477 members. Of these, 16,185 or a percentage of 16·6 were idle at the end of the month, in contrast with 14·8 per cent in November. A considerable proportion of the employment curtailment occurred in the garment trades of Quebec and Manitoba and among Quebec leather workers. The majority of trades, however, recorded some slowing up in available work. Among glass workers, whose membership was small, the percentage reduction reported was pronounced. Hat, cap and glove workers were much slacker than in November and declines in activity on a small scale were manifest by cigar and tobacco, fur, textile and carpet, and jewelry workers, printing tradesmen, general labourers, meat cutters and butchers, electric current employees and metal polishers. Mill and smeltermen, on the other hand, showed marked gains in employment from November and activity tended upward for wood and iron and steel workers, and bakers and confectioners. The percentage of idleness for paper makers showed no change from that of the previous month. The level of employment in the manufacturing industries, as a whole, during December was also slightly below that of December, 1937, when 15·1 per cent of idleness was recorded. In this comparison especially noteworthy percentage gains were registered by fur, jewellery and wood workers and more active conditions prevailed for textile and carpet workers, and paper makers. Among printing tradesmen and leather workers the tendency was favourable, though the change from December, 1937, was slight. Of the recessions which were of a more than counteracting nature the most important were indicated by general labourers, glass workers and electric current employees. Noteworthy recessions were also evident among hat, cap and glove, iron and steel and brewery workers, and metal polishers, while activity was slightly retarded for garment workers, bakers and confectioners, meat cutters and butchers, and mill and smelter men.

From unions of coal miners 60 reports were compiled for December, embracing 22,918 members, 1,401 of whom or a percentage of 6·1 were out of work on the last day of the month, in contrast with an unemployment percentage of 5·2 in November. Some curtailment in the volume of work afforded was apparent from December, 1937, unemployment for that month standing at 4·2 per cent. British Columbia miners were considerably slacker during December than in either the preceding month or December, 1937, and in the Nova Scotia coal fields activity eased off slightly. In Alberta the situation was more favourable in both comparisons. In addition to the members entirely unemployed a number were reported as working at greatly reduced time.

The lull in building and construction activities, chiefly seasonal in character, was in evidence to a more marked degree during December than in November, the 218 associations of building tradesmen making returns with an aggregate of 26,754 members indicating 41·2 per cent of idleness, compared with 36·6 per cent in November. Bricklayers, masons and plasterers, and steam shovelmen reported particularly depressed conditions from November and the recessions apparent among bridge and structural iron workers, plumbers and steamfitters, tile layers, lathers and roofers, and painters, decorators and paperhangers were noteworthy. Carpenters and joiners, and hod carriers and building labourers registered declines in activity on a somewhat smaller scale, and employment for granite and stone cutters, and electrical workers eased off slightly. In contrasting with the returns for December, 1937, in the building and construction trades, when 34·5 per cent of unemployed members was recorded, painters, decorators and paperhangers, steam shovelmen and tile layers, lathers and roofers showed heavy increases in unemployment during the month under review. Considerably slacker conditions prevailed also for carpenters and joiners, and bridge and structural iron workers. Among electrical workers, and plumbers and steamfitters decreases in activity of much lesser degree occurred. Granite and stone cutters, however, were much better engaged during December than in the corresponding month in 1937, and among hod carriers and building labourers the improvement shown was rather marked. Bricklayers, masons and plasterers also reported some employment expansion.

The transportation industries during December, with 850 associations including a membership of 66,425 persons, showed that 8,316 or a percentage of 12·5 were out of work as compared with percentages of 9·4 in November and 8·3 in December, 1938. Steam railway employees, whose returns constituted nearly 78 per cent of the entire group membership reported, showed moderate curtailment of activity both when compared with returns for the previous month and December, 1937, and in the navigation division severe losses in em-

ployment were noted in both comparisons. Teamsters and chauffeurs showed little change during December from either the previous month or December, 1937, though the tendency in each case was toward greater employment. Among street and electric railway employees the situation remained practically unchanged in all three months used for comparative purposes.

From unions of retail shop clerks 5 reports were received for December, covering a membership of 1,846 persons, only 3 of whom, or a percentage of ·2, were shown as idle at the end of the month, in contrast with a fully engaged situation in the preceding month and in December, 1937.

Retarded activity on a very small scale was evident among civic employees during December from November, the 81 associations forwarding reports with a total of 10,439 members showing that 250, or a percentage of 2·4, were unemployed on the last day of the month, as contrasted with 2·0 per cent of inactivity in November. Minor contractions were also reflected from December a year ago, when 1·9 per cent of the members reported were without work.

A nominally upward employment tendency was manifest in the miscellaneous group of trades during December from the preceding month, though conditions were somewhat quieter than in December, 1937. This was apparent from the returns compiled from 143 local unions, with a membership involving 11,767 persons, 1,224 of whom were unemployed at the end of the month, a percentage of 10·4 compared with percentages of 10·6 in November and 6·5 in December a year ago. Hotel and restaurant, and theatre and stage employees and unclassified workers all contributed to the total advancement indicated from November, which was nearly offset by the recessions in work afforded barbers and stationary engineers and firemen. The changes throughout, however, were not large. Unclassified workers were in substantial measure responsible for the drop in employment noted from December, 1937, though moderate declines in activity were apparent among barbers and the situation tended less favourable for hotel and restaurant, and theatre and stage employees. Stationary engineers and firemen showed a fractional rise in employment from December a year ago.

Fishermen were slacker during December than in the preceding month, though decidedly better conditions obtained than in December, 1937. This was apparent from the returns tabulated from 6 associations of these workers with 2,234 members, 433 of whom, or a percentage of 19·4, were unemployed, in comparison with percentages of 11·7 at the close of November, 1938, and 39·7 in December, 1937.

A large falling off in employment was shown by lumber workers and loggers during December from both the previous month and December, 1937, the losses in the latter comparison being the more extensive. Reporting for the month under review were 3 unions of these workers, comprising 1,915 members, 909 of whom were idle at the end of the month, a percentage of 47·5 contrasted with percentages of 30·4 in November and 3·3 in December, 1937.

Table I shows by provinces the percentage of members who were on an average unem-

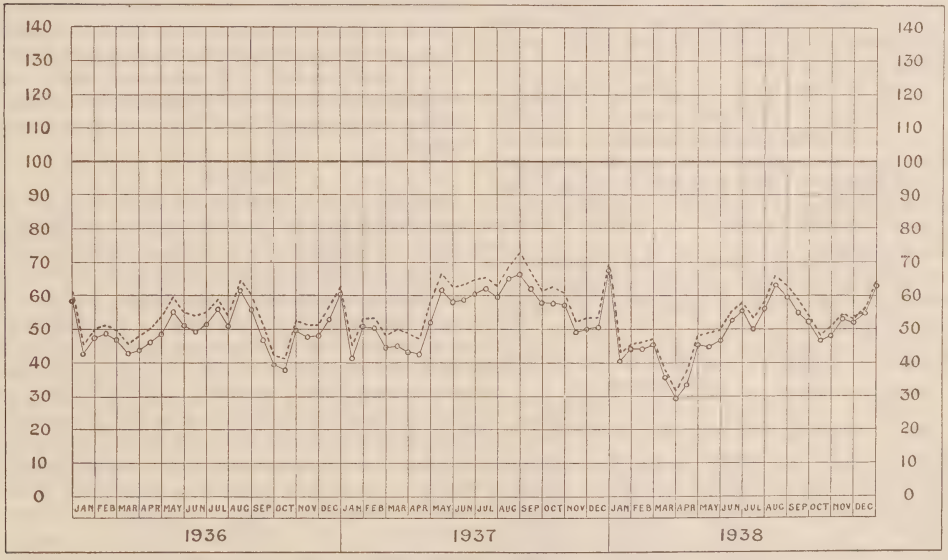
ployed each year from 1919 to 1938, inclusive, and also the percentage of unemployment by provinces for December of each year from 1919 to 1935, inclusive, and for each month from December, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.



(3) Employment Office Reports for December, 1938

The volume of business transacted by offices of the Employment Service of Canada during the month of December, 1938, showed a decline of more than 14 per cent in the average daily placements when compared with those of the preceding month, but an increase of 15 per cent over those of December a year ago. All industrial divisions, except trade and construction and maintenance, in which minor gains only were recorded, showed losses from November, the highest being in farming and logging. In comparison with December, 1937, very substantial gains were registered in farming, construction and maintenance, and services, together with a small increase in mining; logging, however, recorded a marked decline, followed by others of lesser amounts in manufacturing, transportation and trade.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications showed a sharp upward trend throughout the month, but at the close were still about five points below the levels attained at the end of December, 1937. The ratio of vacancies to each 100 applications was 56·7 and 64·3 during the first and the second half of December, 1938, in comparison with ratios of 53·4 and 69·3 during the same periods of 1937. The ratios of placements to each 100 applications during the periods under review were 55·0 and 63·2, as compared with 50·5 and 67·5 during the corresponding month of 1937.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during December, 1938, was 1,501, as compared with 1,755 during the preceding month and with 1,327 in December a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,499 in comparison with 3,258 in November, 1938, and 2,182 in December, 1937.

The average number of placements made daily by the offices of the Service during

December, 1938, was 1,465, of which 967 were in regular employment and 498 in work of one week's duration or less, as compared with a total daily average of 1,712 during the preceding month. Placements in December a year ago averaged 1,274 daily, consisting of 780 in regular and 494 in casual employment.

During the month of December, 1938, the officers of the Service referred 39,073 persons to vacancies and effected a total of 38,070 placements. Of these, the placements in regular employment were 25,131, of which 19,040 were of men and 6,091 of women, while placements in casual work totalled 12,939. The number of vacancies reported by employers was 27,612 for men and 11,394 for women, a total of 39,006, while applications for work numbered 64,972, of which 49,304 were from men and 15,668 from women. Reports for November, 1938, showed 43,859 positions available, 81,426 applications made and 42,783 placements effected, while in December, 1937, there were recorded 34,479 vacancies, 56,711 applications for work and 33,109 placements in regular and casual employment.

During the year 1938 the offices of the Service throughout Canada reported 401,241 vacancies, 782,664 applications and 382,295 placements in regular and casual employment, a decline of nearly 2 per cent from the placements effected during the preceding year, 1937.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Totals
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295

NOVA SCOTIA

During the month of December, positions offered through employment offices in Nova Scotia were over 14 per cent less than in the preceding month, but over 52 per cent above the corresponding month of 1937. There was a decrease in placements of nearly 13 per cent when compared with November, but an increase of over 58 per cent in comparison with December a year ago. With the exception of small declines in logging and trade, placements were higher in all industrial divisions than during December, 1937, the most important increases being in construction and maintenance and services. Placements in these groups numbered 557 and 574 respectively. Of the placements in services 453 were of household workers. During the month 365 men and 115 women were placed in regular employment.

NEW BRUNSWICK

Employment opportunities, as indicated by orders received at employment offices in New Brunswick, were over 2 per cent less favourable than in the preceding month, but nearly 41 per cent above the corresponding month of the previous year. Similar percentages of change were reported in placements under both comparisons. The only industrial division to show any gain in placements over December, 1937, was the highway division of construction and maintenance. This increase was slightly offset by small declines in services and trade. The changes in all other groups were unimportant. Placements under construction and maintenance numbered 452 and in services 599. Of the latter, 474 were of household workers. Placements in regular employment numbered 19 of men and 78 of women.

QUEBEC

Orders received at employment offices in the Province of Quebec during December called for nearly 6 per cent more workers than in the preceding month and nearly 37 per cent more than in the corresponding month of the previous year. There was an increase also in placements of nearly 9 per cent when compared with November and of over 43 per cent in comparison with December a year ago. The increase in placements over December, 1937, was due to relief work in the highway division of construction and maintenance. Services showed a moderate gain, but there was a fairly substantial decrease in bush placements. The changes in other groups were nominal only. Placements by industrial divisions included manufacturing 163; logging 183; construction and maintenance 5,868; trade 91 and services 2,580, of which 2,285 were of household workers. There were 6,025 men and 1,446 women placed in regular employment.

ONTARIO

There was a decline of nearly 14 per cent in the number of positions offered through employment offices in Ontario during December when compared with the preceding month and of nearly 15 per cent in comparison with the corresponding month of the previous year. Placements were nearly 14 per cent less than in November and nearly 13 per cent

below December, 1937. With the exception of a fairly substantial increase in the highway division of construction and maintenance, all industrial divisions showed reductions in placements when compared with December a year ago. The largest decrease was in logging. There were moderate losses in services and manufacturing and smaller declines in transportation, farming and trade. Placements by industrial divisions included manufacturing 381; logging, 490; farming, 429; construction and maintenance, 2,783; trade, 275 and services, 3,461, of which 2,314 were of household workers. During the month 2,012 men and 1,163 women were placed in regular employment.

Manitoba

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during December were over 37 per cent better than in the preceding month and on practically the same level as during the corresponding month of the previous year. There was an increase in placements of over 36 per cent when compared with November, but a decline of over 1 per cent when compared with December, 1937. When comparing placements by industrial divisions with December a year ago, the only decrease of importance was in construction and maintenance, and there was a minor loss in logging. These declines were almost entirely offset by fairly substantial gains in farming and services, made up largely of placements under the Farm Improvement and Employment Plan. The changes in other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were: logging, 229; farming, 3,217; construction and maintenance, 137 and services, 1,416, of which 1,337 were of household workers. Regular placements numbered 3,536 of men and 978 of women.

Saskatchewan

The demand for workers, as indicated by orders received at employment offices in Saskatchewan during December, was nearly 36 per cent less than in the preceding month, but over 395 per cent above the corresponding month of the previous year. There was a decrease in placements of over 35 per cent when compared with November, but a gain of 386 per cent when compared with December a year ago. The exceptionally large increase over December, 1937, was entirely due to the many placements made in farming and services under the Farm Improvement and Employment Plan, as small changes only were reported in all other groups, the largest of which was a decline in construction and maintenance. Placements in farming numbered 4,839 and in services 1,772. Of the latter, 1,716 were of household workers. During the month 4,665 men and 1,790 women were placed in regular employment.

Alberta

During December, 1938, employment offices in Alberta received orders for over 17 per cent fewer workers than in the preceding month and over 5 per cent less than during the corresponding month of 1937. There was a decrease in placements of nearly 23 per cent when compared with November, but a nominal increase in comparison with December of the previous year. While placements for the province as a whole were on about the same level as in 1937, increases were reported in farming and services, but these were offset by declines in logging and construction and maintenance. Industrial divisions in which most of the placements were effected during the month were farming 1,445; construction and maintenance 221; and services 470, of which 396 were of household workers. There were 1,664 men and 300 women placed in regular employment.

British Columbia

There was a decline of over 17 per cent in the number of positions offered through employment offices in British Columbia when compared with the preceding month and of over 35 per cent in comparison with the corresponding month of the previous year. Similar percentages of loss were reported in placements under both comparisons. With the exception of a nominal increase in farming, all industrial divisions showed declines in placements when compared with December, 1937. The largest decrease was in highway division of construction and maintenance, but fairly important losses were also recorded in logging and services. Industrial divisions in which most of the placements were effected during the month were logging 265; construction and maintenance 3,609; and services 770, of which 523 were of household workers During the month 754 men and 221 women were placed in regular employment.

Movement of Labour

During the month of December, 1938, the offices of the Employment Service of Canada made 25,131 placements in regular employment, 17,070 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 452 were granted the Employment Service reduced transportation rate, 443 travelling to centres

* 3 Placements effected by offices since closed.

within the same province as the despatching office and 9 to other provinces. The reduced transportation rate, which is 2·5 cents per mile, with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to proceed to distant employment for which no workers are available locally.

Taking advantage of the reduced rate in Quebec during December one bushman secured a certificate at the Hull office for transportation to Pembroke. Offices in Ontario issued 379 reduced rate certificates during December, 377 provincial and 2 interprovincial. The latter were granted at the Timmins office to mine workers going to Rouyn. For points within their respective zones the Port Arthur office despatched 212 bushworkers and one hotel employee, the Fort William office 63 bushworkers and the Sudbury office 47 bushworkers. From Sudbury, in addition, 8 bushworkers went to Sault Ste. Marie. The Kenora zone received one miner from Timmins, the Sudbury zone 22 bushworkers from Pembroke and the Timmins zone 20 bushworkers from North Bay. The Toronto office effected transfers of 2 tractor operators to Sudbury and of one farm hand within its own zone. In Manitoba 34 persons profited by the Employment Service reduced transportation rate during December, 28 of whom went to provincial employment and 6 outside the province. Within the province the transfers were from Winnipeg to centres within the same zone and included 20 bushmen, 4 mine workers, 3 sawyers and one farm hand. The interprovincial movement was also from Winnipeg from which centre 5 bushmen and one fisherman were conveyed to Port Arthur. Saskatchewan transfers at the reduced rate during December were of bushmen, 2 in number, who travelled on certificates received at Saskatoon to employment in the Prince Albert zone. The Edmonton office was entirely responsible for the labour movement in Alberta during December, which involved the issue of 35 reduced rate certificates, all of which were provincial. For points within its own zone the Edmonton office transferred 27 bushmen workers, 3 cooks, 2 transportation company employees, one carpenter and one housekeeper, while the Drumheller zone was the destination of one cook. In British Columbia during December the Vancouver office shipped one hotel clerk to employment within its own zone.

Of the 452 persons who were carried at the Employment Service reduced transportation rate during December, 271 travelled by the Canadian National Railways, 158 by the Canadian Pacific Railway, 22 by the Temiskaming and Northern Ontario Railway and one by the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During December, 1938

The building permits issued by 58 cities in December, 1938, represented construction work valued at $3,471,555, as compared with $4,687,296 in November, 1938, and $3,556,977 in December, 1937. There was therefore a decline of $1,215,741 or 25·9 per cent in December as compared with the preceding month, while there was also a slight decrease of $85,422 or 2·4 per cent in comparison with the same month in 1937.

The value of the building permits taken out during 1938 was $60,855,610; this exceeded by $5,010,611 the aggregate of $55,844,999 reported in 1937, and was also decidedly higher than in any other year since 1931. The cumulative total in each of the last seven years has, however, been decidedly below that for any earlier year of the record; the wholesale prices of building materials have recently been lower than in the same period of 1937, although they continue higher than in any of the years, 1931-1936.

Detailed statements for December were received from some 50 cities, showing that they had issued some 230 permits for dwellings valued at more than $1,000,000, and 1,000 permits for other buildings at an estimated cost of more than $2,200,000. There were also three permits taken out for engineering work at a cost of $35,419. During November, the construction of some 400 dwellings and 1,800 other buildings was authorized; these were estimated to cost approximately $1,170,000 and $3,000,000, respectively.

Each of the provinces reported a decrease in the value of the building authorized as compared with the preceding month; that of $283,760 or 75·6 per cent in Nova Scotia was most pronounced.

The value of the building represented by the permits taken out in Quebec and Manitoba was higher in December, 1938, than in the same month of 1937, those provinces showing increases of $147,151 or 14·6 per cent and $82,940 or 159·5 per cent, respectively, in that comparison. The declines elsewhere recorded were comparatively small, that of $153,719 or 8·2 per cent in Ontario being the largest.

Of the four largest cities, Montreal and Winnipeg indicated decreases as compared

with November, 1938, but increases over December, 1937, while Toronto and Vancouver reported declines in both comparisons. Of the other centres, Three Rivers, Brantford, Chatham, Kingston, Niagara Falls, Peterborough, St. Thomas, Riverside, St. Boniface, Lethbridge and Victoria recorded gain as compared with November, 1938, and also as compared with December, 1937.

The following table shows the value of the building authorized by 58 cities during the Decembers of the years since 1920, and also for the completed years; the 1938 figures are unrevised, while for preceding years the statistics are revised. (A revised statement for 1938 will be issued next month.) Index numbers, based upon the total value of the building authorized by these cities during 1926 as 100, are given below, as are the average index numbers of wholesale prices of building materials in the years 1920-38.

Year	Value of permits issued in December	Value of permits issued in twelve months	Indexes of value of permits issued in twelve months (1926=100)	Average indexes of wholesale prices of building materials, twelve months (1926=100)
	$	$		
1938	3,471,555	60,855,610	38·9	90·0
1937	3,556,977	55,844,999	35·7	94·4
1936	3,282,166	41,325,693	26·4	85·3
1935	2,401,856	46,560,623	29·8	81·2
1934	2,521,820	27,457,524	17·6	82·6
1933	1,983,292	21,776,496	13·9	78·3
1932	1,569,255	42,319,397	27·1	77·2
1931	7,895,106	112,222,845	71·8	81·9
1930	15,440,281	166,379,325	106·4	90·9
1929	14,688,682	234,944,549	150·2	99·0
1928	16,095,160	219,105,715	140·1	97·1
1927	11,755,566	184,613,742	118·0	96·1
1926	11,508,818	156,386,607	100·0	100·0
1925	7,363,777	125,029,367	79·9	102·9
1924	6,463,319	126,583,148	80·9	106·6
1923	6,974,256	133,521,621	85·4	111·8
1922	9,517,402	148,215,407	94·8	108·7
1921	5,537,330	116,794,414	74·7	122·7
1920	4,844,354	117,019,622	74·8	144·0

The unrevised statistics for 1938 indicate that last year's aggregate was the largest in seven years, being nine per cent higher than in 1937, the previous maximum since 1931. However, the annual aggregate for each of those years has been considerably below the average for the eighteen years, 1920-1937. The index number of wholesale prices of building materials in 1938, though lower than in 1937, was higher than in any of the years, 1931-1936.

The accompanying table gives the value of the building permits issued by 58 cities in November and December, 1938, and December, 1937. The 35 centres for which records are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JANUARY, 1939

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of January, 1939, was reported by the superintendents of the Employment Service to be as follows:—

Other than ordinary farm chores, the cutting and delivering of firewood, ice harvesting and orchard pruning, farming in the Maritimes was quiet. Weather conditions had been favourable for lumbering and many teams were in the woods in preparation for the log haul. Fishing was only fair. Coal mines in the New Glasgow area, as well as those in Cape Breton and vicinity, worked from two to six days per week. Manufacturing, in general was slack, although no idleness was reported by the iron and steel industry. All building construction under way showed steady progress, but little new work had been started. Road work also continued and groups of men were employed shovelling snow and cutting ice from drains and culverts. Transportation was fairly heavy and trade was normal. The demand for household workers in the women's division was somewhat less than usual, with unplaced applicants in that section increasing.

Farming in Quebec Province was very quiet, while the only centre reporting activity in logging was Val d'Or, in which zone a railway tie camp had been opened, to which over 100 men had been supplied. Mining also was dormant. Manufacturing districts reported as follows: Bagotville and Chicoutimi —paper mills slack; La Tuque—employment firm; Hull—satisfactory; Matane—saw mills and wood cutting establishments slower; Montreal—more active, especially boots and shoes; Quebec City—some improvement in leather, but a decline in clothing; Rouyn—quiet; Three Rivers—many textile workers on reduced time. Government projects under way throughout the province provided employment for numerous persons and building construction, though somewhat sluggish, was progressing slowly. Railway construction also furnished work for about 50 men. Trade was dull and services likewise less active.

The demand for farm help in Ontario was light and orders received were easily filled. Logging camps were busy with their log haul, but there was little labour turnover. Mining also was very slack. Little improvement was noted in manufacturing, industrial conditions on the whole remaining quiet. At Chatham, however, tobacco factories were working at full capacity, with a total staff of over 1,000 employees. Elsewhere, little change was noted. Iron and steel establishments, clothing and textiles and auto accessories continued to report slackness, but manufacturers of foodstuffs and shoe and rubber factories were busier. Building was confined chiefly to repairs and renovations and to projects already started. The cold weather, too, had handicapped out-of-door construction. Road work continued, but with little demand for additional help. Trade was quiet. There was a steady call for regular domestic workers in the women's division, with difficulties still being experienced in obtaining capable help to meet all qualifications required by the employers. Factory employment for women also showed some improvement.

Requests for farm help under the Farm Improvement and Employment Plan throughout the Prairie Provinces were gradually declining, with applicants still plentiful. Logging was quiet, placements being confined largely to cordwood camps. A poorer mining season than usual, due to milder weather, resulted in reduced coal shipments and no demand for miners. Manufacturing was quiet. Building construction at Winnipeg showed little activity, although the outlook for new construction was brighter, but at Edmonton and Lethbridge improvement in this line was already recorded. A number of men also had been sent to forestry camps where work was available. Railway operation was only fair. Trade at Winnipeg was steady, but elsewhere rather dull. There was a scarcity of suitable applicants in the women's division for city positions and farm houshold vacancies under the bonus scheme were hard to fill.

Farming in British Columbia was very quiet, but in the fruit industry apple sales were improving and packers working steadily. Logging showed no gain and the re-opening of camps at Nanaimo planned for February 1 had been postponed until later, owing to market conditions. Many saw mills were on short time, others were operating for export orders only, with practically no turnover of labour. Mild weather had affected the coal market so that working days at several collieries had been reduced. Factories at Nelson were running as usual. Building construction showed little activity, with the exception of some minor repair work. Drydocks at Prince Rupert were active; however, waterfront work there was slack, but plentiful at New Westminster and Victoria. Trade was

72003—6½

quiet. In the women's division many applicants were registered, but few positions were available and at Nanaimo classes under the Dominion Provincial Youth Training Plan were very popular, so that a waiting list was on file of those desirous of being trained; this applied particularly to the ones interested in dressmaking, although the class for automobile mechanics there claimed the majority of applicants.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, January, 1939, summarized the employment situation as follows:—

Employment at December 12 showed little change, on the whole, as compared with November 14. It improved in coal mining, the motor vehicle, cycle and aircraft industry, metal goods manufacture, engineering, the cotton and linen industries, the silk and artificial silk industry, port transport service, the distributive trades, and hotel and boarding house service. On the other hand, employment declined in agriculture and horticulture, building, public works contracting, fishing, the pottery and hosiery industries, cocoa and chocolate manufacture, and certain other food preparing industries.

It is provisionally estimated that at December 12, 1938, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,263,000. This was 5,000 more than at November 14, 1938, and, on a comparable basis, about 10,000 more than at December 13, 1937, when, however, outdoor employment was adversely affected by bad weather.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at December 12, 1938, was 12·7, the same as at November 14. For December 13, 1937, the percentage (which excludes the classes brought into insurance in April, 1938) was 11·9. For persons insured under the general scheme the corresponding percentages were 12·9 at December 12, 1938, 13·0 at November 14, 1938, and 12·1 at December 13, 1937. For persons within the agricultural scheme the percentages were 8·9, 5·7 and 8·2 respectively.

At December 12, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,474,019 wholly unemployed, 294,708 temporarily stopped, and 62,645 normally in casual employment, making a total of 1,831,372; this was 3,269 more than at November 14, 1938, and 165,965 more than at December 13, 1937.

The total of 1,831,372 persons on the registers in Great Britain at December 12, 1938, included 1,076,387 persons with claims admitted for insurance benefit, 553,596 with applications authorized for unemployment allowances, 42,169 persons with applications for insurance benefits or unemployment allowances under consideration, and 159,220 other persons, of whom 33,638 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at December 12, 1938, was 1,918,583, as compared with 1,911,293 at November 14, 1938, and 1,755,491 at December 13, 1937.

United States

According to a press release issued on January 24, by Miss Frances Perkins, United States Secretary of Labor, there was a further increase of 200,000 in employment in non-agricultural industries in December.

In releasing these figures, it was stated that the most significant features of the December gain were the continued increase in factory employment, which normally declines at this season, and an unusually large expansion in retail trade.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Since July almost 1,200,000 workers have been re-employed in non-agricultural occupations. These figures do not include employees on projects of the Works Progress Administration and other Federal emergency agencies or certain temporary workers who are hired only during peaks of activity in some industries.

In addition to the gain of approximately 50,000 workers in manufacturing industries, approximately 440,000 additional persons were employed in stores between mid-November and mid-December to handle the holiday trade. Smaller increases in employment were reported in metal and bituminous-coal mining, wholesale trade, brokerage, and insurance. In quarries, dyeing and cleaning works, and private building construction there were substantial seasonal recessions. In building the decline was much less pronounced than usual in December. Class I railroads laid off nearly 18,000 workers. The seasonal reductions in

employment in crude petroleum producing, utilities, hotels, and laundries were not large. The small decline in anthracite mining was contraseasonal.

The rise of 0·7 per cent in factory employment continued the succession of increases which began in July, 1938, although in December employment normally declines by about 1 per cent. The gain of 3·0 per cent in factory pay-rolls was much more pronounced than the usual seasonal increase of 0·4 per cent and represented an addition of $4,800,000 in weekly disbursements to factory wage-earners.

Forty-nine of the 87 manufacturing industries surveyed by the Bureau reported gains in employment and 63 reported increased pay rolls. The increases in employment, in most instances, were either more pronounced than seasonal or were contraseasonal, while most of the declines were smaller than usual. The most pronounced gains were in the durable goods industries, in which employment rose 0·7 per cent, as compared with 0·3 per cent in the nondurable goods industries.

In retail trade the employment gain of 13 per cent between mid-November and mid-December reflected the expansion necessary to handle holiday volume and was the most pronounced employment increase in this month during the last 10 years. In the general merchandising group, composed of department, variety, and general merchandise stores and mail-order houses, the gain of 38·5 per cent in employment brought the December employment index (146·6 per cent of the 1929 average) to the highest level shown during the past decade, and represented a substantially larger gain than the usual December increase of 26 per cent. Pronounced gains were also reported in the following lines of retail trade: jewellery, 18·9 per cent; apparel, 12·7 per cent; furniture, 5·3 per cent; hardware, 4·6 per cent; drugs, 3·4 per cent; coal, wood and ice, 2·9 per cent; automotive, 1·3 per cent; and food, 0·9 per cent. In wholesale trade a contraseasonal employment gain of 0·5 per cent added 6,400 employees to pay rolls, which showed the largest number employed at any time since February, 1938.

The employment gain of 2·4 per cent, or 1,600 workers, in metal mines continued the upward movement of the last four months and brought the employment level above that of any month since February, 1938. Bituminous coal mines took on 2,300 additional workers. Quarries and oil wells curtailed employment slightly less than seasonally. Anthracite mines had 1,300 fewer men employed in mid-December than in mid-November, but pay rolls in this industry rose 16·3 per cent.

Private building construction again reported a smaller-than-seasonal decline of 6·1 per cent in employment, the smallest curtailment reported between November and December in the last 7 years. Pay rolls decreased 5·6 per cent, according to reports received from 9,282 contractors employing 79,000 workers. These reports do not cover public construction projects financed by the Public Works Administration, the Works Progress Administration, the Reconstruction Finance Corporation, or by regular appropriations of the Federal, State, and local governments. Employment in public building construction financed from Federal funds increased slightly as the P.W.A. program expanded, but this gain was more than offset by reductions in road work, both Federal and State.

Work of National Labour Relations Board (U.S.A.) in 1937-38

The National Labour Relations Board (United States) recently issued its third annual report for the fiscal year 1937-38. Summarizing its activities, the Board reported as follows:

The 12 months of the past fiscal year, ending June 30, 1938, comprehended for the National Labour Relations Board more cases handled and more disposed of than did all the other 28 months of its activities since October, 1935.

Twelve thousand six hundred and thirty-two cases were under consideration in this one year, involving 3,131,688 workers.

Eight thousand eight hundred and fifty-one cases were written off the books, involving 1,845,818 workers.

Ninety-five per cent of the 8,851 cases were closed without necessity of formal hearing.

Only 5 per cent were closed after issuance of Board decisions and orders.

Other significant data for the fiscal year are:

The Board settled 771 strike cases.

It held 830 consent and 258 directed elections.

It secured 4,621 settlements through the voluntary co-operation of all parties.

Forty-two decimal eight per cent of all cases closed were dismissed by the Board or withdrawn by the parties.

The Board disposed of 74·3 per cent of A.F. of L. cases, and 67·1 per cent of C.I.O. cases.

Settlements preceding formal action were secured in 52·5 per cent of A.F. of L. cases, and 52·7 per cent of C.I.O. cases.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages that those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;
>
> "The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is

vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be bept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Fisheries

Repairs and overhaul of C.G.S. *Malaspina.* Name of contractors, Victoria Machinery Depot Co., Ltd., Victoria, B.C. Date of contract, January 19, 1939. Amount of contract, $2,370 plus 30 cents per pound for zinc plates. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 75
Blacksmiths' helpers	0 55
Boilermakers	0 86½
Boilermakers' helpers	0 65
Bricklayers	0 90
Carpenters—ships	0 75
Caulkers—iron	0 86½
Caulkers—wood	0 75
Electricians	0 68
Electricians' helpers	0 50
Machinists	0 75
Machinists' helpers	0 50
Moulders—iron	0 75
Painters	0 75
Patternmakers	0 84
Platers	0 86½
Plumbers and pipe fitters	0 71
Plumbers and pipe fitters' helpers	0 50
Punch and shear men	0 74
Riggers	0 65
Riveters	0 86½
Rivet holders	0 74
Rivet heaters	0 66
Ships' fitters	0 86½
Teamsters	0 45
Teamsters with team and wagon	0 85
Welders—acetylene	0 80
Welders—electric	0 86½
Truck drivers	0 45

Hours: 8 per day and 48 per week.

NATIONAL HARBOURS BOARD

Construction of foundation for a movable highway bridge at the Princess Louise Dock, Quebec, P.Q. Name of contractors, Angus Robertson Limited, Montreal, P.Q. Date of contract, January 13, 1939. Amount of contract, approximately $18,129. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 60
Gas or electric	0 55
Compressor operators (gas or electric)	0 55
Crane operators (steam, gas or electric)	0 70
Compressor operators (steam)	0 60
Drill runners	0 50
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	14 00
Diver's tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Electricians	0 65
Engineers operating, steam—single or double drums	0 60
three or more drums	0 70
Engineers on steel erection	0 75
Firemen, stationary	0 45
Hoist operators (gas or electric)	0 55
Labourers	0 40
Machinists	0 65
Motor truck drivers	0 45
Motor truck driver and truck—	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45

Steam shovel operator	1 12½
Steam shovel firemen	0 90
Steam shovel cranemen	0 74⅛
Steam shovel oilers	0 60
Tractor operators—gas	0 65
Team & scraper	0 85
Team & plow	0 85
Watchman	0 45

Interior plastering of the hospital at the R.C.A.F. Station at Trenton, Ont. Name of

contractor, Mr. William McKenna, Belleville, Ont. Date of contract, January 5, 1939. Amount of contract, $3,200. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 70
Labourers	0 40
Lathers, wood	0 65
Lathers, metal	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45

Supply and erection of six travelling cranes at the Joint Service Magazines, Esquimalt, B.C. Name of contractors, John T. Hepburn, Ltd., Toronto, Ont. Date of contract, December 29, 1938. Amount of contract, $6,500. A fair wages schedule was included in the contract for the erection work as follows:—

	Per hour
Labourers	$0 45
Machinists	0 75
Painters	0 65
Structural steel workers	1 12½

Department of Public Works

Construction of a wharf at Dault's Bay, Simcoe Co., Ont. Name of contractors, W. G. Campbell Engineering and Construction Co., Ltd., Toronto, Ont. Date of contract, November 22, 1938. Amount of contract, approximately $5,700. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Carpenters & joiners	0 60
Compressor operators (gas or elec.)	0 45
Driver	0 35
Driver—horse & cart	0 50
Driver—team and wagon	0 65
Engineers, operating steam—

	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00

Reconstruction of a wharf at Ladysmith, Nanaimo District, B.C. Name of contractors, James McDonald Construction Co., Ltd., Victoria, B.C. Date of contract, December 27, 1938. Amount of contract, approximately $4,630.80. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Construction of a wharf at Bathurst, N.B. Name of contractors, T. C. Gorman Construction Co., Ltd., Montreal, P.Q. Date of

contract, December 12, 1938. Amount of contract, approximately $94,272.30. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 50
Timbermen and cribmen (measuring, scribing and by the use of axe, adze, etc., cutting and fitting timber)	0 37½
Labourers	0 30
Blacksmith	0 50
Blacksmith's helpers	0 35
Boatmen (rowboat)	0 30
Motor boat operator	0 35
Cement and concrete mixer operator:	
Gas	0 40
Steam	0 55
Pile driver engineer	0 55
Pile driver foreman	0 65
Pile driver fireman	0 35
Compressor operator (gas or electric)	0 40
Engineer, operating, steam (single or double drums)	0 55
Firemen, stationary	0 35
Hoist operator (gas or electric)	0 40
Machinist	0 55
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Drivers	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Welders and burners (acetylene)	0 50
Watchman	0 25
	Per day

Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00

Renewal of float and approach at Osland Park, Skeena District, B.C. Name of contractors, Skeena River Piledriving Co., Osland, B.C. Date of contract, December 16, 1938. Amount of contract, approximately $5,013.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 45
Pile driver foreman	1 25
Pile driver engineers	1 12½
Pile driver men	1 00
Pile driver boommen	1 00
Pile driver bridgemen	1 00
Pile driver firemen	0 68¾
Watchman	0 45

Construction of a breakwater at Pictou Island, N.S. Name of contractor, Mr. James N. Kenney, Truro, N.S. Date of contract, December 29, 1938. Amount of contract, approximately $14,486. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Boatmen (rowboat)	0 35
Driver	0 35
Driver, horse & cart	0 50
Driver, team & wagon	0 65
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver & truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Pile driver foreman	0 70
Pile driver engineer	0 60
Pile driver firemen	0 40
Pile driver derrick engineers	0 60
Pile driver derrick firemen	0 40
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of harbour improvements at Dingwall, Victoria Co., N.S. Name of contractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, January 4, 1939. Amount of contract, approximately $173,280. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 50
Blacksmiths' helpers	0 35
Boatmen (rowboat)	0 30
Carpenters & joiners	0 50
Compressor operators (gas. or elec.)	0 40
Drill runners	0 40
Engineers, operating steam:	
Single or double drums	0 55
Three or more drums	0 65
Engineers, loco. crane:	
Steam, gas. or electric	0 60
Firemen, stationary	0 35
Hoist operators (gas. or elec.)	0 40
Labourers	0 30
Machinists	0 55
Motor boat operators	0 35
Motor truck drivers	0 35
Motor truck driver & truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Powdermen	0 40
Shovel operators (gas. or elec.)	0 85
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Timberman and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 37½
Watchmen	0 25
Deck hands	0 30
Sawmen	0 30

Construction of an addition and alterations to the public building at Bathurst, N.B. Name of contractor, Mr. Joseph A. Pinault, Bathurst, N.B. Date of contract, November 17, 1938. Amount of contract, $9,850 and unit prices for any additional work.

	Per hour
Brick & hollow tile layers	$0 70
Brick & hollow tile layers' helpers (mixing & tempering mortar)	0 35
Carpenters & joiners	0 50

	Per hour
Cement finishers	0 50
Cement & concrete mixer operators:	
Steam	0 55
Gas. or elec.	0 40

Watchman	0 25

Construction of fishermen's floats and approach at Victoria, B.C. Name of contractors, James McDonald Construction Co., Ltd., Victoria, B.C. Date of contract, December 15, 1938. Amount of contract, approximately $4,619.44. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Construction of a public building at Gilbert Plains, Man. Name of contractors, The Dauphin Construction Co., Ltd., Dauphin, Man. Date of contract, January 10, 1939. Amount of contract, $12,775 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers—(mixing and tempering mortar)	0 42½
Carpenters and joiners	0 70
Cement and concrete mixer operators—	
Steam	0 65
Gas or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 75
Engineers, operating, steam:	
Single or double drums	0 70
Three or more drums	0 75
Engineers on steel erection	0 85
Firemen, stationary	0 45
Labourers	0 35
Lathers, metal	0 70
Lathers, wood	0 65
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 65
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 42½
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 42½
Roofers, felt and gravel	0 40
Sheet metal workers	0 65
Stonecutters	0 80
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 42½
Structural steel workers	0 85
Watchman	0 30
Welders and burners on steel erection	0 85

Construction of an extension to the breakwater at Denman Island, Comox-Alberni District, B.C. Name of contractors, Nickson Construction Co., Ltd., Vancouver, B.C. Date of contract, December 20, 1938. Amount of contract, approximately $11,067. A fair wages schedule was included in the contract as follows:—

	Per hour
Boomman	$1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver man	1 00

Construction of an extension to the wharf at Bass River, Colchester Co., N.S. Name of contractor, Mr. R. M. Hall, Halifax, N.S. Date of contract, December 31, 1938. Amount of contract, approximately $7,919. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 50
Blacksmiths' helpers	0 35
Boatmen (rowboat)	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Drivers	0 30
Hoist operators (gas or electric)	0 40
Labourers	0 30
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Pile driver foreman	0 65
Pile driver engineer	0 55
Pile driver fireman	0 35
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)	0 37½
Watchmen	0 25

Construction of a wharf at Ile a la Grosse, Sask. Name of contractor, Mr. A. Jules Marion, North Battleford, Sask. Date of contract, October 13, 1938. Amount of contract, approximately $9,450. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 40
Labourers	0 35
Driver	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Timbermen or cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)	0 50
Pile driver foreman	0 75
Pile driver engineer	0 65
Pile driver fireman	0 45
Pile driver derrick engineer	0 65
Pile driver derrick fireman	0 45
Watchman	0 30

Construction of a public building at Birtle, Man. Name of contractors, Manitoba Engineering Co., Ltd., Winnipeg, Man. Date of contract, December 19, 1938. Amount of contract, $10,895 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 42½
Carpenters and joiners	0 70
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gas or electric	0 45
Drivers	0 35

Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Painters and glaziers	0 55
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Sheet metal workers	0 60
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 40
Watchman	0 30

Construction of a public building at Jasper, Alta. Name of contractors, Poole Construction Co., Ltd., Edmonton, Alta. Date of contract, January 11, 1939. Amount of contract, $15,438.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas. or electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 85
Engineers on steel erection	0 95
Engineers, operating, steam:	
Single drum	0 65
Double drum	0 90
Firemen, stationary	0 50
Labourers	0 45
*Lathers—metal	0 75
Lathers—wood	0 75
Linoleum layers	0 60
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
Ornamental iron workers	0 95
Painters and glaziers	0 75
Plasterers	1 00

	Per hour
Plasterers' helpers (mixing and tempering material)	0 55
Plumbers and steamfitters	0 95
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers, felt and gravel, patent	0 50
Roofers, sheet metal	0 75
Roofers, shingles (wood, asbestos)	0 90
Sheet metal workers	0 75
Stonecutters	1 00
Stonemasons	1 10
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 95
Watchman	0 40
Waxers and polishers	0 50
Welders and burners (on steel erection)	0 95
*(Metal furring, tied-on lath work and attached ceilings)	0 90

Wharf construction and dredging work at Grand Metis, Matane Co., P.Q. Name of contractors, Messrs. Pierre Bélanger and Adélard Bélanger, Sayabec, P.Q. Date of contract, November 22, 1938. Amount of contract, approximately $13,820.92. A fair wages schedule was included in the construction contract as follows, the general fair wages clause being included in the dredging contract:—

	Per hour
Blacksmith	$0 50
Blacksmith's helpers	0 35
Boatmen (rowboats)	0 30
Carpenters and joiners	0 50
Compressor operators (gas. or elec.)	0 40
Drill runners	0 40
Fireman (stationary)	0 35
Engineer, operating, steam (single or double drum)	0 55
Engineer, loco. crane, (steam, gas. or elec.)	0 60
Labourers	0 30
Machinists	0 55
Pile driver foreman	0 65
Pile driver engineer	0 55
Pile driver fireman	0 35
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Timberman and cribman (measuring, scribing and by the use of the axe, adze, etc. cutting and fitting timber)	0 37½
Watchman	0 25

Construction of a breastwork extension at Grande Entrée (West Point), M. I., Gaspé Co., P.Q. Name of contractor, Mr. Wm. Harney, Quebec, P.Q. Date of contract, January 11, 1939. Amount of contract, approximately $5,991.98. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 50
Boatmen (rowboats)	0 30
Carpenters and joiners	0 50
Compressor operators	0 40
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Drivers	0 30
Drill runners	0 40
Engineers, loco. crane (steam, gas. or elec.)	0 60

Riveters	0 50
Riveter's helpers	0 40
Air frame construction and assembly—Con.	Per hour
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—	
1st year	0 20
2nd year	0 25
3rd year	0 35

NOTE.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

Major reconditioning of Fairchild 71 monoplane. Name of contractors, Fairchild Aircraft Ltd., Longueuil, P.Q. Date of contract, January 16, 1939. Amount of contract, $5,641.80. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Atlas AC landplane. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, January 17, 1939. Amount of contract, $8,514.60. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Atlas A/C landplane. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, January 17, 1939. Amount of contract, $7,721.64. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Atlas AC landplane. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, January 18, 1939. Amount of contract, $7,936.92. The preceding fair wages schedule was also included in this contract.

Repair and modification of Vickers floats, complete with chassis. Name of contractors, Canadian Vickers Ltd., Montreal, P.Q. Date of contract, January 31, 1939. Amount of contract, $1,150. The preceding fair wages schedule was also included in this contract.

National Housing Statistics

Honourable Charles A. Dunning, Minister of Finance, recently released figures showing National Housing Act loans for January aggregating $645,864. The total for the corresponding month last year was $456,213. Approval was given to 123 loans, providing for 187 family housing units, compared with 50 loans for 140 units in January, 1938.

January operations bring the total of approved loans under the Dominion Housing Act and Part I of the National Housing Act to $28,323,866, providing housing accommodation for 7,319 Canadian families. Since August last, approval has been given to 1,427 National Housing Act loans. Of these, 1,309 have been for single family houses, 73 (mostly in Quebec) have been for two-family houses, and 45 loans have been for multiple family houses including 4 family duplexes.

72003—7½

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Transportation and Public Utilities: Electricity and Gas

WINNIPEG, MANITOBA.—THE WINNIPEG ELECTRIC COMPANY AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCALS NOS. 1037 AND 435.

Agreement reached following report of board under the Industrial Disputes Investigation Act which is noted on page 126 of this issue.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Preference in employment to be given to union members. No discrimination to be shown by the Company against any employee for being or not being a member of the union.

Hours for day men: 8 per day, 4 on Saturdays, a 44-hour week. Hours for shift men: 8 per day, 88 per two-week period.

Overtime for day men: time and one-half to midnight; work after midnight to 8 a.m., and work on Sundays and nine specified holidays double time. Overtime for shift men: double time except for the first 4-hour period of the time following the regular shift, which shall be paid at time and one-half.

Wages per hour: foremen (senior) 99 cents, foremen 98 cents, foremen sent to do out of town work 98 cents or 86 cents with board, troublemen and linemen on emergency truck 90½ cents, sub-foremen 90½ cents, linemen journeymen 88½ cents, linemen sent to do out of town work, 88½ or 76½ cents with board (increases of 1½ cents per hour in all the above cases); linemen hired on the job outside of town for rural work 75 cents, groundmen 47½ cents (these two classes were not in the previous agreement); apprentice linemen from 60½ cents during first year to 82½ cents during fourth year, meter installers and meter repairers 81½ cents (increases of one cent per hour in these cases); helper apprentices 38 cents for first year (an increase of ½ cent), 50½ cents during second year (an increase of 3½ cents), 65½ cents during third year (an increase of 9 cents), 65½ cents during fourth year (an increase of one cent); cable splicers when working in this capacity 93½ cents (an increase of 1½ cents); lamp trimmers 70 cents, station maintenance men (journeymen) 84½ cents (increase of one cent); helpers 38 cents for first year (an increase of ½ cent), 48 cents during second year, 57½ cents during third year and 65½ cents during fourth year (increases of one cent).

Vacation: employees desiring two weeks' holidays to notify the superintendent at least 14 days prior to date of holidays, and when satisfactory arrangements are made they shall be allowed the time off.

Employees sent out of town to have transportation and board paid if work lasts not more than one month. If men return to the city at night, board will not be paid for. All permanent men sent to do out of town work to have transportation paid but not their board, or if provided with board to be paid 12 cents per hour less than men working in the city.

Apprentices to serve for four years in the trade.

Seniority to be considered in laying off men, provided that efficiency is the governing factor.

Collective Labour Agreements Act, Quebec

The following agreements and amendments and cancellations of agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

Bakers, Sorel (cancellation)
Bakers, Montreal (amendment)
Glove cutters (work gloves), Province (amendment)
Men's and boys' hat and cap industry, Montreal (cancellation)
Corrugated paper box manufacturing industry, Province
Building trades, Montreal (correction)
Longshoremen (inland and coastal navigation), Montreal (cancellation)
Taxi drivers, Sorel (cancellation)
Butchers, Sorel (cancellation)
Garage employees, Quebec (amendment)
Shoe shiners, Montreal

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in the article on page 219 of this issue:—

ONTARIO

Carpenters, Kirkland and Larder Lake Zone.

SASKATCHEWAN

Carpenters, Moose Jaw.
Plumbers, Saskatoon.
Beauty culture, Swift Current.

ALBERTA

Taxi drivers, Calgary.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the Labour Gazette, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting the manufacture of corrugated paper boxes throughout the province and affecting shoe shiners at Montreal; amendments and corrections to other agreements; the repeal by Orders in Council of certain other agreements, all of which are summarized below. A request for the extension of new agreements affecting glove cutters (work gloves) throughout the province was published in the *Quebec Official Gazette* of December 31, and of those affecting the men's and boys' hat and cap workers throughout the province, building trades at Hull and sand and gravel workers throughout the province were published in the issue of January 28. In addition, Orders in Council were passed approving the constitution and by-laws of certain joint committees and approval of the levying of assessment as noted below.

Manufacturing: Vegetable Foods

Bakers, Sorel.—An Order in Council, approved January 16 and published in the *Quebec Official Gazette,* January 21, repeals the Order in Council making the agreement in this trade obligatory (Labour Gazette, September, 1937, page 1033).

Bakers, Montreal.—An Order in Council, approved December 23, and published in the *Quebec Official Gazette,* December 31, amends the previous Orders in Council for this trade (Labour Gazette, January, 1938, page 102) by providing that in bakeries employing one or two men there shall be a foreman at a minimum wage of $24 per week and by providing that the agreement be in force until June 30, 1939, and the conditions will be reconsidered sixty days prior to that date.

Manufacturing: Fur, Leather and Products

GLOVE CUTTERS (WORK GLOVES), PROVINCE OF QUEBEC.—An Order in Council, approved January 16, and published in the *Quebec Official Gazette,* January 21, amends the previous Order in Council for this trade (LABOUR GAZETTE, August, 1937, page 920) by providing that the agreement continue in force until the new one for which application for extension was published in the *Quebec Official Gazette,* December 31, is ratified by Order in Council.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' HAT AND CAP INDUSTRY, MONTREAL.—An Order in Council, approved January 12 and published in the *Quebec Official Gazette,* January 21, repeals the Orders in Council making this agreement obligatory in the Montreal district (LABOUR GAZETTE, January, 1938, page 102, August, page 944 and November, page 1298). Application for the extension of a new agreement for this industry throughout the province was published in the January 28 issue of the *Quebec Official Gazette.*

Manufacturing: Pulp, Paper and Paper Products

CORRUGATED PAPER BOX MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved December 23, and published in the *Quebec Official Gazette,* December 31, with correction in the issue of January 21, makes binding the terms of an agreement between three manufacturers of corrugated paper boxes and the three associations of their employees of these firms.

The agreement which covers the manufacturing of corrugated paper boxes and all other containers entirely or partly made of corrugated paper board, throughout the province, is to be in effect from December 31, 1938, to December 31, 1939.

Hours (except for shipping or repair men) not to exceed 60 per week, with however a weekly average for the year not to exceed 55 per week. The average weekly hours for an employee with less than one year's service is not to exceed 55 per week.

Overtime: time and one quarter.

Minimum hourly wage rates for male employees: foremen 45 cents, operators of corrugating machine 45 cents, operators of printing machines 35 cents, other operators and helpers 30 cents, truck drivers and general maintenance men 30 cents, stationary enginemen and machinists 40 cents, stokers 35 cents, other male employees 25 cents. Minimum hourly wage rates for female employees: inexperienced hands 17 cents, helpers 22 cents, experienced employees 26 cents. The minimum average rate for female employees is 25 cents and the minimum average for all employees (both sexes) is 30 cents. Wages above certain figures are not to be included in calculating this average.

Wage rates higher than the minimum rates which were being paid when the Order in Council came into effect are not to be reduced. The joint committee to classify all employees.

Construction

BUILDING TRADES, MONTREAL,—An Order in Council, approved December 23, and published in the *Quebec Official Gazette,* December 31, amends the previous Orders in Council for these trades (LABOUR GAZETTE, August, 1938, page 945) by a correction which does not affect the summary as given in the LABOUR GAZETTE.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.—An Order in Council, approved January 16, and published in the *Quebec Official Gazette,* January 21, repeals the previous Order in Council making this agreement obligatory (LABOUR GAZETTE, July, 1938, page 799).

Transportation and Public Utilities: Local Transportation

TAXI DRIVERS, SOREL.—An Order in Council, approved January 16, and published in the *Quebec Official Gazette,* January 21, repeals the Order in Council making this agreement obligatory (LABOUR GAZETTE, August, 1937, page 922).

Trade

BUTCHERS, SOREL.—An Order in Council, approved January 16, and published in the *Quebec Official Gazette,* January 21, repeals the Order in Council making this agreement obligatory (LABOUR GAZETTE, August, 1937, page 920).

Service: Business and Personal

GARAGE EMPLOYEES, QUEBEC.—An Order in Council, approved December 23, and published in the *Quebec Official Gazette,* December 31, amends the previous Orders in Council, (LABOUR GAZETTE, June, 1938, page 696 and December, page 1174).

The agreement is renewed from November 28, 1938, to November 27, 1939, and for another year if no notice of change is given.

Certain definitions are added in the agreement. The village of Loretteville is placed in Zone II.

Hours: the evening hours for which 10 per cent extra is to be paid are from 7 p.m. to 11 p.m.

Wages: in Zone II, the classes of superintendent or service manager at a minimum rate of $30 per week and foreman at $25 is added. In Zone I, journeymen mechanics, fitters, machinists, electricians, body men, wheelwrights, blacksmiths, welders, painters and upholsterers are divided into three classes, the minimum hourly wage rate for Class A is 45 cents, class B, 42 cents, class C 40 cents, while for first-year journeymen the minimum is 40 cents. However, those who under a certificate of competency issued up to November 28, 1938, were then entitled to 45 cents per hour will all be included in class A. In commercial establishments in Zone I the minimum wage rate for service men,

gas sellers, washermen, etc., is 25 cents per hour except for beginners who may be paid at 20 cents during their first year.

Apprentices in Zone I are limited to one apprentice to each three journeymen or fraction thereof, for qualified trades considered as a whole.

Any employer furnishing room and board to his employee without any obligation for the employee to accept, may deduct $1 per room per week and 20 cents per meal for meals furnished.

Shoe Shiners, Montreal.—An Order in Council, approved December 23, and published in the *Quebec Official Gazette,* December 31, makes obligatory the terms of an agreement between Le Syndicat National des Maîtres-Cireurs de Chaussures de Montréal (The National Union of Master Shoe Shiners of Montreal) and Le Syndicat Catholique des Employés Cireurs de Chaussures (The Catholic Union of Employed Shoe Shiners).

The Order in Council applies to the Island of Montreal and is to be in effect from December 31, 1938, to December 30, 1939.

Hours: 69 per week, distributed between 8 a.m. and 9 p.m. from Monday to Friday and 8 a.m. to midnight on Saturday. No work on Sundays, Christmas or New Year's days.

Wages: ordinary employees $8 per week, extra employees 15 cents per hour.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements are approved by Orders in Council and published in the December 31 and January 21 issues of the *Quebec Official Gazette:*

Employees of Red Mill.

Can and metal container manufacturing, Province of Quebec.

Building Trades, Three Rivers.

Building Trades, Sorel.

Building Trades, St. John.

Retail trade, Quebec.

Barbers and hairdressers, Valleyfield.

Approval of Assessment

The request of assessment by the joint committees of the following industries have been approved by Order in Council (*Quebec Official Gazette,* December 31):

Lithographing industry, Province of Quebec.

Printing trades, Montreal district.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

In four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction

CARPENTERS, KIRKLAND AND LARDER LAKE ZONE.—An Order in Council, dated January 17 and published in *The Ontario Gazette*, January 21, makes binding the terms of a schedule for carpenters and joiners from January 31, 1939, "during pleasure."

The territory covered includes the townships of Teck, Lebel, Gauthier, McVittie, McGarry and Hearst in the district of Temiskaming.

Hours: 9 per day, 5 on Saturdays, a 50 hour week.

Overtime: double time, except that 2 hours overtime may be done on Mondays to Fridays inclusive and on Saturdays up to 5 p.m. at time and one-half. Work done on Saturdays after 12 noon in order to permit the pouring of concrete may, however, be done at straight time. Work on Sundays and five specified holidays may only be done when authorized by the advisory committee which in such cases will decide whether such work will be done at time and one-half or double time.

Minimum wage rate for carpenters and joiners: 70 cents per hour until April 15, 1939, and 75 cents per hour thereafter.

Saskatchewan

Construction

CARPENTERS, MOOSE JAW.—An Order in Council, approved December 21, and published in *The Saskatchewan Gazette*, January 16, makes binding for the city of Moose Jaw and within ten miles of it, the terms of a schedule for carpenters from January 26, 1939, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44-hour week. In case of shift work, those working between 5 p.m. and 8 a.m. to work 7½ hours and be paid for 8 hours.

Overtime: time and one-half; work on Sundays and four specified holidays, double time.

Minimum hourly wage rates: journeymen carpenters 70 cents, foremen carpenters 80 cents, carpenters who are neither employers nor employees 90 cents.

Apprentices: any employer employing five or less journeymen carpenters may employ one apprentice. Not more than two apprentices shall be employed unless 20 or more journeymen carpenters are employed.

Wages for apprentices: from 30 cents per hour during first year to 60 cents during fourth year.

PLUMBERS, SASKATOON.—An Order in Council approved January 21 and published in *The Saskatchewan Gazette*, January 31, makes binding for the city of Saskatoon and the town of Sutherland the terms of a schedule for plumbers and steamfitters from February 10 "during pleasure."

Hours: 8 per day from Mondays to Fridays inclusive, a 40-hour week. Work may be done on Saturday mornings at regular rate if required for the protection of life or property and the setting of sleeves and inserts.

Overtime: time and one-half. Work on Sundays and eight specified holidays, double time.

Minimum wage rate: for plumbers and steamfitters $1 per hour.

Service: Business and Personal

BEAUTY CULTURE, SWIFT CURRENT.—An Order in Council, approved January 17, and published in *The Saskatchewan Gazette*, January 31, makes binding the terms of a schedule of wages and hours for the beauty culture industry in the city of Swift Current, from February 10, 1939 "during pleasure."

The terms of this schedule are similar to those of the one previously in effect which was summarized in the LABOUR GAZETTE, January, 1938, page 106, with these exceptions:

Hours continue at 50 per week, but it is now provided that there be no work on Wednesdays after 12 noon between January 1 and August 15, unless otherwise governed by city by-laws.

Wages and other conditions are similar to those in the previous agreement. A scale of minimum prices which must be charged customers for each operation is now included.

Alberta

TAXI DRIVERS, CALGARY.—An Order in Council, dated January 26 and published in *The Alberta Gazette*, January 31, makes binding the terms of a schedule for the taxi livery industry in the city of Calgary from February 10, 1939, "during pleasure."

Hours: 66 per week divided into 6 working days, which shall consist of 12 continuous hours of employment less one hour rest period in each day.

Wages: the guaranteed weekly minimum wage of regularly employed chauffeurs: from February 10, 1939, to March 31, 1939, and from October 1, 1939, to expiration of agreement, $13.50 per week plus 25 per cent commission on all receipts from fares and authorized credit accounts in excess of $54 per week; from April 1, 1939, to September 30, 1939, $12.50 per week plus 50 per cent commission on all receipts from fares and authorized credit accounts in excess of $50 per week. Wages of temporary chauffeurs to be *pro rata* of the above guaranteed minimum, with a minimum of $1.25 if called for one-half day or less and $2.50 if employed only one day in the week. All employers paying a higher rate than the above to their present employees may not reduce them, or if working less than 66 hours per week, may not increase such hours.

Chauffeurs are held responsible for any damage which they may cause employers' cars if occasioned directly by the negligence of the chauffeur, up to 50 per cent of the total cost of repairs but in no case to exceed $12.50 for any one accident or damage. Not more than $2 per week may be deducted from the chauffeur's wages in settlement of such indebtedness.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JANUARY, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight. The cost per week, in terms of retail prices, of a list of staple foods, fuel and rent entering into a family budget and the Dominion Bureau of Statistics weekly index number of wholesale prices were both slightly lower than in the previous month.

The cost per week of a list of twenty-nine staple foods entering into the budget for a family of five in terms of average retail prices in sixty-nine cities was $8.27 at the beginning of January as compared with $8.33 for December, 1938; $8.68 for January, 1938; $8.41 for January, 1937; $6.67 for March, 1933 (the low point in recent years); and $11.88 for January, 1930. The slight decrease during the month under review was due mainly to a seasonal fall in the cost of eggs. Other changes were relatively small, there being decreases in the cost of lard, butter and flour and increases in the cost of meats and potatoes. Including the cost of fuel and rent with that of foods the total cost of the list was $17.18 at the beginning of January as compared with $17.25 for December, 1938; $17.48 for January, 1938; $17.04 for January, 1937; $15.41 for June, 1933 (the low point during recent years); $22.17 for January, 1930; $21.52 for January, 1922; 26.92 for July, 1920 (the post war peak); and $14.49 for January, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of prices in 1926 as 100 changed little week by week during January and was 73·2 for the week ended January 27 as compared with 73·5 for the week ended December 30, 1938, and 73·4 for that ended December 2. The latest figures available on a monthly basis are for December, 1938, when the index was 73·3 as compared with 83·8 for January, 1938; 81·3 for January, 1937; 63·5 for February, 1933 (the low point during recent years); 95·3 for January, 1930; 97·1 for January, 1922; 164·3 for May, 1920 (the post war peak); and 64·9 for January, 1914. Of the eight principal groups in the classification according to chief component materials the only change of importance was in the Non-Ferrous Metals group which declined about 2½ per cent. Other group changes were, an advance in the Animals and Their Products group, and declines in the Vegetable Products group, the Fibres, Textiles and Textile Products group, the Iron and Its Products group.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of January of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such district with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made

for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Meat prices in the main were upward in January following a downward trend extending over several months. Sirloin steak averaged 25·7 cents per pound in January, 24·9 cents in December, 1938, and 28·6 cents in August, 1938. Mutton averaged 22·8 cents per pound in January, 22·2 cents in December, 1938, and 25·8 cents in June. Fresh pork was 23·3 cents per pound in January, 22·7 cents in December, 1938, and 27·4 cents in August. The price of breakfast bacon has been downward since August, 1938, from an average of 36·3 cents per pound to 30·5 cents in January, 1939. Egg prices were generally lower, fresh grades averaging 38·6 cents per dozen as compared with 44 cents in December. Flour was again fractionally lower in the average at 3·1 cents per pound as compared with 4·5 cents in January, 1938. Potato prices continued upward in most localities, the Dominion average being $1.24 per 90 pounds in January as compared with $1.18 in the previous month and 96 cents

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended January 27, 1939; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries are included in "Prices in Canada and Other Countries, 1938" which will be issued shortly as a supplement to the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 98 3 for December as compared with 98·4 for November. The index of food prices rose from 90·6 to 91·8 or 1·3 per cent during the month but the index for industrial materials fell from 102·5 to 101·7 or 0·8 per cent. Compared with the December, 1937, figure the general index showed a decrease of 8·6 per cent, prices of food were 12·1 per cent less and industrial materials and manufactures 6·9 per cent less.

The Statist index number on the base 1867-1877=100, was 89·1 at the end of December as compared with 87·4 at the end of November, an increase of 1·9 per cent for the month. As compared with December, 1937, the general index showed a decrease of 8·4 per cent and the yearly average for 1938 at 91·4 compares with 102·8 for 1937, a decline of 11·1 per cent. The index of prices of foodstuffs was 78·6 for December, being 4·2 per cent higher than in November

while that for materials was 96·8 or 0·7 per cent higher than the previous month.

Cost of Living.—The Ministry of Labour's index number, on the base 1914=100, was 155 at the end of December as compared with 156 a month earlier. During the month the index of food prices declined from 139 to 138, due to decreases in the prices of eggs, other changes being relatively unimportant. All the other groups making up the index were unchanged. During 1938 the general cost of living index declined 2·5 per cent and the index of food prices declined 4·9 per cent.

Eire

Cost of Living.—The cost of living index number of the Department of Industry and Commerce, on the base July, 1914=100, was 177 at mid-November, 1938, as compared to 173 three months previously. During the quarter the index of food prices increased from 159 to 163, that for fuel and lighting materials increased from 179 to 184, and that for clothing prices declined from 226 to 225. The index number of rents, which is published only once each year, was 129 for November, 1938, as compared to 128 a year earlier.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 666 for December as compared with 657 for November. The index of food prices increased from 634 to 648 during the month, there having been increases in all its component groups. The index of prices of industrial materials increased from 678 to 682, a decrease in the price of minerals and metals being more than offset by increases in the prices of textiles and sundries. The index based on gold currency, 1914=100, was 54 for December as compared with 53 for November.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·3 for December as compared with 106·1 for November. The index of prices of agricultural products increased from 106·8 to 107·2 due to increases in all its sub-groups with the exception of cattle which declined 0·1 per cent. The index of raw materials and semi-manufactured goods increased 0·1 per cent to 94·3 and the index for manufactured goods increased by a like percentage to 125·6.

Cost of Living.—The official index number on the base 1913-1914=100, was 125·3 for December as compared to 125·0 for November. The index of prices of sundries decreased less than 0·1 per cent, rent was unchanged and all the other groups showed small increases the most important of which was one of 0·4 per cent in food which was 121·3 for December.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 100 for October as compared to 101 for September. The index of food prices declined from 104 in September to 103 in October while the index for non-foods declined from 99 to 98.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 106 for November, 1938, as compared to 105 for October. The food, rent and clothing groups were unchanged but the fuel and lighting index increased from 105 to 106 and that for sundries increased from 94 to 96.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number, on the base 1926=100, was 77·5 for November as compared with 77·6 for October. Of the ten groups making up the index, five groups showed increases for the month, four showed decreases, and the textile products group was unchanged. The increases were as follows: farm products, 1·5 per cent, hides and leather products, 1·3 per cent, foods 0·8 per cent, miscellaneous products 0·6 per cent and house-furnishing goods, 0·1 per cent. The groups showing decreases were: fuel and lighting materials, 2·3 per cent, building materials, 0·7 per cent, chemicals and drugs, 0·6 per cent, and metals and metal products 0·4 per cent. The decreases outweighed the increases and the general index was the lowest in four years, being 7·0 per cent lower than in November, 1937.

Cost of Living.—The index number of the Industrial Conference Board on the base 1923=100, was 85·8 for December as compared to 85·6 for November. The index of food prices rose 1·0 per cent during the month to 80·3. Other items showed only minor changes. Living costs in December, 1938, were 3·2 per cent lower than in December, 1937, 14·3 per cent lower than in December, 1929, but 19·7 per cent higher than at the low point of 1933.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FOURTH QUARTER OF 1938

THE number of fatal industrial accidents, (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the fourth quarter of 1938 was 262, there being 92 in October, 89 in November and 81 in December.

The report for the third quarter of 1938, showing 286 fatalities, was given in the LABOUR GAZETTE, November, 1938, page 1316. In the fourth quarter of 1937, 279 fatal accidents were recorded (LABOUR GAZETTE, February, 1938, page 229).

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 37 fatalities for the first three quarters of 1938.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Transport Commissioners of Canada from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the fourth quarter of 1938 were as follows: agriculture, 45; logging, 34; fishing and trapping, 6; mining, non-ferrous smelting and quarrying, 71; manufacturing, 20; construction, 27; electric light and power, 3; transportation and public utilities, 36; trade, 7; service, 13.

Of the mining accidents, 32 were in "metalliferous mining", 25 in "coal mining," 12 in "non-metallic mineral mining and quarrying, n. e. s.." and 2 in "structural materials."

Of the accidents in manufacturing, 1 was in "vegetable foods, dring and tobacco," 1 in "animal foods," 7 in "saw and planing mill products," 2 in "wood products," 3 in "pulp, paper and paper products," 5 in "iron, steel and products," and 1 in "non-metallic mineral products."

In construction there were 11 fatalities in "buildings and structures," 14 in "highway and bridge," and 2 in "miscellaneous construction."

In transportation and public utilities there were 14 fatalities in "steam railways," 1 in "street and electric railways," 9 in "water transportation," 2 in "air transportation," 8 in "local and highway transportation," 1 in "storage," and 1 in "express."

In trade there were 7 fatalities in "retail."

Of the fatalities in service, 5 were in "public administration," 1 in "custom and repair," 6 in "personal, domestic and business," and 1 in "professional establishments."

The most serious disaster during the period under review occurred in a coal mine at Sydney Mines, Nova Scotia, on December 6, when the steel haulage cable controlling the descent of the riding rake snapped, for some cause not definitely determined by the inquiry, and 21 miners lost their lives and many others were injured in the pile up of a run away string of 26 cars carrying over 250 miners down to the work in the undersea pit. An 11-point program of safety measures, designed to prevent a recurrence of such an accident was recommended by a union committee at a public inquiry under the provincial Coal Mines Regulation Act.

Another serious accident occurred in an asbestos mine at Thetford Mines, Quebec, on December 7, where 7 miners were killed when buried under a rock slide owing to the collapse of a tunnel wall.

Other accidents involving the loss of two or more lives were as follows: two miners were overcome with cold after a tractor broke through the ice, near Miller Creek, Yukon, about November 20. Two miners were killed in a premature dynamite explosion, near Timmins, Ontario, on December 14; and another two miners lost their lives when trapped underground by a rock burst following an explosion at Kirkland Lake, Ontario, on December 27.

At Valley Junction, Quebec, two labourers on highway construction were killed when buried under a cave-in of a wall of a pit for a bridge, on November 24.

When a plane crashed near Regina, Saskatchewan on November 16, two pilots were killed.

A caretaker and a helper were burned to death in a furnace explosion at Montreal, Quebec, on October 6.

During this quarter one fatality occurred in Canadian waters which is not included in the statistical record. This is owing to the fact that the seaman killed was employed on a ship registered in another country. On October 22, he fell into a hold of a British freighter, at Sorel, Quebec, and died on October 28.

Supplementary List of Accidents

A supplementary list of accidents occurring during the first three quarters of 1938 has been compiled which contains 37 fatalities, of which 5 were in logging, 1 in fishing and trapping, 5 in mining, non-ferrous smelting and quarrying, 8 in manufacturing, 9 in construction, 1 in electric light and power, 5 in transportation and public utilities, 2 in trade, and 1 in service. Two of these accidents occurred in January, 2 in March, 1 in April, 8 in June, 2 in July, 10 in August and 12 in September.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Damages Awarded Against Vancouver Moving Picture Operator and Picketing Enjoined

ON December 28, Mr. Justice D. A. McDonald in the British Columbia Supreme Court granted an injunction against picketing and awarded damages for $2,000 and costs against the local Union of the International Alliance of Theatrical Stage Employees and Moving-Picture-Machine Operators and the Vancouver Trades and Labour Council.

On October 5, 1937, the proprietor of the Hollywood Theatre, Ltd., entered into an agreement with the union regarding working conditions. The agreement, as presented by the union, provided that the plaintiff should employ only projectionists supplied by the union at the wage rates agreed on but the plaintiff amended the agreement before signing it to add "except and only when members of the family of the Party of the First Part are not available." The reason for this addition to the agreement was that the proprietor expected his son to be licensed as a projectionist in the near future. At the trial the union contended that there was an understanding that the plaintiff would continue to employ one union man even after the plaintiff's son was qualified. This the defendant denied and the Court considered that there was no satisfactory evidence to establish such an understanding.

On May 7, 1938, the plaintiff informed the union in reply to an inquiry that he did not intend to engage a union projectionist and that evening picketing of the theatre was begun by four men bearing notices that the "Hollywood Theatre does not employ members of the B C. Projectionists Union affiliated with the Vancouver, New Westminster Trades and Labour Council." Handbills were also distributed in the vicinity of the theatre conveying the same information and outlining the agreement as the union claimed it should be interpreted. Some hand bills also stated that the "union was not responsible for the coloured people marching in front of the Hollywood Theatre."

The Trades and Labour Council supported the union and on June 11 for about an hour there was a parade, in front of and near the theatre, of about 60 men walking in pairs wearing sashes indicating their unions. After

this demonstration, the plaintiff obtained an interim injunction and picketing was discontinued on June 21.

The Court held that the language of Mr. Justice Donovan of the Manitoba Court of King's Bench in *Allied Amusements Ltd.* v. *Reaney* applied to the case. He quoted from that judgment:

> There can on the evidence be no doubt that the defendants acted in concert in reference to a pre-arranged plan, and that what was subsequently done was in pursuance of that plan. The defendants, without lawful justification, were attempting to compel the plaintiff to do what it was not legally obliged to do in conducting its business. . . .
>
> To say that the general intention of the defendants was the furtherance of labour interests does not excuse unlawful means to achieve the immediate intention, which here was to so annoy, coerce and injure the plaintiff that there would be a surrender of a part of the conduct of its business.

The latter judgment was affirmed by the Manitoba Court of Appeal which approved the judgment of the British Columbia Court of Appeal in *Schuberg* vs. *Local International Alliance Company* which on an equal division of the Court, affirmed the judgment enjoining picketing.

Mr. Justice McDonald considered that he was bound to follow the decision in the Schuberg case. In awarding costs, it was pointed out that four defendants, who had become members of the executive of the Trades and Labour Council after the acts complained of had taken place, were added shortly before the trial. No remedy was sought against these individuals and the only costs incurred by reason of their being parties were the costs of the motion to add them as defendants. The defendants contended that the costs of the motion should be charged to the plaintiffs but the Court held this contention unsound and the plaintiffs entitled to these costs as well as the general costs of the action. *Hollywood Theatre Limited* v. *Tenney et al* (1939) 1 Western Weekly Reports 90.

Manitoba Court of Appeal Affirms Judgment Against Picketing of Theatre

On January 16, the Manitoba Court of Appeal dismissed with costs an appeal by the defendant officers of two trade unions of moving-picture projectionists in Winnipeg. The defendant unions were Local 8 of the All-Canadian Congress of Labour and Local 299 of the International Alliance of Theatrical Stage Employees and Moving-Picture Machine Operators of the United States and Canada. The appeal was against the judgment of Mr. Justice Taylor granting an injunction permanently restraining the defendants from picketing the premises of the plaintiff theatre owner and awarding $1,000 damages and costs (Labour Gazette, 1938, p. 962). The judgment of the Court was given by Mr. Justice Robson, Mr. Justice Trueman dissenting in part.

A dispute between rival unions of motion picture projectionists in Winnipeg gave rise to the action. The International Alliance had agreements with some chain theatres while the local of the All-Canadian Congress had agreements with some independent theatres. Until towards the end of 1936, the All-Canadian Congress of Labour had affiliated with it the One Big Union but at that time there was a split in the Congress and a new organization was set up under the name of the Canadian Federation of Labour which included the O.B.U.

From February 7, 1937, the plaintiff, in this case, had been operating under a written agreement with Local 8 of the All-Canadian Congress by which the Local was to furnish the projectionist for his theatre. On July 26, 1937, the plaintiff was notified that the agreement was to be terminated on September 1, and he, thereupon, entered into an agreement with Projectionists' Union No. 1 of the O.B.U. that until June 30, 1940, he would employ only projectionists who were members of Local 1 of the O.B.U. In explanation of the notice cancelling the agreement, the secretary of Local 8 informed the plaintiff that 30 days' notice of cancellation of the agreement was given to enable a new agreement to be negotiated. It appears from the evidence that the projectionist employed under the All-Canadian Congress agreement became a member of Local 299 of the International Union and that he was dismissed when the agreement was entered into with the O.B.U. Picketing of the plaintiff's premises was carried on jointly by members of the All-Canadian Congress local and of the local of the International Union.

Speaking for the majority of the Court, Mr. Justice Robson stated:

> On the face of things it appears clear that plaintiff was selected by defendants for retaliation for not contracting with defendants for a projectionist, but it is also true that the defendants saw behind plaintiff the projectionists' unit of the One Big Union and were seeking to drive projectionists away from it by forcing their dismissal by the independent proprietors. The conduct of defendants has no sanction in law...
>
> Defendants contend that they did nothing beyond the exercising of economic pressure, which they say was legitimate in view of the fact that plaintiff did not resume union relations with the A.C.C. or adopt relations with the International and because he dismissed Hughes and employed a One Big Union projectionist. The argument of the defendants is that they had a right to take these measures in support of their organizations and to forward the economic principle of such unions...
>
> In the present case the learned trial Judge says the object of the picketing and distributing of handbills was not in any doubt; that the

matter was dealt with very frankly by the defendant Foster in his evidence; that the defendants supposed that by this means they could bring sufficient pressure to bear upon the plaintiff through the patrons of the theatre to compel him to discharge his O.B.U. employee and engage one of theirs. The learned Judge found also that as a result of the picketing and distribution of handbills dozens of plaintiff's patrons absented themselves from the theatre and that the plaintiff had suffered serious loss thereby particularly in the reduction of receipts and to some extent in the expenditure of moneys in different ways in an endeavour to regain his lost customers and attract new ones.

There is an implication in defendants' argument that the learned Judge's finding as to defendants' object was wrong and that the signs carried by the pickets and the bills or posters distributed were in themselves innocent things within the right of the defendants to exhibit or circulate. It is clear from the evidence that the handbills were intended for union men. Four hundred copies were distributed at the gates of Canadian National Railway shops. It is a simple inference that these men's union associations were with the International. Whether they read the bills as "Park Theatre does not employ International Union operator," or whether the word International was purposely in reduced size, the bill still meant that the plaintiff was not employing a union projectionist. Now clearly the district was one in which the population was largely composed of union men, probably mostly International...

It seems to me beyond question that for the defendants to publish to International men that an employer does not employ an International operator was meant to carry a sinister significance. The words were published in such circumstances that the recipients of the information were certain to believe that the Park Theatre management had been under some obligation towards the International in which it had defaulted. The witness Foster plainly stated the intention. The words cast abroad to that particular class in their own community carried an innuendo of wrongdoing on the part of the plaintiff bound to be harmful to him. It matters not whether the signs and bills were read as only charging that plaintiff did not employ a union projectionist (without regard to International) for that state of affairs may in the minds of union men be equally reprehensible. The effect on the patronage of the theatre tells the story.

I think the learned Judge's finding as to defendant's object and its success was well supported. . .

The plaintiff has also a good case in that the defendants were attempting by unlawful means to coerce plaintiff into (1) breaking his contract with Haysom and to employ their man Hughes; (2) breaking his contract with the One Big Union and to contract with a unit of the International or A.C.C. . . .

It seems to me that the evidence in this present case, and in fact the statements of the defendants who testified at the trial, show the purpose of injuring the plaintiff in his trade to accomplish their ends rather than that of engaging in fair competition in labour, and so I would hold that this case comes within *Quinn v. Leatham.* Attending at or near or approaching a house or other place in order merely to obtain or communicate information may be a step in the course of legitimate competition in the labour market or advancement of labour interests as was found to be the case in *Ward, Lock & Co. v. Operative Printers Soc.* (1906) 22 T.L.R. 327, and as is excepted from sec. 501 of the *Criminal Code,* R.S.C., 1927, ch. 36. Nothing here is meant to question that right within its true limits in the slightest degree. That right is put forward as the defence here. But with all respect to the learned counsel who advanced that view, I must say I think the acts of defendants here had another purpose, namely, to coerce plaintiff by direct injury to his trade and so do not come within the privilege of attending to obtain or communicate information.

I would hold also that the charge that defendants had conspired to injure plaintiff by the acts complained of was made out and that their conspiracy had had the damaging effect found by the learned Judge and so was actionable.

In his dissenting opinion, Mr. Justice Trueman distinguished between the position of the All-Canadian Congress local and the International local. Picketing by members of the latter, he considered due to the plaintiff's refusal to retain their man as projectionist, "something which he could not do without breach of his contract with the O.B.U. unit. It is not a legitimate trade dispute where one union tries to force a member upon an employer who is unable to retain him by reason of his obligations to another union." He would have dimissed the appeal of these defendants with costs. As regards the All-Canadian Congress local, he referred to evidence of a meeting of the independent theatre owners and their propectionists at which the former stated that they were making contracts with the O.B.U. so that it would be necessary for their employees to join the O.B.U. if they wished to keep their jobs. The view of the trial judge was

> that the sole issue in the action was whether the picketing was unlawful, and that what took place at the Furby Theatre meeting or what consequences ensued from it had no bearing upon the legality of the picketing. I am, with all respect, unable to agree. . . . The picketing by the A.C.C. was peacefully carried out and was entirely warranted by the circumstances to which I have referred and by the trade interest they were entitled to protect. I am therefore of opinion that the appeal of the defendants, who are sued as officers and members of the A.C.C., should be allowed with costs here and below. *Besler v. Matthews et al.* (1939) 1, W.W. R. 113.

Barber Convicted Under Saskatchewan Industrial Standards Act

The Crown was successful in appealing the dismissal of a charge against a barber in Saskatoon for violating the schedule of wages made binding under the Industrial Standards Act by charging a lower price for a haircut than that fixed in the schedule. According to the schedule agreed to by the master barbers and the employees under the Industrial Standards Act, the charge for a haircut for a person over 14 was to be 40 cents. The Magistrate dismissed the charge, accepting the plea of the defendant that he had given only a "hair trim" for which he had charged 25 cents. The District Court Judge, after considering the schedules applying to other

cities in Saskatchewan and hearing evidence of those concerned with the drawing up of the schedule held that there was no difference between the terms and that since the defendant was the proprietor of a one-man shop and therefore was an employer within the meaning of the Act, he was liable to the penalty provided. The minimum fine of $25 was imposed.

In connection with evidence submitted showing that prices varied with different zones in the province and the contention that a charge of 40 cents in some parts of the province was very high, the Court stated

> it is not the function of the Court to criticize the Act or the schedules adopted thereunder. The schedules have been adopted by the master barbers in strict conformity with the powers conferred by the Act. If the schedules do not produce all the results desired and hoped for, if they work a hardship on members of the trade and on a very considerable portion of the public under the present economic conditions, there is a provision for a reconsideration and amendment within the terms of the Act. *Rex v. Kenny,* (1939) 1 W.W.R. 182.

Injunction Against Picketing by Garment Workers' Union in Montreal

On December 31, 1938, Mr. Justice Surveyer in the Superior Court at Montreal granted an application for an interlocutory injunction restraining certain officers and organizers of the International Ladies' Garment Workers' Union and their representatives from picketing or in any manner interfering with or attempting to interfere with the business or employees of the Ideal Dress Company. The restraining order is to remain in effect until otherwise ordered.

In 1937, the union conducted an organizing campaign in the dress manufacturing industry in Montreal with a view to obtaining a collective agreement with the various employers in the industry. Samuel and Morris Lupovitch, owners of the Ideal Dress Company, refused to negotiate with the union. They were alleged by the union to have dismissed certain employees for union activities, whereupon a strike was called on November 25, 1937. Within the next few months the strikers were gradually replaced by other workers. Several court cases arose out of disturbances connected with the strike; some strikers were convicted of intimidation or assault and the charges against others were dismissed.

On December 11, 1937, Mr. Justice Surveyer issued an interim, ex parte, injunction which was continued from time to time pending the hearing of the action. On January 4, the court pointed out that the restraining order issued was not intended to prevent all picketing and subsequently the police permitted a limited number of pickets.

In the application for the injunction, the petitioners alleged that the union had threatened that unless they entered into an agreement to employ only members of the union they would call a strike and would, by violence and intimidation, compel the firm to give up business. They alleged further that the respondents had watched and beset the firm's place of business in an attempt to prevent its employees going to and from work; that at times as many as 250 and 300 people were massed in front of the firm's premises and that on December 1 stones were thrown and other acts of violence committed.

In reply, the union's representative stated that the firm was employing workers under conditions violating the Women's Minimum Wage Act and that the firm had resorted to "strong arm tactics and other illegal means to prevent their employees from enjoying their rights."

As regards the claim of the union that the provincial Women's Minimum Wage Act and orders thereunder were being violated by the Ideal Dress Company, charges against the firm under Section 415A of the Criminal Code of Canada, declaring certain acts done with a view to circumventing any minimum wage or other law of Canada to be a criminal offence, were dismissed in the Montreal police court on March 25, 1938, on the ground that the section did not apply to provincial legislation, but the charges were proved to the satisfaction of the court. (LABOUR GAZETTE, 1938, p. 468.)

In his judgment, Mr. Justice Surveyer pointed out that under Article 957 of the Code of Civil procedure an interlocutory injunction may be granted by any judge of the Superior Court at the time of the issuing of a writ of summons or while a suit is pending whenever the commission or continuance of any act or operation would cause great injury to the plaintiff. He indicated further that in deciding on the question of granting an injunction the court

> is governed by the consideration of the comparative mischief or inconvenience to the parties which may arise from granting or withholding the injunction; that if it appear that greater damage would arise to the plaintiff by withholding the injunction in the event of the legal right proving to be in his favour, than to the defendant by granting the injunction in the event of the injunction proving afterwards to have been wrongly granted the injunction will issue.

He considered that the "balance of convenience" was in this case

> overwhelmingly in favour of petitioners, who are by the acts of respondents and their associates, restrained in their liberty and prevented from carrying on their business in a manner satisfactory to themselves and to a large number of workmen, while the granting of an injunction will cause little, if any, appreciable damage to respondents.

Leave to appeal has been applied for by the respondents, *Lupovitch vs. Shane,* Superior Court, Montreal, December 31, 1938.

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] MARCH, 1939 [NUMBER 3

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

A FURTHER contraction was noted in industrial employment in Canada at the beginning of February, according to returns received by the Dominion Bureau of Statistics from 11,261 firms, each with a minimum of fifteen employees. The staffs of these firms at February 1 aggregated 1,026,635 persons, as compared with 1,042,258 at January 1. This reduction compared unfavourably with the small gain that usually, though not invariably, has been indicated at February 1 in the preceding years of the record, but was decidedly smaller than the loss reported at that date in 1938. The index, based on the 1926 average as 100, declined from 108·1 at January 1 to 106·5 at the beginning of February, as compared with 110·4 at the same date in 1938. At February 1 in preceding years it was as follows: 1937, 104·1; 1936, 98·4; 1935, 94·6; 1934, 91·4; 1933, 77·0; 1932, 89·7; 1931, 100·7; 1930, 111·6; 1929, 110·5; 1928, 102·0, and 1927, 96·6.

Unemployment in Trade Unions.—At the beginning of February, 1939, the unemployment percentage reported to the Department of Labour by local trade union members throughout Canada stood at 15·9 in comparison with percentages of 16·2 at the beginning of January, 1939, and 12·4 at the beginning of February, 1938. The February percentage was based on the reports received from 1,980 labour organizations involving a membership of 250,621 persons, 39,776 of whom were out of work.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed a decline from December, 1938, but a gain over January last year in the business recorded during the month of January, 1939, as shown by the average daily placements recorded. The most important changes under each comparison being in farming, construction and maintenance and services, a loss being shown in these industries in the first instance and a gain under the second. Vacancies in January, 1939, numbered 33,349, applications 78,133, and placements in regular and casual employment 32,132.

73986—1½

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $17.06 at the beginning of February as compared with $17.18 for January, the slight decrease being due to the lower cost of foods. Comparative figures for certain other dates are $17.39 for February, 1938; $17.12 for February, 1937; $15.41 for June, 1933 (the low point during recent years); and $22.12 for February, 1930. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100, changed little during the month and for the week ended March 3 was 73·2, the same as for the week ended January 27 as compared with 73·4 for the week ended January 6. Comparative figures for the index number on a monthly basis are 83·6 for February, 1938; 82·9 for February, 1937; 72·5 for February, 1936; 63·5 for February, 1933 (the low point in recent years); and 93·9 for February, 1930.

Business Statistics.—The table on page 238 gives the latest information available reflecting industrial conditions in Canada. The index of the physical volume of business in January, 1939, was two per cent lower than in December, 1938, but about one per cent higher than in January, 1938. Both imports and exports as well as the production of electric power were considerably higher in the month under review than in the preceding month but several other principal groups were lower, the index of mineral production indicating a volume for this group about 3½ per cent lower, car loadings 4 per cent, and construction 36 per cent lower. Manufacturing was little changed. Comparing January, 1939, with January, 1938, the figures for manufacturing, output of electric power and exports indicated higher volume, while decreases were indicated in mineral production, construction, car loadings and imports.

Information available for February, 1939, shows employment at a lower level than in the previous month and lower also than in February, 1938, while the value of contracts awarded advanced in both comparisons. The

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended March 3, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending February 25, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending February 25, January 28, 1939, and December 31, 1938; February 26, January 29, 1938, December 31, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

number of cars of revenue freight was slightly greater than in January but lower than in February, 1938.

Strikes and Lockouts.—The number of strikes and lockouts recorded for February was eight, involving 2,643 workers and resulting in a time loss of 24,791 man working days, the greatest time loss in any February since 1934. More than one-half of the time loss was caused by a strike of 1,000 rubber factory workers at Kitchener, Ont. There was also considerable time loss due to strikes of coal miners in Alberta and British Columbia. During January, 1939, there were ten disputes, involving 1,228 workers with time loss of 8,047 working days. In February, 1938, there were nine strikes, involving 1,627 workers with time loss of 3,575 man working days, about one-half the time loss being due to a short strike of 1,200 coal handlers and drivers in Toronto, Ont. Of the eight disputes recorded for February, 1939, six were terminated during the month, three resulting in favour of the workers involved, one in favour of the employer concerned, while a compromise settlement was reached in one case and the result of one dispute was recorded as indefinite. Two disputes, involving 1,104 workers, were recorded as unterminated at the end of February. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Explanation of Labour Organization Chart in February Labour Gazette

In view of a complaint lodged by the Secretary of the Canadian Federation of Labour with the Minister of Labour against a chart illustrative of labour organization in Canada, 1937, appearing in the February issue, it is felt that an explanation should be presented of the chart and the figures appearing thereon, and the basis on which those figures are compiled. The figures in all cases are those reported to the department by local units of the federated organizations covered in the chart. Those figures are compiled from returns made to the department by the individual locals in response to a questionnaire which was addressed to all local unions reported to the department by the central organizations, and every effort was made to secure the necessary information from each.

This chart is intended as a visual summarization of the department's publication, entitled *Labour Organization in Canada for 1937*, which was issued recently. It is pointed out that in the section of that publication dealing particularly with the Canadian Federation of Labour there appears on page 27 in the paragraph under the caption "Membership of the Federation" the following words:

"The Canadian Federation of Labour reported a total affiliated membership of 52,622. Of the 72 local unions reported to be in affiliation with the Federation, all of which were circularized by the department, only 39 made returns, showing a combined membership of 8,704."

The department thus published the membership claimed by the Federation officials, namely **52,622,** as well as the membership reported by the 39 locals, from whom returns as to their membership, were received out of the 72 reported by the Federation. As set out above, all of the 72 locals were asked to make returns.

The method adopted and followed in the case of obtaining information as to membership of the Canadian Federation of Labour and its affiliated organizations and the tabulation and publication of such, was identically the same as that adopted and followed in the case of all other central bodies.

Industrial Disputes Investigation Act

During the month the department received the report from the Board of Conciliation and Investigation which was established to deal with the dispute between the Canadian National Railways and its trainmen in the Southern Ontario district, with respect to the merging of two promotion districts. Three applications for the establishment of Boards were also received. The text of the above-mentioned Board report and other particulars dealing with proceedings under the Act will be found on pages 244-250.

Statistics of Material Aid Recipients for January

According to early figures from the national registration of persons on aid in January, issued on March 14 by Hon. Norman McL. Rogers, Minister of Labour, the number of farmers and members of their families in receipt of agricultural aid continues to show a decline in comparison with the same month of last year.

Although unemployed persons receiving aid showed the usual increase from December to January, and brought the January total above that of the same month in 1938, the grand total of persons of all classes in receipt of aid showed a decrease from the preceding year.

Preliminary figures from the January registration showed the Dominion total of unemployed but fully employable persons on aid in January of this year at 180,000, an increase of 11 per cent from the December total of

162,000. The figure for January this year represented an increase of nearly 7 per cent over January a year ago.

A total of 662,000 persons were receiving non-agricultural aid in January this year, 9½ per cent more than in the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of about 5 per cent from the figure for January, 1938.

Some 67,000 farmers who, together with their dependents, account for a farm population of 316,000, were reported as receiving agricultural aid for subsistence in January. Of these persons 270,500 were located in the province of Saskatchewan alone. The Dominion total on agricultural aid, while up by 4·3 per cent in January over the December revised figure, was almost 18 per cent less than in January, 1938. The January total of farmers and their families on aid in Saskatchewan, while continuing to hold the improvement over a year ago, increased by 3 per cent over December, 1938, but was still more than 19 per cent lower than in January a year ago.

The grand total of all classes of persons on urban and agricultural aid in January, according to these early figures, was 978,000, an increase of almost 8 per cent over the December figure as revised to date, but 3·7 per cent less than in January, 1938.

Supplements on Prices and Wages and Hours

Continuing the series on *Wages and Hours of Labour in Canada* and *Prices in Canada and Other Countries*, two supplements to this issue of the LABOUR GAZETTE are being issued.

The supplement on Wages and Hours of Labour in Canada is the twenty-second report in that series, and contains information relative to the years 1938, 1937 and 1929. The report gives statistics indicating the wages and working hours of the principal classes of labour throughout the Dominion in various industries. The second supplement deals with the trend of retail and wholesale prices in Canada in 1938 and previous years; tabular statistics are also given showing the movement of prices in other countries throughout the world.

Amendment to the Lord's Day Act

On February 24, Mr. H. E. Brunelle (Champlain) moved the second reading of a bill to amend the Lord's Day Act, and on March 7 the bill was read the third time and passed by the House of Commons. (A similar bill was introduced last year by Mr. Brunelle, which after second reading was referred to the Standing Committee on Banking and Commerce—LABOUR GAZETTE, March 1938, page 237.)

In moving second reading on February 24 of this bill, Mr. Brunelle stated that it purported "solely to give to our courts the discretionary power to impose gaol sentences upon those who make their employees work on Sundays." The amendment read as follows:—

Section 14 of the Lord's Day Act, chapter 123 of the Revised Statutes of Canada, 1927, is amended by adding thereto the following subsection:

Any person, being a director, an officer, a superintendent or an employee of a corporation, to whose direction or orders any employee is by the terms or conditions of his employment bound to conform, who authorizes or directs any such last mentioned employee of that corporation to carry on any part of the business of the corporation in violation of any of the provisions of this act, shall be liable, on summary conviction before two justices of the peace, to similar penalties to those to which a corporation is liable under subsection 1 of this section, or for a first offence, to imprisonment for a term not exceeding three months and not less than one month, with or without hard labour, and for each subsequent offence, to imprisonment for a term not exceeding six months and not less than two months, with or without hard labour.

In supporting the amendment, the Rt. Hon. E. Lapointe, Minister of Justice, stated that "there can be no doubt that there have been many abuses of the Lord's Day Act, and strong corporations could easily avoid its prescriptions by paying a penalty when they were brought to court and then proceeding in the same way afterwards.

"The bill now before the house would certainly make the law more strict and would have the effect of compelling those who have something to do with such corporations to observe the law. . . ."

Extension of Technical Education Act

On March 1, Hon. Norman McL. Rogers introduced a resolution in the House of Commons stating that it was "expedient to introduce a measure to amend the Technical Education Act, to make available, for the purposes of the Act, any portion of the unexpended appropriation during the period of five years succeeding the fiscal year ending March 31, 1939."

Mr. Rogers explained that the resolution preceded the introduction of a bill by which it was intended to renew for another five years the Technical Education Act of 1919, as previously amended in 1929 and 1934, for the purpose of permitting the province of Manitoba to take up the balance of its original allotment under the Act of 1919. The Minister pointed out that Manitoba was the

only province now enabled to take advantage of the legislation, the amount still available for allotment to that province under the Act being $286,037.39. Reference was also made by Mr. Rogers to earlier amending Acts in 1929 and 1934 which had been passed for the same purpose of permitting provinces that had not taken up their allotments under the original legislation to do so.

After a discussion on the resolution, the bill to amend the Act was introduced and read the first time. Subsequently, on March 3, the bill was read the second and third times and passed.

Canadian Youth Congress Submits Memorandum to Minister of Labour

The National Committee of the Canadian Youth Congress submitted a brief to the Hon. Norman McL. Rogers, Minister of Labour, on March 3. Expressing gratification for the efforts of the Federal and Provincial Governments in inaugurating and extending youth training projects, the memorandum registered the Congress' belief in "the basic rightness of the method adopted in attacking the problem of unemployment among youth," and opposed suggestions to introduce other methods "less in keeping with our democratic principles and with the need to develop young men and women within the healthy influences of the community at large. The memorandum also recorded the Congress' opinion that the work should be continued along present lines."

The Congress expressed its appreciation of the work of the Dominion Supervisor of Youth Training and that of his assistants in the provinces. Referring to the increased scope of youth-training activities with the resultant increase in administrative work, and the necessity "for a more highly developed and comprehensive machinery for this work," the Congress stated that it was of the opinion that a "youth administration" should be developed "maintaining the principle of Dominion-Provincial co-operation which it has obtained heretofore."

The specific recommendations of the Congress were briefly as follows: Establishment of a permanent national youth administration under the Department of Labour; the setting up of a voluntary National Advisory Committee, to work in close conjunction with the National Youth Administration; that provincial governments be encouraged to establish similar youth administrations and provincial Advisory Committees; that the provincial administrations appoint voluntary local directors in co-operation with municipal authorities and local advisory committees; that special attention be given to the "securing of advice and assistance of private agencies in all phases of administration."

In another section of its brief the Congress outlined a proposed program of youth-training under four main headings, viz.: Educational projects; placement; employment; and recreational projects.

A special appendix to the brief dealt with such related subjects as wages and hours of work; collective bargaining; protection of older workers; unemployment insurance; and revision of the British North America Act.

Debate on proposed reduction of pensionable age limit

On a motion introduced on March 6 by Mr. A. A. Heaps (Winnipeg North), a debate took place in the House of Commons on a proposal to reduce the pensionable age limit under the Old Age Pensions Act.

Mr. Heaps' resolution stated "that this house would welcome a government declaration of policy that would bring about an immediate lowering of the present pensionable age limit of seventy years, the effect of such being that the older generation would retire from industrial activity, thereby creating opportunities for the younger generation to be usefully and gainfully employed."

In speaking to his resolution Mr. Heaps said in part: "My plea this evening is for economic security for our older population. When men and women have given of the best years of their lives in building up the state and providing for others in the community, I believe they are entitled, when they reach old age, to a measure of economic security which they do not have to-day until they reach the age of seventy. . . ."

After several members had spoken on the resolution, Hon. Charles A. Dunning, Minister of Finance, replied on behalf of the Government, pointing out that approximately 50 per cent of all people in Canada who are seventy years and over are receiving old age pensions at an expense to the Federal Government, amounting to $28,500,000 last year and that for the present year the estimates provide for $30,500,000. In this connection Mr. Dunning said "Even if we continue the present basis the cost for the next twenty years will increase very rapidly, though no more generous treatment is accorded. This increase will result partly from the normal growth in population and partly from the fact that in the next twenty-five or thirty years the percentage of our population over seventy to the total population will steadily increase, because our population has been so largely built up in the generation just past by the immigration of adult persons."

The Minister of Finance then gave figures dealing with the future cost of old age pensions based upon estimates made of the increase in population and the expected number of those over seventy years of age in the population, and the proportion of that population receiving old age pensions. Using the present rate of pension payment and these future census estimates, Mr. Dunning indicated that "the cost to the dominion in 1941 would be $46,300,000; in 1951, it would be $62,000,000; in 1961, $82,200,000; and in 1971, $92,800,000." Referring directly to the proposal to reduce the pensionable age limit, Mr. Dunning stated:

"Now, if we lowered the pension age to sixty-five, the immediate additional cost to the dominion alone would be $18,859,000 a year. The total cost to the dominion alone if the eligible age were lowered to sixty-five would be $48,621,000 as against the $30,500,000 provided for the current year. If we reduced the eligible age to sixty, the estimated immediate cost to the dominion would be an additional $44,000,000 more than we are now spending. That is to say, to reduce the pensionable age by ten years would cost the dominion immediately some $14,000,000 more than the dominion is now spending on those over seventy, or a total of $44,200,000 immediate increase. Or the total immediate cost to the dominion this year, if the age were lowered to sixty, would be $73,900,000.

"To the country as a whole the cost would be still greater; for one must remember that the provinces are in this, and this house cannot light-heartedly change this act and assume that every province will accept the financial obligations involved."

Expenditures on Youth Training in Australia

The *New South Wales Industrial Gazette*, November, 1938, contains information showing the expenditures made in the various States of Australia by the Commonwealth Government, in connection with technical training of unemployed youths. The sum of £200,000 was allocated to the various States as follows: New South Wales, £79,000; Victoria, £55,000; Queensland, £25,000; South Australia £19,000; Western Australia, £14,000; and Tasmania, £8,000. In addition to these amounts, the various States made provision in their estimates for the following amounts during 1937-38, to be expended on youth training: New South Wales, £100,000; Victoria, £55,000; Queensland, £25,250; South Australia, £15,000; Tasmania, £8,000. The amounts spent by the States from Commonwealth and State contributions towards the special schemes for the training and employment of youths up to June 30, 1938, were: New South Wales, £36,691; Victoria (up to July 14, 1938), £3,048; Queensland, £10,109; South Australia, £23,499; Western Australia, £2,790; Tasmania, £5,476. Expenditure since June 30, 1938, up to the dates shown has been as follows: New South Wales (September 15, 1938), £12,309; Victoria (from July 14 to September 14, 1938), £11,952; Queensland (August 31, 1938), £7,169; South Australia (August 31, 1938), £6,731; Western Australia (September 12, 1938), £118; Tasmania (September 15, 1938), £2,100. In addition, capital expenditure totalling £13,204 was met by the Queensland Government up to August 31, 1938.

Eighty-sixth session of the governing body of the I.L.O.

At the Eighty-Sixth Session of the Governing Body of the International Labour Office, held in Geneva from February 2nd to 4th, it was decided to place the following four questions on the agenda of the 1940 Session of the International Labour Conference: the organization of labour inspection; the weekly rest in commerce and offices; safety provisions for underground work in coal mines; and the rights of performers in broadcasting.

The problems of labour inspection and safety in coal mines will be dealt with by a single discussion, while the other two problems will be submitted to the double discussion procedure.

The Governing Body also, as the result of a wish expressed by the International Textile Conference held at Washington in 1937, decided, in principle, on the setting up of a Technical Tripartite Committee on the Textile Industry, with panels representing the various sections, and instructed the International Labour Office to proceed at once with the consultation of Governments, employers' and workers' organizations with a view to the constitution of such panels, which will deal with production of raw silk, production of flax, cotton manufactures, wool manufacture, silk manufactures, jute production and manufacture, linen manufacture, and hosiery manufactures.

The new Committee will consider labour conditions in the textile industries, taking into account those aspects of the industries which, directly or indirectly, may have a bearing on the improvement of those conditions; and will make recommendations to the Governing Body.

Japan and the I.L.O.

According to *Industrial and Labour Information* of February 13, 1939, Mr. K. Matsuoka, President of the All-Japan Trade Union Federation, commenting on the withdrawal of Japan from the International Labour Organization, stated that: "It

is indeed regrettable that Japan has completely severed relations with the International Labour Organization, but I believe that this was unavoidable in the present circumstances.

"Although it was only from 1924 that the working class of this country began to take a direct part in the selection of workers' delegates to the International Labour Conference, the Japanese Government had been co-operating continuously with the I.L.O. since the Washington Conference of 1919. Since then, 24 sessions have been held and many Draft Conventions have been adopted, including those on the restriction of working hours and prohibition of night work of young persons and women. The good work of the Conference is not, however, confined to the working class alone. It has also made itself felt in the industrial and cultural fields at large, and has contributed greatly toward the enactment and improvement of social legislation.

"Although we were compelled by force of circumstances to sever relations with the I.L.O., we should not forget the services of the I.L.O., which have proved that internationalism in the true sense of the word can contribute toward human civilization."

Mandatory Order for Beauty Shops in New York State

Industrial Commissioner Frieda S. Miller issued on February 24 a mandatory wage order in the beauty service industry, affecting women and male minor employees in beauty shops throughout New York State. The order, which becomes effective on March 27, is the second mandatory order under the State Minimum Wage Law. It replaces the directory order, in effect since August 1, 1938, except in the case of manicurists employed in barber shops, who remain under the directory order for the time being.

In accordance with the provisions of the law, the rates set by the directory order continue unchanged, although minor changes have been made in the administrative regulations. The order provides that full-time employees in beauty service occupations, with the exception of maids, receive a minimum wage of $16.50 for a 45-hour week. Full-time maids are paid at least $15 a week and part-time employees $4 per day of eight hours or less. Under a mandatory order offenders are subject to fines ranging from $50 to $200 and prison sentences of from 10 to 90 days. Moreover, employees who have been paid less than the minimum wage to which they are entitled under the order may sue to recover wages due them.

Commissioner Miller, in issuing the order made the following statement: "Application of a mandatory order to the beauty service industry will help to establish stable conditions throughout the industry. The large majority of employers, who are ready to fulfill the provisions of the wage order, will no longer have to face the competition of the small group who violated wage standards and as a result were able to undercut their competitors."

The mandatory order makes some minor changes in the administrative regulations that were in effect under the directory order. The provision permitting the employer to give each employee three successive hours off in order to make a 45-hour week has been omitted, because it needlessly complicated compliance with the law. A change in the record-keeping provisions makes it necessary for records of hours, age and wages of each employee to be kept at the place of employment. Employers are forbidden to make a charge for uniforms that would bring the employee's wage below the minimum, but it is no longer necessary for an employer to obtain a permit before he can charge for uniforms.

Three public hearings were held by Commissioner Miller before she issued the mandatory order, on February 7, 14 and 15, in New York City, Rochester and Albany, respectively. All units of the State Hairdressers' Association and labour and consumer organizations supported the change. At the New York City and Rochester hearings some opposition was voiced by individuals and small employer groups but at the Albany hearing the issuance of a mandatory order received no opposition.

The first mandatory order to go into effect was in the laundry industry on August 22, 1938. This order provides for a guaranteed minimum wage for a 40-hour week of $14 in New York City, Westchester and Nassau counties and $13.20 in all other communities over 18,000 population. In communities with a population of 18,000 or less, the minimum wage is 30 cents an hour.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THREE applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From longshoremen, foremen, equipment operators, etc., in the employ at Montreal of various steamship companies engaged in inland and coastal navigation, namely, Canada Steamship Lines, Tree Line Navigation Co., Ltd., Clarke Steamship Co., Ltd., Ellis Shipping Co., Ltd., Interprovincial Steamship Lines (Montreal Shipping Agent), Gaspe Baie Chaleurs Navigation Company and Vaillancourt Transportation, Inc. Four hundred employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, were stated to be directly affected by the dispute, which grew out of the employees' request for increased wages and certain changes in working conditions. Before action was taken looking to the establishment of a board an agreement was reached as a result of direct negotiations between the parties concerned and the application was withdrawn.

(2) From employees of the Manitoba Telephone Commission being members of Local 1037 of the International Brotherhood of Electrical Workers, the Independent Brotherhood of Telephone Workers, the Manitoba Telephone Association and the Independent Order of Telephone Operators. Nine hundred and fifty employees are stated to be directly affected by the dispute, which relates to the employees' request for abolition of a wage deduction which had been put into effect on January 1, 1932.

(3) From the National Cartage and Storage, Limited. The dispute related to the company's proposal to increase the number of hours worked per week by its employees and reduce their rate of pay. From 28 to 40 men, depending on the seasonal volume of business, were stated to be directly affected. These employees are members of Fort Garry Division 253, Canadian Brotherhood of Railway Employees. Conciliation officers of the department proceeded to Winnipeg early in March and conferred with the parties concerned. As a result of their mediation a settlement was effected, and board procedure was thus rendered unnecessary.

Board Established

A Board of Conciliation and Investigation was established by the Minister of Labour on February 23 to deal with a dispute between various ocean steamship companies at the Port of St. John, N.B., and their checkers, coopers, etc., a majority of whom are members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The employees applied for a board during January (LABOUR GAZETTE, February, 1939, page 126). Board members have been appointed as follows: Mr. Tom Moore, of Ottawa, Ont., nominated by the employees, and Mr. C. Allan Beatteay, of St. John, N.B., nominated by the companies. Messrs. Moore and Beatteay have been requested to confer looking to a joint recommendation for third member who will be chairman.

Report of Board in Dispute Between Canadian National Railways and its Trainmen

A unanimous report, embodying the text of an agreement reached between the parties involved, was received early in March from the Board of Conciliation and Investigation which had been established to deal with a dispute between the Canadian National Railways and 350 trainmen in the Southern Ontario District, members of the Brotherhood of Railroad Trainmen, in regard to the proposed consolidation of two seniority and promotion districts. The personnel of the board was as follows: Mr. W. G. Graham, of Lindsay, Ont., chairman, appointed on the recommendation of the other board members, Messrs. Albert McGovern and C. F. Needham, both of Toronto, Ont., nominees of the employees and company, respectively. Following is the text of the board's report:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between the Canadian National Railways and its Trainmen in Southern Ontario District (13th and 14th Seniority and Promotion Districts), members of the Brotherhood of Railroad Trainmen, with respect to the merging of two Promotion

Districts involving the seniority rights of men holding seniority on the former individual districts, and abolishing so-called "Homestead Rights" in applying seniority and promotion rules on the enlarged district.

To the Honourable
Norman McL. Rogers,
Minister of Labour,
Ottawa, Ontario.

Sir:

The undersigned members of the Board of Conciliation and Investigation appointed by you in the above matter, having, before entering upon the functions of office, taken the oath required by the Act, have the honour to report as follows:

The Board was composed of Mr. W. G. Graham, Chairman, appointed by the Minister on the joint recommendation of the two other members; Mr. C. F. Needham, nominated by the Railway; and Mr. Albert McGovern, nominated by the employees.

A preliminary meeting was held at the Union Station in the City of Toronto on February 20, 1939, when the procedure to be followed at subsequent meetings of the Board was fully discussed.

The Board commenced its hearings at 10.00 a.m., February 27, 1939, in the Royal York Hotel, Toronto, the railway and the employees being represented as follows:—

Canadian National Railways: Mr. G. H. Jones, Accountant; Mr. R. H. Burgess, Assistant Chief Clerk.

Employees' representatives: Mr. A. J. Kelly, Dominion Legislative Representative, Brotherhood of Railroad Trainmen; Mr. C. I. Warren, General Chairman, Brotherhood of Railroad Trainmen; Mr. W. T. Parr, Secretary of General Committee, Brotherhood of Railroad Trainmen.

The formal application for the establishment of this Board was made on behalf of the Brotherhood of Railroad Trainmen by Mr. W. J. Babe, Vice-President, and Mr. C. I. Warren, General Chairman, on December 29, 1938, and the statement in reply by the railway was made on January 28, 1939. These documents indicate that the dispute arose as a result of the railway having served notice on the General Chairman of the Brotherhood of Railroad Trainmen under date of December 13, 1938, that they intended, effective January 1, 1939, to (*a*) consolidate the 13th and 14th Seniority and Promotion Districts; (*b*) prepare a revised general seniority roster; and (*c*) make other modifications in a certain agreement known as the Merger Plan Agreement between the Brotherhood of Railroad Trainmen and the Railway, dated November 1, 1929.

Public hearings were held by the Board in the Royal York Hotel, Toronto, on February 27 and 28, and March 1, 1939, when the representatives of the railway and the employees submitted written and oral statements with respect to the dispute. The following facts were developed from the presentations made to the Board and the arguments which ensued:

The Schedule for Conductors, Baggagemen, Brakemen and Yardmen effective June 1, 1929, superseded four schedules previously in effect covering these classes of employees on the various corporate lines of the Central Region, Canadian National Railways.

Concurrently with the execution of that Schedule a separate agreement was made dated June 1, 1929, which provided that a special agreement would be entered into covering in detail the preparation of consolidated seniority lists to conform with the Seniority and Promotion Districts set out in Articles 58 and 123 of the Schedule, and for "homestead rights" to be granted to certain of the men on their former seniority territories.

In conformity with the agreement dated June 1, 1929, an agreement dated November 1, 1929, generally known as the "Merger Plan Agreement," was entered into. This Merger Plan Agreement provided that a sufficient number of men would be homesteaded on their former promotion district, to the extent that such promotion district is included in their new promotion district, to reasonably take care of all assigned and unassigned service, but not including spare men, except a limited number of spare conductors.

In addition to the General Seniority Rosters for the promotion districts, this agreement provided for separate seniority rosters, known as "Homestead Seniority Rosters," to be maintained on each former promotion district, or if subdivided the portion thereof included in the new promotion district, for all men accorded homestead rights under the agreement.

Where former promotion districts were subdivided men employed thereon were permitted to elect (subject to seniority) the portion of the subdivided territory to which they would be assigned for the future.

Both the General Seniority Rosters and the Homestead Seniority Rosters were compiled on the basis of conditions existing as at November 1, 1929. These seniority lists were issued and made effective April 1, 1930.

A falling-off in business in 1930 resulted in the runs of a number of the homesteaded

freight brakemen being discontinued, and the question arose as to whether such men could exercise homestead rights to work on the spare board, and it was ruled that that was the intent of the Merger Plan Agreement.

Under the Merger Plan Agreement passenger trainmen were all homesteaded, as they all held regular assignments, and spare work in passenger service was performed by brakemen on the spare board. With the falling-off in business certain passenger trains were discontinued, or were replaced by mixed trains (to which assignments freight men were entitled), and this resulted in a number of passenger trainmen losing their runs and it was ruled that such men would have preference rights to spare passenger work; in other words, that spare boards for passenger trainmen would be established, which had not previously been the case.

There was no uniformity in respect to the extent of the former seniority territories; as illustrating this, on certain sections the corporate line constituted a seniority and promotion territory, while on other sections each terminal or subdivision constituted a separate seniority and promotion territory.

For several years prior to 1929 there had been a gradual increase in business, and the Merger Plan Agreement dated November 1, 1929, did not contemplate that there would subsequently be a serious falling-off in traffic and reduction in crew assignments such as has taken place.

On the 13th and 14th Seniority and Promotion Districts there was a very serious falling-off in the number of crew assignments, which, as above stated, had not been contemplated by the Merger Plan Agreement dated November 1, 1929, due to the following causes:—

(*a*) Pooling with the Canadian Pacific Railway of passenger trains on the 13th Seniority District in the spring of 1933.
(*b*) Opening of the new Welland Canal in the fall of 1930.
(*c*) Bus and truck competition.
(*d*) Abandonments of certain sections of line.
(*e*) Establishment of a number of mixed train assignments and discontinuance of certain passenger train assignments.
(*f*) Business depression affecting certain homestead territories more adversely than others.

The pooling of passenger trains with the Canadian Pacific Railway severely affected the Canadian Northern Railway Group of employees who, under the Merger Plan Agreement dated November 1, 1929, had attached themselves to the 13th Seniority and Promotion District.

The opening of the new Welland Canal resulted in a reduction of freight traffic from ports on the Great Lakes served by the railways, which, in turn, brought about a reduction in the number of train crews required on several of the former seniority territories. As a matter of fact certain of this traffic formerly handled by the railways to or from a certain lake port is now handled by the railways to or from a different lake port, thereby involving train service employees from different former seniority territories performing the road haul.

The bus and truck competition has resulted in the railways suffering a heavy loss of traffic and making a considerable curtailment in train service, particularly on the branch lines. Certain of the former seniority territories were severely affected on that account; namely, former Canadian Northern, Lindsay, Stratford and London territories.

The abandonments of certain sections of line have particularly affected the ex-Canadian Northern, Lindsay and Stratford former seniority territories.

The establishment of a number of mixed train assignments and the discontinuance of certain passenger train assignments, which the railway found necessary to effect economies under changed conditions, has resulted in an increase in the number of mixed train assignments and a decrease in the number of passenger train assignments. This has been detrimental to the passenger trainmen, as they hold no rights in freight service (except dating from 1928) and the mixed trains are manned by freight brakemen.

The matter of making some modification in the Merger Plan Agreement on the 13th Seniority and Promotion District was first taken up by the railway with the General Chairmen of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen on November 25, 1933, as a result of the heavy reductions in crews owing to falling-off in business and the pooling of the Toronto-Ottawa passenger train service with the Canadian Pacific Railway in the spring of 1933. Many conferences were held and much correspondence exchanged without results.

In the fall of 1935 the Conductors complained of the unsatisfactory situation on the 14th Seniority and Promotion District, and since that time the matter of the unsatisfactory situation on both the 13th and 14th Seniority and Promotion Districts has been a matter of controversy. However, this unsatisfactory situation, in so far as the conductors are concerned, was disposed of by the agreement between the railway and the Order of Railway Conductors dated

April 29, 1937. This agreement provided for (*a*) the consolidation of the 13th and 14th Seniority and Promotion Districts, (*b*) the preparation of a revised seniority roster for conductors, and (*c*) other modifications of the so-called Merger Plan Agreement of November 1, 1929, including the abolition of homestead rights. The application of the agreement between the railway and the Order of Railway Conductors further aggravated the situation in so far as the brakemen are concerned.

The railway, apparently feeling that it had exhausted every means at its disposal to arrive at a mutual agreement to take care of the situation, served notice under date of December 13th, 1938, on the General Chairman, Brotherhood of Railroad Trainmen, that unless a mutual agreement could be reached the railway intended to make effective January 1, 1939, an arrangement under which the 13th and 14th Seniority and Promotion Districts would be consolidated, a revised general seniority roster would be prepared and certain other modifications would be made in the Merger Plan Agreement of November 1, 1929.

A conference was held between the Brotherhood of Railroad Trainmen and the officers of the railway on December 28, 1938, at which the Brotherhood of Railroad Trainmen intimated that they could not agree to this arrangement, and the Brotherhood of Railroad Trainmen applied for a Board of Conciliation and Investigation.

A Board having been applied for, the railway did not make the proposed arrangement effective January 1, 1939.

Before the Board the railway representatives contended that the arrangement which the railway had intended to make effective January 1, 1939, was designed to gradually correct the present unsatisfactory situation with the least possible disturbance to the employees.

The representatives of the employees contended that, in effect, the proposals of the railway would (*a*) eliminate the recognized boundaries within which seniority has been earned and recognized for many years, by consolidating two Seniority and Promotion Districts, (*b*) discontinue the respective classifications as between freight brakemen and passenger trainmen, which have existed for many years, and (*c*) abolish the protection of seniority and classification heretofore provided under the so-called homestead rights as contained in the Merger Agreement of 1929.

They further contended that such proposals would violate the long established principles that seniority must be earned within the confines of specified territories and classified services, which had been protected by the so-called "homestead rights" as referred to. To such violations they offered most strenuous objections.

They also expressed regret at the evident lack of a full appreciation on the part of the railway of the correlation of seniority rights of conductors and trainmen respectively. It was stated that the application of the agreement between the railway and the Order of Railway Conductors effective April 29, 1937, has permitted conductors to move into terminals where they had not earned any seniority rights, forcing a corresponding number of brakemen out of service.

It was further contended by the employees that inasmuch as there were no monetary or operating advantages to be gained by the railway, they could see no justification for the railway departing from the long established practice of leaving questions concerning seniority rights to the employees themselves to arrange.

The representatives of the railway stated that they were unable to reconcile with the agreements that had been negotiated between the railway and the Brotherhood of Railroad Trainmen the exceptions now taken by the employees to the proposition of the railway. In this connection they pointed out that the provisions of Article 58 of the Schedule effective June 1, 1929, provides for the consolidation of former seniority and promotion territories and accords men seniority rights on portions of the territory where they have never earned any seniority; also that the Schedule contemplates the ultimate discontinuance of the respective classifications of freight brakeman and passenger trainman.

They further pointed out that all of the men employed on each of the former seniority and promotion territories were not homesteaded under the Merger Plan Agreement and those who were not homesteaded were not protected against men from other former seniority and promotion territories. Attention was also drawn to the fact that homestead rights under the Merger Plan Agreement have already been abolished under mutual agreements between the railway and the Brotherhood of Railroad Trainmen in respect to the yardmen in Toronto Terminals and in terminals west of Toronto.

The representatives of the employees stated that they desired to make clear to the Board that any and all agreements affecting the seniority of the men covered thereby had heretofore been made after full consideration by the railway and the accredited representatives of such men, and that in regard to the agreements referred to by the representa-

tives of the railway, under which homestead rights were abolished at certain terminals, this was the result of agreements deemed necessary and negotiated to, in a general way, simplify the exercise of rights conferred by the Schedule in effect.

During the hearings before the Board the chairman impressed upon the parties that it was one of the duties of the Board to encourage and assist the parties in arriving at a settlement of the dispute.

Following the presentation by the railway representatives of their submission and the answering of a number of questions in regard thereto, certain suggestions were made by the Board which it was thought would provide a basis on which a mutual agreement might be reached, and the chairman adjourned the proceedings to give the parties an opportunity to get together, advising them that the services of the Board would be at their disposal during such negotiations.

When the Board reconvened the following morning, February 28, the parties reported that they had been unable to reach a mutual agreement.

The hearing continued and the employees submitted their presentation, following which the Board was adjourned to give the railway representatives an opportunity to prepare a statement in rebuttal to the employees' presentation.

The Chairman requested that the employees' representatives remain for a private conference with the Board. At this conference various angles of the dispute were discussed and questions in regard to the working out of the railway's proposition were considered. The Board then pressed the employees' representatives to take some action with a view to settling the dispute. It appeared to be generally felt that dissatisfaction did exist among the trainmen on the 13th and 14th Seniority and Promotion Districts in regard to the working out of the Merger Plan Agreement. However, the representatives of the employees explained that, other than in very exceptional cases, it was not the general policy to change the seniority status or rights of employees.

The Board reconvened on March 1, when the railway submitted its statement in rebuttal to the employees' statement, and later the employees' representatives submitted a further statement in reply to the railway's statement in rebuttal.

There being no further information which either party desired to place before the Board, the public sittings of the Board were declared concluded. The Chairman, however, advised the parties that the Board would deliberate on the matters in dispute, as required by the Industrial Disputes Investigation Act, and he hoped that the representatives would be available on short notice in case their services were required further, also that he still had some hope that a mutual agreement might yet be reached between the parties.

On March 2, the day following adjournment of the public sittings, the Board went into conference and, after carefully considering the evidence, reached the conclusion that unsatisfactory conditions did exist in respect to the trainmen on the 13th and 14th Seniority and Promotion Districts under the application of the 1929 so-called Merger Plan Agreement which should be corrected or alleviated, and, in view of the fact that the railway's representatives had already intimated that they were prepared to endeavour to negotiate a mutually satisfactory agreement, the Board decided to address the following letter to the employees' representatives:—

> Based on the evidence before it, the Board has unanimously reached the conclusion that unsatisfactory conditions exist in respect to the trainmen on the 13th and 14th Seniority Districts under the application of the 1929 so-called Merger Plan Agreement, which should be corrected or alleviated.
>
> The members of the Board, being aware that such matters of dissatisfaction can best be taken care of by mutual agreement between the company and the employees, the Board strongly recommends and urges you, as representing the employees before the Board, to endeavour to negotiate a mutual agreement with the company to correct or alleviate the unsatisfactory situation. We understand that the company is prepared to negotiate such an agreement.
>
> If the Board can be of any assistance at such negotiations it is at your service. The Board is, as you know, anxious to expedite matters and it will therefore be appreciated if you will be good enough to reply to this communication by two o'clock this afternoon.

The employees requested an extension of time beyond two o'clock in the afternoon in which to complete their deliberations and reach a conclusion as to the action they should take on the letter from the Board above quoted, and this was granted by the Board. Shortly afterwards they advised the Chairman that they were now in a position and prepared to enter into negotiations looking to the making of a mutual agreement with the railway. Thereupon the Chairman arranged for the representatives of both parties to have a further conference. The Chairman advised the parties that the services of the Board would be at their disposal during their negotiations.

The Board is pleased to report that the negotiations between the representatives of the parties, which took place on March 3 and 4, resulted in an agreement having been reached which was mutually satisfactory to the representatives of both parties as well as to the members of the Board. The memorandum of

settlement so agreed upon and accepted by the parties is as follows:—

Memorandum of Agreement

Memorandum of Agreement in Respect to Freight Brakemen and Passenger Trainmen on the 13th and 14th Seniority and Promotion Districts and Covering (a) *Consolidation of the 13th and 14th Seniority and Promotion Districts,* (b) *Preparation of a Revised General Seniority Roster, and* (c) *Other Modifications in the So-called Merger Plan Agreement of November 1, 1929.*

1 The 13th and 14th Seniority and Promotion Districts of the Central Region, as defined in Article 58 of the Schedule effective June 1, 1929, and as referred to in the so-called Merger Plan Agreement of November 1, 1929, will be consolidated for freight brakemen and passenger trainmen and will, in future, be known as the Consolidated 13th-14th Seniority and Promotion District.

2. Schedule Article 61, first paragraph, is abrogated and a revised general roster of freight brakemen and passenger trainmen will be prepared, and the names of the men will appear thereon in the order in which they entered train service without distinction as between freight brakemen and passenger trainmen.

3. Men holding permanent assignments in passenger service on March 12, 1939, will not be subject to displacement by other men (that is men on the working list other than those holding permanent assignments in passenger service) unless such other men are otherwise unable to hold work on the spare board at any terminal on the seniority district. Men holding permanent assignments in passenger service on March 12, 1939, will not be permitted to exercise their seniority in other service so long as they can hold a permanent assignment in passenger service.

4. When a reduction is made in the number of men in the working list at any terminal, the junior men (except as otherwise provided under Clause 3 hereof) will be displaced and will exercise their seniority to displace the junior men on the spare board at any terminal on the seniority district. Men cut off the working list at their home terminal will have the right to return to their home terminal when additional men are required thereat, providing their seniority entitles them to the work; men failing to avail themselves of the privilege of returning to their home terminals must file refusal in writing with the proper officer of the railway and local chairman, and the terminal at which they remain will, from the date of such refusal, be considered their home terminal.

5. Passenger trainmen's spare boards, now maintained at certain points, will be merged with the freight brakemen's spare boards at such points and only one spare board maintained as per Schedule Article 78.

6. When additional men are required on the working list, the laid-off men will be called back to the service in seniority order.

7. Those portions of Schedule Article 76 reading "Runs will also be similarly bulletined and filled at spring and fall changes of time-table" in the first paragraph of Rule (*b*), and "or until change of time-table" in Rule (*f*), will be abrogated.

8. Permanent vacancies, except those created as per Schedule Article 76 (*b*), second paragraph, or permanent new runs created (i.e., which it is anticipated will be on for over ninety (90) days), except seasonal assignments such as fruit trains, Dundas stone trains, etc., and work trains, will be bulletined over the Consolidated 13th-14th Seniority and Promotion District for seven (7) days and the senior qualified applicant will be assigned.

Vacancies in passenger service east of Toronto created as per Schedule Article 76 (*b*), second paragraph will be filled by men assigned in passenger service on that territory and likewise such vacancies west of Toronto will be filled by men assigned in passenger service on that territory.

Vacancies in freight or mixed train service created as per Schedule Article 76 (*b*), second paragraph, will be filled by men assigned in freight service out of the terminal to which the assignment is attached unless the home terminal is changed in which case such vacancies will be bulletined to the district.

9. Temporary assignments covering—

(*a*) Temporary runs (i.e., which it is anticipated will be on for ninety (90) days or less);
(*b*) Seasonal assignments, such as fruit trains, Dundas stone train, etc.;
(*c*) Work train assignments;
(*d*) Additional chain gang assignments for ninety (90) days or less;
(*e*) Additional assignments due to equalization of mileage,

will be bulletined at the terminal out of which the temporary assignment operates and filled by the senior, qualified applicant on the working list at such terminal.

10. Men holding assignments bulletined as per Item 9 who, for any reason, lose such assignments, will return to their former assignments (which will be considered as temporary vacancies during the time the regularly assigned occupants thereof are filling assignments bulletined as per Item 9) unless, in the meantime, they have bid in assignments bulletined as per Item 8, in which event such assignments will be considered their former assignments.

11. Spare board vacancies at a terminal will not be advertised until all men considered as belonging to such terminal and who are working at other terminals have been returned to their home terminal.

12. This Memorandum of Agreement is effective as from March 12, 1939, subject to revision on thirty (30) days' notice from either party to the other.

For the Employees:

(Sgd.) C. I. WARREN,
General Chairman,
Brotherhood of Railroad Trainmen.

For the Railways:

(Sgd.) F. L. C. BOND,
Vice-Pres. and Gen. Manager.

The undersigned representatives of the railway and the employees who presented the contentions of the respective parties before the

Board of Conciliation and Investigation concur in this agreement:—

Representatives of the Employees:
(Sgd.) A. J. KELLEY.
CECIL I. WARREN.
W. T. PARR.

Representatives of the Railway:
(Sgd.) G. H. JONES.

Toronto, Ontario,
March 4, 1939.

In conclusion the Board desires particularly to record its appreciation of the full co-operation and the spirit of courtesy and fairness which characterized the attitude of both parties and all of the persons who appeared before it in these negotiations.

All of which is respectfully submitted.

(Sgd.) W. G. GRAHAM,
Chairman.

(Sgd.) A. McGOVERN,
Employees' Representative.

(Sgd.) C. F. NEEDHAM,
Employer's Representative.

Toronto, Ontario,
March 6, 1939.

Home Improvement Loans

According to figures issued recently by the Hon. Charles A. Dunning, Minister of Finance, 63,516 home improvement loans have been made up to February 28, 1939, in cities and towns with a population of 5,000 and over, these loans amounting in value to $25,340,-305.63.

An analysis of the loan applications indicates that approximately 46 per cent of the amount spent went for masonry, carpentry, and plastering, 24 per cent for plumbing and heating, 16 per cent for painting, 9 per cent for roofing, and the other 5 per cent for electric wiring, mechanical equipment, and insulation. A further analysis indicates that approximately 16,175,000 man-hours of labour have been provided, and approximately $10,977,000 has been distributed directly as wages and other earnings in the building trades. While it is, of course, impossible to secure exact figures, these estimates are based on a careful analysis of the available data, and are believed to reflect the actual picture sufficiently for all practical purposes. The figures given for hours of labour provided, and amount distributed as wages do not take into account approximately $12,500,000 spent on materials of which a large percentage would also go to labour indirectly.

Loans reported in February, typically the low month for home improvement loans, number 1,044 totalling $399,325.78, or about 7 per cent higher than for the same month last year.

Ontario again maintains a substantial lead in number and amount of loans in February with 578 loans aggregating $222,487.40, Quebec coming second in amount of loans. British Columbia, which province was supplanted in January for third place by Alberta, again assumes this position by a comfortable margin, and is in fact in second place for February in number of loans.

National Housing Statistics

National Housing Act loans for the month of February, 1939, totalling $763,364 and providing housing accommodation for 249 families are shown in figures released by the Hon. Charles A. Dunning, Minister of Finance. These amounts compare with total loans approved in February, 1938, amounting to $341,909 and providing for 104 family housing units, thus representing an increase of 123 per cent in volume of loans and 139 per cent in number of units financed compared with the same month last year. Loans approved in January, 1939, provided for 187 family housing units and amounted to $645,864.

Total loans for the 7 months of operations since August, 1938, under Part 1 of the National Housing Act now aggregate $7,931,575 providing housing accommodation for 2,273 families. Compared with loans approved in the same period a year previous, this represents an increase of 99 per cent in volume of loans and 125 per cent in number of family units financed.

Total loans to February 28, 1939, approved under Part 1 of the National Housing Act and its predecessor, the Dominion Housing Act now aggregate $29,087,230.

Premier Angus L. MacDonald of Nova Scotia recently announced the appointment of Dr. A. B. Balcom, professor of economics at Acadia University, Wolfville, N.S., as chairman of the Nova Scotia Economic Council. The post of chairman had been held by Dr. A. Stanley Mackenzie until his death last fall. The appointment to the Council of Professor Stewart Bates, head of Dalhousie University's Department of Economics, was also announced. Until the time of his appointment to the Dalhousie University faculty, Professor Bates had occupied the position of secretary of the Economic Council.

STRIKES AND LOCKOUTS IN CANADA AND OTHER COUNTRIES, 1938

THE number of strikes and lockouts in existence in Canada during 1938 was 147, somewhat over one-half of the number in 1937 but slightly more than in most of the years since 1931 whereas the number of workers involved, 20,395, was appreciably less than in any year since 1931. The time loss in man-working days, 148,678, was only one-sixth of that in 1937 and was less than in any year since 1931 but approximately equal to the average time loss for the five year period 1926 to 1930, the lowest since the record was begun in 1901. The year was marked by the number of disputes involving comparatively small numbers of workers for short periods, as in 1937. As for the larger strikes there were only nine disputes which involved more than 500 workers in 1938 while in 1937 there were 32 and several of these caused comparatively great time loss.

The most important disputes during the year were those involving sawmill workers at Fort Frances, Ont., from April to June; fishermen at Lunenburg, N.S., in January; lime plant workers at Blubber Bay, B.C., from June to the end of the year; cotton factory workers at Cornwall, Ont., in January; restaurant workers at Toronto from June to November; automobile parts factory workers at Windsor, Ont., from August to October; taxicab drivers in Toronto in April; and coal miners at Minto, N.B., in January, a strike which began

TABLE I—STRIKES AND LOCKOUTS IN CANADA BY YEARS, 1901-1938

Year	Number of disputes beginning during the year	Disputes in existence during year									
		All Industries				Coal Mining			Industries other than Coal Mining		
		Number of disputes	Number of employers	Number of workers involved	Time loss in man-working days	Number of disputes	Number of workers involved	Time loss in man-working days	Number of disputes	Number of workers involved	Time loss in man-working days

* In these totals figures for disputes extending over the end of a year are counted more than once.

in October, 1937. Over one-half of the time loss was in manufacturing industries but there was also considerable time loss in fishing, mining and local transportation.

As in 1936 and 1937, the proportion of disputes as to recognition of union, employment and discharge of union workers, etc., was large, there being 53 such disputes involving 7,589 workers with a time loss of 60,350 days. Disputes primarily as to wages numbered also 53 and involved 7,034 workers with time loss of 59,543 days.

Nearly half of the workers in all disputes were partially successful, while thirty per cent were successful and eighteen per cent were unsuccessful.

"Sit-down" or "stay-in" strikes were of no importance in 1938, being confined to a few instances where workers in lumber or mining camps remained in the bunk houses for a short time but in one coal mine a small number of workers remained underground for some hours. As is usual there were some cases where factory workers remained at their working places for a few hours expecting a settlement to be reached.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in Canada, publishing in the LABOUR GAZETTE each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each dispute. Early in each year a review of the previous year has been given, including statistical tables analysing the data, and since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the LABOUR GAZETTE are necessarily of a preliminary nature the annual review constitutes the revised record for the year. A special report on "Strikes and Lockouts in Canada, 1901 to 1912," issued in 1913, contained a complete list of strikes and lockouts for that period with analytical tables. The annual reviews in the LABOUR GAZETTE have brought the lists of disputes and analytical tables down to date each year.

The annual review for 1930 appearing in the LABOUR GAZETTE, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were also made.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together, the term dispute being used with reference to either.

A strike or lockout included as such in the records of the Department, is a cessation of work involving six or more employees and lasting one working day or more. Disputes of less than one day's duration and disputes involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. A separate record of such disputes involving less than 10 days' time loss is maintained in the Department. Although not included in the statistical record, such disputes are mentioned in the LABOUR GAZETTE at the time of their occurrence. During 1938 there were 18 such disputes, involving 433 employees, causing a time loss of only 91 working days.

In Tables I and X the number of employers involved is given. Where a number of establishments, mines, etc., are under one management, one employer is counted. In disputes which involve large numbers of shops or factories, clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, only the approximate number of employers is usually reported.

The figures in this report are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is impossible always to secure exact information, but the estimate made in such cases is the result of painstaking methods in the collection of data, and with increasing experience in dealing with the subject it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number of working days during which each strike lasted by the number of employees directly involved in the dispute from time to time so far as known and not replaced. The number of employees recorded for each dispute is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information is available, the numbers indirectly affected have been shown in foot-

notes to Table X, which is a detailed list of the strikes and lockouts during the year. The workers indirectly affected in each dispute are those in the establishment who are unable to continue work because of the stoppage but not participating in the dispute.

The statistical tables do not include minor disputes as described in a previous paragraph, nor disputes (previously recorded) as to which information has been received indicating that employment conditions are no longer affected but which the unions or organizations concerned have not yet declared terminated.

Information is available as to the following disputes of this nature which were carried over from 1937 but were called off or lapsed during 1938: motion picture projectionists, Toronto, Ont., commenced July 11, 1932, two employers, lapsed by December 31, 1938; meat packing employees, Vancouver B.C., December 29, 1936, one employer, lapsed by December 31, 1938; custom tailors, Toronto, Ont., commenced May 20, 1937, one employer, lapsed by March 31, 1938; dress factory workers (cotton), Montreal, P.Q., commenced November 25, 1937, one employer, called off by union during June, 1938; and hotel employees Toronto, Ont., commenced December 6, 1937, one employer, settled March 3, 1938, a union agreement being secured. The following disputes of the same nature were still on record at the end of 1938: coastwise longshoremen, Vancouver, November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees Toronto Ont. September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; and bakers and helpers, Vancouver, B.C., November 11, 1938, one employer.

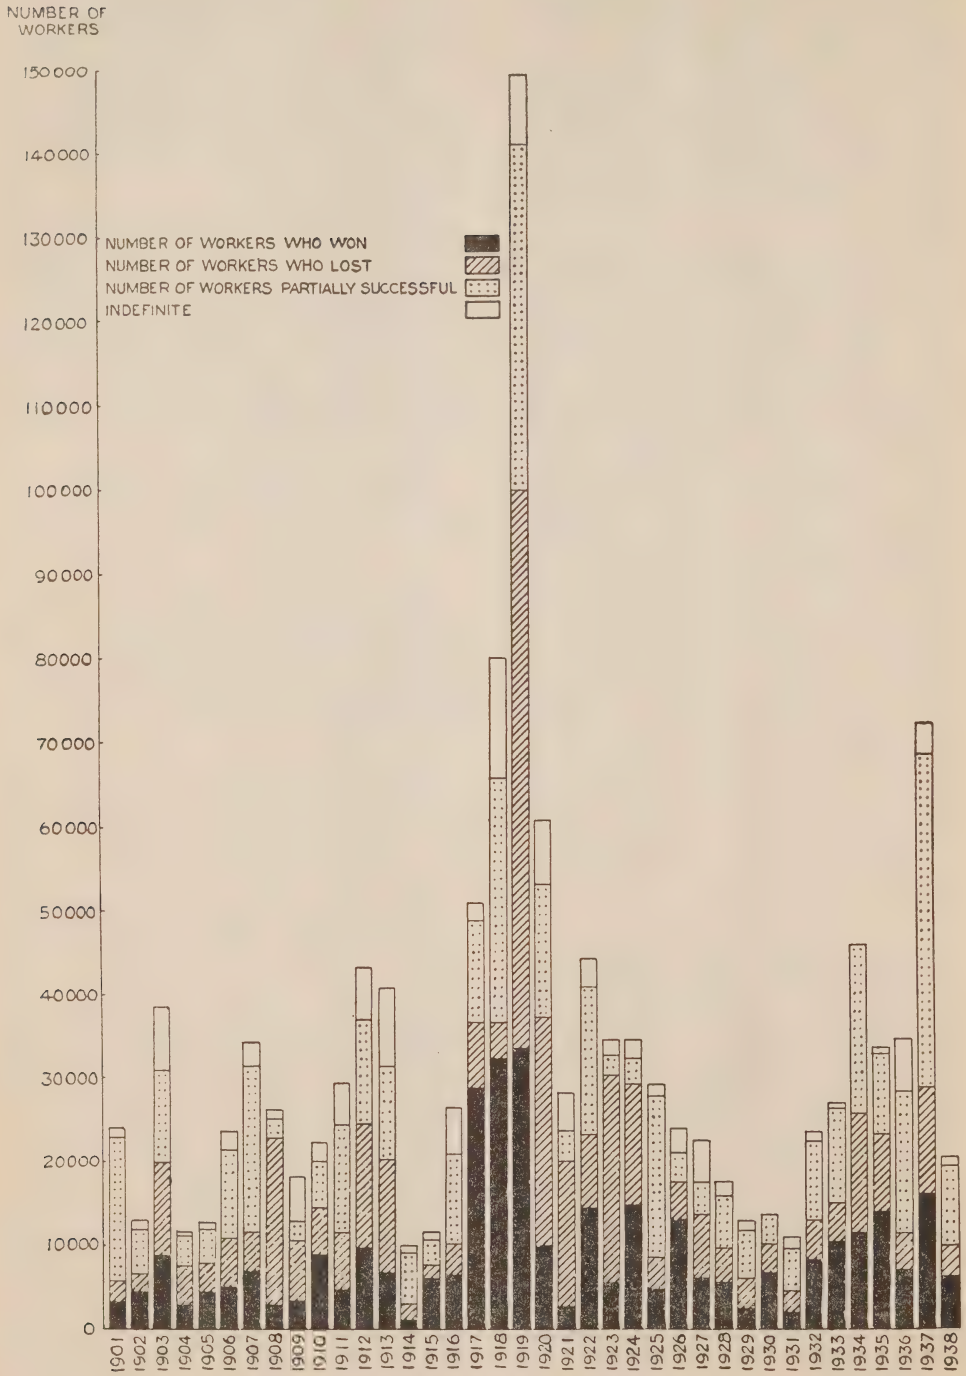
Charts

The accompanying chart of the time loss in working days by groups of industries for each year back to 1901, shows that in Mining considerable time loss occurred in 1909, 1910, 1911 and 1913, and again in 1917, 1922, 1924 and 1925, while in 1932, in 1934 and again in 1937 time loss was greater than in the other years since 1925. In 1919 the time loss due to general strikes is shown separately. In Manufacturing considerable time loss occurred in metal manufacturing in 1919, 1920 and 1937; in clothing (including textiles, furs, boots and shoes, leather, etc.) in 1903, 1908, 1912, 1914, 1917, 1919, 1925, 1926, 1930, 1931, 1932, 1933, 1934, 1936 and in 1937; in cigar manufacturing in 1901; in printing in 1921, 1922, 1923 and 1924; and in saw-milling in 1931 and 1932. In Construction time loss was considerable in 1912 and 1919. In Transportation, etc., there was considerable time loss only in 1901, due to a strike of trackmen; in 1903 due to a strike of railway clerks and freight handlers throughout western Canada, and a strike of longshoremen at Montreal, with a sympathetic strike of teamsters; and in 1908, due to a strike of railway shop machinists. In Other Industries considerable time loss was due to strikes of fishermen in 1901, to strikes of loggers in 1919, 1920, 1933, 1934 and 1935.

From the chart showing results of the disputes it appears that the majority of employees were successful or partially successful in 1901, 1902, 1907, 1915, 1916, 1917, 1918, 1926, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937 and 1938, but were unsuccessful in 1908, 1921 and 1923. In 1919, a large percentage of the workers who were unsuccessful were involved in the general strike at Winnipeg and in general strikes in other localities in sympathy with it.

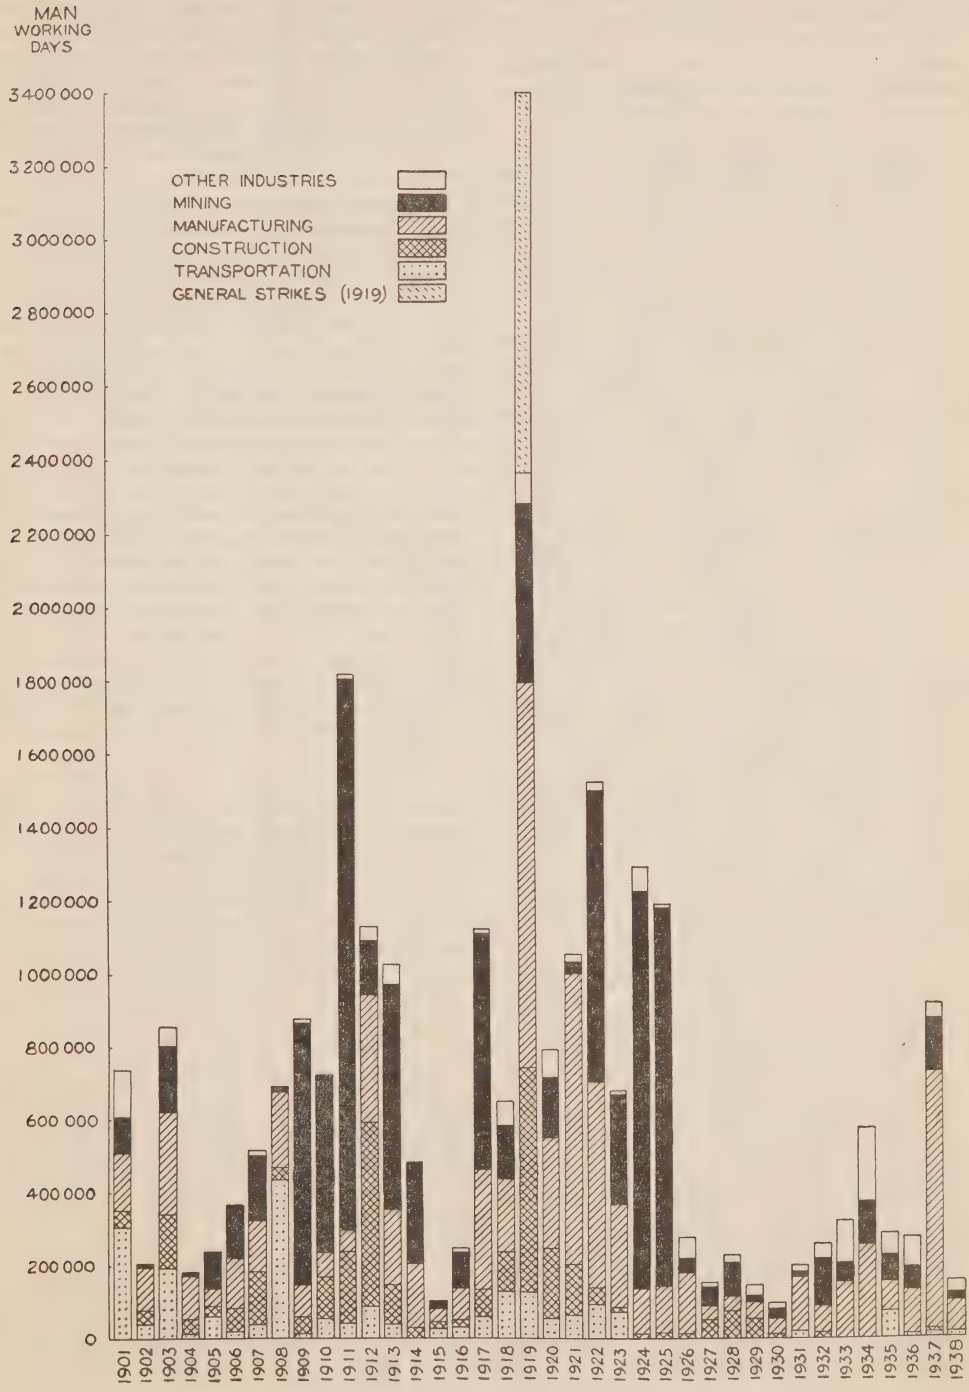
Review of Disputes by Industries

AGRICULTURE.—The only dispute recorded involved ten greenhouse employees at Kitchener, Ont., for a few days at the end of July.



LOGGING.—Of the four disputes recorded only one lasted more than a few days, that at McKirdy in Ontario in January. All were chiefly in regard to board and camp conditions except one, a strike for the dismissal of a foreman charged with discrimination against union employees.

FISHING.—Only three of the eight disputes recorded resulted in much time loss, namely those involving fishermen at Lunenburg, N.S., North Sydney, N.S., and Johnstone Strait, B.C. All of the disputes were with reference to prices of fish except that the strike at Lunenburg, N.S., and one at Vancouver, B.C., also involved union recognition while a strike of trawler fishermen at Halifax, N.S., was in sympathy with fish handlers.



MINING.—All of the disputes concerned coal mines except a strike of mercury miners at Bridge River, B.C., during August in a new mine where a dispute arose as to wage rates when regular production commenced, the strikers being replaced. The most important of these strikes involved coal miners at Minto, N.B., on strike from October, 1937, until January, 1938, when the dispute as to union recognition and wage rates was referred to a Board of Conciliation under the Industrial Disputes Investigation Act. The Board investigated the relations of the miners and the employers, prices of coal, market conditions, working and living conditions and recommended some improvements. Three disputes

73986—2½

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS OF WORKERS INVOLVED EACH YEAR 1901-1938

LOSS IN MAN WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1901-1938

in Saskatchewan during October arose out of the organization of two unions in the district and were referred to a Board under the Industrial Disputes Investigation Act. The Board began the investigation early in 1939. The other disputes were with reference to working conditions, adjustments of wages, dismissal of employees, alleged discrimination, etc. None were of great duration.

MANUFACTURING.—The textile and clothing industries were affected by 18 disputes involving 3,461 workers with time loss of 25,474 days. The most important of these disputes involved cotton factory workers at Cornwall, Ontario, for a few days in March, regarding the application of a provincial minimum wage scale for the industry which followed the strikes in textile factories in Ontario in 1937. The strike resulted in an agreement providing for the recognition of the union in dealing with wages and working conditions. There were also six textile and hosiery or knitting factory strikes which resulted in considerable time loss. Those were disputes as to working conditions, etc., affecting wages, but in one there was a demand for union recognition which resulted in recognition of a shop committee. There were comparatively few disputes in clothing factories. As in most of the recent years there were a number of disputes in wood and metal manufacturing establishments. The most important in the first of these industries was the strike of sawmill workers at Fort Frances, Ontario, from April to June against a reduction in wages and for the renewal of a union agreement, this being secured with a compromise on the wage reduction. The most important of the strikes in metal manufacturing were in four automobile or automobile parts plants at Windsor, Ontario, and one at Oshawa, Ontario. All were settled by the Ontario Department of Labour with an arrangement that any matters in dispute not settled by negotiations would be arbitrated by a departmental conciliation officer. There was also a dispute in an establishment at Windsor making glass for automobiles which was similarly settled. Two strikes of lime plant workers at Blubber Bay, B.C., occurred, one in March and one in June, the second being with reference to the recommendations of a Board under the British Columbia Industrial Conciliation and Arbitration Act for the settlement of the first strike, which was with respect to union recognition and discharge of union workers. The Board had recommended the setting up of both union and non-union committees. The plant continued in operation, the strikers being replaced to a great extent, but picketing continued to the end of the year resulting in disorders and the arrest and conviction of pickets and others on charges of assault, etc.

CONSTRUCTION.—All of the disputes involved comparatively small numbers of employees for very few days except a strike of painters in Toronto against 50 independent master painters to secure adherence to the union agreement, in which they were partially successful. There were six strikes of highway construction truck drivers, chiefly regarding rates per ton, etc.

TRANSPORTATION AND PUBLIC UTILITIES.—The most important dispute involved taxicab drivers in Toronto, Ont., in April to secure increases in wages, reduced hours and union recognition. After nearly three weeks a union agreement was signed with compromises on the wages and hours. A strike of deckhands, firemen, etc., on steamships operating on the Great Lakes and on the St. Lawrence River above Montreal was against refusal of employment to a number of workers who did not belong to certain unions with which the employers had made open shop agreements. Some of the other steamship companies had recognized another union for collective bargaining or had made verbal agreements for wage increases. It was arranged after two days that there would be no discrimination over union membership. Two strikes of cartage employees at Montreal, P.Q., resulted in union agreements and four brief strikes of freight handlers, longshoremen, and elevator employees resulted in wage increases, in most cases compromises.

TRADE.—Two strikes of coal handlers and drivers in Toronto, Ont., resulted in wage increases as a result of conciliation by the Ontario Department of Labour and an agreement enforceable under the Industrial Standards Act of Ontario was reached. A strike of fish handlers at Halifax over union recognition resulted in the reinstatement of dismissed union workers but not in union recognition as a majority of the employees in a vote under the Nova Scotia Trade Union Act did not favour it.

SERVICE.—Two strikes of cleaners and dyers in Toronto to enforce union agreements were unsuccessful. A strike of restaurant employees in Toronto, Ont., against the discharge of union workers was unsuccessful but some of the strikers were re-engaged in a settlement reached after five months.

Analysis of Statistics, 1938

Table I is a summary of the principal statistics for the period for which the record has been compiled beginning in 1901. The table shows the number of disputes beginning in

each year and the number in existence during the year, the difference in each case being the number of disputes carried over the end of the previous calendar year. A small number of disputes have been carried over at the end of every year except 1903, 1929 and 1934. The approximate number of employers involved in all disputes as well as the number of workers involved and the time loss, is given. In addition to these data, the number of disputes in existence during each year in coal mining and in industries other than coal mining is given, along with the number of workers involved and the time loss. A study of the latter figures reveals that a few disputes in coal mining in some years account for a large proportion of the workers involved and for a still larger proportion of the time loss resulting.

Table II, an analysis by number of workers involved, shows that over one-half of the disputes involved less than 100 workers and that these caused twenty-two per cent of the time loss for the year. Over one-half of the time loss, however, was due to 45 disputes involving from 100 to 500 workers and these 45 disputes affected over forty per cent of all the workers involved during the year. Only nine disputes involved more than 500 workers and these disputes caused only twenty-five per cent of the year's time loss.

Table III, an analysis by time loss, shows that only three disputes caused over 10,000 days' time loss, and that over one-half the year's time loss was due to 34 disputes, each of which resulted in time loss of between 1,000 and 10,000 days.

Table IV, an analysis by duration, shows that out of 147 disputes recorded 79 lasted less than five days and that altogether 114 lasted less than 15 days, also that nearly thirty per cent of the year's time loss was due to 17 disputes which lasted 25 days or more, and that nearly twenty-five per cent of the time loss was due to disputes which were carried over from 1937 or were unterminated at the end of 1938.

Table V, an analysis by provinces, shows that Ontario had the largest number of disputes as well as the greatest percentage of workers involved and time loss, being followed by Nova Scotia. The other provinces affected by considerable time loss were British Columbia, Quebec and Alberta. The interprovincial dispute was that involving steamship deckhands, firemen, etc., on the Great Lakes and St. Lawrence River for two days in April.

Table VI, an analysis by industries, shows that manufacturing had nearly one-half of the disputes and over one-half of the time loss but only 36·6 per cent of the workers involved in all disputes. Textiles and clothing, wood products, metal products and non-metallic minerals, etc., were the groups chiefly affected. Mining and fishing also had considerable time loss. In other industries the numbers of disputes were not large with proportionately little time loss.

Table VII, an analysis by causes and results of settlements, shows that disputes as to union questions were substantially equal to those as to wages, etc., not only in number but in workers involved and in time loss. It may be pointed out (as many be seen in Table X) that many of the disputes had more than one cause or object and in making this analysis each dispute is classified according to the cause shown first in Table X, being that which appeared to be the most important or the principal object among several. Very many of the disputes as to union questions involved also questions as to wages, in some cases probably of almost equal importance, and this affects the significance of the comparison. Approximately forty per cent of the time loss for the year was due to each of these groups of causes. By results it appears that nearly one-half of all workers involved in disputes were partially successful, that thirty per cent were successful and that fifteen per cent were unsuccessful. In disputes primarily as to wages, about one-half of the workers were partially successful, thirty per cent were successful, and less than ten per cent were unsuccessful. Nearly the same proportions appear in disputes as to union questions.

Table VIII, an analysis by industries and methods of settlement, shows that out of 147 disputes on record 56 were settled by direct negotiations between the parties involved and 49 by conciliation, approximately one-third of all disputes in each case. In previous years the proportion settled by negotiations has been much larger. The change is probably due to the larger proportion of disputes as to union recognition, etc., which are less likely to be settled by direct negotiations, and therefore frequently result in resort to conciliation, usually by the federal, provincial or municipal authorities. In recent years most of the provinces have provided for conciliation in labour disputes, either by legislation for the appointment of boards of conciliation or arbitration or by the appointment of conciliation officers. The four disputes terminated by reference to Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were those involving coal miners in New Brunswick and Saskatchewan.

Table IX, gives an analysis by months for the past eleven years, showing the number of disputes commencing during each month, as well as the number of disputes in existence,

and the number of workers involved each month, both in new disputes and in all disputes in progress, with the total time loss by months. Until 1931 the largest number of disputes was usually in May or June due chiefly to strikes in the building trades but since 1930 there have been comparatively few disputes in the construction industry. During 1938 the greatest number of disputes was in October, there being some increase in nearly all of the industries. The greatest time loss occurred in January owing to strikes of fishermen and fish handlers in Nova Scotia, coal miners in New Brunswick, pulpwood cutters in northern Ontario, and textile workers in Quebec.

TABLE II.—STRIKES AND LOCKOUTS, 1938, BY NUMBER OF WORKERS INVOLVED

Number of workers involved	Disputes		Workers involved		Time loss	
	Number	Per cent of total	Number	Per cent of total	Man working days	Per cent of total
1,000 and over	3	2·0	3,800	18·6	9,300	6·3

a. Employment conditions no longer affected but in most cases union continued strike for some time. b. 1,200 coal miners out in 1937 at commencement of strike. c. Dressmakers in Toronto, 500 employees in 42 establishments, stopped work by arrangement with employers for January 27 to ratify new agreement. d. A strike of 35 truck drivers, for one day in August, at Brown's Flats, Queen's County, N.B., for a change in wage payment system has been reported recently. A compromise was reached as a result of conciliation by the Provincial Fair Wage Officer.

Strikes and Lockouts in Other Countries during 1938

THE accompanying tables gives the principal figures as to strikes and lockouts in other countries since 1919, as compared with Canada, showing the number of disputes (strikes and lockouts), the number of employees involved in stoppages of work and the time loss in man working days in those countries for which such figures are available.

Methods of compilation of trade dispute statistics vary greatly in various countries. In some countries figures as to strikes and lockouts are published separately, but where possible, they have been included together in the table here given. In some cases the number of strikes and lockouts shown for a year is the number beginning during the year, in other cases it is the number ending during the year and in still other cases it is the number in existence during the year, including those carried over from the previous year with those beginning during the year.

The figures as to the number of employees involved published by some countries show not only the number of employees directly involved, but also the number of those indirectly affected, that is thrown out of work by disputes to which they were not parties; but exact information on this point is not always given. In the table given herewith the column showing numbers of employees involved includes figures for the numbers directly involved or the total number directly and indirectly involved according to the method adopted by the country concerned.

For some countries figures as to time loss, that is the number of "man working days" lost, are not given.

Footnotes to the table indicate the nature of the statistics with reference to the above points.

Many countries publish statistics dealing with trade disputes only once each year or even less frequently, the figures being issued in some cases after an interval of some length. Most countries revise their figures when additional facts are brought to light, even though such revisions may necessitate changes in statistics published a considerable time previously.

In most cases the statistics dealing with disputes in other countries, published in the Labour Gazette are obtained from official publications of the countries concerned, but in some cases the information is obtained from publications of the International Labour Office of the League of Nations. Information as to particular disputes is obtained for the most part from newspaper reports; as very few countries give detailed accounts of all strikes in their official publications.

Great Britain and Northern Ireland

The number of trade disputes involving stoppages of work in Great Britain and Northern Ireland which began during 1938 was 866 as compared with 1,129 in 1937. Including about 1,000 workers involved in strikes which began in 1937 and extended into 1938, the total number of workers, either directly or indirectly involved in all disputes which were in progress during 1938, was 275,600, the comparable figure for 1937 being 610,200. The time loss was estimated at about 1,335,000 man working days during 1938 as compared to 3,413,000 in 1937.

Although the number of disputes beginning during 1938, was the fourth highest since 1919, having been exceeded in 1919, 1920 and 1937, the aggregate working time lost was less than in any previous year during the period, with the exception of 1927, 1933 and 1934.

There was no dispute of major importance during the year. Only two disputes involved more than 5,000 workers. One of these involved about 5,100 employees of an aircraft factory at Birmingham, who were on strike from August 29 to September 7 due to dissatisfaction with certain basic rates of wages; they returned to work on conditions, existing prior to the strike, pending negotiations. The other affected 9,700 coal miners in South Wales and Monmouthshire who struck work on July 11, refusing to work with non-unionists; this strike ended the same day when the non-unionists joined the union. In addition there were three protracted disputes in the coal mining industry, each of which though affecting only one colliery, resulted in an aggregate loss of from 90,000 to 100,000 man working days; two of these stoppages occurred in Scotland and the other in Kent.

France

The year 1938 was one of rising prices in France and this fact together with the need for increased industrial production due to the international situation, played an important part in the history of industrial relations during the year.

Late in 1937 there was a strike of 100,000 municipal and suburban employees in and about Paris arising from a demand for increased wages to compensate for the increased cost of living, and while the strike was terminated before the end of that year, the negotiations in which government officials took part were not satisfactorily completed until January 25, 1938 (Labour Gazette, February 1938, page 141).

During March and April there were large strikes in which the workers attempted to force their employers to sign new agreements which would provide for adjustments in wages in accordance with changes in the cost of living. A strike in March was reported to have involved about 30,000 workers in the metallurgical, chemical and other industries in the Paris district and the Lille region of Northern France. Another strike of metal workers reported to number 160,000 took place in the Paris district between April 15 and May 29 with similar objectives. In both these cases representatives of the government took part in the negotiations and while amicable settlements were announced the exact terms were not made public.

In July there began a strike of about 7,000 dockworkers at Marseilles who refused to work nights or Sundays until such time as rates of pay for work done in excess of 40 hours per week were settled. During negotiations soldiers were used to unload boats.

On August 21, the government announced that due to the seriousness of the foreign and domestic situations, a plan had been drawn up to modify the forty hour week which had been established in 1936. National defense industries were to work at least 48 hours per week and workers in other industries were urged to accept increases in the length of their working hours "in accordance with their needs."

Demands by workers that the forty hour week should be retained led to strikes early in September, notably at Amiens, when 14,000 textile workers took possession of 24 mills. Due to the serious international crisis in the latter part of this month the exact nature of the settlement effected was not made clear; but the necessity for increased production and the mobilization of large numbers of labourers undoubtedly played an important part in the settlement of disputes at this time.

During October the government obtained from parliament emergency powers for the issue of decrees designed to improve national finance and increase production. Early in November fifty-eight such decrees were published, one of the most controversial of which was that which extended the forty-hour week to from 44 to 50 per week.

These decrees led to several of the most serious strikes of the year. On November 20, about 50,000 metal workers and coal miners in the Lille district went on strike and on November 24 the strikes spread to the Paris district, one of the largest being that of employees of an automobile and small arms plant at Billancourt reported to number over 30,000, a number of whom refused to leave the plant until compelled to do so by force.

On November 25, the General Confederation of Labour, representing about 5,000,000 trade unionists, called for a 24-hour strike to take place on November 30, in protest against the decrees. The government, as in the case of a railway strike in 1910, requisitioned the railways thus making interference with railway operation a crime. Later military control was extended to subways, buses, gas, water, light, mail, telegraph and telephone services. Strikers in these categories were warned that they would be liable to court martial. Troops were also concentrated at various points in Paris and throughout the country to aid police authorities, should they be required.

On November 30 large numbers of workers refrained from working but the great majority did not and although there were numerous interruptions to industry these did not reach the proportions of a nation-wide general strike. There were numerous arrests and dismissals of strikers but following the failure of the general strike the government announced a conciliatory policy and it appeared probable that sentences would not be severe. By December 7, it was reported that conditions in the metal industry in northern France, where the strikes had been most widespread, had become almost normal.

United States

Complete statistics of industrial disputes in the United States during the year 1938 will not be published until later in the year. The annual analysis of the statistics of industrial disputes for the year 1937 was published in the May, 1938, issue of the Monthly Labour Review and was summarized in the LABOUR GAZETTE, June, 1938, page 614.

The unrevised figures for the first eleven months of 1938 show that there were about 2,339 strikes in progress during this period as compared to 4,709 during the same months in 1937. The number of workers involved in these strikes was approximately 640,000 while in the first eleven months of 1937 there were more than three times as many workers involved in strikes. The time loss in the first eleven months of 1938 was approximately 8,250,000 man working days while the figure for the corresponding period of 1937 was 27,750,652 man working days.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1939

THE following table shows the number of disputes, workers involved and time loss for February, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Feb. 1939	8	2,643	24,791
*Jan. 1939	10	1,228	8,047
Feb. 1938	9	1,627	3,575

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of disputes in February was slightly lower than in January but the number of workers involved and the time loss in man working days were both much greater. More than one-half of the time loss during February was caused by a strike involving about 1,000 workers in rubber factories in Kitchener, Ont. Strikes involving coal miners at Blairmore, Alta., and at Cumberland, B.C., also caused considerable time loss. The former was carried over from January, being the only dispute causing substantial time loss in that month. In February, 1938, the only dispute which caused much time loss was that involving 1,200 coal handlers and drivers at Toronto, Ont., for one and one-half days.

Three disputes, involving 825 workers and causing a time loss of 7,021 man working days, were carried over from January, and five disputes commenced during the month. Of these eight disputes recorded for February, six were terminated during the month, three resulted in favour of the workers involved and one in favour of the employer concerned, while a compromise settlement was reached in one case and the result of one dispute was recorded as indefinite. At the end of February, therefore, there were two strikes or lockouts on record, namely: rubber factory workers, Kitchener, Ont., and lime plant workers, Blubber Bay, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; and dressmakers, Montreal, P.Q., January 20, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A cessation of work by seventy loggers at Fire River, near Hornepayne, Ont., from January 27 to January 31, was noted in the February issue of the LABOUR GAZETTE but particulars were not received in time for that issue. The workers demanded an increase in wages of $5 per month and improved board and camp conditions. Negotiations resulted in a resumption of work at the same wages but certain improvements in camp conditions were to be made.

A minor dispute involved two stationary engineers in a factory building in Toronto, Ont., who ceased work on February 13, demanding renewal of an agreement with the International Union of Operating Engineers and an increase in wages of $3 per week. Negotiations resulted in a resumption of work in about two hours, a closed shop union agreement having been signed. Wages were increased from $23 per week to $26 for a third-class engineer and from $20 per week to $23 for a fourth-class engineer. Provision was made also for dealing with future disputes. The agreement is outlined elsewhere in this issue.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to February

COAL MINERS, BLAIRMORE, ALTA.—Following the rejection, on February 1, by a vote of the miners, of the arrangement agreed upon in January between the representatives of the employers and the union, the conciliation

officer of the Department arranged that a conference should be held on February 7 and negotiations for a new scale of contract rates were begun. The scale agreed upon was accepted by a vote of the miners on February 14, and work was resumed the next day.

Cap and Glove Factory Workers, Windsor, Ont.—A settlement of this dispute, as noted in the Labour Gazette for February, was reached on February 1. A closed shop union agreement was signed providing for a reduction in hours from forty-four per week to forty-two, time and one-quarter for overtime, and for arbitration of disputes. This was the result of conciliation by a Toronto dealer in materials for the work. Work was resumed on February 4.

Lime Plant Workers, Blubber Bay, B.C.—A settlement of this dispute which commenced in June, 1938, was not reached by the end of the month as the proposals of a committee to deal with the dispute were rejected on February 3. The committee consisted of representatives of the British Columbia Coast District Council of the International Woodworkers' Association and of the company with the Chairman of the Board under the Industrial Conciliation and Arbitration Act, which had made an award in connection with the dispute prior to the strike, acting as conciliator and chairman. A member of the provincial legislature was present. The proposals were that the company would reinstate half of the men on strike, some immediately and some later, and would negotiate all disputes with a committee of employees.

Disputes Commencing During February

Coal Miners, East Coulee, Alta.—Employees in one mine ceased work from the afternoon of February 9 to February 14 alleging a lack of heat and hot water in the washroom due to a defective pipe. The management replaced the pipe and work was resumed on instructions from a union representative. Some disputes as to other matters were also settled.

Coal Miners, Cumberland, B.C.—Employees of a colliery, reported to have been closed down since December, refused to resume work on February 20 on the re-opening of the mine when the company discontinued free transportation of miners for whom there were not sufficient houses at this mine. These were joined on the same day by the employees in the other colliery operated by the same company. The strikers are members of the United Mine Workers of America and it was stated the union officers ordered a resumption of work pending negotiations as the strike was in violation of the agreement. Work was resumed on February 24 and the company agreed to provide transportation.

Rubber Factory Workers, Kitchener, Ont.—Rubber factory workers in one establishment making rubber tires, tubes, etc., ceased work on February 8 demanding an increase in wages of five cents per hour and a signed agreement with the United Rubber Workers of America. When efforts at conciliation by the Mayor and a committee of Council were not successful the strikers were joined on February 13 by workers in a rubber footwear factory, who made the same demands. Both establishments belong to one company. Proposals of the employers that the workers return to duty and continue negotiations with the management through the union for its own members only and failing agreement to refer the dispute to the Ontario Department of Labour were rejected by the union employees on February 15. Non-union employees, about 350 in number, voted on February 16 in favour of returning to work under the same conditions as prevailed prior to the strike but no effort was made to resume operations. A mediation committee consisting of company and union officials with representatives of the Ontario Department of Labour drew up proposals providing for overtime pay, regulation of hours, collective bargaining procedure and observance of seniority rights and guaranteed production during the term of any resultant agreement. The proposals while meeting with the approval of the union employees at a meeting on February 26 were not accepted as a basis of settlement without an increase in wages, which the company stated could not be made. A settlement was not reached by the end of the month. Early in March as a result of conciliation by the Ontario Department of Labour, a settlement was reached providing for arbitration of the wage dispute and work was resumed on March 13.

Steel Mill Workers (Bar Mill), Sydney, N.S.—Employees in the bar mill in a steel manufacturing establishment at Sydney, N.S., ceased work on February 22 to secure payment at wage rates by the ton instead of by the hour for certain workers. Work was resumed in the afternoon of February 23 pending negotiations. The employees again ceased work later in the day as the negotiations were not successful and at the end of the month a settlement had not been reached. On March 7, as a result of conciliation by the Deputy Minister of Labour for Nova Scotia, work was resumed.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to February, 1939.				
MINING, ETC.—				
Coal miners, Blairmore, Alta.	3	700	6,000	Commenced Jan. 16, 1939; *re* conversion of yardage to tonnage rates of pay without change in earnings; terminated Feb. 14; conciliation (federal); new scale negotiated; compromise.
MANUFACTURING—				
Textiles, Clothing, Etc.—				
Cap and glove factory workers, Windsor, Ont.	1	21	21	Alleged lockout, commenced Jan 27, 1939; *re* reinstatement of workers, union agreement, etc.; terminated Feb. 1; conciliation (wholesale merchant); in favour of workers.
Non-Metallic Minerals—				
Lime plant workers, Blubber Bay, B.C.	1	104	1,000	Commenced June 2, 1938; *re* application of conciliation board (provincial) award as to reinstatement of certain workers and as to union recognition; unterminated.
(b) Strikes and Lockouts commencing during February, 1939.				
MINING, ETC.—				
Coal miners, East Coulee, Alta.	1	60	210	Commenced Feb. 9; alleged lack of heat and hot water in washroom; terminated Feb. 14; return of workers when equipment repaired; in favour of workers.
Coal miners, Cumberland, B.C.	2	578	2,300	Commenced Feb. 20; for free transportation between homes and mine; terminated Feb. 23; return of workers pending negotiations; in favour of workers.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	2	1,000	15,000	Commenced Feb. 8; for union agreement, increased wages, etc.; unterminated.
Metal Products—				
Steel mill workers (bar mill), Sydney, N.S.	1	100	200	Commenced Feb. 22; for wages per ton instead of per day; terminated Feb. 23 pending negotiations; indefinite.†
TRANSPORTATION—				
Steam Railways—				
Labourers (snow shovellers), Brockville, Ont.	1	80	60	Commenced Feb. 23; for increase in wages; terminated Feb. 23; return of workers and replacement; in favour of employer.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

†A second stoppage was reported, from Feb. 23 to March 6.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month. The annual review containing a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries is on pages 275 to 281 of this issue.

Great Britain and Northern Ireland

The *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes which began during January was 57 and 8 were still in progress from the previous month, making a total of 65 during the month, involving 22,600 workers with a resultant time loss of 81,000 man working days.

Of the 57 disputes which began during January, six arose out of demands for increases in wages and 18 were over other wage questions; two were over questions of working hours, 12 were over questions respecting the employment of particular classes or persons, 15 arose out of other questions affecting working conditions and four were over questions of trade union principles.

Final settlements reached during January numbered 48. Of these, 10 were settled in favour of the workers, 24 were settled in favour of the employers and 14 resulted in compromises. In the case of seven other disputes work was resumed pending negotiations.

The largest strike reported to the Ministry of Labour during January was one which involved 5,800 colliery workers at several collieries in Glamorganshire who refused to work with non-unionists. The strike commenced on January 23; work was resumed on January 25 when the non-unionists joined the union.

At Coventry, 5,000 employees of a firm manufacturing aeroplane and motor engines struck on January 31 in protest against the employment of juveniles on work claimed by adults. Work was resumed on February 2 on conditions existing prior to the stoppage.

At Deal, Kent, 710 coal mine workers ceased work on January 4 in protest against the suspension of one shift of 12 workers who had left the pit without authority. About 600 workers were indirectly affected. Work was resumed the same day on the advice of the strikers' union.

At Granton, Newhaven and Leith on the Firth of Forth, officers and crews of fishing trawlers together with shore staffs, numbering in all 600, ceased work on January 4 as the result of a dispute concerning the basis of net takings for the purpose of determining bonus payments. About 200 workers were indirectly affected. No settlement has yet been reported.

A strike of 679 workers in a rubber tire factory at Inchinnan, Renfrew, began on January 12 as a result of dissatisfaction with new piecework rates for certain work. Increases were conceded and work was resumed on January 14.

Objection to the appointment of a foreman led to a strike of 564 skilled and semi-skilled employees of an aircraft factory at Dumbarton, near Glasgow on January 25. Work was resumed the following day without change in conditions.

Belgium

The monthly labour review of Belgium reports five strikes as having begun during December. These strikes which were all terminated before the end of the month involved 1,426 workers and resulted in a time loss of 1,676 man-working days. Of the settlements, two were in favour of the workers, two in favour of the employers and one resulted in a compromise.

United States

Preliminary estimates of strikes in December, 1938, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 155 strikes as beginning during the month, which with 120 unterminated at the end of November made a total of 275 in progress during the month. The number of workers involved in these disputes was 60,000 with a resultant time loss of 550,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 303 strikes in progress involving about 70,000 workers with a resultant time loss of 600,000 man working days.

On February 1, members of the Building Service Employees International Union employed in the garment trade district of New York went on strike demanding a forty-hour week and an increase of 15 per cent in wages. The number of men on strike was variously reported but appears to have been about 6,700. As a result about 100,000 workers in

73986—4½

the clothing industry were unable to work. In an effort to effect a settlement the mayor called a conference between representatives of the union and the Midtown and Penn Zone Realty Owners Association against which organization the strike had been called. On February 3, both sides accepted the mayor's plan which called for a wage increase of $1 per week and a reduction of one hour in the 48 hour working week, with a further reduction of one hour and a re-opening of wage negotiations after eighteen months. Work was resumed on February 4.

A factional dispute among members of Plymouth Local 51 of the United Automobile Workers caused a strike of 23,000 employees of an automobile plant at Detroit on February 23. Those who ceased work were in favour of retaining their affiliation with the Congress of Industrial Organizations while they claimed that the company was dealing with an opposing faction. At the request of the official who is recognized as acting-president of the United Automobile Workers by the Congress of Industrial Organizations the strikers returned to work on February 24, pending an election to be held under the auspices of the National Labour Relations Board, to decide who shall represent them.

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Summary of Recent Decisions

REPORTS have been received of two cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the LABOUR GAZETTE, November, 1938, page 1213, and in previous issues, and the sixth report of the proceedings of the Board covering the period from October 1, 1933 to September 30, 1936 was issued as a supplement to the February, 1937, issue of the LABOUR GAZETTE.

The Board was established under voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules of agreements having due regard to the rights of the several classes of employees and of the railways respectively".

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following railway brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance-of-Way Employees and Railway Shop Labourers.

Case No. 470—The Canadian National Railways (Central Region) and the Order of Railroad Telegraphers

This case concerned a dispute relative to the filling of the position of agent at Point Edward, Ontario. It was stated by the employees that in Ocotber, 1937, the agent at Sarnia retired and the agent at Point Edward was moved to the Sarnia agency and given jurisdiction over the agency at Point Edward as well as Sarnia, this action being taken by the Railways without notifying the Order of Railroad Telegraphers' Committee. Since that time it was stated that the Order of Railroad Telegraphers has been endeavouring to have the agency at Point Edward bulletined and filled, but the Railways' management has declined to do so.

The employees contended that the agency at Point Edward had not been discontinued, as the work of selling tickets and supervising train movements was still being carried on with the exception of the accounting which was being done at Sarnia, and also that the greater part of the business at Point Edward which was formerly done through the agent was being carried on through the chief clerk. The employees therefore requested that the vacancy for an agent at Point Edward, "a schedule position", be properly bulletined to the telegraphers located in that promotion district (No. 11) and assigned to the senior qualified applicant.

The Railways stated that the agent at Sarnia and the agent at Point Edward are included in the wage scale of the telegraphers' schedule and designated as supervisory agents and are open to bid by telegraphers holding seniority in Seniority and Promotion District No. 11.

It was also stated by the Railways that the volume of local freight handled at Point Edward was negligible and that the only reason for maintaining a freight office and shed was due to the interchange of traffic with boats during the navigation season.

The Railways therefore contended that present day conditions did not warrant the

employment of an agent at Sarnia and an agent at Point Edward and requested that the claim of the employees be denied.

In its decision the Board stated that the letter and spirit of the agreement had not been complied with in abolishing the position of agent. The Board therefore recommended that "In all the circumstances, and without prejudice to the Company's right to close stations, the position of agent at Point Edward should be bulletined, and in view of the material changes in conditions that have occurred since the position was first established the parties should confer together with a view to making such adjustment as the changes in conditions may justify".

Case No. 471—The Canadian Pacific Railway (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

This dispute was relative to the question of compensation payable to road crews required to perform yard service only, no road service being involved either before commencing or upon completion of such yard service.

In a joint statement of facts it was declared that an unassigned freight crew consisting of a conductor and two trainmen were called upon to perform switching duties in Kerrobert Yard and were paid for a minimum day at through freight rates for the service performed. A claim for the payment of these men at yard rates was made but was declined by the Company.

The employees contended that as this road crew was used exclusively in yard switching service, no road service having been performed, such work should be compensated in accordance with yard service rates and conditions.

The Company maintained that "there is no provision in its contracts with either the Order of Railway Conductors or the Brotherhood of Railroad Trainmen requiring it to pay yard rates to a road crew for switching done within a terminal. There are, however, several clauses providing that road crews will be paid road rates for work done within terminal limits". The Company therefore contended that the claim of the employees was not justified

Representatives of both the employees and the Company appeared before the Board on different occasions and presented additional oral and written evidence in support of their respective contentions.

The Board's decision sustained the claim of the employees.

Industrial Labour in India

The International Labour Office has recently issued a report entitled "Industrial Labour in India" (Studies and Reports Series A, Industrial Relations), which is a survey of industrial labour in those provinces of that great country which make up what is known as "British India."

In preparing this volume, the International Labour Office has drawn very largely on the Report of the Royal Commission on Labour in India (the Whitley Commission), which was issued in 1931; this Report, together with the volumes of evidence given before the Commission, represents the results of what was probably the most thorough investigation into industrial conditions that has ever been made in one country. Although there have been important changes in the industrial situation in India since the Report was issued—changes which have been due in no small measure to the recommendations of the Commission—the Report remains, and will no doubt long remain, the principal source of information about conditions of labour in India, as well as of suggestions for reform. Many other sources of information have been tapped, and the most recent statistical and other data have, as far as possible, been included.

The report of the International Labour Office is divided into ten chapters, the first being explanatory of the geographical, social and political setting of the problems of industrial labour in India, while the others deal successively with the nature and extent of industrial employment, labour legislation, industrial relations, employment and unemployment, health and safety hours of work, wages, standard of living, and housing and welfare.

Service Dividend for Employees of Imperial Tobacco Co., Ltd.

According to a recent announcement made by the Imperial Tobacco Company of Canada, Limited, approximately 4,000 of its employees will receive a service dividend amounting to about $220,000, representing 5½ per cent of wages earned during 1938. It was stated that the payment of this service dividend brought the total amount of such dividends paid to $840,000.

Employees of the Imperial Tobacco Company also benefit through group insurance, a sick benefit plan, a pension fund, and a week's annual vacation with pay for factory workers. (For vacation plan see Labour Gazette, April 1937, page 423).

PROVINCIAL LEGISLATIVE PROGRAMMES OF LABOUR ORGANIZATIONS

THE February issue of the LABOUR GAZETTE (page 166) contained summaries of the programmes of proposed labour legislation presented to their respective provincial governments by the Saskatchewan Provincial Executive of the Trades and Labour Congress, and the Manitoba Executive Committee of the Trades and Labour Congress, Legislative Committees of the Winnipeg Trades and Labour Council, and the Railway Transportation Brotherhoods.

Reviews are presented herewith of the submissions made by the Alberta Federation of Labour, the New Brunswick Federation of Labour, and the Joint Legislative Committee of the Railway Transportation Brotherhoods, the Ontario Executive of the Trades and Labour Congress, the Confederation of Catholic Workers and the Provincial Federation of Labour of Quebec.

Alberta Federation of Labour

On January 19, the Alberta Federation of Labour presented a brief of proposed labour legislation to the Alberta government.

Dealing with the problem of unemployment, the memorandum referred to the practice in certain sections of the province of finger-printing unemployed persons. It was demanded that this practice cease and that such finger prints as have been taken be immediately destroyed.

The memorandum expressed the delegation's opinion that unemployment "can and should be, materially reduced through the undertaking of large scale public works programmes under trade union rates of wages." It was suggested that work-creating projects such as extension and improvement of highways, erection and repairs to public buildings, slum clearance, and reforestation and conservation work programmes be adopted.

Unemployment Insurance

Referring to the endorsement of a plan of national unemployment insurance by the national and provincial organizations of the Trades and Labour Congress, the delegation's memorandum urged the provincial government to "enact the necessary legislation to give the workers of this province protection which such insurance scheme would afford."

Relief Rates and Labour

The opinion was expressed that relief scales were inadequate and should be materially increased. Opposition was also registered against the "common practice of replacing civic employees by relief labour" and of "government officials offering the service of relief labour to do work which would ordinarily be done through regularly employed workmen at trade union rates of wages; also to the forced labour feature of the so-called Farm Labour Scheme, and the ridiculously low wages forced upon this class of worker."

Hours of Labour

It was suggested that in order to set an example, the government should reduce the hours of labour in all public institutions and undertakings and that at the forthcoming session, legislation should be enacted providing for a 40-hour maximum work-week, "and that since present day wages only allow for the bare necessities of life" no reduction in wages should take place.

The memorandum registered the protest of the hotel and restaurant employees' organization to the practice of the "split shift" system. Legislation was requested guaranteeing an eight-hour day to all hospital employees and nurses in the province.

Minimum Wages

A minimum wage rate of 55 cents per hour or at least $100 a month was requested, together with a revision and survey of the Female Minimum Wage Act as applying to hotels and restaurants.

The memorandum recorded the delegation's objection against the practice of making deductions for employees' meals in the catering industry and urged: That all uniforms should be supplied and laundered by the employer; that minimum wages should be at least $14 per week including meals in all first class hotels and restaurants, and $11 per week, including meals, in second class establishments; that extra waitresses should be paid a minimum of 35 cents per hour with meals; and that each "call shift" should consist of 4 hours straight and should not be broken up into separate shifts.

Department of Labour

The delegation reiterated its request that the government establish a Department of Labour and urged upon the government "the need and necessity of such a department." It

was also requested that the Federation be represented upon all Boards dealing with matters "affecting wages, hours, enforcements and all such matters as are of vital importance to the worker."

It was suggested that habitual violators of the minimum wage laws be refused a licence to carry on business in the province.

Mothers' Allowances

Believing that an increase in mothers' allowances was absolutely necessary, it was suggested that provisions must be made for the raising of the age limit under which children are eligible for allowance to 19 years providing they attend school. It was asked that deserted wives, mothers with invalid husbands and all mothers whether with one or more children, be included under the Act.

Old Age Pensions

The assistance of the provincial government was sought in having the Old Age Pensions Act so amended as to provide that it shall become a retirement scheme to those 55 years of age and over who withdraw from industry and commerce; that the minimum of such pensions be $60 per month and that no deduction be made from allowances so fixed where a recipient's income is less than $1,000 per annum.

Other Requests

Other proposed legislation included: Enactment of legislation providing at least two weeks vacation with pay for all workers in industry and commerce; amending the Garnishee Act to provide that a person shall be allowed to retain $100 per month of his wages; setting up an independent Civil Service Commission; making it compulsory for an employer to recognize and negotiate and bargain collectively with a union and representative of such unions which represent at least 51 per cent of the workers; changes in the Workmen's Compensation Act; health; education; etc.

New Brunswick Federation of Labour and Joint Legislative Committee of the Railway Transportation Brotherhoods

On February 1, 1939, the New Brunswick Federation of Labour and the New Brunswick Joint Legislative Committee of the Railway Transportation Brotherhoods presented their legislative requests to the government of the province. Their memorandum complimented the provincial government on the labour legislation enacted at the last session of the New Brunswick legislature, particular reference being made to the Labour and Industrial Relations Act, the Mining Act, the Workmen's Compensation Act and the Forest Operations Commission Act.

Department of Labour

The government was again urged to establish "a proper Department of Labour with a Minister and a Deputy Minister at its head to take over the administration of the various labour and social acts now on the Statutes and those that may be passed in the future, and to have general supervision of matters pertaining to labour and industrial activities."

Nationalization of Social and Labour Legislation and the B. N. A. Act

Expressing the opinion that experience had "proven conclusively that the lack of uniformity in social and labour legislation of the provinces has prevented the full enjoyment of the provisions of laws in the provinces where this type of legislation is in force, and has denied to others the rights and privileges which they should be enjoying in certain provinces which have been backward in adopting advanced social legislation," it was stated that such legislation should be Dominion wide in scope, and it was urged that the provincial government pass enabling legislation which would make it possible for the Dominion Parliament to enact such legislation which would be effective in all provinces.

Amendments to the British North America Act were suggested on the following basis:

(*a*) To broaden the scope and legislative competence of the Federal Government empodwerpetence of the Federal Government empowerterest and welfare of the people of Canada as a whole; and particularly to enable it to implement by legislation the several draft conventions and recommendations of the International Labour Conferences of the League of Nations.

(*b*) To empower the Federal Government to deal effectively with the regulation of all transport agencies as works for the general advantage of Canada.

(*c*) To permit Federal control over industrial and commercial activities essential to ensuring the adoption and observance of proper working conditions and living standards and the elimination of unfair and unnecessary competition between provinces.

(*d*) Restrict the powers of the Senate to veto any bill passed by the House of Commons more than twice; this being in harmony with the present practice of the British Parliament.

(*e*) Abolish appeals to the Privy Council.

Labour and Industrial Relations Act

Two major changes in the Labour and Industrial Relations Act were requested. One

of these was the inclusion of employees of the Crown in the benefits of the Act, as it was considered "unfair and unjust, and possibly unconstitutional," to deprive certain citizens of rights "recognized as lawful for others."

It was declared that experience gained since the enactment of the legislation had shown that Part 2 of the Act was not giving the desired objectives. In this connection it was claimed that this Part of the Act did not go far enough in providing for collective bargaining between employers and employees; and secondly that Section 9 was considered to be too all inclusive to the extent that it was feared that it interfered with employers and employees consummating certain working agreements. The memorandum then specifically detailed the desired changes.

Workmen's Compensation

The memorandum urged the implementation of certain requests made on other occasions for amendments to the Workmen's Compensation Act. Failing this it was suggested that a committee or commission be appointed "to consider and recommend to the government amendments to the Act, which will bring it into line with similar legislation in Canada."

Industrial Standards Act

It was "urgently requested" that the government enact legislation at the forthcoming session of the legislature similar to the Industrial Standards Acts in Alberta and Ontario.

Proposed New Brunswick Labour Act

Referring to protests made from various parts of the province during the last several years against contractors and other employers bringing workers into the province to perform work which could have been done by resident labour, it was requested that legislative protection be given to workers similar to that provided in Nova Scotia by law. The memorandum contained an outline of a proposed "New Brunswick Labour Act."

Hours of Labour

In order that the benefits of the shorter work-day and work-week might accrue to all concerned and more evenly distribute the products of labour, the government was urged to "consider the passage of an act establishing a universal six-hour work-day and five-day work-week, with no reduction in the daily or weekly remuneration, as any reduction in this would defeat the primary object, that of providing employment and purchasing power so that, that which is produced may be consumed."

Railway Unification

The memorandum recorded the opposition of organized labour in New Brunswick to "all proposals for amalgamation of our two great Canadian railway systems for several reasons, most important of which is the disastrous effect such amalgamation must have upon employment in this province."

Other Requests

Additional legislative proposals and requests dealt with such subjects as: Regulation of highway transport; proclamation of certain legislation passed but not in force such as the Mothers' Allowance Act, the Children's Protection Act, and the Minimum Wage Act for Women and Girls, the Electrical Energy Act, the Factories Act and the Stationary Engineers and Steam Boiler Act. Other requests referred to highway traffic rules; protection of highway crossings; stationary engineers' licences; free school books; state hospitalization and medicine; Housing Commission Act; provincial civil service; examination and licensing of motion picture machine operators, etc.

Trades and Labour Congress of Canada

The legislative recommendations of the Trades and Labour Congress were submitted to the Ontario government on February 14, the delegation of approximately 60 members being headed by Mr. R. J. Tallon, acting president.

Employment and Unemployment

Emphasizing that unemployment continued to be the most pressing problem, the Congress recommended the undertaking of essential public works and that steps be taken to make possible the application of the federal Municipal Improvements Act. Pointing out that the Dominion housing legislation "is continunemployment included: Promotion of the provincial authorities," it was urged that the provincial government take the necessary steps to permit of full advantage being taken of the provisions of the Dominion Act.

As a means of encouraging home building, reduction of interest rates on public debt and private mortgages was recommended. Other recommended measures in the amelioration of unemployment included: promotion of the tourist trade by the extension and modernization of highways; land clearance for agricultural purposes; reforestation and conservation; extension of the facilities of the Employment

Service with financial assistance to permit workers "securing and reaching jobs at distant points" etc.

Unemployment Insurance

Reiterating its contention that unemployment insurance is a national responsibility, the memorandum referred to the action of the Niagara Falls convention of the Trades and Labour Congress in this direction and quoted the following section:

"We trust the Ontario Government's policy of co-operation with the Federal Government in this matter will be continued so as to make immediately possible the enactment of this very necessary and long overdue social reform."

Moratorium and Debt Adjustment

The memorandum again directed attention "to the position of those who, through continued unemployment or under-employment, are unable to meet obligations in respect to their homes," and reiterated the organization's request for continuance of existing moratorium legislation. It was also suggested that "in cases where foreclosure is threatened the government assume the mortgage at a rate of interest and under terms within the resources of the home owner." Legislation permitting municipalities to consolidate tax arrears and accept payment over a period of years was also recommended.

Right to Organize

In again seeking the enactment of legislation to guarantee to workers the legal right to join trade unions of their own choice for the purpose of collective bargaining, the memorandum commended the Hon. N. O. Hipel, Ontario Minister of Labour, "for making public authentic information as to the deplorably low wages received by many workers throughout the province." But it considered that any government efforts to correct this condition "are weakened or made futile unless supported by strong trade union organization." The memorandum observed:

"Experience gained through the operation of existing Minimum Wage legislation, the Fair Wage Act, Industrial Standards Act, etc., has proven this beyond doubt. Knowing this to be the case, many employers have sought to prevent unionization of their employees by espionage, 'yellow dog' contracts, discharge and threats of discharge and similar ruthless methods. We therefore again most strongly urge enactment of legislation which will protect wage earners against such practices and free them to better their conditions through trade union organization."

Injunction Interference With Peaceful Picketing

The Trades and Labour Congress again called attention "to the injustice of restraining peaceful picketing by the securing of injunctions during industrial disputes," and asked that the right of workers "to lawfully picket during strikes" be sustained "free from undue interference by the courts."

Hours of Labour

Dealing with reduction in working hours, the memorandum stated in part as follows:

"The regulation of hours of labour is, by decision of the Privy Council, a matter to be dealt with by provincial authority. We therefore again urge that existing legislation such as the Factories, Shops, and Office Buildings Act, the Fair Wage Act and the Minimum Wage Act, be used to their fullest extent and amended where necessary to bring about a reduction in the hours of work with the ultimate objective of establishing a 6-hour 5-day week for all workers, these reductions to be made without lowering of the aggregate earnings of the workers concerned, in order that this may result in an increase in consumers' purchasing power and thus give the necessary impetus to industrial activities.

Industrial Standards Act

In connection with the Ontario Industrial Standards Act, the views of the Congress as expressed in the memorandum were as follows:

"The objects of the Industrial Standards Act are being largely frustrated by its administration. There is general complaint with regard to undue delay in the establishment of codes, following hearings as provided by the Act, and dissatisfaction with many other phases of administration, many of which have been dealt with directly by representatives of organizations involved. As a result of discussion of this matter at our last convention, a resolution was unanimously adopted asking for an immediate and complete change in the present personnel of the Labour and Industry Board and that the new appointees include a representative of labour."

Minimum Wages

After stating that the prevalent opinion is that adult skilled and semi-skilled male labour "are better protected through trade union organization and collective agreements," the Trades and Labour Congress executive reiterated the following requests:

"For increased effort in enforcing minimum wage legislation in so far as it affects women, girls and boys under 19 years of age where

the latter are not already covered by trade union agreement or the Apprenticeship Act; that workers seeking the aid of the Minimum Wage Board be accorded adequate legal protection and guaranteed all back wages due them without having to go to court to obtain same; that establishments on the outskirts of industrial centres be brought within the application of the Act; that domestic help be brought within the scope of the Act, and finally, that organized labour be given direct representation on the Board administering this legislation."

Factories Act

Amendments to this Act were requested to restrict hours of labour "so as to conform with present day requirements for a shorter work week;" to bring hotels and restaurants under the Act, and to empower the Minister of Labour to order closing of polishing, buffing and plating departments of any establishment violating Section 43 of the Act.

Highways Act

Based on convention decisions, the Congress asked that action be taken to reduce and strictly regulate the hours of labour of operators of trucks and buses using the highways; that such vehicles be equipped with the most modern type of sander; that in cases where trailers are used, an extra man be carried on the rear of such trailers; that bumpers of trucks and trailers be of uniform design and regulation height from the pavement; that trucks and trailers shall not be used for the transportation of human beings and further, that heavier taxation should be paid for such motor vehicles with a special tax on trailers.

It was further urged that a portion of the revenue received from motor vehicle fees and gasoline taxes be returned to the municipalities based on the number of licensed vehicles in their respective jurisdictions.

Workmen's Compensation

In regard to workmen's compensation, the memorandum declared:

"We contend that there is no justifiable reason why workers becoming incapacitated while following their employment, either by accident or industrial disease, should be paid compensation in lesser amount than they received for the employment which has been responsible for the incapacity. We therefore reiterate requests that the rate of compensation be increased from 66⅔ per cent to 100 per cent of earnings at the time of the incapacity, and that all diseases attributable to employment be brought within the scope of the Act.

"Changes are sought in the Act whereby three stages of the development of silicosis would be defined and compensation, except for the last stage (for which full compensation for life be given), paid either by lump sum or in monthly payments at the option of the worker; that tuberculosis contracted through employment in mines be made compensable, and medical reports as to physical condition be made available to miners."

Among other requested amendments to the Act were: Payment to window cleaners; inclusion of all restaurant workers; that it be made compulsory for all institutions and public service bodies to insure their employees under the Act; that provision of artificial limbs, etc., be extended for such periods as may be necessary; and rigid enforcement of provisions relating to first-aid equipment, etc.

Old Age Pensions

While declaring itself in favour of administration and control by federal authority, the Trades and Labour Congress sought provincial co-operation in obtaining certain changes in the Old Age Pensions Act, viz.: That the Act be made into a retirement scheme with benefits to all who withdraw from industry or commerce at the age of 60 years; that no deduction in the amount of benefits be made where the recipient's annual income is less than $1,000; that the present scale of pensions be substantially increased; and that the clauses respecting provincial residence qualifications and the signing over of property be eliminated.

Requested changes within the provincial sphere included: Representation of organized labour on the Pensions Commission, and discontinuance of the practice of reducing benefits in cases where the pensioner resides with a member of his family or where two pensioners live together.

The Congress also considered that "in many cases undue stress is placed on provision of the Parents Maintenance Act in the granting of pensions as this prevents many children adequately providing for themselves and their dependents."

Health Services

Advocating a national health insurance program the Trades and Labour Congress expressed itself as follows:—

"Enactment of legislation providing for health insurance on a national basis has been consistently advocated by the Trades and Labour Congress of Canada for many years and we reiterate our request for the co-operation of your government in establishing such a scheme in Canada in order that every

citizen may be ensured full benefits of curative and preventive care, etc."

The Congress also asked that medical services for workers in lumber camps be placed under government control, and administered either through the Workmen's Compensation Board or some similar body, "in order to ensure the fullest protection to the workers subscribing the funds for such purpose."

Other Recommendations

Other recommendations contained in the memorandum included:—

Increasing property exemption in mothers' allowances cases from $2,500 to $5,000.

Prohibition of the operation of one-man street cars and buses.

Operation of all steam heating and power plants in public buildings by a certified engineer.

Adoption of safety code of the Canadian Engineering Standards Association in the installation of all elevators.

Enactment of legislation establishing the eight-hour day for permanent municipal fire departments.

Amendment of the Cinematograph Act to provide for regulations governing apprentices in respect to age, period of training and examination.

Installation of sprinkler systems in hotels, hospitals, orphanages, homes for the aged, apartments, etc.

Permission to carry liquor advertising in magazines and newspapers published within the province.

Appointment of a labour representative on all public boards or commissions established by the Government where the interests of workers are particularly concerned.

Establishing of regulations governing the use of poisonous materials in industrial processes and sand blasting operations.

Upward revision of court witness fees.

Legislation providing for compulsory bonding of lawyers, notaries and others handling trust funds.

Provision for the maintenance of competent life guards at bathing beaches.

Provision of free text books to all school pupils.

Regulations covering operation of power paper cutting machines used in printing plants, etc.

Substitution of physical training for cadet training in schools of the Province.

Amendment of the Mechanic's Lien Act to give workers fullest protection and facilitate collection of wages as a first charge against property.

Establishment of uniform building, and plumbing and steamfitting standards throughout the province.

Legislation to ensure adequate superannuation protection to municipal employees.

Confederation of Catholic Workers of Canada

The Confederation of Catholic Workers of Canada placed before the Quebec Government on February 1 its recommendations for legislation. They included amendments in the Collective Labour Agreements Act, Fair Wage Act, Professional Syndicates Act and the Workmen's Compensation Act, the enactment of legislation setting up a Provincial Economic Council or a Superior Labour Council, prohibiting dismissal from employment on the ground of union activity and providing, in case a labour court is created, for compulsory arbitration of disputes arising over the renewal of any collective agreement or involving public employees such as municipal fire department employees who are not conceded the right to strike. Amendments were requested also in the Electricians and Electrical Installations Act and in the Pipe Mechanics Act, in the former Act to make the regulations more stringent and to distinguish between electricians employed in the building industry and others and to extend the latter statute to municipalities with a population of 5,000 or more. It was suggested that both statutes should be amended to permit the employment of one apprentice to every three journeymen.

Collective Labour Agreements Act

As regards the Collective Labour Agreements Act, it was requested that the Confederation should be given opportunity to express its views before the Public Bills Committee of the Legislative Assembly if amendments to the Act were considered at the present session.

Specific amendments to certain sections were suggested by the Confederation as follows:

(1) that the definition of a "professional employer" as "an employer who habitually has employees in his employ for any kind of work which is the object of an agreement" should be amended by adding the words "whether said employer is or is not a contractor, manufacturer or merchant in that kind of work"; (2) that the power given to the Lieutenant-Governor in Council to repeal an Order making an agreement binding on all persons in the industry concerned should be exercised only after consultation with the parties to the agreement; (3) that the Act should declare expressly that the provisions of an agreement which may be made obligatory include those fixing minimum prices for services to customers, provided such provisions are considered necessary to enable the wages fixed by the agreement to be paid; (4) that a clause should be inserted declaring all Provincial Government works, or works carried on by third parties, to be subject to the agreement governing the industry concerned and a schedule of wages based on the rates fixed

in the agreement for the locality where the work is carried on should be included in government contracts, that the Department of Labour should enforce this provision and that where there is no collective agreement under the Act, the rates set out in the contract should be the prevailing rates in the district; (5) that the clause requiring the parties to an agreement made obligatory to form a joint committee to enforce it should be clarified by declaring expressly that it is the parties signing the agreement who have this authority and that the committee has power to ensure the carrying out of the order in council making the agreement binding "notwithstanding interpretations to the contrary considered as following the spirit or letter of any provision of the Civil Code"; (6) that the joint committee enforcing the agreement should be empowered to take action, on behalf of the workmen employed on the construction of any building, against the owner of the building in case the contractor becomes insolvent. (The Confederation suggested, however, that this particular amendment might be inserted in the section of the Civil Code giving the workmen, suppliers of material, etc., preferred claims against a building); (7) that the inspectors of the joint committees be given wider powers in order to enable them to obtain evidence; (8) that any employer or any journeyman working on his own as well as a "professional employer" be required to keep posted a copy of the scale of wages applying to the work; (9) that the levy on the workers' wages to furnish part of the funds to pay the expenses of the joint committees be based on the wage of the lowest paid worker excluding apprentices; (10) that the joint committee be authorized to require certificates of competency from workers governed by an agreement in every municipality within the district instead of in any municipality with a population of over 5,000; (11) that the maximum fee for an examination for a certificate of competency be $5 instead of $2; (12) that an association of employees permitted by the joint committee, subject to the approval of the Lieutenant-Governor in Council, to issue certificates of competency be required to charge not less than the fee fixed by the committees; (13) that a clause be added permitting an employer or association of employers to include a clause providing for a closed union shop in a collective agreement which has been registered with the Minister of Labour in accordance with the Professional Syndicates Act; (14) that to the clause prohibiting the dismissal of a workman because he has made a complaint respecting an agreement, a by-law of the joint committee or a violation of the Act or because he has testified in any action taken under the Act be added the words "even if there are concomitant reasons"; (15) that the clause declaring an employer liable to a fine for hindering a joint committee in its work be broadened to apply to any person obstructing the committee; (16) that in the penalty for violating the wage-rate by granting or accepting any rebate, distinction be made between an employer and workman so as to make any such employer liable to a fine ranging from $10 to $25 and costs for each employee involved in the offence and to make an employee liable to a fine ranging from $5 to $25 and costs for the first offence and to $25 and costs for the second or any subsequent offence.

The Confederation recommended also that such organizations as shop committees and company unions be declared unlawful and that the Government should refuse to make binding a collective agreement signed by any such organization when it is shown after investigation that the employers or their officials were active in forming the associations; that the Collective Labour Agreements Act should be incorporated in the Professional Syndicates Act; that a similar section to that of the Fair Wage Act providing that any informer's name must be kept secret should be added to the Collective Labour Agreements Act; and that the legal fees of a joint committee enforcing an agreement be taxable in the same way as other costs when the committee is successful in a suit.

The Government was requested to revise the Orders in Council making binding the agreements in the building industry in Montreal and Three Rivers so as not to exempt contracts for repairs amounting to $2,000 or less and to consider in future only the petitions made by the parties signing the agreement in these two districts. The voluntary agreements in these towns covered contracts for repair work below $2,000 but the Order in Council extending the agreements and making them binding on the whole industry exempted such work.

Fair Wage Act

In the matter of the Fair Wage Act, the Confederation requested that, in forming a conciliation committee to advise the Fair Wage Board on the minimum rates to be fixed in any industry, the labour representative should be selected by incorporated unions where such unions existed, that is by unions registered under the Professional Syndicates Act; that any change in or repeal of a fair wage order should be made only if, after consultation with the parties concerned, it was shown, to the satisfaction of the Fair Wage

Board, that conditions in the industry had changed since the first order was issued; that it be prohibited for an employer to change the rate of wages or working conditions of his employees while a fair wage Order is being prepared unless such change is to the advantage of the workmen.

Certain changes were requested in Wage Order No. 4 which applied to all industrial and commercial undertakings, schools and public corporations in the cities and towns of the province (Labour Gazette, May 1938, p. 512). It was recommended that the Order should provide that workmen with longer service to their credit should be given preference over others with due regard to their respective qualifications; that overtime should be paid at the rate of time and one-half as required in the Order but should be based on the workmen's regular wage and not on the minimum wage fixed in the Order as stipulated at present; that a workman who is expected to present himself daily for work and who has not been informed that there will be no work should be paid for at least three hours' work even if he has performed no work instead of requiring, as at present, an employer to pay a workman who works less than a regular day for at least three hours; that, in spite of applications to the contrary by certain municipalities, the Order continue to apply to municipal employees other than those employed intermittently for casual work or those employed by municipalities other than cities and towns. It was recommended also that the Act be amended to forbid the Fair Wage Board to suspend the application of certain provisions of Order 4 pending the issuance of a new Order applying to any industry and that the Board be required to give notice in the Quebec Official Gazette of all exemptions from any of its Orders.

The Government was requested not to approve any Order fixing hourly rates at less than 35 cents in Montreal, 33 in Quebec City and 30 in other places except in the case of workers under 18 years of age.

Professional Syndicates Act

As to the Professional Syndicates Act, the Confederation suggested that professional syndicates as defined in the Act should be authorized to take action on behalf of their members wherever orders of the Fair Wage Board were violated; that the Act be amended to stipulate that if a collective agreement filed with the Minister of Labour in accordance with the Act provides for a joint committee to ensure the application of the agreement, the committee should be formed exclusively of representatives of the parties to the agreement, each party being entitled to an equal number of members.

Suggestions were made to clarify certain terms used in the Act. A "council" linking together unions in the same trade in the city should not be considered a federation as that term is used in the Act and the expression "federation of unions" should designate a group of unions in the same trade or industry in different places. It was recommended that a federation of unions should be enabled to secure incorporation under the Act even if there is a council in the same city where the federation has its headquarters and that it be made possible to insert in the constitution of a union or council that it must affiliate with a superior body provided that the syndicate or council has been organized by the superior body. Also, the Act should facilitate the incorporation of central councils, bodies linking together unions in different trades in the same place or district. The Confederation declared itself opposed to the enactment of special legislation for the sole purpose of granting legal status to trade unions, trade councils or federations. It considers that the Professional Syndicates Act should continue to be the law applying to all trade unions which wish to have legal personality.

Workmen's Compensation Act

While expressing its satisfaction that the fundamental principles of the Workmen's Compensation Act had been maintained, that a representative of organized labour had been made a member of the Workmen's Compensation Commission and that a medical board had been appointed, the Confederation advanced certain suggestions for amendments in the Act: (1) that all employers be brought within its scope; (2) that the basis for computing the benefits for partial and total disability be the weekly wage of the workman at the time of the accident multiplied by 2,400 (that is 300 days of eight hours each) in order to determine the annual wage and that no wage less than 30 cents an hour should be considered; (3) that the right to compensation date from the day of the accident; (4) that hospitals and other institutions of the kind be brought under the Act; (5) that silicosis contracted in industries such as stone and granite cutting, as well as in mines, should be compensated and that lead poisoning in the painting industry be added to the list of compensatable diseases.

Social Insurance

The Confederation declared itself in favour of contributory social insurance and, in particular, would be pleased if the Provincial

Government pronounced in favour of a national contributory system of unemployment insurance as the Quebec Commission on Social Insurance had recommended. The Confederation suggested also that the Government should prepare an Act providing for family allowances, having regard to the recommendations of the Social Insurance Commission, March, 1932. This law would apply only to industries in which fair wages have been obtained through collective agreements or otherwise. As to the Old Age Pensions Act, it was submitted that this Act should be an old age insurance law on a contributory basis but pending action in that direction, the C.T.C.C. urged that pensions be paid at 65 years of age, instead of at 70.

Freedom of Association

The Government was asked to enact a statute dealing with unreasonable dismissals, particularly those for union activity. The onus of proof in such cases should be on the employer and the penalty instead of being a fine should provide for damages to the person dismissed up to six months' wages or reinstatement in the job. It was also requested that the practice of certain employers of requiring persons applying for jobs to fill in forms indicating whether they are members of a trade union should be prohibited.

Miscellaneous

There were also recommendations relating to the better observance of Sunday, particularly in the pulp and paper industry where repair work ought to be prohibited on Sunday and in bakeries where Sunday work should be prevented by the appointment of inspectors. An Act prohibiting night work in bakeries was also requested and it was suggested that it should be based on the Convention of the International Labour Conference, 1925. The Confederation asked also that a commission be appointed on bread prices in line with the plan proposed by the Association of Master Bakers of the Province of Quebec.

Other recommendations included a statute requiring public utility companies in towns of 10,000 or more to create contributory pension funds for their employees, the pension to be payable after 30 years of service and to be equivalent to 50 per cent of the wage during the last 10 years, that a person retiring on a reasonable pension from the Provincial Government or from a municipal office or from a public utility company should not be permitted to work for such bodies without renouncing his pension; that cities of 100,000 or more should be enabled to adopt by by-law the double-platoon system for fire departments. Increased appropriations for the Department of Trade and Industry were asked for and also the appointment of an inspector for the Chicoutimi district to enforce the Industrial Establishments Act, the order in council providing for an eight-hour day in the building industry and to inquire into accidents and enforce the law concerning safety in public buildings. It was also suggested that the Government should establish in the different trade schools in the province advisory committees on which trade unions would be represented. At the request of numerous foremen and superintendents, the C.T.C.C. recommended that the Government should establish at Montreal a course in factory management.

Provincial Federation of Labour of Quebec

On January 25, the Provincial Federation of Labour of Quebec presented its program of proposed labour legislation to the Hon. Maurice Duplessis, provincial premier, and members of the cabinet.

Workmen's Compensation

The first item in the submission dealt with matters relative to Workmen's Compensation. Expressing appreciation that organized labour had been given representation on the Board and that silicosis had been placed on the list of occupational diseases subject to compensation, the Federation asked that all other industrial diseases be also included.

The Federation also considered that the rate of compensation should be increased to 100 per cent of wages instead of 66⅔ per cent, and that full indemnity should be paid until the injured worker is completely recovered.

Emphasizing that a number of industrial and commercial establishments are exempted from the operation of this legislation, the Federation believed that all such, without exception, should be subject to the Act under Schedule 1.

Unemployment, Public Works and Unemployment Insurance

As an immediate measure in relieving unemployment, the Federation advocated "an elaborate program of construction of public buildings and workmen's dwellings" at wage scales established by collective labour agreements or union rates.

The larger problem could be best solved, in the opinion of the Federation, by a national system of unemployment insurance, and the provincial government was urged to facilitate such a program.

Fair Wage Legislation

Outlining the background and origin of fair wage legislation in the province, the Federation considered that the orders issued under the Act "do not give what was expected of them"; that the rates of wages, generally, are too low; and that the exemptions were too numerous. The Federation believed "that the capital error was not to have established a differentiation between a man's and woman's wage."

Collective Labour Agreements Act

The memorandum stated the attitude of the Federation in regard to the Collective Labour Agreements Act. It considered that such agreements "are a powerful factor in maintaining cordial relations between employer and employee"; also that "organized labour is convinced that industry can govern itself." Upon this last point, the memorandum indicated that state interference should end, once a labour contract had been agreed upon. The Federation stated that it was not opposed to the principle of collective labour agreements "but to the form it has been given by the legislator" which limited the activity of labour organizations and "compromised their development." In this respect the memorandum declared:—

> We most especially protest against the powers that this law gives to the Minister of Labour as well as to the Lieutenant-Governor in Council which permits them to modify or to revoke a decree at their pleasure and this without consulting the interested parties; they can even stop the levy to which employers and employees are subject, which is the equivalent of saying that the existence of a collective labour agreement as well as that of the joint committee is at their mercy.
>
> We therefore demand that this law be modified in such a way that no changes can be made to an agreement or decree if it is not at the request, in the opinion, and with the consent, of the interested parties, the same procedure should be followed in respect to the levy.

Other points of difference raised in the memorandum were those sections of the legislation providing for exemptions for government works, and lower salaries for permanent employees. The Federation urgently requested the government "to leave to the labour organizations the right to issue certificates of qualification to their members and that union cards be recognized, as heretofore, by the examiners of the joint committee." The Federation also objected "to the fact that legal prosecution must be brought by the Minister, the joint committee or any person having a written authorization of the Attorney-General.

It was considered by the Federation that "any person who feels he has been wronged should have recourse before a court of justice."

The memorandum referred to "the diversity and inconsistencies of penalties imposed" under various sections of the Act, and in concluding its observation on this legislation, declared:—

> We regret to have to say in all sincerity that until the law dealing with collective labour agreements is radically modified we must strongly object to it, and we would prefer to see it totally disappear from our Provincial Statutes rather than see it maintained in its actual form.

Labour Tribunals

Advocating the establishment of labour tribunals, the Federation expressed itself as follows:—

> We would suggest the formation in all judicial districts of special Courts or Tribunals or at least the nomination of judges well versed in social and industrial legislation, especially entrusted with these labour cases.
>
> We do not hesitate to declare that we would favour the creation of "Conseils de Prud'hommes" which, without cost or very little costs, would settle a number of differences of little importance, between employers and employees and this with full knowledge of said cases because these "Conseils de Prud'hommes" would be exclusively composed of representatives from employers and employees alike and be therefore some sort of a complementary body to the joint committees entrusted with the enforcement of collective labour agreements.

Communist Propaganda

With reference to the so-called "Padlock Law" (Act Respecting Communistic Propaganda, 1937, Chapter 11), which has as its object the protection of the province against communist propaganda, the Federation considered that while the intent of the law "may have been good and fully justified," yet there was an omission, "grave in its consequences," which "could be easily corrected by explaining clearly what is meant by communism or bolshevism." "This omission," continued the memorandum, "may wrongfully damage persons, who, though they have no sympathy for communism as such, who, by force of circumstances or unwittingly, may be accused of having propagated the communist doctrine."

Pointing out that organized labour as represented by the Federation was not in sympathy with communism and "had fought it long before it occurred to any government to adopt legislation to repress it," the memorandum stated:—

> We are in favour of a protective law against the spread of any propaganda of revolutionary character, whether from the right or the left, fostering violent overthrow of the democratic system of our country. We however ask ourselves if this law, in its actual form, does not violate a fundamental principle of British and Canadian justice when it declares a person

guilty until proof of his innocence be given and denies him any recourse to appeal.

Other Recommendations

Among other recommendations contained in the memorandum were:—

Adoption of national health insurance.

Enactment of legislation "which would compel heads of commercial and industrial enterprises to grant annual holidays or paid vacations to all regular employees."

Abolition of the Legislative Council.

Abrogation, or amendment of the interdiction prohibiting admission to cinemas of children under sixteen years of age.

Urging the government to advise the Provincial Council of Public Education to amend its decision *re* the teaching of English in the primary grades of French Catholic schools. (The Federation suggested that English should be taught "at least beginning with the third year.")

Revision of the electoral law by: (1) granting the franchise to women; (2) making identity cards compulsory; (3) establishing polls in public buildings; (4) appointment of returning officers on basis of merit and honesty and "not because of political partizanship"; (5) designation on ballot of occupation and political party of candidates.

Prohibition of night employment of women and young girls in certain hotels and restaurants and in the serving of alcoholic beverages.

Abolition of night work in bakeries.

Provision of weekly day of rest to theatre employees.

Abolition of sweat-shops.

Establishing the priority of wage claims in cases of bankruptcy.

ANNUAL CONVENTION OF NEW BRUNSWICK FEDERATION OF LABOUR

With one of the largest attendances of delegates in recent years, the twenty-sixth annual convention of the New Brunswick Federation of Labour was held in Saint John on January 10. The preliminary features included addresses of welcome by His Worship, D. L. MacLaren, Mayor of Saint John; and John S. MacKinnon, who officially opened the proceedings as chairman of the Local Arrangements Committee.

Guests of the convention who addressed the delegates during the opening exercises were the Hon. Dr. P. H. Le Porte, Provincial Minister of Health and Labour, and Hon. F. C. Squires, Opposition Leader in the Legislature. Both speakers expressed the opinion that there should be a separate Department of Labour in the province. Hon. Dr. Le Porte also reviewed some of the legislation passed last year, mentioning the Labour and Industrial Relations Act, amendments to the Workmen's Compensation Act, the Workmen's Lien Act, the Mining Act and the Forest Operations Commission Act. Hon. Mr. Squires spoke more generally stating he believed New Brunswick was on the eve of a great industrial and commercial development and it was necessary for governments, employers and labour to co-operate to achieve this objective.

Following the preliminary proceedings, Mr. Jas. A. Whitebone, president of the Federation, declared the convention officially opened and announced the appointment of the various committees. The Credential Committee reported 41 locals had sent in credentials for 96 delegates, that 38 locals and 2 councils were actually represented by 73 delegates, and that the following five fraternal delegates were also present: Jas. Brodrick, international representative of the Brotherhood of Electrical Workers; Geo. Murphy, international representative of the International Association of Machinists; S. A. Stephens, international representative of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers; Frank Cane, chairman and A. W. French, secretary of the Joint Provincial Legislative Board of the Railway Transportation Brotherhoods.

The president and secretary-treasurer each submitted comprehensive reports on the progress of the Federation, and forty resolutions were referred to the Resolutions Committee.

The convention adopted a recommendation of the Union Label Committee that a Union Label Department be established by the Federation to distribute information; that all delegates urge their locals and families to request the union label when making purchases; and that locals engaged in union label trades request their employers to place the label on all such goods and services.

Resolutions Adopted

The following recommendations were contained in the adopted resolutions:

Complete and democratic national unity of all the provinces through the extension of the Act of Confederation.

Requesting the provincial government to co-operate with the federal government in adopting national unemployment and health insurance acts.

Requesting amendments to the Workmen's Compensation Act.

Requesting legislation to provide that all automobiles offered for re-sale be thoroughly examined and made safe.

Requesting legislation for the six-hour day without any reduction in the daily wage.

Endorsing the request of the Trades and Labour Congress of Canada for the extension of the Old Age Pensions Act to a retirement allowance payable to all who's income is less than $1,000.

Recommending that workers refrain from purchasing goods imported from Fascist and Nazi countries and requesting the government to curtail as far as possible the importation of goods from these countries.

Requesting the provincial government to develop new industries to finish raw materials within the province.

Requesting that the Workmen's Lien Act be amended to include mines.

Requesting legislation to provide for state hospitalization, medicine and health insurance.

Requesting that all large public buildings be equipped with air conditioning equipment.

Requesting that all goods imported into Canada be stamped with the name of the country of origin.

That the Executive Board study the need and effect of an apprenticeship act, and request for the same if found feasible.

Requesting the adoption of an Industrial Standards Act to be effective in the building trades in Saint John.

Requesting that a forty-eight hour week be adopted in the Provincial Hospital and that the employees be included in the provincial government superannuation scheme.

That the amendments to the Workmen's Compensation Act sought by the Federation be adopted at the coming session of the Legislature, or that they be referred to a joint commission to study them and make recommendations to the government.

That Part 2 of the Labour and Industrial Relations Act be repealed and a new Part 2 be adopted more in line with the wishes of labour, and that it provide that "every employer shall recognize and bargain collectively with members of a trade union representing a majority choice of the employees eligible for membership. . . . ." and that the words "employed by or under the Crown" be struck out.

Requesting that the Stationary Engineers Act be amended to provide for the grading of engineers' certificates.

Requesting the provincial government to urge upon the federal government that it instruct the National Harbours Board to adjust its port charges so that the same rates will apply to all harbours. That this Federation protests against the abolition of the 6 cent preferential rate on all grain shipped through Canadian ports, and that the provincial government be asked to request the Imperial Government to re-establish the 6 cent preferential rate on grain shipped through Canadian ports.

Requesting amendment to the Workmen's Compensation Act to provide the replacement of artificial limbs when damaged in industry.

Requesting the proclamation of the Mothers' Allowance Act.

Expressing opposition to the amalgamation of the two great railways.

Requesting the adoption of a New Brunswick Labour Act.

Protesting against the exportation of pulpwood from this province.

That this Federation and its affiliated organizations use only union watermarked paper.

The Saint John Trades and Labour Council tendered the visiting delegates a banquet in the Royal Hotel, at which many prominent men of the province spoke, including: Hon. Dr. A. P. Patterson, Minister of Education, Federal and Municipal Relations, representing the Hon. Premier Dysart, who was unavoidably absent; Hon. Dr. P. H. Le Porte, Minister of Health and Labour; Hon. E. J. Henneberry, President of the Executive Council; Hon. F. C. Squires, Leader of the Provincial Opposition; His Worship, Mayor D. L. MacLaren; Councillor Geo. E. Barbour; Mr. Allen McAvity, M.P.; Mr. Robert McAllister, M.L.A.; Mr. H. A. Porter, M.L.A.; Mr. W. W. V. Foster, M.L.A.; and Mr. Jas. A. Whitebone. Mr. John S. MacKinnon acted as chairman and toastmaster.

All the executive officers were re-elected as follows: President, Jas. A. Whitebone, Saint John; 1st vice-president, G. W. Roy Myles, Moncton; 2nd vice-president, G. R. Edgecombe, McAdam; 3rd vice-president, T. J. Lawlor, Dalhousie; and secretary-treasurer, Geo. R. Melvin, Saint John; John S. MacKinnon was elected legislative representative. Vice-president Myles was elected to represent the Federation at the next Trades and Labour Congress of Canada convention, and Moncton was chosen as the next convention city. The usual number of district vice-presidents were also chosen.

Succeeding Hon. Michael Dwyer, who resigned to become president and general manager of the Nova Scotia Steel and Coal Company, Lauchlin D. Currie was recently sworn in as Nova Scotia Minister of Public Works and Mines, and Minister of Labour.

There were 4,333 accidents reported to the Ontario Workmen's Compensation Board during the month of February, as compared with 4,516 during January, and 4,937 during February a year ago. Benefits awarded amounted to $417,677.38, of which $329,561.08 was for compensation and $88,161.30 for medical aid.

In the February issue of the *Monthly Labour Review* published by the United States Department of Labour, an article dealing with the activities of the Civilian Conservation Corps, 1938, indicates that one of the most important accomplishments of that organization has been the protection of the forests of the United States. In the year 1938 about 270,000,000 forest trees were planted.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Canada Shipping Act—Municipal Improvements Assistance Act—Ontario Factory, Shop and Office Building Act—Quebec Fair Wage Act

REGULATIONS under Dominion legislation include by-laws for the licensing of pilots in the district of Chignecto, N.B., and a revision of the requirements as to residence of persons employed on certain works carried on with financial assistance from the Dominion Government. Rules for boiler inspection in Ontario have been tightened up and the fees specified. A new Fair Wage Order in Quebec applies to the waste materials industry in Montreal.

Dominion Municipal Improvements Assistance Act, 1938

On November 29, regulations of July 23 under this Act were amended. With one exception the labour provisions remain the same. (LABOUR GAZETTE, August, 1938, p. 894). To the stipulation that only residents of Canada may be employed on work projects carried out under this Act has been added the proviso that where special or technical knowledge is required, non-residents may be employed with the approval of the Minister of Finance, and when persons of the required qualifications are not available in Canada.

Canada Shipping Act

By-laws under this Act for the Pilotage District of Chignecto, N.B., adopted on August 13 by the Pilotage Authority in that district, were approved by order in council on November 23. All ships not exempt by the Act from using a pilot must pay pilotage dues whether using a pilot or not. Dues vary with the tonnage and the distance piloted.

Wages of pilots are paid from the sums due for the pilot's work, less 2 per cent which is paid as salary to the secretary-treasurer who is appointed by the Pilotage Authority subject to the approval of the Governor in Council and is charged with the collection of pilotage dues through the customs collector and with the payment of wages and other duties. A pilot detained on board ship for any other reason than weather conditions must be paid in addition $4 for each day of detention.

Unless exempt, all pilots must be licensed according to the by-laws and, except where no pilot is available after signal by the Ship Master, only licensed pilots may pilot ships in the district. The number of pilots in the district is to be determined by the Authority. An applicant for a pilot's licence must be a British subject, 21 years of age and a resident of the counties of Albert or Westmorland, N.B., or of Cumberland, N.S. He must be physically and mentally fit and pass examinations showing him to have a general knowledge of navigation, the rules of the road, aids to navigation in the district, and harbour and port regulations. Successful candidates are to be licensed for a period of not less than two years and must pay a prescribed annual fee. The licence is valid until the pilot is 65 after which it may be renewed annually for five years on a medical examination.

Ontario Factory, Shop and Office Building Act

Regulations concerning boiler inspection which became effective on January 2, 1939, replace those of December 31, 1918, and January 21, 1919. The only persons now authorized to test and inspect uninsured boilers and other pressure vessels are inspectors approved and appointed by the Lieutenant-Governor in Council. Previously, any holder of an operating engineer's certificate from the provincial Stationary and Hoisting Engineers Board could test and inspect boilers, excluding those under his own supervision and no other government approval or authority was necessary.

The new regulations require a report of all inspections and tests and the fees charged to be sent to the Chief Inspector. Salaries of boiler inspectors are to be fixed by order in council. The fees for inspection are prescribed in the regulations and are based on the heating surface for steel boilers, grate area for iron boilers and plant capacity in refrigerating machines. The rates are graduated upwards from $3 for an iron or steel boiler with 578 or less square feet of heating surface, a cast iron boiler with 14 or less square feet of grate and for a refrigerating system of from three to 10 tons capacity, to $20 for a steel or iron boiler of 3,346 or more square feet of heating surface, and a cast iron boiler of 59 or more square feet of grate and to $10 for a refrigeration system of 41 or more tons capacity. Inspection fees for air and gas tanks, steam cookers, digesters, steam-kettles and other pressure vessels range from $2 to $7.50 according to the size of the vessel. Inspection fees for boilers in churches, chapels,

convents, colleges, schoolhouses, hospitals and orphanages are 50 per cent less than the regular fees.

Quebec Fair Wage Act

Two amendments in previous orders and one new order under this Act were gazetted February 11. From this date wage-earners in Dorion and Ile Cadieux, Vaudreuil County, are exempt from the provisions of Order 4 and from December 17, 1938, Order 18 governing funeral furniture manufacture does not apply to any municipality with a population of less than 4,000. (Labour Gazette, 1938, pp. 512, 1352.)

The new Order, No. 25, fixes minimum wage rates for employees in the waste materials industry on Montreal Island and in cities and towns within a 10-mile radius of the island. This industry includes establishments dealing in rags of cotton, wool, etc., scraps of metal, rubber, leather and other material, bottles and used containers and any other waste exclusive of waste paper. The order is to remain in force for two years unless repealed by the Board or the Lieutenant-Governor in Council. The provisions of Order 4 not incompatible are to be considered as part of the Order. Stationary enginemen in the industry are governed by the provisions of Order 6 (Labour Gazette, 1938, p. 624) except in establishments outside the territory covered by that Order where the rates may be 10 per cent less.

The minimum rates apply to a week of 48 hours for office employees and messengers, 72 hours for watchmen, 60 hours for chauffeurs, drivers and all other male employees and 55 hours for other female employees. Time in excess of these hours is overtime and except as provided by Order 4 must be paid for at the rate of one and a half times the actual wages paid.

The rates are similar to those provided by Order 4 for industrial and commercial establishments in the Montreal district but only 40 per cent of the general workers are required to be paid the highest rate, 26 cents an hour, instead of 60 per cent as under Order 4 and each of the minimum hourly rates of 22 cents and 17 cents must be paid to not more than 30 per cent of the employees instead of to 25 per cent and 15 per cent respectively. The percentages of male and female workers are to be calculated separately. Office workers, watchmen, drivers and messengers are to be paid as under Order 4.

Immigration to Canada During 1938

The Immigration Branch of the Department of Mines and Resources recently issued a statement of immigration to Canada covering the year 1938.

During the year 17,244 immigrants entered Canada compared with 15,101 in 1937, an increase of 14·2 per cent. Of the total entering the Dominion, 3,389 were from the British Isles; 5,833 from the United States; 1,312 from northern European countries; while other races numbered 6,710. In each classification increases in the numbers entering Canada were recorded in comparison with 1937, the largest increase (21·1 per cent) being under the classification "other races"; 18·5 per cent increase in the number of persons coming from the British Isles; 5·0 per cent increase in the number coming from the United States; and 14·7 per cent increase in the number coming from northern European countries.

Adult males entering Canada during 1938 numbered 4,142; adult females 6,800, and children under eighteen comprised 6,302 of the total of all persons entering the Dominion during the year.

Of this total, 1,730 males, 1,052 females, and 1,979 children were listed in the farming class. The labouring class comprised 296 males, 67 females and 121 children; mechanics, 507 males, 232 females and 136 children; trading class, 716 males, 383 females and 230 children; mining class 37 males, 11 females, and 6 children; female domestic servants eighteen years and over numbered 795, under eighteen years, 182; "other classes" accounted for the remainder of the total there being 856 males, 4,260 females, and 3,648 children in that classification.

The destination of the largest number (7,107) of the immigrants to Canada during 1938 was given as Ontario; 3,301 were going to Quebec; 1,673 to Manitoba; 1,648 to Alberta; 1,549 to British Columbia, 850 to Nova Scotia; 684 to Saskatchewan; 358 to New Brunswick; 62 to Prince Edward Island; and 8 and 4 to the Yukon Territory and Northwest Territories respectively.

The International Labour Office has recently published a handbook entitled "Safety in the Construction and Use of Lifts," in Part 1 of which an account is given of the dangers inherent in lifts and hoists, and of the safety devices and precautions that practical experience has shown to be necessary or advisable. Part 111 contains the relevant provisions of the regulations and specifications in force in a number of countries.

73986—5½

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, JANUARY, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on February 1 was 11,261, the employees on their payrolls numbering 1,026,635 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for January was 1,980, having an aggregate membership of 250,621, persons, 15·9 per cent of whom were without employment on February 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of February, 1939, as Reported by Employers

Employment at the beginning of February showed a further contraction, according to data tabulated by the Dominion Bureau of Statistics from 11,261 firms whose staffs included 1,026,635 persons, compared with 1,042,258 at January 1; this reduction of 15,623 workers, or 1·5 per cent was decidedly smaller than that of 2·7 per cent reported at February 1, 1938. In the experience of the last eighteen years, however, employment on the average has shown a very slightly upward movement from January to February, so that the loss at the latest date, as at February 1, 1938, was contra-seasonal. The crude index (1926 = 100) stood at 106·5 at February 1, 1939, as compared with 108·1 at January 1, and 110·4 at the beginning of February in 1938; after correction for seasonal influences, the index declined from 112·3 in the preceding month to 110·6 at the date under review. Although the latest figure was lower than at February 1 of last winter, it was higher than at the same date in 1937 and earlier years since 1930.

Based upon the 1926 average as 100, the unadjusted index numbers of employment at the beginning of February in recent years are as follows: 1939, 106·5; 1938, 110·4; 1937, 104·1; 1936, 98·4; 1935, 94·6; 1934, 91·4; 1933, 77·0; 1932, 89·7; 1931, 100·7; 1930, 111·6; 1929, 110·5; 1928, 102·0 and 1927, 96·6.

An analysis of the returns by industries shows that at February 1, 1939, there was seasonal improvement in manufacturing, in which the co-operating establishments reported an increase of 8,681 workers, or 1·6 per cent, as compared with January 1, 1939. This gain was rather smaller than the average indicated at the beginning of February in the years since 1921, but was the same as that noted at February 1, 1938. Within this division, the iron and steel, textile, leather and lumber industries showed the greatest improvement.

With the exception of mining, in which there was little general change, the non-manufacturing industries generally reported curtailment. There were very large losses in trade and construction, while the trend was also downward in logging, transportation, communications and services. The reductions, except in logging, were seasonal in character. In most cases, the decline exceeded the average at February 1 in the experience of the last eighteen years; transportation was an exception, the contraction in that division being less than usual at midwinter in the period, 1921-1938. The shrinkage recorded by employers in the various industries was also on a much smaller scale than that reported in the same groups at the beginning of February last winter.

A brief review of the situation as at February 1, 1938, shows that the 10,402 firms from whom statistics had been received, had reported an aggregate payroll of 1,052,551, as compared with 1,081,603 in the preceding month. The index then was 3·9 points higher than that of 106·5 at February 1, 1939.

Employment By Economic Areas

Contractions were recorded in all provinces except Ontario, the losses in Nova Scotia and

Quebec being most pronounced. Except in Prince Edward Island, Saskatchewan and Alberta, employment generally was quieter than at February 1 of last year, although in four of the five economic areas it was rather more active than at the same date in 1937 and immediately preceding years; in this comparison, the Maritime area was the exception.

Maritime Provinces.—The trend in the Maritime Provinces has usually been downward at the beginning of February in the eighteen preceding years for which data are available, the average loss in employment being over one per cent. At February 1 of the present year, activity showed a decline that considerably exceeded the average, 6,383 persons having been laid off since their last report by the 802 reporting employers, whose payrolls aggregated 73,764 workers. Logging, trade and construction reported curtailment, that in the last-named being greatest. Some seasonal improvement took place in transportation, while manufacturing was practically unchanged. Within the latter, food factories showed reduced activity, but iron and steel plants were busier.

A smaller loss, on the whole had been recorded in the Maritime Provinces at February 1 of last year, when 722 firms had reported 81,187 employees, or 2,543 fewer than at January 1, 1938. The index, at 112·3, was then higher than at the date under review, viz., 100·5.

Quebec.—Employment in Quebec showed a contraction at the date under review, when the working forces of the 2,822 co-operating establishments aggregated 320,551, as against 325,785 at January 1, 1939. This decrease of 1·6 per cent was smaller than that recorded at February 1, 1938; however, improvement has frequently been shown at February 1 in the eighteen years of the record, and the average change at that date in the period, 1921-1938, is a small advance. At the beginning of February, 1939, there were gains, on the whole, in manufacturing, notably in leather, textile and iron and steel plants, while tobacco, clay, glass and stone and non-ferrous

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

metal works were slacker. Logging, transportation, construction, services and trade also showed reduced activity. The index at February 1, 1939, stood at 113·0, as compared with 114·5 at the same date of last year, when the employers making returns had reported a staff of 319,213 men and women, or 14,373 fewer than in the preceding month.

Ontario.—There was a moderate increase in employment afforded in Ontario. Recovery was shown in manufacturing, particularly in iron and steel, textile, leather, lumber, food and pulp and paper factories; mining, steam railway operation, highway and railway construction and maintenance also reported improvement, but building, services and retail trade were seasonally slacker, while no general change was noted in logging. Data were received from 4,910 firms employing 428,892 persons at the date under review, as compared with 427,105 at the beginning of January. This gain of 1,787 workers was rather smaller than the increase that has been indicated, on the average, between January 1 and February 1 in the years since 1920. The movement had been downward at the beginning of February last year, when the 4,610 employers furnishing information had reported an aggregate payroll of 453,035; the index then, however, stood at 116·2, as compared with 109·2 at the latest date.

Prairie Provinces.—Employment in the Prairie Provinces has, with rare exceptions, declined at February 1 in the eighteen preceding years for which records are available. The tendency was also unfavourable at the date under review, when the 1,613 co-operating firms reduced their payrolls by 4,209 persons, to 120,850 at February 1. Manufacturing showed an advance, there being improvement in iron and steel, textile and lumber plants. Logging was also more active. On the other hand, coal-mining, communications, transportation, trade and construction released employees, the losses in the last two industries being most marked. The general contraction in industrial activity at February 1, 1939, exceeded the average indicated at that date in the years since 1920, but was smaller than the decrease noted at the beginning of February in 1938, the 1,498 employers then furnishing statistics had reduced their working forces to 117,083 from 122,760 at January 1, 1938. The index stood at 93·9 at the date under review, compared with 91·7 at February 1 of last year.

British Columbia.—There was a further falling-off in employment in British Columbia at February 1. Trade, construction and manufacturing reported reduced activity, the declines in the last-named taking place largely in food and pulp and paper factories, while lumber mills and metal-using plants were more active; logging also showed improvement. The working forces of 1,115 reporting firms aggregated 82,578, a loss of 1,584 employees as compared with their payrolls in the preceding month. The general curtailment in staffs compared unfavourably with the small increase that, on the average, has been indicated from January 1 to February 1 in the last eighteen years, and was larger than the decrease at the beginning of February in 1938; the labour forces of the 1,070 co-operating establishments had then been reduced by 1,174 persons to 82,033. The index, at 96·4, at February 1 of last year, was practically the same as at the date under review, when it stood at 96·2.

Index numbers of employment by economic areas are given in Table 1.

Employment by Cities

The trend of employment was downward in seven of the eight cities for which statistics are segregated,—Quebec, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver showing losses in employment, while in Montreal improvement was indicated. Industrial activity in Montreal, Quebec City, Ottawa and Vancouver was at a higher level than at the same date of last year; in Toronto and Winnipeg the indexes were fractionally lower than at February 1, 1938, while in Hamilton and Windsor there was a more pronounced falling-off in that comparison.

Montreal.—Manufacturing showed considerable recovery on the whole, notably in the leather, textile and iron and steel groups, while tobacco, non-ferrous metal and some other classes reported moderate declines. Transportation and road construction and maintenance afforded more employment, partly as a result of heavy snow falls. Trade was seasonably dull. Data were received from 1,642 firms employing 158,202 workers, or 3,381 more than at January 1. Industrial activity in Montreal has usually advanced between January 1 and February 1, in the experience of the years since 1923, when statistics for that city were first segregated. The index at the latest date stood at 102·6, or some five points higher than at the beginning of February in 1938, when contra-seasonal curtailment had been indicated; the 1,423 co-operating establishments had then employed 146,686 men and women.

Quebec.—Returns tabulated from 207 employers in Quebec City showed that they had reduced their staffs from 16,683 at January 1 to 16,328 persons at February 1, the index falling from 119·7 at the former to 117·0 at the

latter date. Manufacturing showed a slackening, and trade and services were seasonally quiet. The general index was higher than at the corresponding date of last year, although a rather smaller decline had then been reported by the 177 employers whose data were received; their working forces had numbered 13,086.

Toronto.—Large seasonal losses took place in retail trade, and construction was quieter; on the other hand, manufacturing showed improvement, mainly in food, printing and publishing and textile works. On the whole, there was a decrease of 2,044 in the number employed by the 1,673 co-operating firms, who had 133,775 workers. This reduction was smaller than that indicated at the beginning of February, 1938, when the index of employment was fractionally higher than that of 105·7 at the date under review. The 1,571 employers from whom statistics were received at February 1, of a year ago, had a personnel of 132,038.

Ottawa.—There was seasonal curtailment in retail trade in Ottawa, but manufacturing was somewhat brisker. Two hundred and twenty-four establishments reported 13,964 workers, or 213 fewer than at January 1. The index of employment was slightly higher than at the beginning of February, 1938, when a larger decline, on the whole, had been indicated by the 204 co-operating firms, who then had 13,454 employees.

Hamilton.—Employment in Hamilton showed a recession, chiefly in construction and trade, while manufacturing reported some improvement, mainly in iron and steel plants. Statistics were tabulated from 313 employers with a staff of 31,191 men and women, compared with 31,515 in the preceding month. The index, at 96·9, was many points lower than at February 1, of a year ago, although a larger decrease had then been reported by the 295 establishments furnishing information, whose payrolls had included 34,807 persons.

Windsor.—Automobile factories were not so active; trade and construction were also quieter, while other industries showed little general change. The 191 reporting firms employed 19,315 workers, as against 20,644 at January 1. The level of employment was lower than at the same date in 1938, when a force of 21,044 had been indicated by 179 employers; the index then stood at 154·3, compared with 140·5 at the beginning of February in the present winter.

Winnipeg.—The number employed in Winnipeg showed a contraction, mainly in trade, although building and communications also released help. Manufacturing, however, was more active, textile, iron and steel, printing and publishing and other factories reporting improvement. Returns were compiled from 510 concerns with a personnel of 38,506, compared with 39,208 in the preceding month. Employment was at practically the same level as at February 1 of last year, when more extensive curtailment had been recorded by the 487 co-operating establishments, which employed 38,500 persons, as compared with 39,654 at the beginning of January, 1938.

Vancouver.—Manufacturing on the whole reported generally heightened activity, the gains in the lumber and metal groups being largest; on the other hand, communications, transportation, construction and trade released employees. The 476 firms in Vancouver furnishing statistics had a staff of 34,779, as against 34,811 at January 1. The index, at 106·7, was slightly higher than at the same date in 1938, when 461 employers had 34,128 men and women on their payrolls.

Employment by Industries

Manufacturing.—Seasonal improvement was noted in factory employment at the beginning of February, when 6,245 co-operating manufacturers reported 540,926 operatives, compared with 532,245 at January 1. This was an increase of 8,681 persons, which raised the crude index from 104·3 in the preceding month to 106·0 at February 1, as compared with 110·3 at the beginning of February a year ago. While the latest index was therefore lower than at the same date in 1938, it was higher than at February 1 in 1937 and earlier years since 1930.

The general advance in manufacturing at the beginning of February, 1939, approximated that noted at midwinter of last year, but was smaller than the average gain from January to February in the years since 1920. The seasonally-adjusted index therefore declined, standing at 110·0 at the latest date, as compared with 111·3 at January 1, 1939.

The most pronounced improvement over January 1, 1939, took place in iron and steel plants, in which 4,967 additional employees were reported by the firms furnishing data; this gain, however, was not equal to the average increase between January 1 and February 1 in the years since 1920, although it exceeded that noted at the beginning of February in 1938. There were also substantial increases in textile, leather, lumber, chemical and printing and paper factories. Food, beverage, electrical apparatus, clay, glass and stone and electric light and power plants and pulp and paper mills showed curtailment.

The February 1, 1939, crude index of employment in manufacturing, as already stated,

stood at 106·0, compared with 104·3 in the preceding month, while at the beginning of February in recent years it has been as follows:—1938, 110·3; 1937, 105·3; 1936, 98·5; 1935, 90·1; 1934, 84·2; 1933, 75·0; 1932, 85·9; 1931, 96·1; 1930, 110·2; 1929, 112·8; 1928, 102·3 and 1927, 98·2.

The 5,996 manufacturers furnishing data for February 1, of last year had reported 560,852 employees, as compared with 552,174 at the opening of 1938. The recovery then indicated had therefore been on much the same scale as at the latest date, when the index was, however, 3·9 per cent lower than at the beginning of February, 1938.

Animal Products—Edible.—There was a decrease in employment in this group at the beginning of February, exceeding that noted at the corresponding date last year; however, the index then, at 122·5, was practically the same as that of 122·2 at the date under review. Statements were tabulated from 304 firms employing 23,611 workers, as compared with 24,931 in the preceding month. Dairies and fish-preserving plants reported losses, those in the latter being considerable.

Leather and Products.—Employment in boot and shoe factories very substantially increased, and there was a smaller gain in tanneries and in the production of miscellaneous leather goods. A combined working force of 21,958 persons was reported by the 314 co-operating manufacturers, who had 20,630 employees at the beginning of January. Most of the advance took place in Quebec and Ontario. Activity was greater than at February 1 of a year ago, the latest index standing at 107·1, compared with 103·9 at the same date in 1938.

Lumber and Products.—Seasonal improvement was indicated in sawmills, while furniture factories were also busier; 885 workers were taken on by the 895 lumber firms making returns, who had 37,121 on their staffs. The increase was not equal to that registered at the beginning of February, 1938, when the index of employment was slightly higher. There were gains in New Brunswick, Ontario and the Western Provinces at February 1 of the present winter.

Musical Instruments.—Thirty-seven manufacturers of musical instruments (not including radios) reported decreased employment at February 1 as compared with the preceding month; their staffs numbered 1,353 persons, as compared with 1,382 at January 1. The index stood at 47·4, as against 40·3 at the same date of last year, when an upward movement had been indicated.

Plant Products—Edible.—There was a slight falling-off in the vegetable food group, according to the 518 reporting establishments, which employed 31,923 workers, compared with 32,019 in the preceding month. Sugar and syrup factories showed losses rather more than offsetting additions to staffs in the flour and cereal, fruit and vegetable preserving and bakery divisions. A small increase on the whole had been indicated at February 1 of last year, but the index then stood at 103·7, as compared with 105·1 at the date under review.

Pulp and Paper.—Pulp and paper mills released employees, while paper product and printing and publishing plants reported gains which resulted in improvement in the industry as a whole. The general index, at 103·7, was between three and four points lower than at February 1, 1938, when curtailment had been recorded. Data were received from 686 employers of 64,034 workers, as against 63,472 at the beginning of January, 1939. Gains were reported in Quebec and Ontario, while activity declined in New Brunswick and British Columbia.

Rubber Products.—Little general change took place in rubber factories; 54 of these reduced their payrolls from 12,794 persons at January 1 to 12,755 at February 1. The index, at 102·1, was slightly higher than at the same date in 1938, when recovery had been indicated.

Textile Products.—The advance in employment in the co-operating factories was smaller than that noted at February 1, 1938, and was also less than the usual seasonal expansion at that date in previous years of the record. Woollen, silk, headwear, hosiery and knitting, garment and personal furnishing establishments registered important increases in personnel; the working forces of the 1,152 co-operating firms aggregated 101,934 persons at the beginning of February of this year, as compared with 98,571 in their last report. Ontario and Quebec showed marked improvement.

Beverages.—Employment in this division was curtailed; returns for the beginning of February were tabulated from 142 factories with 8,453 employees, or 322 fewer than in their last report. Activity was slightly greater than at February 1 of a year ago, when the movement had also been downward.

Tobacco.—Forty-five tobacco manufacturing plants reported a combined working force of 13,211 men and women, an increase of 117 over their January 1 staffs. The index was rather higher than at the beginning of February in 1938; reduced employment had then been indicated by the co-operating employers.

Chemicals and Allied Products.—Statements were compiled from 291 firms in this group, whose staffs aggregated 17,970, as compared

with 17,647 at the beginning of January. Employment was slightly brisker than last winter; a gain over the preceding month had also been noted at February 1, 1938.

Clay, Glass and Stone Products.—A decrease was recorded in this group at the date under review, according to 212 manufacturers, whose labour forces included 7,880 workers, or 437 fewer than in the preceding month. Employment generally was in less volume than at February 1, 1938, when a small advance had been indicated in these industries as a whole.

Electric Light and Power.—A falling-off was noted in central electric stations at the beginning of February; the 99 co-operating producers reported 15,849 employees, compared with 16,162 at January 1. Activity was greater than at February 1 of last year, a larger decline having then been indicated.

Electrical Appliances.—Employment in electrical appliance works showed a contraction from the preceding month; the index was many points lower than at the beginning of February in 1938, when the trend had also been downward. Data were received from 126 establishments employing 17,018 operatives, as against 17,164 at January 1, 1939.

Iron and Steel Products.—There were important increases in employment in iron and steel factories, although the gains were below the average at February 1 in the years since 1920. The recovery was most noteworthy in the railway car and locomotive, automobile and other vehicle, crude, rolled and forged, machinery, agricultural implement, boiler, engine and tank and heating appliance divisions. The greatest improvement was in Quebec and Ontario, although the trend was generally upward. Statistics were tabulated from 916 firms, whose staffs stood at 123,373, compared with 118,406 at January 1. The index, at 94·3, was 10·3 points lower than at the corresponding date of last year; the improvement then indicated had, however, been less extensive.

Non-ferrous Metal Products.—Lead, tin, zinc and copper works in this division recorded moderately heightened activity, but smelting and refining was rather slacker. There were increases in Ontario and British Columbia, with losses in Quebec. On the whole, there was a small advance in the working forces of the 184 co-operating establishments, whose staffs aggregated 23,811, compared with 23,745 in their last report. The index, at 151·3, was slightly lower than at the same date in the winter of 1938 (154·8).

Mineral Products.—One hundred establishments in the mineral products group reported 11,901 workers, compared with 12,119 in the preceding month. Employment in this division as a whole was slightly duller than at midwinter in 1938.

Logging

An important decline was recorded in logging; this was decidedly smaller than that noted at February 1, 1938, but employment was then at a considerably higher level. Statements were received from 406 operators employing 41,355 workers, as against 43,560 at January 1. The trend was favourable in the Western Provinces, while there were losses in New Brunswick and Quebec, and little general change was reported in Ontario.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Feb. 1, 1927	96·6	98·3	95·3	98·3	96·4	90·8
Feb. 1, 1928	102·0	97·0	101·6	104·9	103·2	93·5
Feb. 1, 1929	110·5	104·6	105·9	117·0	113·1	96·4
Feb. 1, 1930	111·6	112·1	108·2	117·1	109·8	99·9

[1] For explanation of term "Relative Weight", see footnote to Table I.

Mining

Metallic ore mining showed heightened activity, while the extraction of coal and other non-metallic minerals afforded less employment. On the whole, there was an increase of 55 persons in the forces of the operators furnishing returns, who numbered 438. Their staffs aggregated 74,307 employees, of whom 25,536 were engaged in the mining of coal, 40,928 in metallic ores and 7,843 in non-metallic minerals, other than coal. A contraction had been indicated in this division at February 1, 1938, and the index was then some six points lower than at the date under review.

Communications

The personnel of the companies and branches reporting included 21,679 men and women, compared with 22,241 in the preceding month, most of the reduction taking place on tele-

phones. The number employed was smaller than at the same date in 1938, although a similar curtailment had then been recorded.

Transportation

Street Railways, Cartage and Storage.—There was a downward trend in employment in these industries at February 1, but the decline was smaller than that which occurred at the same date in 1938; the index then was several points lower. The 272 co-operating employers had 27,319 persons on their payrolls, or 290 fewer than at January 1, 1939. There were moderate losses in all provinces except the Maritimes, where the general situation was unchanged.

Steam Railway.—An increase was indicated at the beginning of February in the operation departments of the steam railways, which reported 56,962 employees, compared with 56,468 in the month before. Shrinkage had been indicated at February 1 of last year, but the index then stood at 74·3, or slightly above that of 71·6 at the date under review.

Shipping and Stevedoring.—Employment in water transportation showed a further recession; 122 employers released 732 workers from their payrolls, bringing them to 11,737 at February 1 of the present year. The index was fractionally lower than at the same date in 1938, when a much greater decrease had been recorded.

Construction and Maintenance

Building.—Employment in building construction declined at February 1; the index, at 44·2, was several points lower than at the beginning of February a year ago, the reduction then indicated having been on a smaller scale. Statistics were received from 824 contractors, with 18,509 persons in their employ at the date under review, as against 22,413 at January 1, 1939. The tendency was unfavourable in all five economic areas.

Highway.—The number of workers reported by 373 employers in the highway construction and maintenance group was 65,917, or 7,258 fewer than in the preceding month. Employment in this division was in decidedly greater volume than at February 1, 1938, when more extensive losses had been indicated.

Railway.—Additions to staffs were noted in railway construction and maintenance, mainly due to track-clearing operations. Smaller gains had been recorded at the same date in 1938, but the index then was some four points higher. Statements were tabulated from 34 employers in this group, with 22,894 persons on their payrolls, as compared with 20,151 in the last report. Increases in personnel were registered in Quebec and Ontario.

Services

The service group was quieter than in the preceding month; 572 establishments had 28,281 employees, or 486 fewer than at January 1, 1939. Most of the loss occurred in hotels and restaurants. The index, at 129·5, was slightly higher than at February 1 of last year, when much larger declines had been noted in this industrial division.

Trade

Following the heightened activity resulting from the Christmas and holiday season, there was a substantial falling-off in the number employed in trade at February 1. The 1,789 merchandising establishments furnishing data reduced their payrolls from 128,908 employees at January 1, 1939, to 116,749 at the beginning of February. There were marked decreases in retail stores, while wholesale establishments showed no general change. The percentage curtailment was on a scale somewhat smaller than that reported at the beginning of February in 1938, but exceeded the average loss at midwinter in the last eighteen years. The index of employment at the latest date stood at 131·0, or a few points higher than that of 127·9 at February 1 of last year.

Tables

Index numbers of employment by economic areas, and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at February 1, 1939.

(2) Unemployment in Trade Unions at the Close of January, 1939.

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons engaged at work outside their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

A minor increase in the volume of work afforded local trade union members was apparent at the close of January from the preceding month, the 1,980 labour organizations from which reports were tabulated with an aggregate of 250,621 members showing that 39,776 were idle on the last day of the month,

a percentage of 15·9 contrasted with 16·2 per cent of inactivity in December, 1938. Some employment curtailment, however, was evident from January, 1938, when 12·4 per cent of the members reported were out of work. Manitoba unions with a gain of over 5 per cent in work available showed the most important employment advancement from December, the manufacturing, building and construction, and transportation industries all sharing in the better movement. Quebec unions indicated but slight variation in conditions from the preceding month though the tendency was favourable, while in Ontario the situation remained substantially the same as at the end of 1938. In New Brunswick and Alberta, however, moderate recessions occurred, and declines of lesser magnitude were reflected from Saskatchewan, British Columbia and Nova Scotia. Unemployment increases were noted in all provinces during January from the corresponding month in 1938, Nova Scotia, New Brunswick, Manitoba and Alberta unions showing the most pronounced contractions in activity. Retarded employment, on a smaller scale, was evident in Quebec, Ontario and Saskatchewan, while in British Columbia conditions were but nominally adverse.

The returns on unemployment in the largest city in each province with the exception of Prince Edward Island are compiled separately each month. Increases in work afforded during January, of noteworthy degree, were registered by Winnipeg unions while in Montreal, Toronto and Vancouver the tendency was toward greater employment, though the changes from December were merely nominal. In Saint John, on the other hand, activity was considerably reduced and in Halifax moderate losses occurred. Curtailed activity, on a small scale, was manifest by Regina and Edmonton members. Compared with the returns for January, 1938, Saint John, Montreal, Winnipeg and Edmonton members suffered substantial decreases in work available during the month reviewed, and some slowing up in employment was evident among Halifax and Toronto unions. In Regina and Vancouver, however, the situation was slightly improved.

Accompanying this article is a chart which shows the trend of unemployment by months from January, 1933, to date. The projection of the curve during January this year was slightly downward from that of the preceding month, an indication of increasing employment. The level reached at the close of the month was, however, above that of January, 1938, when a somewhat greater volume of work was afforded.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The situation in the manufacturing industries was more favourable during January than at the close of 1938, the 581 associations from which reports were compiled, with a total of 98,859 members showing that 13,808 or a percentage of 14·0 were idle, compared with 16·6 per cent in December. Activity was but fractionally retarded from January a year ago when 13·1 per cent of the members reported

were out of work. Hat, cap and glove workers, and general labourers were much better engaged during January than in December, and increases, on a smaller scale, though noteworthy, were manifest by leather workers. Textile and carpet, and garment workers also, reflected moderately improved conditions, and lesser gains were recorded by bakers and confectioners, iron and steel, gas, and fur workers. On the contrary, metal polishers and glass workers showed considerably reduced activity, but as their membership was small they did not greatly affect the situation in the manufacturing industries as a whole. Recessions, of much lesser degree, occurred among brewery and wood workers, and minor contractions in activity were evident among papermakers, printing tradesmen, and meat cutters and butchers. In contrasting with the returns for January, 1938, wood, hat, cap and glove, and fur workers were decidedly more active during the month reviewed, and general labourers, leather, and gas workers were also considerably better engaged. Improvement, on a smaller scale, was noted by meat cutters and butchers, bakers and confectioners, and cigar and tobacco workers. Of the recessions which slightly more than offset these gains the most important, viewed from a percentage basis, was that registered by glass workers, though the contractions evident among iron and steel workers affected the greatest number of members. Curtailment in activity, also of noteworthy proportions, was reflected by metal polishers and brewery workers, while losses in employment on a smaller scale were shown by garment workers. Among jewellery, and textile and carpet workers, papermakers and printing tradesmen the tendency was toward lessened employment though the changes from January a year ago were quite slight.

Coal mining showed a drop in activity during January from either the preceding month or January, 1938, the change in the latter comparison being the more pronounced. This was apparent from the reports received from 59 locals with a membership numbering 22,804 persons, 1,822 or a percentage of 8·0 of whom were unemployed on the last day of the month, contrasted with percentages of 6·1 in December and 3·6 in January a year ago. Employment for Nova Scotia and Alberta members tended downward during January from December, the drop in Alberta being over 5 per cent, while in Nova Scotia the variation was slight. In British Columbia, however, the situation improved by 5 per cent. Contrasted with the returns for January, 1938, Nova Scotia, Alberta and British Columbia members participated in the less favourable movement shown in the group as a whole during the month under survey, British Columbia members suffering severe losses in employment and the other provinces more moderate recessions. Short time work also, was prevalent among the miners during January.

Seasonal slowing up in activity in building and construction operations was again manifest during January, and to a greater degree than at the close of 1938, the 229 associations of building tradesmen making returns, with a membership numbering 27,629 persons, showing that 12,090, or a percentage of 43·8, were unemployed on the last day of the month in contrast with a percentage of 41·2 in December. Quieter conditions also prevailed than in January, 1938, when 37·0 per cent of idleness was recorded. Hod carriers and building labourers were much slacker during January than in the previous month and noteworthy employment curtailment was evident among bricklayers, masons and plasterers. The situation also declined for steam shovelmen, bridge and structural iron workers, carpenters and joiners, painters, decorators and paperhangers, granite and stonecutters, and plumbers and steamfitters. The trend for electrical workers, and tile layers, lathers and roofers was more favourable than in December though the variations were quite slight. When a comparison is made with the returns for January, 1938, in the building and construction trades, extensive contractions in work afforded were registered by steam shovelmen, bridge and structural iron workers, painters, decorators and paperhangers, tile layers, lathers and roofers, and hod carriers and building labourers during the period surveyed, and conditions for carpenters and joiners, and plumbers and steamfitters were considerably quieter. Electrical workers reported a drop in activity of less than one per cent. Granite and stonecutters, on the other hand, were much more actively engaged, and noteworthy gains were manifest by bricklayers, masons and plasterers.

There was little variation in the level of employment in the transportation industries during January from the preceding month, though the tendency was adverse, according to the returns compiled from 842 organizations involving 65,968 persons. Of these, 8,504, or a percentage of 12·9, were idle on the last day of the month contrasted with a percentage of 12·5 in December. The situation was also less favourable than in January, 1938, when 8·1 per cent of unemployment was reported. Steam railway employees, whose returns included over 78 per cent of the entire group membership recorded, showed a practically unchanged situation from December, as did also street and electric railway employees. In navigation, however,

conditions were considerably more depressed and losses in employment, on a moderate scale, were manifest by teamsters and chauffeurs. Contrasted with the returns for January, 1938, heavy increases in unemployment were indicated in the navigation division during the month reviewed, though the curtailment in work afforded steam railway employees, while not so great viewed from a percentage basis, still affected a much larger number of members. Lesser contractions were evident among teamsters and chauffeurs. Among street and electric railway employees, the percentage of idleness remained identical with that of January of last year.

Retail shop clerks were quite actively engaged during January, the 5 associations making returns at the end of the month and combining a membership of 1,885 persons, showing that only 0·2 per cent were idle, the same percentage as was recorded at the close of December, 1938. In January last year all members were reported busy.

Returns were received at the close of January from 79 associations of civic employees embracing a membership of 10,320 persons, 115 or 1·1 per cent of whom were out of work in comparison with percentages of 2·4 in December and 2·2 in January last year.

In the miscellaneous group of trades there was a fractional drop in activity during January from the preceding month, unemployment standing at 11·1 per cent as compared with a percentage of 10·4 in December. The January percentage was based on the reports compiled from 143 labour organizations with a membership aggregate of 11,611 persons, 1,290 of whom were without work on the last day of the month. Theatre and stage employees showed a noteworthy increase in the volume of work afforded from December, and nominal advances were registered by stationary engineers and firemen. These gains, however, were more than offset by the reductions in employment evident among barbers, unclassified workers, and hotel and restaurant employees. In comparison with the returns for January, 1938, when 8·3 per cent of idleness was recorded in the miscellaneous group of trades, as a whole, theatre and stage employees were much better engaged during the month under review, and activity for stationary engineers and firemen tended upward. Decidedly less favourable conditions prevailed, however, for unclassified workers, and employment for barbers was moderately curtailed. Among hotel and restaurant employees minor contractions occurred.

A better situation was reflected in the fishing industry during January than in either the previous month or January, 1938, the improvement in the latter comparison being quite substantial. This was apparent from the reports tabulated from 9 unions of fishermen with a membership total of 2,019 persons, 296 of whom or a percentage of 14·7 were out of work on the last day of the month as compared with 19·4 per cent at the close of December and with a percentage of 37·0 in January last year.

The 4 unions of lumber workers and loggers furnishing reports at the close of January and covering a membership of 2,227 persons, showed that 1,343 were unemployed, a percentage of 60·3 contrasted with percentages of 47·5 in December and 4·9 in January, 1938.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938 inclusive, and also the percentages of unemployment by provinces for January of each year from 1929 to 1936 inclusive, and for each month from January, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929.....	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	5·7

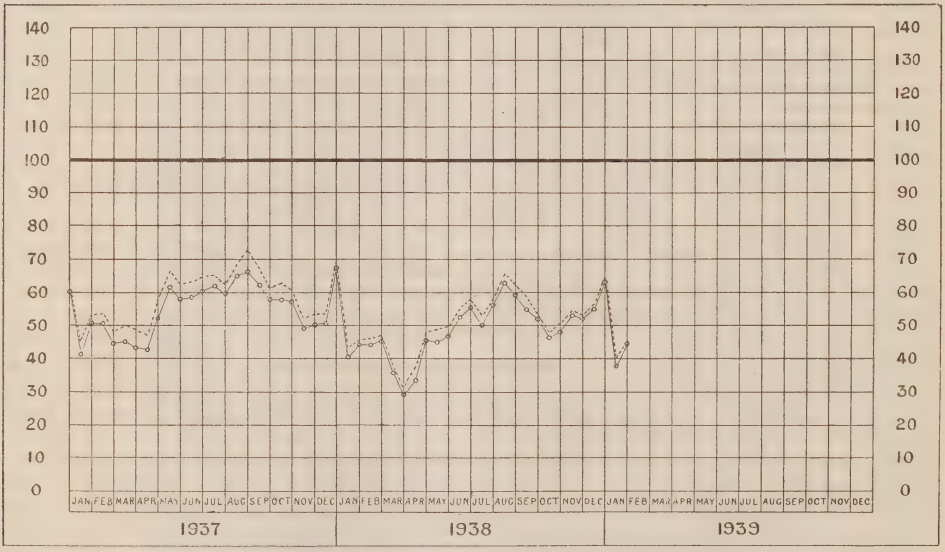
(3) Employment Office Reports for January, 1939



During the month of January, 1939, the volume of business as shown by the average daily placements effected by the offices of the Employment Service of Canada was over 12 per cent less than that transacted during the previous month and nearly 16 per cent higher than that of the corresponding period a year ago. Under the first comparison, all groups recorded decreases, except logging, in which a moderate gain took place, the greatest losses being in farming, construction and maintenance and services, the declines in the remaining divisions being nominal only. When compared with January last year, substantial increases were reported in construction and maintenance, farming and services, but logging, manufacturing, mining, trade and transportation registered fewer placements. The losses in the two last named groups, however, were very small.

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined sharply during the first half of January, but showed a marked upward trend during the latter half of the month, both curves then having reached practically the same levels as those shown at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 40·0 and 45·4 during the first and the second half of January, 1939, in comparison with ratios of 43·3 and 45·8 during the same periods of 1938. The ratios of placements to each 100 applications during the month under review were 37·8 and 44·5, as compared with 40·4 and 44·3 during the corresponding periods a year ago.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during January, 1939, was 1,334, as compared with 1,501 during the preceding month and with 1,171 in January, 1938.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The average number of applications for employment received daily by the offices during the month under review was 3,126, in comparison with 2,499 in December, and with 2,628 during January last year.

The average number of placements made daily by the offices of the Service during January, 1939, was 1,286 of which 777 were in regular employment and 509 in work of one week's duration or less, as compared with a total daily average of 1,465 during the preceding month. Placements in January a

year ago averaged 1,113 daily, consisting of 804 in regular and 309 in casual employment.

During the month of January, 1939, the offices of the Service referred 33,750 persons to vacancies and effected a total of 32,132 placements; of these the placements in regular employment were 19,427, of which 13,405 were of men and 6,022 of women, while placements in casual work totalled 12,705. The number of vacancies reported by employers was 22,974 for men and 10,375 for women, a total of 33,349, while applications for work numbered 78,133 of which 58,537 were from men and 19,596 from women. Reports for December, 1938, showed 39,006 positions available, 64,972 applications made and 38,070 placements effected, while in January, 1938, there were recorded 29,253 vacancies, 65,683 applications for work and 27,818 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:—

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (1 month)	19,427	12,705	32,132

Nova Scotia

During January, employment offices in Nova Scotia received orders for nearly 22 per cent less workers than in the preceding month, but over 28 per cent more than during the corresponding month of last year. There was a decrease in placements of nearly 24 per cent when compared with December, but an increase of over 33 per cent in comparison with January, 1938. The increase in placements over January of last year was due to gains in construction and maintenance and services, although the improvement in the latter group was offset by a decline in mining. The changes in other groups were unimportant, the largest being an increase in farming. Industrial divisions in which most of the placements were effected were construction and maintenance 368, and services 492, of which 384 were of household workers. During the month 122 men and 144 women were placed in regular employment.

New Brunswick

There was a decrease of nearly 12 per cent in the number of positions offered through employment offices in New Brunswick during January when compared with the preceding month, but an increase of nearly 23 per cent in comparison with the corresponding month of last year. Placements were nearly 13 per cent less than in December, but over 25 per cent above January, 1938. The only group to show any change of importance from January of last year was construction and maintenance, the increase in this division being responsible for the gain in placements for the province as a whole. Placements under construction and maintenance numbered 390 and in services 509. Of the latter 414 were of household workers. There were 19 men and 69 women placed in regular employment.

Quebec

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec during January, was nearly 27 per cent less than in the preceding month and nearly 8 per cent below the corresponding month of last year. There was a decrease also in placements of over 32 per cent when compared with December and of over 8 per cent in comparison with January, 1938. A large decrease in the highway division of construction and maintenance resulted in the decline in placements for the province as a whole when compared with January of last year. This loss was partly offset by gains in logging and services. Placements in other groups were on about the same level as those of last year. Industrial divisions in which most of the placements were effected during the month were manufacturing 81; logging 837; construction and maintenance 2,394; trade 91, and services 2,609, of which 2,398 were of household workers. Placements in regular employment numbered 3,241 of men and 1,698 of women.

Ontario

There was an increase of over 19 per cent in the number of positions offered through employment offices in Ontario during January when compared with the preceding month and of over 24 per cent in comparison with the corresponding month of last year. Placements also were nearly 21 per cent higher than in December and 29 per cent above January, 1938. When comparing placements during the month under review with January of last year there was a substantial increase in the highway division of construction and maintenance made up largely of workers engaged in snow removal. This increase was

partly offset by a large decrease in logging and smaller losses in manufacturing and services. Small changes only were reported in other groups. Placements by industrial divisions included manufacturing 390; logging 400; farming 474; construction and maintenance 4,887; trade 190, and services 3,105, of which 2,205 were of household workers. During the month 2,564 men and 1,336 women were placed in regular employment.

Manitoba

Orders received at employment offices in Manitoba during January called for over 15 per cent fewer workers than in the preceding month and over 30 per cent less than during the corresponding month of last year. Similar percentages of decline were reported in placements under both comparisons. The decrease in placements from January a year ago was due to substantial declines in farming and construction and maintenance, and a small loss in services. Bush placements were somewhat higher and there were minor changes only in all other groups. Placements by industrial divisions included logging 395; farming 2,570; construction and maintenance 211, and services 1,101, of which 1,017 were of household workers. There were 3,137 men and 861 women placed in regular employment.

Saskatchewan

During January, positions offered through employment offices in Saskatchewan were 42 per cent less than in the preceding month, but 331 per cent above the corresponding month of last year. There was a decrease in placements of over 43 per cent when compared with December, but an increase of nearly 290 per cent in comparison with January, 1938. As in previous months, placements under the Farm Improvement and Employment Plan accounted for the very substantial gain over the corresponding month of the previous year and constituted practically the entire placement activity of the province during the month. There were 2,344 farm placements and 1,383 placements in services. Of the latter, 259 were city domestic workers and 988 farm household workers. Placements in regular employment numbered 2,276 of men and 1,321 of women.

Alberta

Employment opportunities, as indicated by orders received at employment offices in Alberta during January, were nearly 18 per cent less favourable than in the preceding month and nearly 4 per cent below the corresponding month of last year. There was a decrease of over 16 per cent in placements when compared with December, but a nominal gain when compared with January, 1938. Although placements were at about the same level as in January of last year, small gains were reported in construction and maintenance and services, and there were declines of about the same size in logging and farming. Industrial divisions in which most of the placements were effected during the month were manufacturing 54; logging 96; farming 1,005; construction and maintenance 279, and services 438, of which 366 were of household workers. Placements in regular employment numbered 1,265 of men and 320 of women.

British Columbia

Opportunities for employment, as indicated by orders received at employment offices in British Columbia during January, were nearly 5 per cent less favourable than in the preceding month, but nearly 42 per cent better than during the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. Casual employment on snow removal and other road work accounted for the increase in placements over January, 1938. There was a small gain in services, but a decrease in logging and minor changes only in all other groups. Placements by industrial divisions included logging 221; farming 75; construction and maintenance 3,585, and services 647, of which 465 were of household workers. There were 781 men and 273 women placed in regular employment.

Movement of Labour

During the month of January, 1939, the offices of the Employment Service of Canada effected 19,427 placements in regular employment, 12,259 of which were of persons for whom the employment located was outside the immediate district of the offices at which they were registered. Of the latter, 308 were granted the Employment Service reduced transportation rate, 299 travelling to centres within the same province as the despatching office and 9 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to journey to distant employment for which no workers are available locally.

Transportation certificates granted by Ontario offices during January numbered 227, all provincial. From Port Arthur 64 bush workers, 19 highway construction workers, 2 mine employees and 2 fishermen were carried at the reduced rate to employment at points within the territory administered by that city

*1 Placement effected by offices since closed.

office. The Sudbury office despatched 51 bush workers within its own zone and 13 labourers to Port Arthur. The Sudbury zone was also the destination of 37 bush workers travelling from North Bay and of 5 bush workers and one tractor operator shipped from Pembroke. The Fort William office was instrumental in transferring 24 bushmen to centres within the same zone. Proceeding from Toronto, 3 farm hands went to rural points within the Toronto zone, one bushman and construction labourer to North Bay and one farm hand each to the Brantford, London, Owen Sound and York Township zones. The movement of labour in Manitoba during January emanated from Winnipeg, which city office transferred 34 persons at the reduced rate, 25 within the province and 9 outside. The latter were for the Port Arthur zone and included 5 bushmen, one miner, one tractor operator, one farm hand and one hotel general. Travelling to various sections of the Winnipeg zone, were 10 sawmill workers, 7 mine workers, 6 bushmen and one blacksmith. The remaining provincial transfer was of a truck driver bound for Brandon. In Saskatchewan during January 3 reduced rate certificates were issued at the Regina office to teachers going to situations within the same zone. Benefiting by the Employment Service reduced transportation rate in Alberta during January, 40 persons were carried to provincial employment. From Edmonton, 20 bush workers, 5 machine operators, 3 sawmill workers, 3 farm hands, 3 miners, one engineer, one hotel cook and one waitress were sent to various centres within the Edmonton zone. Transferred from Calgary 2 farm hands were carried to Drumheller and one farm hand to a point in the Calgary zone. The Vancouver office was responsible for the 4 transfers at the reduced rate effected in British Columbia during December. Despatched to centres in the Vancouver zone were one miner, one farm hand and one housekeeper, while one gardener was sent to the Penticton zone.

Of the 308 workers who travelled at the Employment Service reduced transportation rate during January, 223 proceeded over the Canadian National Railways, 82 over the Canadian Pacific Railway and 3 over the Pacific Great Eastern Railway.

(4) Building Permits issued in Canada during January, 1939

The value of the building authorized by 58 cities in January, 1939, showed a seasonal decline as compared with the preceding month, and the total was also lower than in January, 1938; the co-operating municipalities issued permits for building work estimated to cost $1,706,630, compared with $3,482,915 in December, 1938, and $1,859,181 in January of last year. There was therefore a reduction of 51 per cent in the former comparison and of 8·2 per cent in the latter comparison.

Some 50 centres furnished detailed statements for January, showing that they had granted about 160 permits for dwellings, whose anticipated cost was over $600,000, and more than 900 permits for other buildings estimated at approximately $1,000,000. In December, the erection of some 230 dwellings and 1,000 other buildings was authorized, at an estimated expenditure of $1,000,000 and $2,200,000 respectively.

Prince Edward Island, Nova Scotia, Saskatchewan, Alberta and British Columbia reported increases in the value of the building represented by the permits taken out in January as compared with December, 1938. The largest gain of $295,276 or 107·6 per cent took place in British Columbia. Of the declines elsewhere recorded, the most marked were those of $924,643 or 79·9 per cent in Quebec, and $1,095,675 or 63·0 per cent in Ontario.

As compared with January, 1938, Nova Scotia, Saskatchewan, Alberta and British Columbia showed increases, of which those of $75,408 in Nova Scotia, and $47,695 in Alberta were most pronounced. In the other provinces, the value of the building authorized was lower, the reduction of $189,926 or 22·8 per cent in Ontario being greatest.

In Montreal, Toronto and Winnipeg there were decreases in the value of the building undertaken as compared with the preceding month, and also as compared with the same month of last year, while Vancouver showed gains in both comparisons. The following cities also reported increases over December and as compared with January of last year: Halifax, Saint John, Galt, Guelph, Oshawa, Ottawa, Owen Sound, Stratford, St. Catharines, Regina, Calgary, Edmonton, Lethbridge, Nanaimo, New Westminster and North Vancouver.

The following table gives the value of the building authorized by 58 cities during January of each year since 1926. Index numbers of wholesale prices of building materials in January of the same years are also given, (1926=100).

Year	Value of permits issued in January	Indexes of value of permits issued in January (1926=100)	Indexes of wholesale prices of building materials in January (1926 average=100)
	$		
1939	1,706,630	36·1	87·3
1938	1,859,181	39·4	91·6
1937	1,721,867	36·5	89·1
1936	1,302,758	27·6	83·6
1935	882,878	18·7	81·6
1934	707,812	15·0	81·9
1933	1,185,961	25·1	75·7
1932	2,761,929	58·5	79·4
1931	8,401,456	178·0	84·0
1930	7,217,397	152·9	97·4
1929	8,416,880	178·3	98·0
1928	7,716,587	163·5	95·2
1927	5,676,537	120·3	96·8
1926	4,719,534	100·0	102·3

The 1939 figure was less by 51 per cent than in January, 1938, and was also slightly lower than in 1937, but was higher than in any earlier year since 1932. The wholesale costs of building materials in recent months have been below those in the same period of the preceding year, and in January, 1939, were also slightly lower than in 1937, although they were higher than in any January in the period 1931-1936.

The accompanying table gives the value of the building permits issued by 58 cities in January 1939, and January 1938. The statistics for all but the present year are based on revised statements furnished by the civic officials after the close of the year. The 35 cities for which statistics are available since 1910 are indicated thus *

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF FEBRUARY, 1939

Reports of Superintendents of the Employment Service

EMPLOYMENT conditions at the end of February, 1939, were reported by the Superintendents of the Employment Service to be as follows:—

Farming in the Maritimes was quiet, except for the usual chores and the cutting and hauling of firewood. Logging, likewise, showed little activity. With more favourable weather, fishing was somewhat better, although heavy gales had hindered offshore fishing at Saint John. Coal mines, both in the New Glasgow area as well as those in Cape Breton and vicinity, worked from 3 to 6 days per week. Manufacturers of confectionery and foodstuffs were busy preparing for the Easter trade and at New Glasgow one of the steel mills employing 400 men had re-opened after having been closed for several weeks. Some idleness, however, was reported in the steel group at Sydney. Other industries in the Maritimes showed little change. No new building construction was under way, but prospects for spring activities were brighter. Transportation by rail, water and motor was fairly heavy. Trade was fair. In the Women's Division placing of individuals in household service continued.

Farming was quiet in Quebec Province and, except for 40 men sent from Val d'Or to a railway tie camp, logging was inactive. Mining, likewise was slack. Manufacturing centres reported as follows:—Bagotville, paper mills working only six hours per day; Chicoutimi and Quebec, plants producing only 50 per cent of their regular volume; Hull and LaTuque, production normal; Montreal and Matane, unchanged; Rouyn and Val d'Or, quiet; Sherbrooke, a little progress noted in textiles; Three Rivers, paper and steel industries no change and cottons improved. Building construction appeared to be somewhat better and numerous unemployed had found work on various relief projects, road maintenance and snow clearance. Trade was rather slow.

Farm orders in Ontario were increasing, with wages in some districts showing an upward trend. Log hauling was about completed and the only orders received were for men for replacement. At North Bay, peak operations just concluded had provided for the maintenance of about 34 logging camps with a personnel approximating about 50 per cent of last year's total. Mining remained active, but with few calls for men. No material change was reported in the industrial situation. Iron and steel establishments, in particular, continued to report production and staff levels below those of last year; planing mills and auto accessory factories were also slack, while textiles and glass factories were busier. Building construction was quiet, but heavy snowfalls provided employment for a large number of men for whom no other work was available. Orders in the women's division for experienced household workers remained steady; casual help, however, was not in such great demand. A few women and girls also were placed with industrial concerns and at Niagara Falls a third class of seventeen students was being trained as waitresses under the Dominion-Provincial Youth Training Program.

Although the demand for farm help in the prairie provinces was fairly quiet, as the Farm Improvement and Placement Plan neared its conclusion, there was an increasing number of placements made at regular wages. Opportunities for work in logging were confined chiefly to those in cordwood camps. Coal mining, which had showed some increased activity during the recent severe weather, again declined. Manufacturing was dull. No new building projects were under way, but road maintenance and snow clearance had provided some casual employment. Trade was quiet. A scarcity of experienced maids continued in the women's division and few applicants were willing to take positions offered in country homes.

Farming was quiet in British Columbia, although recent fine weather had been very encouraging to farmers eager to start field operations. While no improvement was noted in logging, some movement of labour was expected about March 1, when several camps were preparing to resume operations. Sawmills also were slack. Mining was more active. The value to British Columbia of this growing industry will be more readily appreciated by the fact that it gives direct employment to approximately 15,000 persons, with the likelihood that an even greater number will be employed during the coming season. Factories at Nelson were running without change. Building construction still remained rather quiet, nevertheless alterations and National Defence projects under way provided work for a certain number of men. Drydocks and shipyards at Prince Rupert were busy and all waterfronts reported increased activity. Trade was fair, with collections slow. Regular employment for domestics in the women's division was available, but day work was scarce, with many applicants registered.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, February 1939, summarized the employment situation as follows:—

Employment showed a decline between December 12 and January 16. A marked reduction in employment normally occurs in January in many industries owing to a temporary slackening in activity after Christmas. The effects of this seasonal decline were accentuated January 16 by the severe weather which restricted outdoor employment at that date. The decline occurred mainly in building, public works contracting, agriculture and horticulture, stone quarrying, the distributive trades, furniture and metal goods manufacture, certain branches of engineering, and the clothing, wool textile, pottery and printing industries. On the other hand employment improved in coal mining and iron and steel manufacture.

It is provisionally estimated that at January 16, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,079,000. This was 184,000 less than at December 12, 1938, and on a comparable basis, 50,000 less than at January 17, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at January 16, 1939, was 14·1, as compared with 12·7 at December 12, 1938. For January 17, 1938, the percentage was 13·0. For persons insured under the general scheme the corresponding percentages were 14·3 at January 16, 1939, 12·9 at December 12, 1938, and 13·2 at January 17, 1938. For persons within the agricultural scheme the percentages were 11·1, 8·9 and 9·0 respectively.

At January 16, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,594,431 wholly unemployed 379,027 temporarily stopped, and 65,568 normally in casual employment, making a total of 2,039,026; this was 207,654 more than at December 12, 1938, and 211,419 more than at January 17, 1938. The increase of 207,654 between December 12, 1938, and January 16, 1939, included over 39,000 boys and girls, a large number of whom had registered for employment on reaching the school-leaving age at the end of the December term.

The total of 2,039,026 persons on the registers in Great Britain at January 16, 1939, included 1,232,850 persons with claims admitted for insurance benefit, 567,915 with applications authorized for unemployment allowances, 53,504 persons with applications for insurance benefits or unemployment allowances under consideration, and 184,757 other persons, of whom 59,179 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at January 16, 1939, was 2,133,809, as compared with 1,918,583 at December 12, 1938, and 1,927,005 at January 17, 1938.

United States

According to a press release issued on February 24, by Miss Frances Perkins, Secretary of Labor, seasonal employment declines in retail stores, factories, and construction were primary factors contributing to the decrease of approximately 880,000 workers engaged in non-agricultural industries in January. It was stated that this decline was only slightly larger than that which took place from December, 1936, to January, 1937, and is much smaller than the unusually sharp decline from December, 1937, to January, 1938.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:

About 100,000 fewer workers were employed in January in non-agricultural industries than a year ago at this time. These figures do not include employees on Works Progress Administration and National Youth Administration projects, enrollees in the Civilian Conservation Corps, nor certain part-time workers who are hired only during peaks of activity in some industries.

Employment in retail stores always shows a large reduction after the peak of the Christmas trade, and factory employment normally declines from December to January. This year the January curtailment in employment in both factories and stores conformed to about the usual seasonal pattern, indicating a well-sustained basic level of activity. In private building construction, the decline was slightly less than the average for January in recent years, while highway and street work was considerably curtailed. Telephone and telegraph companies and insurance and brokerage offices reported small employment gains.

The decrease of 2·1 per cent in factory employment indicates the release of approximately 150,000 wage earners, accompanied by a decrease of 3·9 per cent in factory pay rolls, representing a loss of $6,500,000 in aggregate weekly wages. These decreases represent about the usual January reduction.

Gains in employment were reported by 19 of the 87 manufacturing industries surveyed and increases in pay rolls by 14 of the manufacturing industries. For the durable goods group of industries there was a 2·0 per cent decrease in employment, slightly less than seasonal, and 4·7 per cent recession in pay rolls. For the nondurable goods industries there was a somewhat greater than seasonal decline of 2·0 per cent in employment, and a 3·1 per cent drop in pay rolls.

In retail trade, there was a post-holiday decline in employment of 15·8 per cent or well over half a million workers. The January 1939 employment index at 82·9 per cent of the 1929 average was 1·4 per cent below the level of a year ago. The December-January decline, which was slightly greater than seasonal, reflected the lay-off of the unusually large extra force taken on for the holiday trade. Employment in the general merchandising group decreased 36·5 per cent but was 1·4 per cent above the level of January of last year. Apparel stores reported employment losses of 20·8 per cent; jewelry, 18·8 per cent; furniture, 8·1 per cent; cigars, 6·4 per cent. Other retail groups showed reductions of less than 5 per cent, with the exception of dealers in wood, coal and ice and in farm supplies, who increased the number of their employees by 4 per cent and 0·4 per cent, respectively. Wholesale trade as a group reduced employment seasonally by 1·6 per cent.

Anthracite mines reduced their working forces 2·5 per cent and bituminous coal mines 0·7 per cent. Pay rolls in the coal mining industries showed more pronounced declines than employment, reflecting reduced production during the first half of January.

Employment in quarries declined less than seasonally, by 5·4 per cent, and showed a gain over January 1938 of 2·5 per cent. Oil wells decreased their operating forces by 1·2 per cent, while employment in metal mines remained virtually unchanged. Power and light companies reported about the usual January employment decline (1·8 per cent), while telephone and telegraph firms added some workers, and electric railroads reported a small employment cut. A seasonal loss of 3·9 per cent occurred in dyeing and cleaning plants, and there were slight reductions in laundries and hotels.

In private building construction, the decrease of 11·5 per cent in employment was, with the exception of January 1937, the smallest January reduction reported since 1933. All parts of the country reported reduced employment in construction, the smallest losses occurring in the Pacific Coast and East and West South Central States, while the largest declines were shown in the New England, the East and West North Central and Mountain States.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the dues observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the

"B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary conditions.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF NATIONAL DEFENCE

Construction of a pump house and the supply and installation of equipment at Vimy Barracks, Barriefield, Ont. Name of contractors, The Arthur S. Leitch Co., Ltd., Toronto, Ont. Date of contract, February 2, 1939. Amount of contract, $9,778. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 80
Cement and concrete mixer operator:	
Steam	0 65
Gasoline or electric	0 50
Cement finisher	1 00
Compressor operator (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Labourers	0 40
Machinists	0 70
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Painters and glaziers	0 70
Plumbers and steamfitters	0 80
Roofers, felt and gravel: patent	0 45
Sheet metal workers	0 75
Structural steel workers	0 80
	per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	per hour
Watchman	0 35
Welders on steel erection	0 80

Construction of an addition to the Armoury at Cranbrook, B.C. Name of contractor, Mr. A. E. Jones, Cranbrook, B.C. Date of contract, February 20, 1939. Amount of contract, approximately $4,814. A fair wages schedule was included in the contract as follows:—

	Per hour
Bricklayers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 70
Cement and concrete mixer operator:	
Gasoline or electric	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Electricians (inside wiremen)	0 75
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Roofers, felt and gravel: patent	0 45
Sheet metal workers	0 65
Watchman	0 40

Construction of a boiler house and heating system at the Armoury, Nelson, B.C. Name of contractor, Mr. V. Graves, Nelson, B.C. Date of contract, January 10, 1939. Amount of contract, $4,665. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 70
Cement and concrete mixer operator:	
Steam	0 65
Gasoline or electric	0 50
Cement finisher	0 60
Compressor operator (gasoline or electric)	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Electricians (inside wiremen)	0 75
Firemen, stationary	0 45
Labourers	0 40
Machinists	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45

	Per hour
Painters and glaziers	0 65
Plumbers and steamfitters	0 80
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Sheet metal workers	0 65
Watchmen	0 40
Insulation workers (asbestos and cork)	0 75

DEPARTMENT OF PUBLIC WORKS

Construction of a public building at Brighton, Ont. Name of contractors, M. Sullivan & Son, Ltd., Arnprior, Ont. Date of contract, February 2, 1939. Amount of contract, $13,447 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Drivers	0 35
Driver, team and wagon	0 65
Driver, horse and cart	0 50
Electricians (inside wiremen)	0 65
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	0 80
Firemen, stationary	0 40
Labourers	0 35
Lathers, metal	0 60
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel: patent	0 40
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Watchman	0 30
Welders and burners on steel erection	0 80

Construction of improvements to the breakwater-wharf at Victoria Beach, Man. Name of contractor, Mr. Wm. Newman, Winnipeg, Man. Date of contract, January 23, 1939. Amount of contract, approximately, $6,471. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 60
Blacksmith's helpers	0 40
Carpenter	0 70
Labourer	0 35
Timberman or cribman (measuring, scribing, and by the use of axe, adze, etc., cutting and fitting timber)	0 50
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Driver	0 35
Motor truck driver	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
Watchman	0 30

Construction of a public building at Dryden, Ont. Name of contractors, Claydon Co., Ltd., Winnipeg, Man. Date of contract, January 23, 1939. Amount of contract, $13,580 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 65
Labourers	0 35
Lathers, metal	0 60
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Welders on steel erection	0 80
Watchman	0 30

Docking and repairing Dredge P.W.D. 305 ("King Edward"). Name of contractors, B.C. Marine Engineers & Shipbuilders, Ltd., Vancouver, B.C. Date of contract, January 16, 1939. Amount of contract, approximately $37,675. (Information published in December issue of LABOUR GAZETTE regarding this contract not correct.) A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 75
Blacksmiths' helpers	0 50
Boilermakers	0 90
Boilermakers' helpers	0 67
Carpenters—ships	0 83

	Per hour
Caulkers—iron	0 90
Caulkers—wood	0 86
Electricians	0 85½
Electricians' helpers	0 50
Labourers	0 50
Machinists	0 75
Machinists' helpers	0 50
Painters	0 75
Patternmakers	0 85½
Platers	0 90
Riggers	0 65½
Rivetters	0 90
Rivet holders	0 76
Rivet heaters	0 68
Ships' fitters	0 90
Teamsters with team and wagon	1 00
Teamsters	0 45
Truck drivers	0 50
Welders—acetylene	0 82
Welders—electric	0 90

Construction of a public building at Cobden, Ont. Name of contractors, M. Sullivan & Son, Ltd., Arnprior, Ont. Date of contract, January 15, 1939. Amount of contract, $9,897 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gas. or Elec.	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Drivers	0 35
Electricians (inside wiremen)	0 65
Engineers on steel erection	0 80
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Labourers	0 35
Lathers (metal)	0 60
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Watchman	0 30
Welders on steel erection	0 80

Construction of a scientific laboratory for the Royal Canadian Mounted Police at Rockcliffe, Ont. Name of contractors, H. Dagenais, Ltd., Ottawa, Ont. Date of contract, January 17, 1939. Amount of contract, $18,400 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Labourers	0 45
Lathers, metal	0 70
Marble setters	0 90
Marble setters' helpers (all men assigned to help tradesmen)	0 50
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers, composition	0 55
Roofers, shingles (wood, asbestos)	0 85
Sheet metal workers	0 85
Stonecutters	0 80
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 80
Terrazzo layers	0 75
Terrazzo layers, finishers and helpers	0 60
Watchman	0 40
Welders on steel erection	0 80

Construction of a hangar for the Royal Canadian Mounted Police at Rockcliffe, Ont. Name of contractors, Ross-Meagher Ltd., Ottawa, Ont. Date of contract, January 11, 1939. Amount of contract, $22,144 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Electric	0 55
Compressor operators (gas. or elec.)	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Engineers on steel erection	0 80
Engineer, operating steam:	
Single or double drum	0 70
Three or more drums	0 80
Firemen, stationary	0 50
Hoist operators, (gas. or elec.)	0 55

	Per hour
Labourers	0 45
Machinists	0 70
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plumbers and steamfitters	0 95
Painters (spray)	0 80
Roofers, felt and gravel	0 50
Roofers, sheet metal	0 85
Sheet metal workers	0 85
Shovel operators (gas.)	1 00
Steam shovel engineer	1 00
Steam shovel craneman	0 75
Steam shovel fireman	0 55
Watchman	0 40
Structural steel workers	0 80
Welders on structural steel	0 80

Construction of a protection wall and ice breakers at Berthierville, P.Q. Name of contractors, Kelly Bros., Hawkesbury, Ont. Date of contract, January 20, 1939. Amount of contract, $27,903.80. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 50
Cement finishers	0 50
Concrete mixer operator—steam, gas. or elec.	0 40
Derrick engineer (steam)	0 55
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Labourers	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
Pile driver engineers	0 55
Pile driver foreman	0 65
Pile driver firemen	0 35
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)	0 37½
Watchmen	0 25

Construction of a public building at Thurso, P.Q. Name of contractors, Messrs. Kelly Bros., Hawkesbury, Ont. Date of contract, January 24, 1939. Amount of contract, $9,635 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 65
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 55
Electric	0 50
Drivers	0 35
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Electricians (inside wiremen)	0 55
Engineers, operating steam:	
Single or double drums	0 55
Three or more drums	0 65
Engineers on steel erection	0 75
Firemen, stationary	0 50
Labourers	0 35
Lathers, metal	0 60
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35

Sandblaster	0 55
Labourer	0 35
Erector	0 60
Erector's helper	0 40
Sheet metal worker	0 60
Sheet metal worker's helper	0 40
Riveters	0 50
Riveter's helpers	0 40

	Per hour
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—	
1st year	0 20
2nd year	0 25
3rd year	0 35

Note.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

The major reconditioning of Fairchild 71 Monoplane. Name of contractors, Fairchild Aircraft Ltd., Longueuil, P.Q. Date of contract, February 4, 1939. Amount of contract, $3,998.80. The preceding fair wages schedule was also included in this contract.

Construction of 8 main fuel tanks for Bristol 140 Bolingbroke Aircraft. Name of contractors, Fairchild Aircraft Ltd., Longueuil, P.Q. Date of contract, February 21, 1939. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Vadette flying boat. Name of contractors, Canadian Vickers Ltd., Montreal, P.Q. Date of contract, January 20, 1939. Amount of contract, $4,324. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Printing and Publishing

Calgary, Alberta.—Daily Newspaper Publishers and the Calgary Printing Trades Union, (Local No. 1, Canadian National Printing Trades Union).

Agreements to be in effect from July 8 and July 23, 1938 to July 7, 1941, unless otherwise agreed on.

Only union members to be employed, if available.

Hours: a 45 hour week; day work to consist of work done between 7 a.m. and 6 p.m., night work between 7 p.m. and 6 a.m., lobster shift, all work done partly during the hours of night and day work.

Overtime: time and one half for all time worked in excess of the regular hours set out above; overtime to commence when time is called. Double time for work on Sundays and seven specified holidays, and in the case of night shifts to the day preceding such holidays and Sundays.

Minimum wage rates: for the evening newspaper, 85 cents per hour for day work, with $2.40 per week additional for night scale, $4 per week additional for lobster shift; for morning newspaper, 85 cents per hour for both day and night work.

Apprentices may be employed in the ratio of one apprentice to every seven journeymen, with a limit of four apprentices until the regular staff of the newspaper reaches 45, when the maximum number of apprentices may be six. Apprentices to serve six years and to be paid from 25 per cent of journeymen's scale during first and second year to 70 per cent during sixth year.

Machine learners: any member of the union is eligible to learn to operate any typesetting or typecasting device in use in the office, with the permission of the foreman and will be paid two fifths of journeymen's scale during first five weeks, three fifths during next five weeks and four fifths for third five weeks.

A joint standing committee to be appointed for the settlement of any disputes. If they are unable to agree any such dispute will be referred to arbitration.

Manufacturing: Miscellaneous Wood Products

Toronto, Ontario.—Certain Manufacturers of Upholstered Furniture and the Upholsterers International Union, Local No. 30.

Agreement to be in effect from October 15, 1938, to October 15, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed. The manufacturer recognizes the union and the shop committee.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. Labourers may work an additional hour per day. No work on Saturdays after 12 noon, nor on Sundays or eight specified holidays.

Minimum hourly wage rates: upholsterers 65 cents; cutters, springers, operators, cushion fillers, finishers, 55 cents; labourers 40 cents.

During the slack period, there will be equal division of work.

Any dispute which cannot be settled by the shop committee will be taken up with the union representative.

Vancouver, B.C.—The Upholstered Furniture Manufacturers' Association of B.C. and the Upholsterers' International Union, Local 306.

Agreement to be in effect from December 15, 1938, to September 1, 1939, and thereafter from year to year subject to notice.

Preference in employment to be given union members. No discrimination on account of union activity.

Hours to be as established from time to time by the regulations of the provincial government.

Overtime: all time in excess of 48 hours per week to constitute overtime and be paid at time and one half; double time for work on Sundays. No work on eight specified holidays.

Employees called on outside work to be paid for travelling and waiting time. Necessary expenses, including meals, lodging and transportation to be provided employees on such work.

Wages: piece work rate shall be set to let the average upholsterer earn at least 65 cents per hour and springers and cushion makers with at least one year's experience 45 cents per hour; qualified men cutters (one to each shop) to be paid an hourly rate of 60 cents; qualified women cutters with at least two years experience 50 cents, with one year's experience 40 cents; sewers with two years' experience 37½ cents, with one year's experience 35 cents. All employees other than the above and other than apprentices to be paid at least 5 per cent over the provincial minimum wage rate. Any rates higher than the above are not to be reduced.

Apprentices to be governed by the provincial apprenticeship regulations.

Work to be divided as equally as possible among employees; during slack seasons when hours are less than 28 per week per employee, the staff may be reduced; such employees laid off to have preference in re-employment.

A shop delegate to be chosen by employees in each shop who shall meet with employer to settle piece rate scale. If an agreement cannot be reached it will be referred to a joint committee.

Construction: Shipbuilding

NORTH VANCOUVER, B.C.—A SHIPBUILDING AND REPAIR COMPANY AND THE AMALGAMATED BUILDING WORKERS OF CANADA, SHIPYARD SECTION OF VANCOUVER (SHIPBUILDERS, ETC.)

Agreement to be in effect from January 6, 1939, to January 6, 1940.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, April, 1938, page 450.

Hours are unchanged at 44 per week, with wage for shipwrights, joiners and boatbuilders, $6.64 per day, for caulkers, $6.89.

Service: Business and Personal

TORONTO, ONTARIO—A CERTAIN OFFICE AND FACTORY BUILDING OWNER AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS, LOCAL 796.

Agreement reached after strike which is noted on page 282 of this issue. Agreement to be in effect from February 13, 1939, to January 31, 1940, or for another year if no notice is given by either party.

Only union members to be employed. No discrimination against employees.

Hours: 8 per day, 48 per week.

Overtime and work on Sundays and statutory holidays, time and one-half.

Wages: $26 per week for third class engineers, $23 for fourth class engineers.

Disputes to be settled by the grievance committee with the employers.

Collective Labour Agreements Act, Quebec

The following agreement and amendments and cancellations of agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

Corrugated Paper Box Manufacturing Industry, Province of Quebec (amendment).

Printing Trades, Quebec (amendment).

Building Trades, Hull (amendment).

Longshoremen, Sorel (cancellation of amendment).

Retail Store Employees, Quebec (amendment).

Shoe Repairers, Victoriaville (cancellation).

Funeral Undertakers, Montreal (amendment).

Hairdressers and Beauty Parlour Operators, Montreal.

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in the article on page 336 of this issue:—

ONTARIO

Cloak and Suit Manufacturing Industry, Province of Ontario.

SASKATCHEWAN

Sign Painters, Moose Jaw.
Barbers, Swift Current.

ALBERTA

Plasterers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-

Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by an Order in Council of an agreement affecting hairdressers at Montreal and amendments to and cancellation of other agreements, all of which are summarized below. In addition, application has been made for the extension of the following agreements: building trades at St. Jerome as published in the *Quebec Official Gazette* of February 4, textile bag manufacturing, Montreal, as published in the February 11 issue, and clerks at Jonquière and Kenogami as published in the February 18 issue.

Manufacturing: Pulp, Paper and Paper Products

Corrugated Paper Box Manufacturing Industry, Province of Quebec.—An Order in Council, approved January 28, and published in the *Quebec Official Gazette,* February 11, amends the original Order in Council for this industry (Labour Gazette, February, page 218). The agreement had stipulated that wage rates higher than the minimum rates which were being paid when the agreement was made obligatory might not be reduced. The amendment makes a provision that "in the case of a reduction in the spread between present selling prices of boxes and the cost of material used in their fabrication, this clause becomes, after the approval of the joint committee, void and without effect." In no case, however, may wages be reduced below the minimum scale of the agreement.

Manufacturing: Printing and Publishing

Printing Trades, Quebec.—A correction is made to this agreement and published in the *Quebec Official Gazette,* February 11, which does not affect the summary as previously given in the Labour Gazette, September, 1938, page 1044.

Construction

Building Trades, Hull.—An Order in Council, approved February 10, and published in the *Quebec Official Gazette,* February 18, amends the previous Orders in Council for these trades (Labour Gazette, July, 1938, page 798, and November, page 1300) by adding the names of six contractors as parties to the agreement.

Transportation and Public Utilities: Water Transportation

Longshoremen, Sorel.—An Order in Council, approved January 28, and published in the *Quebec Official Gazette,* February 11, cancels the amendment which was noted in the Labour Gazette, November, 1938, page 1300, and which had provided that the agreement be administered by the joint committee of the building industry of Sorel. A separate joint committee for the longshoremen was formed and approved by Order in Council.

Trade

RETAIL STORE EMPLOYEES, QUEBEC.—An Order in Council, approved January 28, and published in the *Quebec Official Gazette,* February 11, changes the original Order in Council for these workers by an amendment which does not affect the summary as given in the LABOUR GAZETTE, January, page 96.

Service: Custom and Repair

SHOE REPAIRERS, VICTORIAVILLE.—An Order in Council, approved January 28, and published in the *Quebec Official Gazette,* February 11, repeals the Order in Council making this agreement obligatory (LABOUR GAZETTE, September, 1937, page 1033).

Service: Business and Personal

FUNERAL UNDERTAKERS, MONTREAL.—An Order in Council, approved February 10, and published in the *Quebec Official Gazette,* February 18, amends the previous Order in Council for this industry (LABOUR GAZETTE, January, page 97).

The territorial jurisdiction is enlarged to include all cities and towns of the Island of Montreal with a population of 4,000 or over and undertakers outside the Island of Montreal doing business either occasionally or regularly on the Island of Montreal.

Hours for all employees including mechanics and service men: the working week to be based on an average of 70 hours previously determined by the Joint Committee.

Overtime: time and one half except for those regularly receiving wages higher than the minimum rates who shall be paid at their regular rate plus 50 per cent of the minimum rate.

Minimum wage rate for mechanics: $25 per week; for service men $15.60 per week if inexperienced and $18 after one year's experience with any undertaker.

HAIRDRESSERS AND BEAUTY PARLOUR OPERATORS, MONTREAL.—An Order in Council, approved February 10, and published in the *Quebec Official Gazette,* February 18, makes obligatory the terms of an agreement between the Master Ladies' Hairdressers and Wigmakers Guild, Inc., l'Association Professionelle des Coiffeurs pour Dames de la Province de Québec, Inc. (The Professional Association of Ladies' Hairdressers of the Province of Quebec, Inc.) and the Hairdressers Employees Association of the Province of Quebec.

This Order in Council, which covers the cities of Montreal, Outremont and Westmount, is to be in effect from February 18, 1939, to February 17, 1940.

Hours: the weekly duration to be 48 hours; the maximum duration 55 hours which must be worked between 9 a.m. and 7 p.m. on Mondays to Fridays inclusive with one hour off for noon meal and a maximum of 9 hours a day, and between 9 a.m. and 9 p.m. on Saturdays with one hour off for each meal, a maximum of 10 hours on Saturday. No work on seven specified holidays.

Overtime: all hours over 48 per week to be paid pro rata.

Minimum wage rate for hairdressers and operators who have completed their two years' apprenticeship: $15 per week of 48 hours. Extra experienced hairdressers hired to help the regular employees to be paid 50 cents per hour for overtime worked and for waiting time. All tips are the property of the hairdresser or operator and are not part of the established wages.

Apprentices limited to one apprentice in each ladies beauty or hairdressing parlour. Apprenticeship to comprise two consecutive years of work in a beauty parlour. Apprentices to be paid $7 per week during first six months, $8 during second six months, $10 during third six months and $11 during fourth six months. Apprentices to work 48 hours per week.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the February 11 issue of the *Quebec Official Gazette*:

Barbers and hairdressers, Joliette, Berthier and Montcalm.

Shoe shiners, Montreal.

Funeral undertakers, Montreal.

Corrugated paper box manufacturing industry, Province of Quebec.

Longshoremen (ocean navigation), Montreal.

Shipliners, Montreal.

Longshoremen, Sorel.

INDUSTRIAL STANDARDS ACT

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions

of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Textiles and Clothing

Cloak and Suit Manufacturing Industry, Province of Ontario.—An Order in Council, dated February 9, and published in *The Ontario Gazette,* February 11, with correction in the issue of February 18, makes binding the terms of a schedule governing the women's cloak and suit manufacturing industry throughout the province of Ontario, from February 1, 1939, " during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, February, 1938, page 216, and February, 1937, page 219, with these exceptions:

Overtime: no permits may be given to work overtime between Good Friday and July 1, nor between Thanksgiving Day and January 1. During the rest of the year overtime is allowed if the advisory committee issues a permit, but in no case may overtime exceed 2 hours in any one day or 8 hours in any one week from January 1 to Good Friday, nor exceed one hour in any one day or 4 hours in any one week between July 1 and Thanksgiving Day.

The advisory committee is authorized to fix a minimum wage rate lower than those of the schedule for any employee who is handicapped or for any employee who performs work included in more than one classification or whose work is only partly subject to the provisions of the schedule.

Saskatchewan

Manufacturing: Miscellaneous Products

Sign Painters, Moose Jaw.—An Order in Council, approved February 13, and published in *The Saskatchewan Gazette,* February 28, makes binding the terms of a schedule governing the sign painting industry in the city of Moose Jaw, from March 10, 1939, "during pleasure".

The schedule covers all work usually done in sign shops by sign painters.

Minimum wage rates: for (*a*) master sign painters who carry on a business in a one-man establishment and who personally perform work at the trade, and for (*b*) journeymen sign painters over 21 years of age regularly employed by a sign shop employer and doing lettering of any description for a sign shop, 65 cents per hour or 42 per cent of the job prices which form part of the schedule, whichever is greater; for sign painters' helpers over 21 years of age, employed as assistants to journeymen sign painters but who do no lettering, 35 cents per hour.

A scale of minimum job prices is included in the schedule.

Service: Business and Personal

Barbers, Swift Current.—An Order in Council, approved January 31, and published in *The Saskatchewan Gazette,* February 15, makes binding the terms of a schedule governing barbers in the city of Swift Current from February 25, 1939, "during pleasure".

Hours: 52 per week, provided that all employees be allowed 4 hours from these 52 hours each week without any deduction in wages. Wednesday barber shops are closed at noon from January 1 to August 15.

Overtime: for work over 52 hours in a week, 30 cents per hour, or 65 per cent of the amount taken in by the employee during such overtime, whichever is greater.

Minimum wage rates: for full time employment, $15 per week of 52 hours or 65 per cent of amount taken in at shop prices, whichever is greater; for part time or casual employment, $3 per day or part thereof except on Saturday or the day before a holiday, when $5 must be paid.

Apprentices are governed by the Minimum Wage Board.

A scale of minimum prices which must be charged customers for each operation is included in the agreement.

Alberta

Construction

Plasterers, Edmonton.—An Order in Council, dated February 16, and published in *The Alberta Gazette,* February 28, makes binding the terms of a schedule governing plasterers at Edmonton, from March 10, 1939, to March 9, 1940.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of night shift, 8 hours' pay for 7 hours' work.

Overtime: time and one-half from 5 p.m. to 10 p.m.; thereafter, double time. No work on Saturday between noon and 5 p.m., nor on four specified holidays.

Minimum wage rate for plasterers: $1.05 per hour.

Journeymen sent out of the city to have their transportation provided or fare both ways paid by the employer.

PRICES RETAIL AND WHOLESALE IN CANADA, FEBRUARY, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the cost per week, in terms of retail prices, of a list of staple foods, fuel and rent entering into a family budget being slightly lower while the Dominion Bureau of Statistics weekly index number of wholesale prices was practically unchanged.

The cost per week of a list of twenty-nine staple foods entering into a budget for a family of five in terms of average retail prices in sixty-nine cities was $8.16 at the beginning of February as compared with $8.27 at the beginning of January; $8.59 for February, 1938; $8.49 for February, 1937; $6.67 for March, 1933 (the low point in recent years); and $11.83 for February, 1930. The decrease in the cost of the list during the month under review was due mainly to a decline in the cost of eggs which was the only important change. Other changes were declines in the cost of lard, bread, and rolled oats and advances in the cost of meats, butter and potatoes. Including the cost of fuel and rent, with that of foods the total cost of the list was $17.06 at the beginning of February as compared with $17.18 for January; $17.39 for February, 1938; $17.12 for February, 1937; $15.41 for June, 1933 (the low point during recent years); $22.12 for February, 1930; $21.07 for February, 1922; $26.92 for July, 1920 (the post war peak); and $14.54 for February, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of prices in 1926 as 100 changed little week by week during the month and was 73·2 for the weeek ended March 3 as well as for the week ended February 3 as compared with 73·4 for that ended January 6. The latest figures available on a monthly basis are for January when the index number was 73·3 as compared with 83·6 for February, 1938; 82·9 for February, 1937; 72·5 for February, 1936; 63·5 for February, 1933 (the low point during recent years); 93·9 for February, 1930; 98·3 for February, 1922; 164·3 for May, 1920 (the post war peak); and 64·8 for February, 1914. In the classification according to chief component materials five of the eight principal groups recorded fractional declines during February but these were offset by advances in the Vegetable Products Group and in the Animal Products Group due in the main to somewhat higher prices for grains and live stocks.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of February of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evapor-

(*Continued on page 346*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended March 3, 1939; monthly figures not yet available

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 338*)

ated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for

clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

Retail Prices

Meat prices in February continued the upward movement which commenced in January following a period of declining prices extending over several months. Sirloin steak was up from an average price of 25·7 cents per pound in January to 26·5 cents in February, rib roast of beef from 19 cents per pound to 19·8 cents, veal from 16·1 cents per pound to 16·8 cents and mutton roast from 22·8 cents per pound to 23·5 cents. Lard averaged about three-quarters of a cent per pound lower at 13·3 cents. The prices of eggs were generally lower, fresh grades being down from 38·6 cents per dozen to 29·6 cents and cooking grades from 31·7 cents per dozen to 24·7 cents. Milk has been unchanged at an average price of 10·9 cents per quart since last September. Creamery butter advanced from an average price of 26·4 cents per pound in January to 27·1 cents in February. Bread at 6·6 cents per pound in February was fractionally lower than in the previous month as compared with 7·2 cents per pound in February, 1938. Potatoes have advanced gradually in price since the autumn in Ontario and other eastern provinces but have changed little in the western provinces. The Dominion average price was up from $1 for 90 pounds in September, 1938, to $1.32 in February, 1939. Anthracite coal averaging 14·64 per ton in February, 1939. has changed little in price since November, 1938. No changes were recorded in rent.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French Nut": Halifax, $15.50; Charlottetown, $13.50; Moncton, $16; Saint John, $14.50; Quebec, $14; Three Rivers $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $15; Thetford Mines, $17.25; Montreal, $14.75 to $15.50; Ottawa, $16.50; Kingston, $15; Belleville, $16.50; Peterborough, $16.75; Oshawa, $15.50; Toronto, $15; St. Catharines, $15; Hamilton, $15 and $14.50; Brantford, $16.25; Galt, $16 and $16.50; St. Thomas, $16; Cobalt, $19.25; Timmins, $19.50; Port Arthur, $17.75; Fort William, $17.75; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries are included in "Prices in Canada and Other Countries, 1938" which is a supplement to the present issue of the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was

97·2 for January as compared with 98·3 for December. The index of food prices rose from 91·8 to 92·5 or 0·8 per cent during the month but the index of prices of industrial materials and manufactures fell from 101·7 to 99·6 or 2·1 per cent. The general index for January, 1939, was at the lowest point recorded since September, 1936, when it was 96·1; it was 9·7 per cent below the figure for January, 1938.

The *Statist* index number on the base 1867-1877=100, was 88·7 at the end of January as compared to 89·1 at the end of December, a decrease of 0·4 per cent for the month. The price of foodstuffs increased 0·5 per cent during the month while industrial materials decreased 0·9 per cent, the latter decrease being mainly due to a decline of 3·7 per cent in the price of minerals which was only partially offset by an increase of 3·4 per cent in textile prices. As compared to the corresponding figure a year earlier, the general index for January shows a decline of 7·7 per cent.

COST OF LIVING.—The Ministry of Labour's index number, on the base 1914=100, was 155 at the first of February while the index of food prices was 138. These figures were the same as those for the previous month, no changes in prices having been sufficiently large to change the index number.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100, was 676 for January as compared with 666 for December, an increase of 1·5 per cent. The index of food prices increased from 648 to 657, due mainly to an increase of 4·7 per cent in the vegetable food group. The index of prices of industrial materials increased from 682 to 694 or 1·8 per cent during the period, a slight decrease in the mineral and metal groups having been more than offset by increases in the textile and sundries groups. The index based on gold currency, 1914=100, was 55 for January as compared with 54 for December.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·5 for January as compared with 106·3 for December. The index of prices of agricultural products increased from 107·2 to 107·8, while the index of prices of manufactured goods decreased from 125·6 to 125·5 and the index of prices of raw materials and semi-manufactured goods was unchanged at 94·3.

COST OF LIVING.—The official index number on the base 1913-1914=100, was 125·8 for January as compared to 125·3 for December. Food prices increased 0·6 per cent and clothing prices increased 0·2 per cent, while the indexes for rent, heat and light, and sundries were unchanged.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July 1914=100, was 99 for November, 1938, as compared with 100 for the previous month. During the month food prices declined 2·9 per cent while the index of prices of non-foods was unchanged.

COST OF LIVING.—The Official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 104 for December, 1938, as compared with 106 for November. The index of food prices fell from 114 to 112, that for fuel and lighting materials fell from 106 to 103 and that for sundries fell from 96 to 95. The indexes for clothing and rent were unchanged at 85 and 100 respectively.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 77·0 for December, as compared with 77·5 for November, a decrease of 0·6 per cent. Of the ten groups making up the index, six groups showed declines from the previous month, as follows: hides and leather products 1·6 per cent, foods 1·3 per cent, fuel and lighting materials 0·7 per cent, textile products 0·6 per cent, farm products and metal and metal products 0·3 per cent each. The groups showing increases over the previous month were: building materials and housefurnishing goods 0·2 per cent each and chemicals and drugs and sundries 0·1 per cent each. The general index for December, 1938, was 5·8 per cent less than the corresponding figure for the previous year.

COST OF LIVING.—The index number of the Bureau of Labour Statistics, on the base 1913=100, was 144·2 on December 15, 1938, showing no change from the index for September 15, 1938. Slight decreases in the cost of food, clothing, house furnishing goods, and miscellaneous items were counterbalanced by an increase in fuel and light costs, while rents were unchanged. Since December 15, 1937, when the general index was 147·3, it has declined 2·1 per cent.

The index number of the Industrial Conference Board, on the base 1923=100, was 85·4 for January as compared with 85·8 for the previous month. The index of food prices declined 1·4 per cent during the month to 79·2. The indexes of the rent and sundries groups were unchanged while those for clothing and fuel and lighting materials declined very slightly.

FATAL INDUSTRIAL ACCIDENTS IN CANADA IN 1938

Analyzed According to Industries, Localities and Months

AN analysis of fatal industrial accidents in Canada during the calendar year 1938, by industries, causes, provinces, and months, is presented in the accompanying tables. The accidents recorded are those occurring to persons gainfully employed during the course, or arising out of their employment; also included are fatalities from industrial diseases reported chiefly by provincial workmen's compensation boards. Quarterly statements, each giving a table of accidents occurring during the period covered, appeared in the Labour Gazette, for May, August and November, 1938, and February, 1939.

The record is compiled from reports from the following governmental authorities: The Board of Transport Commissioners of Canada; The Explosives Division of the Federal Department of Mines; The Workmen's Compensation Boards of Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia; The Ontario Chief Factory Inspector; The Ontario Railway and Municipal Board; and the British Columbia Department of Mines. In addition, reports were received also from the correspondents of the Labour Gazette resident in the principal industrial centres throughout Canada.

Industrial accidents reported in the press are also included in the record after inquiry has been made to avoid duplication. Most of the accidents in agriculture are recorded from press reports, and while it is not known to what extent the accidents in this industry are covered, it is believed that in this respect the record is fairly complete. To a great extent, however, the information obtained from press reports is used to supplement information received from official sources.

Table I gives an analysis of accidents by industries and causes, Table II by provinces, and Table III by months. The last two tables also include summary figures for 1937, which are a final revision of the figures published in the Labour Gazette, March, 1938, by the inclusion of accidents occurring in 1937 which were reported too late for incorporation into the annual statements. These accidents were included in the supplementary reports in the Labour Gazette, for May, August and November, 1938, and February, 1939. The figures for 1938, being still incomplete, are accordingly to some extent not comparable with the completed figures for 1937.

In some industries, where considerable changes in figures from year to year appear, these may be attributed to changes in industrial conditions or to particular occurrences. For example, in the manufacturing group there was a decrease in the number of fatalities from 157 in 1937 to 125 in 1938, in construction a decrease from 170 to 143, in transportation and public utilities a decrease from 227 to 161, in fishing and trapping a decrease from 52 to 30—apparently due in part to slight reductions in employment in some of these industries, with relative decrease in exposure to risk. The increase from 202 to 236 in the mining group may be explained by the fact that during 1938 there were more major accidents, each resulting in the loss of a greater number of lives in this industry. There were 53 mining fatalities from 8 of the most serious accidents for the year.

The most serious disaster during the year under review occurred in a coal mine at Sydney Mines, Nova Scotia, on December 6, when the steel haulage cable controlling the descent of the riding rake snapped, for some cause not definitely determined by the inquiry, and 21 miners lost their lives and many others were injured in the pile up of a runaway string of 26 cars carrying over 250 miners down to work in the undersea pit.

Another serious accident occurred in an asbestos mine at Thetford Mines, Quebec, on December 7, when 7 miners were killed when buried under a rock slide owing to the collapse of a tunnel wall while clearing away rock loosened by a dynamite blast.

Five miners were killed and ten injured at Levack, Ontario, on February 4. These men were being lowered in a mine following blasting operations, when a skip overturned on striking an obstruction, pinning some of the workers between the skip and shaft timbers. Following the inquest, the jury recommended that skips being lowered in mine shafts after blasting operations should be brought to a full stop 200 feet above the blasting bulkhead, and should proceed thereafter on a slow signal and that men with lights be placed in each corner of descending skips to watch for any obstruction below.

Five men were killed and five others injured in an explosion in a coal mine at Hinton, Alberta, on March 30. Until completion of the necessary repairs to the air shaft and ventilation system to restore the mine to working condition, it was necessary to postpone an inspection to determine the cause of the explosion. On August 8 eleven men were fined on charges of infractions of the Alberta Mines Act which grew out of an investigation

(a) These fatalities include accidents to fishermen and seamen outside Canadian waters and such accidents are assigned to the provinces in which the various ships were registered, and exclude accidents to Canadian fishermen and seamen on boats registered in another country. For quarterly reports of accidents see the Labour Gazette for May, August and November 1938, and February 1939.

(b) Revised figures for 1937.

(a) Decennial census of 1931. (b) Annual census of industry 1936. (c) Annual census of industry 1937. (d) Fishermen only, annual census of industry. (e) Revised figure for 1937.

Five mining engineers were killed on July 28, at Bourlamaque, Quebec, when they were dropped 700 feet down a shaft in a runaway hoist cage. The cable snapped as the hoistman applied the emergency braking devices in an attempt to check the rapid descent and the cage plunged to the bottom of the shaft.

At Kirkland Lake, Ontario, on March 15, four miners lost their lives when a stope burst and caved in on them.

At Michel, British Columbia, on July 5, a lightning bolt travelled 3,900 feet into the workings of a coal mine along the steel rails of an underground railway and ignited a

pocket of gas; three miners lost their lives in the resulting explosion.

Three coal miners were also killed at Coal Creek, British Columbia, on September 20, when they were crushed by an avalanche of coal following a "bump" or upheaval in the mine.

Three miners lost their lives when lightning caused a premature dynamite explosion near Val d'Or, Quebec, on May 30.

On March 2, four ice cutters were killed near Stratford, when a train struck their car in a snow storm.

Four men, engaged in the construction of an oratory at Montreal, were killed on June 3, when a hoist in which they were descending crashed about 150 feet to the ground, because the supports of a cross-beam holding the hoist cables at the top of the dome gave way and the cables slipped off.

When an oil refinery still exploded in Turner Valley, Alberta, on February 26, two company officials and a labourer lost their lives from burns and injuries. The finding of the coroner's jury was that the still was just a welded vessel with insufficient supports and it was recommended that the provincial government inspect all oil refineries when being constructed, and when in operation, and make it obligatory to obtain a licence before refining operations were allowed to be started.

On May 16, an engineer, a fireman and a trainman were killed in a derailment, near Schreiber, Ontario.

Three fishermen were killed in an explosion of the gasoline tank of their vessel, off Gore Bay, Ontario, on April 21.

Fatalities by Causes

The classification of fatal accidents according to causes shows that the largest number, 310, came under the category "by moving trains, vehicles, etc." This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse drawn vehicles, as well as accidents, caused by moving implements (both those impelled by power and those drawn by horses), by moving watercraft and by aircraft. The largest number of accidents in this category 116, appear under the heading "automobiles and other power vehicles and implements," also 55 were caused by persons "being struck or run over by, or crushed by or between cars and engines," 32 of these being engaged in steam railways; 47 were in connection with watercraft (9 of these were in logging, 18 in fishing and trapping, and 7 were in water transportation); 41 were caused by mine and quarry cars; 16 were caused by animal drawn vehicles and implements; 14 were due to derailments and collisions (11 of which were in steam railways); 12 by persons "falling from or in cars or engines"; and 9 by aircraft.

Fatalities numbering 191 were caused by "falling objects," of which 89 were from objects falling in mines and quarries, 45 due to falling trees and limbs, 29 to objects falling from elevations, loads, piles; 10 to breaking or loosening of straps, cables, etc.; 9 to collapse of structure; and 9 to other falling objects.

"Falls of persons" caused 185 fatalities, including 62 falls into pits, shafts, harbours, rivers, etc. (some of which resulted in drowning); 51 falls from elevations, 18 from loads, etc., 18 to collapse of support, 10 from ladders, 8 into holds of vessels, 8 down stairs and inclines, 4 falls on the level, 3 on sharp objects and 3 into tanks, vats, kilns, etc.

Next in order as a cause came "dangerous substances," causing 168 fatalities in number, of which 53 were due to explosive substances, 30 to electric current, 27 to hot and inflammable substances and flames, 24 to gas fumes, poison, etc., 14 to conflagrations, 12 to mine explosions from gas, coal dust, etc., and 8 to steam escapes, boiler explosions, compressed air.

Hoisting apparatus caused 37 fatalities; 34 were in connection with the handling of objects; 34 were caused by animals, 21 of which were due to horses; 33 by striking against or being struck by objects; 20 by working machines, 16 by prime movers and 10 by tools.

The category "other causes" includes 76 fatalities of which 23 were due to industrial disease, strain, etc., 19 to lightning, frost, storms, sunstroke, 18 to cave-ins, landslides, ice jams, etc., 8 to shooting and violence, 2 to infection not elsewhere classified, and 6 concerning which no particulars were available.

Fatalities by Provinces

The classification of accidents according to provinces shows that the largest number, 412 occurred in Ontario. There were 256 in Quebec, 189 in British Columbia, 77 in Nova Scotia, 66 in Alberta, 48 in Manitoba, 42 in Saskatchewan, 16 in New Brunswick, 3 in Prince Edward Island, and 5 in the Yukon and Northwest Territories. In Ontario the largest proportion of fatalities occurred in mining, non-ferrous smelting and quarrying where there were 76, with 66 in construction, 61 in agriculture, 61 in transportation and public utilities, 55 in manufacturing, 37 in logging, 23 in trade, 17 in service, 9 in electric light and power and 7 in fishing and trapping. In Quebec, the largest number, 47, was in construction, with 43 in transportation and public utilities, 39 in mining, non-ferrous

smelting and quarrying, 36 in agriculture, 28 in logging, 18 in service, 13 in trade, 5 in electric light and power, and 1 in fishing and trapping. In British Columbia there were 68 fatalities in logging, 40 in mining, non-ferrous smelting and quarrying, 21 in manufacturing, 13 in trade, 9 in construction and 9 in fishing and trapping. In Nova Scotia and Alberta there were respectively 44 and 24 fatalities in mining, non-ferrous smelting and quarrying, and no other industry experienced many fatalities in these provinces. In Manitoba the largest number, 9, was in transportation and public utilities. In Saskatchewan there were 14 in agriculture and 14 in transportation and public utilities. In New Brunswick the largest number of fatalities, 7, occurred in transportation and public utilities.

Fatalities by Industries

The total number of fatalities recorded for the year was 1,114, being classified under the various groups of industries as follows: mining, non-ferrous smelting and quarrying, 236, or 21·19 per cent of the total; transportation and public utilities, 161 or 14·45 per cent; agriculture, 152 or 13·64 per cent; construction, 143 or 12·84 per cent; logging, 142 or 12·74 per cent; manufacturing, 125 or 11·22 per cent; service, 63 or 5·66 per cent; trade, 43 or 3·84 per cent; fishing and trapping, 30 or 2·69 per cent; electric light and power, 19 or 1·71 per cent.

The table of fatalities by months indicates that the greatest number, 112, occurred in August, while the smallest total, 73, was recorded in February. The table gives the number of persons gainfully employed in most of the industries, the latest census figures available being given in each case. For agriculture, logging, construction, trade, finance, service, etc., the figures were those of the decennial census for 1931, for manufacturing, from the annual census of industry for 1936, for mining, fishing, electric light and power, steam railways, street and electric railways, telegraphs and telephones, and express, from the annual census of industry for 1937.

While the latest figures available as to numbers employed are not in any instance those for the year under review, they are included, however, for general comparative purposes.

Fatal and Non-fatal Accidents in Canada recorded by Provincial Workmen's Compensation Boards

The Labour Department's records of industrial accidents include only fatal accidents and fatalities arising out of employment, that is from industrial diseases, etc. The only information of a comprehensive nature as to non-fatal accidents is from the Workmen's Compensation Boards in the various provinces, except that in manufacturing, mining, and steam and electric railway operation, in which accidents are dealt with by various governmental departments and commissions. These are also covered by the Workmen's Compensation Boards.

The annual reports of the several Workmen's Compensation Boards are reviewed from time to time in the LABOUR GAZETTE, information being given as to accidents, amounts paid in compensation, etc. The annual reports of the Provincial Workmen's Compensation Boards were summarized in the following issues: Manitoba and New Brunswick, April, 1938, pages 407-408; Alberta, May, 1938, pages 527-528; Nova Scotia and British Columbia, July, 1938, pages 745-747; Ontario, Septemper, 1938, pages 993-994.

None of the provinces has jurisdiction over all industries, so that the accidents recorded are those in certain industries only. Most of the Boards deal with accidents in logging, mining, manufacturing, construction, transportation and public utilities, excluding agriculture, trapping, finance, domestic service, etc., but include to some extent fishing, trade and government service.

The accompanying table summarizes the figures as to non-fatal accidents recorded by the several Workmen's Compensation Boards for 1932, 1933, 1934, 1935, 1936, 1937 and also include some preliminary figures for 1938. It may be observed that the Department of Labour's figures show 1,247 fatal industrial accidents as occurring during 1937, while the total number of fatal accidents which were included by the Provincial Workmen's Compensation Boards for that year was 721, exclusive of Prince Edward Island. This difference is largely accounted for by the fact that the Provincial Boards do not record accidents in all industries. In addition, however, the Boards' records only show accidents to employees, while the records of the Department of Labour register accidents to all persons occupied in industry, including employers and workmen carrying on their own business, of whom, there are many, particularly in trucking, trade, etc., as well as in agriculture.

INDUSTRIAL ACCIDENTS, NON-FATAL AND FATAL IN CANADA, 1932, 1933, 1934, 1935, 1936, 1937 AND 1938 REPORTED BY PROVINCIAL WORKMEN'S COMPENSATION BOARDS

(a) Accidents requiring medical treatment but not causing disability for a sufficient period to qualify for this compensation: The period varies in the several provinces; figures not reported by some boards.
(b) Preliminary figures.
(c) Subject to further revision.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Conviction for Violation of Lord's Day Act Affirmed in Quebec

On January 20 Mr. Justice Lazure dismissed without costs an appeal by Sable Limited, a firm of fur dyers, from a conviction for violating the Lord's Day Act by requiring some employees to work on Sunday. The firm had been fined $100 and costs (LABOUR GAZETTE, 1938, p. 597). *R. vs. Sable Ltd.*, Superior Court, Montreal.

Decree under Quebec Collective Agreements Act Held Invalid as Contravening Combines Investigation Act

In the Superior Court of Montreal on February 9 Mr. Justice Gibsone maintained a writ of prohibition ordering the Court and Judges of the Sessions of the Peace of the District of Montreal to discontinue proceedings against Dame Becky Lazarovitch carrying on a shoe-repairing business under the name of La Patrie Shoe Repairing. The petitioner was charged in the Court of Sessions with violating, in October, 1937, the provisions of an order in council issued under the authority of the Collective Labour Agreements Act which made binding on the shoe-repair industry in the District of Montreal certain terms of a collective agreement including the provisions as to wages and hours and the scale of prices to be charged for work done. A further charge was that of violating the regulations of the Joint Committee of Shoe Repairers set up under the Act by displaying signs indicating that shoes would be repaired at prices below the scale fixed by the order in council.

In answer to these charges, the petitioner invoked as defences that the order in council was invalid under the statute and that it was also unconstitutional being in contravention of section 498 of the Criminal Code and of the Dominion Combines Investigation Act. She then obtained a writ prohibiting the Court of Sessions of the Peace from proceeding with the case until these questions were decided. The Attorney-General of Quebec intervened to uphold the validity of the Act.

Before Mr. Justice Gibsone, it was contended, on behalf of the petitioner, that the Act gave no power to fix prices but enabled the Lieutenant-Governor in Council to make obligatory only the provisions of an agreement relating to wages, hours of labour, apprenticeship, the proportion of apprentices to skilled workmen and those respecting the classification of operations and determining the classes of employers and employees. In reply, it was argued that the section giving the Lieutenant-Governor in Council power to make obligatory such provisions as he "may deem in conformity with the spirit of this Act" conferred authority to make binding a scale of minimum prices in order that the employer would be in a position to pay the wages fixed by the order in council. Mr. Justice Gibsone held that the Act deals only with agreements between employers and employees as such and while it does not limit the matters on which the parties may agree, it expressly restricts the matters which may be made the subject of an order in council applying to all the industry. In his opinion, the Act is not concerned with employers in their relation to their customers and the restriction on prices has to do with this relation. He held the clauses relating to prices therefore to be invalid as going beyond the power conferred by the Act.

As regards the constitutional validity of the Act and order in council, it was argued for the petitioner that they have the effect of contravening section 498 of the Criminal Code by unduly limiting the facilities for dealing in such commodities as leather, rubber and other shoe-repairing supplies, all or the greater part of which used in the petitioner's business are imported from outside the province and that their effect is to restrain and injure trade and commerce in relation to these articles. On the ground that the statute and orders in council operate against the interests of the public and unduly lessen competition with respect to the articles mentioned, it was also contended that they contravened the Dominion Combines Investigation Act. Moreover, it was argued, the orders in council delegated legislative power and the provincial Legislature has no authority to confer that power.

On the other hand, the respondents contended that the Act and the order in council dealt with matters of a purely private and local nature and relating to property and civil rights in the province and the statute was not one affecting trade and commerce as those words are used in the British North America Act. They denied that the order restricted trade or competition, that it was detrimental to the public interest or that it was the result of any such agreement as described in section 498 of the Criminal Code relating to combinations. On the contrary, they contended that the order in council was for the benefit of the public and that the fixing of prices for various classes of work was necessary to enable the minimum wage fixed by the order to be paid to the workers;

that the object of the order was not the creation of a combination of producers to dominate the market and prevent free competition but to assure the workers in the shoe-repairing industry a reasonable remuneration. Evidence showed that the scale of prices fixed in the order was "much higher than the prices for those same operations" formerly charged on the Island of Montreal and it was the opinion of the Court that the former prices had been fixed in an open market and through free competition. It was therefore held that the fixing of minimum prices was a violation of the Combines Investigation Act; that the collective agreement was a distinct agreement between associations of employers who were parties to it to fix prices and that the agreement thus operated and was intended to operate against the interests of the public as represented by the customers paying for the repair of shoes. Since the Combines Investigation Act is a federal statute and may not be contravened or nullified by provincial authority, the price-fixing clauses of the order in council were *ultra vires*.

Reference was made to section 15 of the Collective Agreements Act which declares that the gazetting of the order in council making binding a collective agreement shall bar any contestation alleging incapacity of the parties to the agreement, its invalidity, the insufficiency of notice and any other matters and shall create a presumption in law establishing the legality of all proceedings relating to the adoption of the order. On this point the Court held that this section of the Act was not meant to prevent consideration of such a question as that raised by the petitioner, that the order in council in fixing prices is illegal because in contravention of federal legislation.

On the contention of the respondents that recourse to a writ of prohibition was not permissible in the case, since the Court and Judges against whom the writ was sought possessed jurisdiction to decide all matters of fact and law connected with it, Mr. Justice Gibsone held that the Court of Sessions did not have jurisdiction to adjudicate the question of the validity of the statute and orders in council and that the petitioner was entitled to the issue of the writ prohibiting that Court from proceeding with the charges until the question of the validity of the statute had been decided.

As regards the displaying of signs by the petitioner indicating that prices lower than those set out in the decree would be charged for shoe repairs, it was held that under the circumstances this did not constitute an offence.

The Court therefore maintained the petition and the writ of prohibition and dismissed the contestation of the Joint Committee of the shoe industry with costs. The intervention of the Attorney-General was also dismissed with the recommendation that the Crown pay to the petitioner her costs for the intervention. Notice of appeal against this judgment has been given by the Attorney-General of Quebec. *Lazarovitch and the Court of Sessions of the Peace,* and the Joint Committee of Shoe Repairers of the District of Montreal, Superior Court, Montreal, February 9, 1939.

Supreme Court Orders New Trial in Action by Seaman for Injury Suffered through Negligence of Fellow Workman

On December 12, 1938, the Supreme Court of Canada ordered a new trial in an action for damages brought in Quebec by a carpenter who, due to the alleged negligence of the chief officer in not ordering the life lines to be erected earlier, suffered injury while working on board the SS. *Cornwallis* a British ship owned by the appellants and registered in Vancouver. The Quebec Court of King's Bench had agreed with the Chief Justice of the Superior Court of Quebec in holding that where there was a conflict between Quebec laws and those of another system of jurisprudence the law applicable was, according to the Merchant Shipping Act, the law of the place of registry, that is, British Columbia. However, the plaintiff had succeeded because no proof was offered to show that the doctrine of common employment, which would release the appellants from responsibility for injury to the respondent caused by negligence of a fellow servant in the course of his duties, is recognized in British Columbia but not in Quebec. Damages to the amount of $4,000 had been awarded.

Before the Supreme Court of Canada the appellants pleaded this doctrine as a common law defence, arguing that as navigation and shipping are within the exclusive jurisdiction of the Dominion Parliament, where the Dominion has no legislation, common law applies and provincial legislation is irrelevant. But the Court held that, in the absence of Dominion or Imperial legislation or some special rule relating to navigation and shipping and dating from Confederation, British Columbia law respecting responsibility of masters for the acts of their servants applies to shipowners.

The plaintiff had proved that an action lay by the law of Quebec, but it was held that since the defendant relied on the difference between Quebec law and that of the locality where the injury occurred, the onus was on it

to prove the difference, in the absence of which the Court presumed the British Columbia law to be as in Quebec, in which case the plaintiff must succeed.

As regards the question of negligence which was for the jury to decide, although the latter stated definitely that in their opinion the accident was due to the negligence of the defendant, they added that if the chief officer had ordered the life lines erected earlier, "the accident might have been avoided," thus appearing uncertain whether the accident was directly due to the alleged negligence or fault. In view of this obscurity in the jury's verdict a new trial was ordered. *Canadian National Steamships Co. vs. Watson* (1939) 1 Dominion Law Reports 273.

B.C. Employer Released on Defective Recognizance May not be Summoned for Sentence

On February 18, an order was granted by Mr. Justice Robertson of the Supreme Court of British Columbia prohibiting a magistrate from sentencing for breach of a so-called recognizance an employer who, after being convicted on July 4, 1938, on a charge of violating the Semi-monthly Payment of Wages Act, had been released on suspended sentence of one year on entering into a form "recognizance" one of the conditions of which was that he would pay the arrears of wages and pay semi-monthly during the year.

The magistrate has power to suspend sentence only where there is a proper recognizance.

On January 11, 1939, an exactly similar summons was issued, and on it being heard by the same magistrate, he stated that it did not constitute a second charge but related to the previous proceedings. The accused then applied for an order of prohibition. Mr. Justice Robertson held that there had been no proper recognizance: the accused did not appear before the magistrate; neither was there an acknowledgment of an amount owing to the Crown if he failed to carry out the conditions set out in the recognizance or a fixed time within which the accused was to appear and receive judgment. The magistrate therefore had no power to sentence the accused at a later date than the original trial. Moreover, the procedure was wrong since under the Summary Convictions Act, it was necessary to arrest on a warrant any person failing to observe the conditions of his recognizance. *Rex* v. *Eveleigh* (1939) 1 Western Weekly Reports 323.

Manitoba County Court Judge Prohibited From Allowing Amendment to Claim for Wages

On February 7, Chief Justice McPherson of the Manitoba Court of King's Bench granted an order prohibiting a County Court judge from hearing an appeal from a judgment under The Wages Recovery Act, 1936, holding that the latter had acted beyond his jurisdiction in allowing an amendment to the information which in fact constituted a new ground of complaint and action.

The employer had been charged with having neglected and refused to pay $200 wages earned by the plaintiff between January 1 and June 1, 1938. A police magistrate at The Pas who heard the case on June 17, 1938, awarded the plaintiff $141.07 and costs. When the defendant appealed to the County Court the plaintiff was allowed to amend the claim to cover the year 1937 as well as six months of 1938. The defendant thereupon applied to the King's Bench for an order prohibiting the County Court judge from hearing the appeal on the amended complaint and asking that only the claim for six months be considered as heard by the magistrate.

The Act provides that a hiring for more than one year must be in writing and that the maximum wages that may be recovered are $200. Had the claim originally been for a year and a half, it might have been disallowed on the ground that there was no written contract of employment. Also the wage claim as amended apparently exceeded the $200 maximum. The amendment proposed here would constitute new grounds of complaint and it is therefore not within the jurisdiction of a County Court judge to allow it. *Seymour* v. *Morgan* (1939) 1 Western Weekly Reports 317.

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] APRIL, 1939 [NUMBER 4

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was little general change in industrial employment at the beginning of March, according to returns received by the Dominion Bureau of Statistics from 11,309 employers of labour, each with a minimum of fifteen employees, and representative of all industries except agriculture, fishing hunting and highly specialized business. The working forces of these firms aggregated 1,027,846 persons, as compared with 1,027,619 in the preceding month. This increase of 227 persons was not sufficient to alter the index number, which stood at 106·5 at both March 1 and February 1, as compared with 107·8 at the beginning of March, 1938. The base used in calculating these indexes is the 1926 average as 100. During the period, 1929-1937, upon whose experience the factors of seasonal adjustment are based, a very slightly downward trend was indicated in employment at March 1; the small advance at the date under review, which had an imperceptible effect on the crude index, therefore increased fractionally the seasonally-corrected figure, which rose from 110·6 at the beginning of February to 111·0 at March 1. At the same date in recent years of the record, the unadjusted index was as follows:— 1937, 102·8; 1936, 98·9; 1935, 96·4; 1934, 92·7; 1933, 76·9; 1932, 88·7; 1931, 100·2; 1930, 110·2; 1929, 111·4 and 1928, 102·6.

Unemployment in Trade Unions.—At the beginning of March, 1939, reports were furnished to the Department of Labour by 1,967 local trade unions with a membership numbering 252,099 persons, 41,410 or 16·4 per cent of whom were without employment, in contrast with percentages of 15·9 at the beginning of February, 1939, and 13·7 at the beginning of March, 1938.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed a decline in the volume of business transacted during February, 1939, when the average daily placements were compared with those of the preceding month, but a gain over that of February a year ago. The greatest losses under the first comparison were in farming and services, while the highest gain under the second was in construction and maintenance, with an appreciable increase also noted in services. Vacancies in February, 1939, numbered 27,816, applications 59,631 and placements in regular and casual emloyment 26,834.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was little changed in March from the level of the preceding month the figures being $17.07 for March and $17.06 for February. Comparative figures for certain previous dates are $17.48 for March, 1938; $17.13 for March, 1937; $16.63 for March, 1936; $15.41 for June, 1933 (the low point during recent years); and $21.96 for March, 1930. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100, continued to show little change week by week during March and was 73·3 for the week ended March 31 as compared with 73·2 for the weeks ended March 3 and February 3. Some comparative figures on a monthly basis for earlier dates are, 83·1 for March, 1938; 85·5 for March, 1937; 72·4 for March, 1936; 63·5 for February, 1933 (the low point in recent years); and 95·6 for March, 1929.

Business Statistics.—The latest information available reflecting industial conditions in Canada is given in the table on page 364. The index of the physical volume of business in February was 1·2 per cent lower than in the previous month but 4·7 per cent higher than in February, 1938. Of the principal groups used in the construction of the index mineral production and construction showed substantial advance after adjustment for seasonal variation while there was also a slight increase in the output of electric power. The advance in mineral production was due mainly to increases in the exports of copper and asbestos and in the production of coal. The

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended March 31, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending April 1, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending March 25, February 25, January 28, 1939; March 26, February 26, January 29, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

indexes of the volume of manufacturing, imports, exports and car loadings were lower in the month under review than in the previous month. Comparing February, 1939 with February, 1938, mineral production, manufacturing, construction, electric power output and exports recorded advances while imports and car loadings were lower. Information available for March shows the number of cars of revenue freight to be greater than in February but smaller than in March, 1938, while the value of construction contracts awarded was lower in both comparisons.

Strikes and Lockouts.—The number of strikes and lockouts recorded for March was seven, involving 1,628 workers and resulting in time loss of 10,293 man working days, which was the smallest time loss in any March since 1930 with the exception of March, 1938. During February, 1939, there were eight disputes involving 2,643 workers with time loss of 24,791 man working days. A large part of the time loss in both February and March was caused by a strike of 1,000 rubber factory workers at Kitchener, Ont. In March, 1938, there were 14 strikes, involving 2,258 workers with time loss of 9,391 man working days, the most important being strikes of textile factory workers at Cornwall, Ont., and at Woodstock, Ont. Of the seven disputes recorded for March, 1939, all were terminated during the month, one resulting in favour of the workers involved, two in favour of the employers concerned, while a compromise settlement was reached in one case and the result in each of three disputes was recorded as indefinite. No disputes were on record as unterminated at the end of the month. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the past month the Department received reports from two Boards of Conciliation and Investigation which dealt with disputes between the (1) various ocean steamship companies at Saint John, N.B., and their checkers, coopers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, and (2) the Diamond Truck Company and its truck drivers, members of the Automotive Transport Section, Canadian Brotherhood of Railway Employees. The texts of these reports, together with a statement respecting other proceedings under the Industrial Disputes Investigation Act, appear in the article on page 371.

Statistics of material aid recipients for February

Preliminary figures from the National Registration for February released by the Honourable Norman McL. Rogers showed that the grand total of all classes of persons on urban and agricultural aid in February was 1,012,000, an increase of nearly 4 per cent over the January figure as revised to date, but slightly more than 3 per cent less than in February, 1938.

The Dominion total of unemployed but fully employable persons on aid in February this year was 190,000, an increase of 5 per cent from the January total of 181,000. The figure for February this year represented an increase of 8·6 per cent over February a year ago.

A total of 694,000 persons were receiving non-agricultural aid in February this year, 4 per cent more than in the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of about 6 per cent from the figure for February, 1938.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from the year before. 70,000 farmers who, together with their dependents, account for a farm population of 318,000, were reported as receiving agricultural aid for subsistence in February. Of these persons 270,000 were located in the Province of Saskatchewan alone. The Dominion total on agricultural aid, while up by 3·3 per cent in February over the January revised figure was over 18 per cent less than in February, 1938. The February total of farmers and their families on aid in Saskatchewan, while continuing to hold the improvement over a year ago, increased by 2·6 per cent over January, 1939, but was 20 per cent lower than in February a year ago.

Minister of Labour on misrepresentation of relief totals

In the House of Commons on March 15, the Minister of Labour, in introducing a measure to provide for the alleviation of unemployment and agricultural distress, refuted statements in certain periodicals "grossly distorting" certain phases of the relief situation in Canada.

The Minister referred to the fact that with the functioning of national registration it is now possible "to follow the changing trends of the relief situation from month to month and year to year."

In spite of the regular publication of these official figures, declared the Minister, "repeated

references 'to over a million persons on unemployment relief' had been given wide publicity in September last when 553,111 persons across Canada were registered as receiving material aid; and that number included children and aged dependents, unemployable and partially employable persons as well as farmers and their families, whose needs certainly did not arise from any lack of work. Actually at that time the employable persons being assisted numbered 114,460; yet we read of 'hundreds of thousands of Canadian workers on relief'."

The Minister then dealt with misrepresentation in regard to transients. Refuting editorial estimates that transients in Canada numbered anywhere from 100,000 to 185,000, the Minister referred to a survey conducted by the Department of Labour in January as a result of which information obtained from reliable sources—the provincial governments and the two railway companies—indicated that, outside of those being cared for by the joint federal and provincial plan, transients numbered less than ten thousand.

The Minister also took exception to another figure—"grossly distorted, that has been given wide currency"—which placed the number of idle young people at a total of over 400,000. While not questioning that there is a serious youth problem in this country, the Minister did question "the technique of research which was adopted by those who made this astonishing computation of over 400,000 idle young people in Canada." Pointing out that this total was based, not even on a sample census survey, but was obtained by a series of arbitrary deductions from the total number of Canadians between the ages of fifteen and thirty as given in the census of 1931, the Minister emphasized that such a total included those within the 15-30 years bracket who are living on farms in this country and were therefore not in the unemployed category.

Criminal Code Amendment Protecting Workers in Right to Organize

The House of Commons on April 11 gave unanimous approval to the Bill (No. 5) sponsored by Mr. J. S. Woodsworth (Winnipeg North Centre) to amend the Criminal Code so that employers may be penalized for interference with the right of employees to organize. Earlier in the day, the Rt. Hon. Ernest Lapointe, Minister of Justice, in introducing Bill No. 90 to amend the Criminal Code, stated that this measure contained a new section which would meet the objective of Mr. Woodsworth's amendment concerning intimidation and efforts to prevent working people from joining labour unions.

In an explanatory note to Mr. Woodsworth's Bill the object is stated as follows:

> The purpose of this Bill is to prevent employers from refusing to employ, or from dismissing employees, or conspiring with others therefor, for the reason that they are members of a trade union.
>
> As it is lawful for workmen or employees to form themselves into trade unions and to bargain collectively, it should, as a matter of public policy, be unlawful for employers to seek by overt acts or intimidation, threats or conspiracy to prevent them from belonging to such trade unions.

The amendment to the Criminal Code as introduced by the Minister of Justice is to be inserted after Section 502, and is as follows:

> 502A. Any employer or his agent, whether a person, company or corporation, who wrongfully and without lawful authority
>
> (*a*) refuses to employ or dismisses from his employment any person for the sole reason that such person is a member of a lawful trade union or of a lawful association or combination of workmen or employees formed for the purpose of advancing in a lawful manner their interests and organized for their protection in the regulation of wages and conditions of work;
>
> (*b*) seeks by intimidation, threat, or loss of position or employment, or by actual loss of position or employment, or by threatening or imposing any pecuniary penalty, to compel workmen or employees to abstain from belonging to such a trade union or to such an association or combination to which they have a lawful right to belong; or
>
> (*c*) conspires, combines, agrees or arranges with any other employer or his agent to do any of the things mentioned in the preceding paragraphs;
>
> is guilty of an offence punishable on indictment or on summary conviction before two justices, and liable on conviction, if an individual, to a fine not exceeding one hundred dollars or to three months' imprisonment, with or without hard labour, and, if a company or corporation, to a fine not exceeding one thousand dollars.

Cost of living survey in Canada

The Dominion Bureau of Statistics has issued some preliminary figures on the results of the survey of nutrition and family expenditure in cities in Canada begun in October, 1938. (Labour Gazette, September, 1938, p. 967). Information as to quantities and cost of the various items entering into family expenditure of wage earners was secured from families in Charlottetown, Saint John, Halifax, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. Family earnings ranged from $450 to $2,500 per year. A further survey as to food expenditure was made in February and another is expected to be made in May. Figures as to families with incomes over $2,500 are also being secured. The compilations have been made from data for 1,135 wage earning families of British origin, 211 of French origin and

93 of other racial origin. Each family included has from one to five children.

The average family incomes by cities ranged from $1,329 to $1,732. On food, fuel and light, shelter and clothing the percentage of total expenditure was from 59·2 to 65·4. The average family expenditures on food ranged from 25·3 per cent of total income to 31·8 per cent in the various cities, the percentages spent for food being highest in the larger cities. On shelter (rent, upkeep of house, etc.) the average expenditures ranged from 15·1 per cent to 20·8 per cent. On fuel and light the percentages were from 4·5 to 7·7 per cent; on clothing from 9·6 per cent to 12·4; house furnishings, etc., averaged 7 per cent; health 4 per cent; personal care 2 per cent; motor car 4 per cent; other transportation 2 per cent; education and vocation one per cent; community welfare and gifts 3 per cent; recreation from 4·3 to 7 per cent; savings, life insurance, etc., approximately 9 per cent. The proportion of families, covered in the survey, owning motor cars varied according to regions. In the Maritime Provinces about one-third of the families were car owners, in Quebec about one-eighth, in Ontario nearly one-half and in western cities about one-third.

The Dominion Bureau of Statistics has issued a two page bulletin on Family Living Expenditures in each of the cities mentioned above; price ten cents each.

Relief land settlement in Canada

During the course of the discussion in the House of Commons relative to the motion of Hon. Norman McL. Rogers, Minister of Labour, in regard to unemployment relief measures, the Leader of the Opposition, Hon. R. J. Manion, inquired as to the number of people re-established on the land. The Minister of Labour, as recorded in Hansard of March 15, indicated the situation to be as follows:

". . . Relief settlement agreements continue in force in the provinces of Quebec, Manitoba and Alberta.

"In Quebec there are at the present time settled on the land 3,123 families with 15,578 dependents, a total of 18,701 individuals. During the present fiscal year 1,452 families have been settled with 6,777 dependents, or a total of 8,229 individuals.

"In Manitoba there are at the present time settled on the land 1,057 families with 4,354 dependents, or a total of 5,411 individuals. During the present fiscal year 275 families have been settled with 1,206 dependents, or a total of 1,481 individuals.

"In Alberta there are at the present time settled on the land 568 families with 2,170 dependents, or a total of 2,738 individuals. During the present fiscal year 136 families have been settled with 520 dependents, or a total of 656 individuals.

"The number of abandonments during the current year is very small. Of those noted above as being settled during the fiscal year the following abandonments have been noted: Quebec, nil; Manitoba, thirteen; Alberta, six."

Comprehensive analysis of Canada's unemployment problem

Canada's Unemployment Problem is the title of the study published recently in book form under the auspices of the Institute of Public Affairs at Dalhousie University. As explained by the editor, L. Richter, in his introduction, the work is a co-operative enterprise and in planning it, an attempt has been made "to pool the resources of those persons throughout the Dominion who, as practical administrators, scientists or teachers, have acquired special experience in the handling or studying of unemployment and unemployment relief."

Each of the contributors was allotted a phase of the problem to which he or she had previously given special attention, the objective being to have a complicated subject presented with expert knowledge. As stated in the "jacket," the book aims to take the question out of the political sphere, and to examine the real issues without bias or prejudice. In a comprehensive volume of more than four hundred pages the nature and extent of unemployment are explained as well as the causes which have influenced it. The study gives the facts and figures essential to an understanding of the problem, and it analyses these facts. It acquaints the reader with the measures already taken to relieve distress and with the results obtained by these efforts. The present system of direct relief is described and a critical appraisal given of its methods and results. The plight of unemployed Canadian youth is shown, and the need for increased training facilities and vocational guidance stressed.

Other phases discussed are the transient problem and the possibilities and limitations of public works and land settlement.

The needs of the drought areas in the West are presented with special reference to the farm rehabilitation program. Foreign experience in dealing with unemployment is discussed as far as it has been applied or is applicable to Canada. Finally, some principles concerning an unemployment policy for the future are outlined.

Emphasizing the non-political aspect of the presentation, Mr. Richter's introductory observation declares: "It does not intend to show what ought to have been done nor does it pretend to devise new policies, though some of the chapters do contain suggestions that have grown out of the personal experience of the writers. For the same reason, no critical appraisal has been given of the propositions contained in the final report of the National Employment Commission (Purvis Commission), but its more important recommendations are discussed in various chapters."

Noting that among the contributors to this study are high ranking civil servants of the Dominion and provinces, Mr. Richter states: "Discussion of administrative problems by civil servants has not been a common practice in this country though it is in keeping with the tradition of many European countries. Naturally civil servants are under some restraint when reviewing governmental measures, but their silence on questions of policy is more than compensated by their revealing knowledge of those practical matters of administration that outside observers, however keen, find very difficult to acquire unless by contact with Government officials."

Acknowledgment is made of the special services rendered to the study by two officials of the Dominion Department of Labour—Miss Margaret Mackintosh, of the Research Branch, and Mr. Harry Hereford, Unemployment Relief Commissioner.

There is a foreword to the book by Hon. Norman McL. Rogers, Minister of Labour, and the chapter headings and contributors are as follows:

I. Nature and Extent of Unemployment in Canada. S. A. Saunders.
II. Unemployment Aid (Direct Relief). Dorothy King.
III. Unemployed Youth. H. A. Weir.
IV. Relief and Other Social Services for Transients. H. M. Cassidy.
V. Prairie Relief and Rehabilitation. W. L. Jacobson.
VI. Relief Land Settlement. W. M. Jones.
VII. Public Works as a Relief Measure. A. MacNamara.
VIII. The Canadian Unemployment Problem in the Light of Foreign Experience. L. Richter.
IX. What of the Future? Charlotte Whitton.

This book is published by Macmillan and Company, Toronto.

Proneness of young workers to accidents

Young people in industry, because of their youth, are more likely to have accidents than older people engaged in the same work, a report issued this week by the Industrial Accident Prevention Associations reveals.

Accident proneness, the report says, is essentially a personal quality differing with each worker. In many cases the nature of dangerous work cannot be altered but working conditions can be made safer; proper lightning, efficient safeguards for machines, reasonable working hours with rest periods, all tend to lower accident rates.

Two important factors in accident liability, according to the survey, are age and experience. Youthfulness is a greater cause of accidents than inexperience, although the two are nearly always linked together. Young people will continue to have accidents no matter what precautions are taken while adults engaged in the same work will have fewer accidents.

It is industry's responsibility, the study points out, to guard the younger generation. It is useless to say the youngsters are careless, inattentive or disobedient. Industry must not condemn young workers for their youth, but must protect them from any special dangers involved in their work.

A study of occupations for young people reveals that they should never be employed in certain types of work because of their normal and natural tendency frequently to be inattentive. Operations of punch presses is not recommended for young people, but should be always assigned to more serious and attentive adult workers who can concentrate on the job in hand and reduce the possibility of an accident through momentary inattention.

Accidents can be prevented among young people, the survey concludes, through proper and sympathetic training period before they begin productive work. Systematic, careful and kindly supervision is essential during the first few months to show young people how machines can be operated without involving themselves and other workers in either minor or major accidents.

New minimum wage legislation in Alberta

Legislation to extend the provisions of the Male Minimum Wage Act to all kinds of employees except farm labourers and domestic servants was introduced in the Alberta Legislature on March 23. This section of the amending Bill (No. 74) is as follows:—

"This act shall apply to all persons in the province who are employees, except persons who are farm labourers or domestic servants,

who are employed in any capacity under any agreement, whether oral or in writing or whether express or implied by which the relationship of master and servant is created between such person and the person by whom he is employed."

The Bill includes a new definition of overtime as follows:—

"Overtime" means any time worked by an employee:—

(1) During any one day in excess of 10 hours or during any time which is not included in the hours of work prescribed pursuant to the hours of work act as the normal hours of work in a day for any such employee; and

(2) During any one week in excess of 54 hours or during any time which is not included in the hours of work prescribed pursuant to the hours of work act as the normal hours of work in a day for any such employee.

This new measure, known as the Male Minimum Wage Act Amendment Act, also provides for fixing of a minimum wage for overtime, also for prescribing of wage periods, wage pay days and modes of payment generally or with respect to any designated class of employee or any designated employer.

Employment of women in Manitoba

A comprehensive report entitled *Employment of Women in Manitoba* has been published recently as Project No. 18 under the Economic Survey Board of Manitoba, this survey being the work of Mrs. Asta Oddson. In allotting credit for assistance in the preparation of the report, the author states that "responsibility for views expressed is that of the writer alone."

By way of introduction the following general observations are made in the approach to the subject:

No analysis of employment or unemployment is complete until proper consideration is given to the question of gainfully employed women. Throughout industry women have played an important part. The circumstances and conditions surrounding their employment have always been a matter of public, and in more recent years, government concern. While the greatest number of women find full time occupations in the home, there has been a considerable percentage of women who for many years have sought and made a place for themselves in occupations outside of the home. This is true in Canada and in Manitoba where approximately 20 per cent of the female population of employable ages is engaged in industrial or other occupations.

The range of gainful employment for women in Canada is fairly wide. Women to-day are found in the professions, in executive positions, in office work, industrial occupations and in domestic service. Although women enter a wide range of gainful occupations, the relative numbers in many are small. The majority of gainfully employed women are, in the main, concentrated in a relatively small number of occupations.

There are many problems associated with the employment of women, especially in industry. Generally speaking, women work for fairly low remuneration, and often for long hours per day. This being so, there is always the possibility, and in many cases the actuality, of exploitation of female labour. Another factor which affects employment among women is the fact that the female working population at any time is not clearly defined, and under certain conditions and for various reasons the number of women available for employment may increase or decrease sharply. In other words there is not the same rigidity in respect to the supply of female labour that there is in respect to the supply of male labour. For instance, in times of depression more women become available for employment than during periods when economic conditions are better. During the past seven or eight years many women have sought occupations, having in mind primarily not their own maintenance, but rather the express purpose of adding to depleted family incomes. In such cases they sometimes work for less than appropriate returns for their services. It is therefore not at all unusual that the pressure of women upon the labour market becomes more severe when there is widespread unemployment among the male population; this results from the effort on their part to compensate for the loss in income of the male wage-earner.

For these reasons, among others, the question of employment and unemployment as it exists to-day among women is surrounded by special circumstances and conditions and merits separate treatment. It is, therefore, the purpose of this analysis to consider the general question of the position of women in industry, the part they are playing in the economic life of the community, and to indicate some of the problems associated with their employment in Manitoba.

Indicative of the method of analysis adopted are the following chapter headings:—

1. History of women workers in England and the growth of regulations governing their employment.
2. Survey of protective legislation.
3. Brief resumé of certain developments in regulations affecting women workers in Canada.
4. Occupational trends of women workers.
5. Relation of employment of women to that of men: General level of men's and women's wages in chief occupation groups.
6. Responsibility of employed women for the support of others.
7. Education and vocational training of women related to their opportunities for employment.
8. Unemployment.

Unemployment insurance in relation to holidays, etc., in Great Britain

The *Ministry of Labour Gazette* (Great Britain) for March contains a summary of the amendments to the Unemployment Insurance Act as indicated in the Unemployment Insurance Bill before Parliament. The purpose of the Bill is to give legislative effect to the recommendations of the Unemployment Insurance Statutory Committee in its report of October,

1938, on holidays and suspensions in relation to unemployment insurance.

Clause 1 of the Bill provides that a person on holiday is not to be deemed to be unemployed and is not entitled to receive unemployment benefit for the holiday; it enables regulations to be made for the purpose of deciding, in this connection, when a person is on holiday and whether unemployment insurance and health and old age pensions insurance contributions are payable in respect of payments received by an employed person on holiday; and it makes consequential alterations with regard to the payment of benefit pending a final decision on the claim. These provisions are to come into operation on October 5, 1939.

Clause 2 provides that the receipt of payments from an employer after suspension or termination of employment shall not be a bar to the receipt of unemployment benefit, provided that the payments are made in accordance with prescribed conditions.

Clause 3 extends to twenty weeks the period of ten weeks which, under the existing law, is the maximum interval that may separate two periods of unemployment to permit of their treatment as one continuous period of unemployment. The clause also makes alteration with regard to the computation of continuous periods of unemployment consequential upon Clause 1.

Clause 4 extends the classes of dependents in respect of which an increase of benefit may be paid.

Clause 8 extends the Minister's powers to provide training courses to persons between 16 and 18 years of age, subject to certain conditions, and to members of the armed forces; the clause also extends the Minister's power to make payments to persons attending training and certain other courses.

Clause 15 abolished, after a period of grace, the existing provisions under which farmers and their workers who enter into long hirings can obtain a rebate of unemployment insurance contributions.

Social Measures Before State Legislatures in United States

Labor Standards, the official publication of the Division of Labor Standards, United States Department of Labor has compiled a summary of social measures now before various State legislatures of that country. This summary is as follows:

Forty-four State legislatures meet in regular session in 1939—43 of them convened in January. A substantial volume of bills relating to wages and hours is indicated—24 States having already introduced such bill patterned after the Federal act. Separate hours legislation has been proposed in 27 States, and five States will pass on minimum-wage bills. In 4 States bills regulating hours and wages in domestic service are pending.

In five States—Connecticut, Massachusetts, New York, South Dakota, and Texas—bills to ratify the Child Labor Amendment have been submitted.

Legislation pertaining to industrial relations appears on the calendar in 33 States. In 16 States there are bills to create labor relations boards patterned after the Federal act. In 7 States legislative proposals providing for mediation or arbitration of labor disputes have been introduced. One of the labor-relation bills in California provides for mediation and conciliation machinery similar to that created in Wisconsin in 1937. Twelve States have bills to limit the jurisdiction of courts in matters pertaining to injunctions in labor disputes. Bills prohibiting or limiting picketing or restricting union activities have been introduced in 16 States.

Amendments to the workmen's compensaton laws have been introduced in a great many States. Among the more striking proposals are bills to make the laws compulsory and to create State funds. Extension of workmen's compensation coverage to domestic workers is sought in New York and California. Several bills to provide workmen's compensation in Arkansas have been introduced. In 14 States bills relating to occupational diseases are pending.

Twenty-one States are considering either new legislation or amendments strengthening their wage payments and wage collection laws.

In six States bills further regulating employment agencies have been introduced.

In Vermont a bill creating an independent labor department has passed the lower house. Bills reorganizing and strengthening State labor departments are pending in 16 States.

Industrial home-work legislation has been introduced in five States.

Twelve States are considering bills to create permanent apprenticeship councils in the labor departments.

During the month of March there were 4,540 accidents reported to the Workmen's Compensation Board of Ontario, as compared with 4,333 during February, and 5,075 during March a year ago.

The benefits awarded amounted to $523,-873.64, of which $426,182.64 was for compensation and $97,691.00 for medical aid.

This brings the number of accidents reported during the first quarter of 1939 to 13,389, as against 15,408 for the same period of 1938, and the benefits awarded during the first three months this year amounted to $1,491,025.38, as compared with $1,622,720.11 during the corresponding period of 1938.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

AN application for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act was received in the Department of Labour during March from employees of the Sydney Steel Division of the Dominion Steel and Coal Corporation, Ltd., Sydney, N.S., to deal with a dispute respecting wages. One hundred and twenty-five employees, members of Lodge No. 1064, Amalgamated Association of Iron, Steel and Tin Workers of North America, are stated to be directly affected by the dispute, and 3,400 employees indirectly affected. Inasmuch as the steel industry does not come within the direct scope of the Industrial Disputes Investigation Act, a Board could be established in this case only with the joint consent of the disputing parties under section 64 of the Act. However, concurrence in Board procedure has been declined by the company.

Through the efforts of the conciliation service of the Department of Labour settlements were effected recently in the case of two disputes which had been made the subject of applications for Boards of Conciliation and Investigation and accordingly in each case Board procedure will now be unnecessary. The parties involved in these disputes were: (1) The Consumers Gas Company of Toronto and 910 employees being members of the National Union of Dominion and Industrial Gas Workers (Labour Gazette, October, 1938, page 1079), and (2) The Canadian National Railways and 210 sleeping car conductors and porters in Ontario and Quebec, members of the Canadian Brotherhood of Railway Employees (Labour Gazette, February, 1939, page 126).

Report of Board in Dispute between Various Ocean Steamship Companies at Saint John, N.B., and their Checkers, Coopers, Etc.

The personnel of the Board of Conciliation and Investigation established recently to deal with a dispute between various ocean steamship companies at the port of Saint John, N.B., and their checkers, coopers, etc., a majority of whom are members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Labour Gazette, March, 1939, page 244), was completed on March 22 by the appointment of Mr. Harold B. Gault, of Saint John, N.B., as third member and chairman. Mr. Gault was appointed by the Minister of Labour in the absence of a joint recommendation from the other board members, Messrs. C. Allan Beatteay, of Saint John, and Tom Moore, of Ottawa, nominees of the company and employees, respectively.

On April 5 the board submitted a unanimous report containing recommendations as to settlement of the various matters in dispute. The text of the report follows.

Report of Board

Saint John, N.B.,
April 3, 1939.

The Honourable Norman McL. Rogers,
Minister of Labour,
Ottawa, Ont.

Sir,—This Board of Conciliation and Investigation set up by you to inquire into the dispute between the ocean steamship companies at the Port of Saint John, N.B., and their checkers, coopers, etc., find after hearing the evidence of both sides, also a delegation from the International Longshoremen's Association, Checkers' Union, No. 1571, that a majority of the employees affected is at the present time members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees at Saint John.

The Board held sittings in the County Court House at Saint John on March 29, 30, 31, for the purpose of receiving evidence from all interested parties, at which time all were given full opportunity to state their views.

While this dispute is not one within the scope of the New Brunswick Labour and Industrial Relations Act of 1938, the board, nevertheless, took cognizance of the principles enunciated therein respecting employer and employees relations, viz:

> The right of the employers and employees to organize in associations, trade unions or other groups for any lawful purpose is hereby recognized.
>
> It shall be lawful for employees to bargain collectively with their employer and to conduct such bargaining through their representatives duly elected by a majority vote of the employees affected or through the duly chosen officers of the organization to which the majority of such employees belong.

After reviewing the evidence submitted, it is the recommendation of this board that the steamship companies should negotiate an agreement with a committee of the employees representing the majority of the workers which would not debar employment to those not members of the union of which the majority may be members.

As Saint John is an all year port the agreement should be for a yearly period.

After giving consideration to the wages and working conditions now prevailing at the Port of Saint John as set forth in the employers memorandum dated December 1, 1938, and the proposed agreement submitted by a majority of the employees party to the application, we recommend that the agreement cover the following: Hours of work, wages, overtime rates, holidays, means of dealing with grievances and preference of work.

Holidays and Overtime Rates

We find both parties agree in respect to holidays on which double time should be paid. These to be New Year's Day, Good Friday, Victoria Day, King's Birthday, Dominion Day, Labour Day and Christmas Day. When any of the above holidays fall on Sunday and the following Monday is declared a legal holiday by the Government, any work done on Monday to be paid for at holiday rates. All work done on Sunday to be paid for at double time.

Saturday half-holidays to prevail from the first of June to the 30th of September, but men shall work such half-holidays if required and double time rates to prevail from one p.m. on Saturday until midnight Sunday.

Grievances

We also find agreement between both parties as to the procedure which should prevail in the event of grievances, viz.—That an aggrieved employee should continue to work and submit his case through the medium of the employees' committee to the employer concerned, and in case of failure to reach a settlement to the steamship committee at Saint John, N.B.

Hours of Work

In considering the hours of work done by the checkers and coopers at Saint John, we find that the ten-hour day which they are required to work to be longer than that worked by any other class on the water front, railway checkers and truckers working a nine-hour day, and longshoremen working an eight-hour day. In our judgment the checkers' and coopers' work-day should be shortened to nine hours as a step toward the establishment of greater uniformity of hours worked by all classes on the water front.

As a long-established practice has been for work at this port to be paid for in periods, we recommend that the division of the nine-hour day into suitable periods, the matter of meal hours, and the payment of overtime beyond the regular constituted working day be directly settled by the employers and the employees, as we feel that they are better acquainted with the technicalities of the operations at the port than the members of the board.

Wages

Wages paid for the nine-hour day should in all cases be equal to those now paid for the prevailing ten-hour day.

With reference to checkers employed temporarily as head checkers and checkers employed on stowage, it is noticed that the practice of paying additional wages is general but not observed by all companies. We concur in the employees contention that such work involves greater responsibilities and therefore recommend that an addional rate of not less than five cents per hour be paid to those called upon to perform the duties above referred to.

Preference of Employment

Without restricting the right of the employer to engage those who in his opinion, are the most suitable for the work to be performed, we recommend in so doing preference should be given to those who have the longest service with each company at this port, providing that efficiency, merit and other relevant factors are equal.

The Board wishes to express its thanks to the representatives of both parties to this dispute, namely, Mr. A. L. W. MacCallum, for the employers, and Mr. F. H. Hall, for the employees, also Mr. John S. MacKinnon, representing the I.L.A. Checkers Union 1571, all of whom expressed their views concisely and courteously and in a manner which assisted the Board very materially in reaching an understanding upon the matters in dispute.

Respectfully submitted,

(Sgd.) HAROLD B. GAULT,
Chairman.

(Sgd.) C. A. BEATTEAY,
Representing Employers.

(Sgd.) TOM MOORE,
Representing Employees

Report of Board in Dispute between Diamond Truck Company and its Truck Drivers

The Board of Conciliation and Investigation established to deal with a dispute between the Diamond Truck Company, Ltd., Montreal, P.Q., and 40 employees being truck drivers, warehousemen, etc., members of the Automotive Transport Section, Canadian Brotherhood of Railway Employees, reported to the Minister of Labour early in April. The dispute related to the employees' request for an agreement embodying increased wages and improved working conditions. The report of the board was signed by the chairman, Mr. Charlemagne Rodier, K.C., and the board member nominated by the employees, Mr. Clinton H. Dowd, and recommended adoption of the agreement proposed by the employees. The company's nominee on the board, Mr. N. Charbonneau, submitted a minority report. The texts of the two reports follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Diamond Truck Company Limited, employers, on the one hand, and the truck drivers, warehousemen, etc., members of the Automotive Transport Section of the Canadian Brotherhood of Railway Employees, on the other hand.

To the Honourable the Minister of Labour,
Department of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation and Investigation authorized by you on the 9th day of July, 1938, to inquire into the dispute between the Diamond Truck Company Limited and its truck drivers, warehousemen, checkers, loaders, mechanics, and mechanics' helpers, convened on August 30, 1938, at the office of the Chairman of the Board.

At a subsequent meeting held on the 31st of August, 1938, and also on September 8, 1938, at the office of the Chairman, Mr. Poitras was present on behalf of the Diamond Truck Company Limited and the men were represented by Mr. A. R. Mosher of the Canadian Brotherhood of Railway Employees.

The basis of the dispute is the demand of the employees for the signature by the Company to an agreement respecting wages, hours and working conditions as shown in the schedule attached to the application.

Bearing in mind the fact that the duty of the Board was to conciliate the dispute if at all possible, the various sections of the proposed agreement were discussed informally with the representatives of both the Company and the men and it seemed to the members of the Board that the main objection of the Company to the agreement was the adoption of the schedule of wages and hours proposed. However, after some discussion it was decided to arrange a further meeting between Mr. Mosher on behalf of the men and Mr. Poitras on behalf of the Company. This further meeting was held but as no agreement was reached, the Board determined to proceed with the investigation of the dispute.

At the first public meeting of the Board held at the Court House in Montreal, a petition was presented by Mr. Paul Langlois on behalf of the Company requesting the recusation of Mr. Charlemagne Rodier, K.C., the Chairman. The Board unanimously dismissed the petition.

In the ensuing examination of some fourteen employees of the Company, it was shown that the wages varied from $12 to $20 per week, the majority being paid $14 per week. One employee was in charge of special work of piano moving and his pay is $24 per week, but his case is quite exceptional.

It appeared to the Board that the men were engaged in arduous work requiring long hours in many cases, with small remuneration.

One witness claimed that he had worked one hundred hours in one week and his wages were $14 per week. Another witness swore that he had worked as high as thirty hours at one stretch. His wages also were $14 per week. Another chauffeur, receiving 25 cents per hour stated that his wages were so small that he had to attend a free clinic close to his home for medical attention, and that he could not carry on at all except that he was in receipt of assistance from relatives who lived with him.

While several of these men are paid by the hour, their wages appear to be very constant whether they worked more or less than the number of hours required to make up the weekly pay. One of the witnesses told of being allowed eight hours for a trip although it actually took ten hours.

Evidence submitted to the Board as to wages and hours of employees of two other trucking concerns showed a startling disparity when compared with the wages of Diamond Truck employees. One of these concerns pays from $24 to $32.50 per week for out-of-town truck drivers, while the other firm had signed the proposed agreement and the lowest paid man is in receipt of forty cents per hour. This latter company pays its truck operators on a basis of $4.50 per trip which actually takes eight hours but they are allowed ten hours.

With six trips per week, the weekly wage is, therefore, $27. There was no evidence to show that these men employed by these other firms competing with the Diamond Truck Company were working any harder or in fact as hard as those employed by the Diamond Truck Company. It was, therefore, contended on behalf of the employees that they should receive similar wages for doing similar work in competition with these other firms.

The objections of the Company to the proposed agreement appeared to be two in number. The first was that, inasmuch as the Company was paying the minimum wages set out in Ordinance number four set by the Fair Wage Board of the Province of Quebec, the employees were, therefore, not legally entitled to, nor could demand, more. Secondly the Company's financial position showed that the Company could not afford to pay higher wages. The reply of the men to the first contention of the Company was that the Ordinance sets only the minimum wage but it is not in any sense to be taken as the maximum rate. That furthermore, it is little short of disgraceful to employ men at a wage of $12 to $14 a week for sixty or more hours. Witnesses on behalf of the Company filed a copy of the Fair Wage Act and also a copy of the Ordinance number four covering salaries.

In this connection reference was made by the representative of the employees to the report of the Royal Commission on Transportation for the Province of Ontario, under the Chairmanship of the Honourable Mr. Justice E. R. E. Chevrier, which states regarding a minimum permissible wage in trucking operations: "Having regard to all the circumstances, the Commission would recommend that for drivers residing in average Ontario urban centres the minimum wage be an hourly rate such as to yield not less than $24 to highway drivers for a week of sixty hours, and not less than $20 to pick-up and delivery drivers. . . . Wages for helpers, warehousemen and mechanics should be proportionate to those mentioned for drivers."

Furthermore, the said Chevrier Commission with reference to the maximum permissible hours of work recommended that the "basic day for drivers be considered ten hours with an allowable twelve hours on any one day, providing the total of sixty hours per week is not exceeded."

The Board is of the opinion that these conclusions of the Chevrier Commission have substantial merit, as the conclusions of its report are based on a most exhaustive study of the whole transport business. It is, therefore, illuminating to note that the wages as suggested in the Chevrier Commission are practically those which are asked for under the proposed agreement. It was submitted on behalf of the employees that this report was simply further evidence of the justice and equity of their demands.

It was further shown to the Board that in the course of the examination that a large number of the employees of the Company carry on their work in the Province of Ontario where they are in competition with employees of other companies which are paying the same rates as are requested in the proposed agreement. It was contended that unless the employees of the Company working in Ontario were paid the same rate as other employees doing the same type of work that the Company was in a position to compete unfairly with the Ontario firms.

The Board is of the opinion that wages of $12 and $14 per week for an employee doing the work of a truck driver with the consequent long hours and heavy labour are much too low. It may be argued on behalf of the Company that the Minimum Wage Act does not force it to pay more but this viewpoint takes into consideration only the legal responsibility with no regard for any humanitarian considerations as to the well-being of the employees, and a decent standard of living. It is no answer to say that the rates charged for the services rendered are too low to warrant payment of higher wages. After all, the employees have nothing to do with the rates set. The inescapable fact is that the Company must pay for its gasoline, oil and trucks the prevailing market price and only in the matter of the wages paid its employees can it reduce its overhead to make more profit.

The Company furnished to the Board a financial statement and the lengthy examination of this statement together with discussion which took place with regard to the items making up this report convinced the Board that the Company's financial structure would not be endangered if the men were paid the wages requested in the agreement.

The financial statement also showed that a large amount is put aside for depreciation which, when taken into consideration with the items for repairs and maintenance, is surprisingly large when compared with the item of wages. In any event, the Board is satisfied that the proportion of the wages to the other expenses shows too great a discrepancy to warrant any opinion other than that the wages paid are too low.

The Board, therefore, in accordance with the merits and substantial justice of the case, recommends that the collective agreement

regarding wages and working conditions as submitted by the employees be accepted.

All of which is respectfully submitted.

(Sgd.) Charlemagne Rodier
Chairman

(Sgd.) Clinton H. Dowd

Dated at the City of Montreal,
Province of Quebec.
This 31st day of March, 1939.

The undersigned Chairman wishes to express his gratitude to his associates, Clinton H. Dowd, Esquire, B.A., LL.B., B.C.L., and Neopold Charbonneau, Esquire, B.A., B.C.L., both eminent members of the Bar, for their whole-hearted co-operation, their knowledge and their fairness.

The Diamond Truck Company supplied the Board with all the required information, papers, documents, reports and figures through its president, Mr. S. Poitras, and its secretary-treasurer, Paul Langlois, Esquire, B.A., LL.L., a member of the Montreal Bar.

The representatives of the employees, Mr. A. R. Mosher, president of the Canadian Brotherhood of Railway Employees, Mr. M. M. Maclean, secretary-treasurer of the same Brotherhood, and Mr. J. Wall, special delegate, greatly impressed the Board with their ability and understanding of the situation.

Strenuous efforts were made by the Board to effect a compromise of the dispute, and for some time we had every hope of success. We feel that, with the facts brought out in the enclosed report, the intervention of the Honourable Minister of Labour may bring about an amicable settlement of the matter.

(Sgd.) Charlemagne Rodier.

Text of Minority Report

This Board of Conciliation, formed as a result of an Application in virtue of the Industrial Disputes Investigation Act, R.S.C., 1927, Ch. 112, was asked to enquire into the matter of the dispute between the Diamond Truck Company Limited and its employees.

The whole matter was fully set forth in the copy of Application, but previous to and during the whole course of the hearing the matter has apparently been confined to two points: the length of the working hours and the salary paid, and in this respect the latter question appeared to be the most debated and important one.

As regards the rest of the demands, it seemed to be more or less assumed by everyone that all the conditions could readily be agreed upon if an understanding could be arrived at on the question of salary.

[*At this point in his report Mr. Charbonneau summarizes the discussion at private meetings of the board, as well as the evidence given at the board's public hearings.*]

The applicants claim that the company should be required to sign the proposed agreement, and claim that, according to the proof made, the salaries paid are inadequate.

I am more or less told that the complaint about bad working conditions has been abandoned. As a matter of fact, it has not been proven that any such conditions existed, and it has, on the contrary, been shown that the employees were properly and decently treated.

Some of the employees, Mr. Poitras stated, were at times accommodated when in need of money, and nothing was ever taken off the salary of employees working by the week for absence due to sickness.

There only remains, therefore, the question of salary.

Apparently, the company has been paying the chauffeurs on a weekly basis, because the chauffeurs themselves preferred this. Some surprise has been expressed at the statement that some chauffeurs received only $14 per week on the highway, but it is to be noted that they were allowed living expenses besides. In the case of chauffeurs working on the Toronto-Gananoque route, the additional amount for expenses was $7.50 per week, and besides they were getting free rooms. I believe that this expense money should be taken into account in the salary, because these people have to live at any event wherever they are.

These, apparently, were the lowest rates, as some chauffeurs received as much as $24 per week, and even $40 at times (Abraham Lelievre), others $25 (H. Clarke, Toronto).

It is very hard to compare these salaries with others paid in similar lines. Hardly any proof has been made in this connection and I believe that the making of such proof would call for exorbitant expense.

The applicants have called the Norman Transport, who are paying higher wages, but Mr. Emblem was careful to explain that he could not compare his line of business with that of the company.

They also had the Martin's Transport, operating in the Province of Ontario, but the proof by this Company was not very conclusive, as this firm was unable to meet its obligations.

It seems quite evident that some of the employees working for the company now were before or after they left the employ of the company in receipt of much lower wages. For instance: Antonia Cantera, previously earning, with his expenses, $21.50 per week, is now employed by the City of Verdun and earns $12.80 per week. Another witness, Jogues,

was previously employed in the taxi business and apparently earning very much less.

Nevertheless, without expressing any opinion on the subject, because I do not believe it is necessary or even advisable, it would seem from my general knowledge of working conditions in other lines that the salaries paid to these responsible operators (as a highway truck driver certainly needs proper qualifications) do not compare favourably with salaries fixed by certain Ordinances in other lines, as, for instance, the building trades, where an ordinary labourer has a right to 35 cents per hour. It is true that in that line the working hours are very unsteady and that for this reason a higher rate might have been fixed.

I believe that it would be unfair and unjust, and unadvisable to oblige this Company amongst others to pay wages which the others are not paying. It would mean the ruin of this firm, which would be unable to meet the rates of competitors who are paying less. The matter should be dealt with for all transport Companies and uniform minimum rates enforced.

This has been done in part in this Province and will be completed more extensively within a properly short period, and it is also about to be dealt with in the Province of Ontario.

In the Province of Quebec, the Fair Wage Board, by its Ordinance No. 4, has already fixed for truck drivers as a fair wage a rate of 25 cents per hour, and it is proved that the Company has been paying at least that amount.

Moreover, a special report has been made to the Government, and this report will probably result in a special decree with respect to all truck drivers in this Province.

There is no doubt that the Fair Wage Boards have made a much more extensive enquiry than the one presently made. They have properly studied the question from all angles and are certainly in a better position to establish a fair rate of salary. At any event, the salary fixed will be for every one and will not put a certain employer at an unfair disadvantage with respect to others; if, as a consequence of a higher salary, they cannot meet their obligations, they will have to increase their transportation rates.

On the other hand, if special rates were inflicted upon one company only, it would mean bankruptcy for that company.

I understand that if the employees were complaining of adverse working conditions with this very firm, it would be proper for such Board to recommend an arrangement, if possible, of any such abuses, but we are dealing now with salary conditions which are similar, apparently, all over the Province.

Without admitting all this, it appears that the applicants would have been more or less satisfied to comply with the rates that will probably be shortly put into effect, but they have contended that this would only apply to the Province of Quebec, and that they should be allowed to have their contract accepted in the Province of Ontario.

First, I do not think that it would be fair and just to discriminate between the Ontario and Quebec employees and that the latter, who unquestionably form the largest number, would have reason to object to such treatment, and this might result in most serious difficulties.

Moreover, we are faced with practically the same situation for Ontario. There has been an extensive study of all matters relative to transportation by a Royal Commission, under the chairmanship of Mr. Justice E. R. E. Chevrier. I have taken cognizance of the summary of this report, which deals with all matters relative to transportation, but also deals with the question of wages. It is most probable that this will result in the establishing of certain rates of wages just as in the Province of Quebec, and the result will be a fixed rate for every one, with no unfair advantages.

With respect to garage employees, a decree has been, in fact, passed in the Province of Quebec, under the Collective Labour Agreements Act. It is the Order-in-Council No. 764 amended by Nos. 1014, 1980 and 2069. This determines the rates and all other working conditions. It is the expression of the agreement of all employers and employees and definitely settles the question with respect to garage employees.

For the above reasons, I am of opinion that the Diamond Truck Company should not be requested to sign the proposed Agreement.

(Sgd.) N. Charbonneau,
Commissioner.

Montreal, March 20, 1939

The Pennsylvania State Department of Labour and Industry has issued Bulletin No. 45 in its research studies of the problems of women and minors in industry. The Bulletin is entitled "Earnings of Women Workers in Pennsylvania Manufacturing With Special Reference to the Clothing Industry." As defined in the introductory paragraph, the purpose of the study is "to indicate the status of women workers in terms of actual earnings, and also in terms of the relationship of those earnings to an adequate living cost."

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM JANUARY 1, 1939, TO MARCH 31, 1939

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period January 1, 1939, to March 31, 1939. (An article covering the period October 1, 1938, to December 31, 1938, appeared in the Labour Gazette, January, 1939, page 30.)

Gas Workers, Toronto, Ont.—Early in October an application was received in the Department of Labour from certain employees of the Consumers' Gas Company, of Toronto, being members of the National Union of Domestic and Industrial Gas Workers, for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, to deal with a dispute arising out of the employees' request for a signed agreement providing increased wages and improved working conditions. The application stated that 910 employees were directly affected.

The employing company challenged the application on the ground that it did not meet the requirements of the Industrial Disputes Investigation Act. Considerable correspondence followed, and, finally, as the result of a conference early in February between conciliation officers of the Department of Labour and officials of the company and representatives of the employees the basic principles of an agreement were mutually accepted, certain minor details remaining to be worked out between the parties directly concerned.

Coal Miners, Blairmore and Bellevue, Alta.—Following a unanimous report received in the Department of Labour on December 13, 1938, from the Board of Conciliation and Investigation which dealt with a dispute relating to wages and working conditions of the coal miners in the employ of nine coal producing companies in Southern Alberta and Southeastern British Columbia, members of the Western Canada Bituminous Coal Operators' Association, a strike occurred on January 16, 1939, of miners employed by two of these companies, namely, the West Canadian Collieries, operating mines at Blairmore and Bellevue, Alta., and the Mohawk Bituminous Mines, Limited, operating at Bellevue, Alta. Approximately 730 coal miners, members of Division 18, U.M.W.A., were involved.

The contract miners at these properties desired to be paid on a tonnage basis instead of on a yardage basis as had formerly been the custom. Although the mine operators were agreeable to this change, a difference of opinion developed between the respective parties as to what rate on a tonnage basis would equate the existing yardage basis of payment. The miners were unwilling to continue work and permit the dispute to be adjusted through conciliation or by arbitration.

A conciliation officer of the Department of Labour arrived in Calgary on January 17 and was in conference daily with the representatives of the miners and operators over a lengthy period for the purpose of finding a basis of settlement. On February 10 an agreement was finally consummated which was ratified by the miners on February 14, and the strike accordingly terminated.

Telegraph Messengers, Toronto, Ont.—A statement with respect to a dispute between the Canadian National Telegraphs and its messengers in the City of Toronto, members of Division No. 264, Canadian Brotherhood of Railway Employees, appeared at page 32 of the January, 1939, issue of the Labour Gazette.

Following further conferences between the parties, in which officers of the conciliation service of the Department of Labour participated, a settlement of this dispute was made early in the month of January and the application for a Board of Conciliation and Investigation was accordingly withdrawn.

Unlicensed Personnel, Canadian Pacific Railway Company, British Columbia Coastal Steamship Service.—A statement appeared in the January, 1939, issue of the Labour Gazette at page 32 concerning a dispute between the management of the Canadian Pacific Railway Company and certain of its employees comprising unlicensed personnel in the British Columbia Coastal Steamship Service.

Negotiations between the parties concerned were still continuing at the end of March. It appeared, however, that an agreement would be consummated within a very short period.

Sleeping and Dining Car Services, Canadian National Railways (Ontario and Quebec).—On January 26, 1939, an application was received in the Department of Labour from sleeping car conductors and porters in the employ of the Canadian National Railways' Sleeping and Dining Car Services, being members of the Canadian Brotherhood of Railway Employees, for the establishment by the Minister of Labour of a Board of Conciliation and Investigation to deal with a dispute concerning an increase in hours of service on certain runs. The application stated that there were 210 employees directly, and 400 indirectly, affected by the dispute.

Officers of the conciliation service of the Department conferred with representatives of the respective parties, and at a joint conference on February 15 the way was paved for a direct settlement which was consummated directly thereafter. Consequently there was no necessity for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.

Truckers and Helpers, Winnipeg, Man.—An application for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department of Labour on February 23, 1939, from the National Cartage and Storage, Limited, of Winnipeg, to deal with a dispute involving a change in hours and a reduction in wages of truck drivers.

The application stated that from 28 to 40 truckers, depending on the seasonal volume of business, were directly affected. The employees are members of the Canadian Brotherhood of Railway Employees.

Departmental conciliation officers visited Winnipeg early in March and conferred with representatives of the respective parties. They were successful in finding a basis of settlement which was mutually acceptable, thus rendering Board procedure unnecessary.

Steam and Operating Engineers, Toronto, Ont.—Four steam and operating engineers employed in the plant of Silverwood Dairies, Limited, Toronto, ceased work on March 2, due to the refusal of the management to concede to their request for a signed agreement and union recognition.

At the request of representatives of the International Union of Operating Engineers for the assistance of this Department in effecting an adjustment of this dispute, an officer of the conciliation service discussed this matter on March 27 with the manager of the Toronto plant. The manager stated that the company had no objection to its employees being members of a union, but objected to signing a union agreement. The manager further advised that the positions held by the strikers were kept open for several days to give them an opportunity during that period of returning to work, and upon their failing to do so the positions, through necessity, had been filled by others who at the time were holding steady positions with other firms. In view of these circumstances the manager was emphatic in his stand that nothing could be done at this time towards the reinstatement of the former employees.

Statistics of Electric Railways in Canada, 1937

The Dominion Bureau of Statistics has recently issued its annual report on Statistics of Electric Railways of Canada,* covering the year ending December 31, 1937. This report includes figures as to motor buses and trucks operated by electric railway companies.

The mileage of track was reduced from 1,800 in 1936 to 1,771 in 1937 but the number of buses was increased from 605 to 653.

The number of passengers carried rose from 614,890,897 in 1936 to 631,894,662 in 1937, a considerable increase over the figure for 1933 which was 585,385,094. Gross earnings from operations were $42,991,444 and operating expenses were $29,545,641 leaving net operating revenues of $13,445,803. Total dividends were $2,693,287, while interest on funded debt totalled $7,602,512. The number of employees was 14,347 with total compensation of $19,778,118. There were 6,824 motormen, conductors and conductor-motormen, their total earnings being $9,209,471. There were 680 motor bus, coach and truck drivers whose earnings were $1,264,550.

Accidents to employees were two fatal and 249 non-fatal; to passengers none fatal, 1,566 non-fatal; to other persons 43 fatal and 679 non-fatal.

Figures are given for each electric railway as to capital, receipts and expenditures, trackage, equipment, traffic, employees, accidents, etc.

*Price 25 cents.

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1939

THE following table shows the number of disputes, workers involved and time loss for March, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Mar. 1939.....	7	1,628	10,293
*Feb. 1939.....	8	2,643	24,791
Mar. 1938.....	14	2,258	9,391

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of disputes was slightly lower in March than in February, the number of workers involved and the time loss were considerably less as a strike of 1,000 rubber factory workers at Kitchener, Ont., which commenced on February 8 and was not terminated until March 10, was the only dispute involving a large number of workers for a considerable time. In February strikes of coal miners at Blairmore, Alta., and Cumberland, B.C., also caused considerable time loss. In March, 1938, more than one-half the time loss resulted from two disputes involving textile factory workers at Cornwall, Ont., and Woodstock, Ont.

Three disputes, involving 1,204 workers, were carried over from February and four disputes commenced during March. All seven disputes were terminated during the month, two resulting in favour of the employers concerned, one in favour of the workers involved, a compromise settlement being reached in one case and the results of three disputes being recorded as indefinite. At the end of the month, therefore, there were no active strikes or lockouts on record.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; lime plant workers, Blubber Bay, B.C., June 2, 1938, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer, the last two being added to the list this month.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A minor dispute involved fifteen ice cutters and haulers near Three Rivers, P.Q., in a stoppage about March 1. It was reported that as a result of storms it became necessary to go farther for the ice but the employer refused to pay more for hauling than the piece rate agreed upon for the shorter distance. As the operations were almost completed for the season the employer finished the work alone.

A minor dispute involved thirty employees of a cotton textile factory in Montreal, P.Q., who ceased work for one hour on March 24 in protest against a reduction in piece rates of wages. It was alleged that the reduction was in violation of an order of the provincial Fair Wage Board. Work was resumed in about an hour as a result of conciliation by an officer of the provincial Fair Wage Board, the wages to remain unchanged from the rates in effect prior to the dispute.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to March

Rubber Factory Workers, Kitchener, Ont. —A settlement of this dispute, noted in the March issue of the Labour Gazette, was reached on March 10, the union employees having voted to accept proposals which had been agreed upon at joint meetings of the management, the union representatives and conciliation officials of the Ontario Department of Labour. The agreements signed by the representatives of the United Rubber Workers of America and of the employers are summarized elsewhere in this issue. They provide

75831—2½

for collective bargaining and the establishment of grievance committees, regulation of hours, pay for overtime, seniority rules, and for arbitration of the dispute as to the workers' demand for an increase in wages of five cents per hour. Work was resumed in one factory on March 13 and in the other on March 14.

Steel Mill Workers (Bar Mill), Sydney, N.S.—As noted in the Labour Gazette for March, work was resumed as a result of conciliation by the Deputy Minister of Labour for Nova Scotia. The demand of the workers for an allowance per ton in addition to the hourly wages was rejected by the management of the company and the employees returned to work on March 7 and later applied to the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.

Lime Plant Workers, Blubber Bay, B.C.—Following the rejection of the proposals of a conciliation committee in February by the strikers, it was reported in March that 30

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to March, 1939				
Manufacturing—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	2	1,000	8,000	Commenced Feb. 8, 1939; for union agreement, increased wages, etc.; terminated March 10, 1939; conciliation (provincial); union agreement signed, wage increase to be arbitrated; indefinite.
Metal Products—				
Steel mill workers (bar mill), Sydney, N.S.	1	100	500	Commenced Feb. 23, 1939; for tonnage bonus for certain workers; terminated March 6, 1939; conciliation (provincial); indefinite.
Non-Metallic Minerals, etc.—				
Lime plant workers, Blubber Bay, B.C.	1	104	800	Commenced June 2, 1938; *re* application of conciliation board (provincial) award as to reinstatement of certain workers and as to union recognition; lapsed by March 31, 1939; in favour of employer.
(b) Strikes and Lockouts commencing during March, 1939				
Mining, Etc.—				
Coal miners, Minto, N.B.	1	300	300	Commenced March 4, against discharge of workers; terminated March 4; conciliation (provincial); indefinite.
Manufacturing—				
Textiles, Clothing, etc.—				
Clothing factory workers (dressmakers), Montreal, P.Q.	1	42	189	Commenced March 6; against alleged reduction in piece rates, dismissal of union workers and against working overtime; terminated March 10; negotiations; piece rates to be settled by joint committee; compromise.
Hat factory workers, Montreal, P.Q.	1	78	468	Commenced March 10; for union agreement with increased wages and 44-hour week; terminated March 16; conciliation (provincial); in favour of workers.
Trade—				
Stationary engineers (dairy), Toronto, Ont.	1	4	36	Commenced March 2; for union agreement and increased wages; employment conditions no longer affected by March 11; replacement; in favour of employer.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

out of 104 on strike had secured work with other employers, leaving 74 still involved. As the strikers have to a considerable extent been replaced from time to time since the strike began on June 2, 1938, the dispute is recorded as having lapsed by the end of March and is included in the list above of disputes not called off by the union concerned although employment conditions are no longer affected.

Disputes Commencing During March

Coal Miners, Minto, N.B.—Miners in one colliery ceased work on March 4 in protest against the discharge of two miners for an alleged breach of mine regulations in neglecting to notify the foreman of their departure from the mine before the end of the shift on the previous day when mining operations ceased due to a power breakdown. Following conciliation by a provincial government official work was resumed on March 6, the next working day, pending investigation of the cases of the discharged employees by a committee composed of a representative of the miners, the mine manager and a provincial official.

Clothing Factory Workers (Dressmakers), Montreal, P.Q.—Dresscutters and dressmakers, members of the International Ladies' Garment Workers' Union, in one establishment ceased work on March 4 against new piece rates of wages, alleged to involve reductions, against discharge of union employees and against working overtime. The employer stated that the piece rates were reduced following a change in production involving simpler operations and that earnings were increased since the change and that overtime was worked at the employees' request. Work was resumed on March 10 following negotiations. It was agreed that the union agreement would be observed by both parties, piece rates to be fixed by a joint committee, and that all workers would be reinstated.

Hat Factory Workers, Montreal, P.Q.—Employees in one establishment ceased work on March 10, when their demands for a union agreement providing for increased wages and a forty-four hour week were refused. As a result of conciliation by an official of the provincial Department of Labour a settlement was reached on March 16. It was reported that a preliminary agreement between the company and the United Hatters, Cap & Millinery Workers' International Union was signed establishing the forty-four hour week and providing that the wage scale and other working conditions would be settled by a joint committee representing both parties to the dispute with a provincial conciliation officer as chairman.

Stationary Engineers (Dairy), Toronto, Ont.—A number of employees of a dairy company ceased work on March 2 when their demand for increased wages and an agreement with the International Union of Operating Engineers was refused. Reinstatement of an engineer recently dismissed was also requested by the union. Toward the end of the month the union requested the representative of the federal Department of Labour in Toronto to bring about a settlement of the dispute. The manager of the dairy stated that the strikers had been replaced a few days after the commencement of the strike and could not be reinstated. Employment conditions being no longer affected the dispute is recorded as having lapsed during March and is included in the list above of disputes not called off by the union concerned although working conditions are no longer affected.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month bringing down to date that given in the March, 1939, issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is obtained for the most part from newspaper reports which at times are uncertain and incomplete.

Great Britain

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes which began during February was 68 and 9 were still in progress from the previous month, making a total of 77 during the month, involving 28,400 work-

ers with a resultant time loss of 116,000 man working days.

Of the 68 disputes which began during February, six arose out of demands for increases in wages, six out of proposed wage decreases and 13 were over other wage questions; 23 were over questions respecting the employment of particular classes or persons, 10 over questions of working conditions and 10 arose over questions of trade union principle.

Final settlements reached during February numbered 56. Of these, 14 were settled in favour of the workers, 27 were settled in favour of the employers and 15 resulted in compromises. In the case of five other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during February was that of employees in an aeroplane and motor engine factory at Coventry, which began on January 31. (Labour Gazette, March, 1939, page 285). The strike was in protest against the employment of juveniles on work claimed by adults. Work was resumed on February 2 on conditions existing prior to the stoppage. Revised figures show that there were 3,780 workers directly involved and 199 indirectly affected.

On February 21 at Sunderland in Durham, 2,149 colliery workers ceased work, objecting to stonemen assisting cuttermen when cuttermen's assistants were absent; 308 workers were indirectly affected. Work was resumed the next day when it was agreed to appoint certain stonemen to form a class of stonemen-cuttermen.

On February 20, 2,000 workers at a colliery at Worsley, Lancashire, ceased work as a result of grievances in regard to working conditions. Two days later they resumed work after some of their grievances had been adjusted and negotiations in regard to the others were to be continued.

The introduction of a new system of payment at a colliery near Dover led to a strike of 908 workers and indirectly affected 703 others. After one day the workers accepted the new system.

Employment of two non-unionists, alleged to be unskilled, as fitters, led to a strike of 800 workers in an aircraft factory at Yorkshire, on February 15. Work was resumed on February 22, pending negotiations.

The strike of officers, crews and shore staffs of fishing trawlers at various ports on the Firth of Forth (Labour Gazette, March, 1939, page 285) which had been in progress since January 4 was settled at the end of February, when a new bonus system was conceded.

At Chorley, Lancashire, the dismissal of certain shop stewards led to a strike of electricians in construction work on February 10. By February 13, the strikers numbered 500. Work was resumed on February 23, on the advice of union officials, following assurance that the position of the stewards would be discussed.

Belgium

The monthly labour review of Belgium reports seven strikes as having begun during January. All but one, which was settled in favour of the workers after half a day, were unterminated at the end of the month. The number of workers involved in these strikes was 295 and the resultant time loss was 2,733 man working days. One strike was against a reduction in wages, while the remainder arose out of demands for increases in wage rates.

New Zealand

The Dominion of New Zealand has recently published statistics of industrial disputes during 1938. During the year there were 72 disputes which affected 103 firms. The number of workers involved in these disputes was 11,388 and the resultant time loss was 35,456 man working days. The estimated loss in wages was approximately £42,104.

Twenty strikes in coal mining involved 4,367 workers or 38·3 per cent of the total number involved in all strikes; in the meat freezing industry there were 11 strikes which involved 2,980 workers, 25·3 per cent of the total; shipping and cargo working accounted for 17 strikes which involved 1,643 workers, 14·4 per cent of the total; and 11 strikes in the chemical, clay working, glass and allied industries involved 1,189 workers or 10·4 per cent of the total.

In 1937 there were 52 disputes which involved 11,411 workers with a resultant time loss of 29,916 man working days.

United States

Preliminary estimates of strikes in January, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 170 strikes as beginning during the month, which with 100 unterminated at the end of December, made a total of 270 in progress during the month. The number of workers involved in these disputes was 75,000 with a resultant time loss of 640,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 249 strikes in progress, involving about 51,000 workers with a resultant time loss of 475,000 man working days.

The contract between the United Mine Workers of America and the operators of bituminous coal mines in the Appalachian coal fields expired on March 31. Negotiations were carried on during March in which the workers demanded increases of 50 cents per day in wages, a 30 hour week, a guarantee of

200 working days per year, and two weeks vacation with pay. The operators offered a contract similar to that in effect prior to March 31, 1937, which would have involved a reduction of 50 cents per day in wages and continuance of the 35 hour week. About the middle of the month the union offered to contiue work under the terms of the expiring agreement until such time as the new agreement should be signed but the operators refused this offer. Negotiations continued throughout the month but no agreement was reached. On April 3, the first working day of the month, miners estimated to number 340,000 ceased work. On April 5 it was reported in the press that the workers' representatives had offered to renew the old agreement for two years with the elimination of the penalty clause against certain strikes. No settlement has been noted.

In Alabama about 20,000 members of the United Mine Workers of America also ceased work when their agreement expired at the end of March.

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

Summary of Recent Decisions

REPORTS have been received of five cases settled recently by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the Labour Gazette, December 1938, page 1346, and in previous issues.

The issue of August 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board, was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "clerks and other classes of employees herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award. The ruling of the arbitrator becomes the decision of the Board.

Case No. 201.—Operating Department, Atlantic Region.—This case concerned the claim of a freight clerk at the Moncton freight office regarding a difference in rate of pay. The clerk in question was required to assist at billing for a number of hours each day without any change in his rate of pay. The employees contended that the clerk should have been paid at the biller's rate of $126 per month, such rate to be retroactive to the date that clerk's grievance was submitted in writing to the superintendent. The railways did not consider that "work of two or three hours per day assisting what might be regarded as the assistant biller, and so classified on the payroll, should be paid at a higher rate than the employees' regular rate," and therefore requested that the claim be declined. Both parties appeared before the Board and gave oral evidence of their respective contentions. The Board denied the claim of the employees.

Case No. 202.—Operating Department, Atlantic Region.—In this case, which closely paralleled the preceding case, the Board denied the claim of the employees.

Case No. 203.—Operating Department, Atlantic Region.—This dispute arose as a result of the removal of a shed foreman at Moncton, N.B. from his position on account of allegedly unsatisfactory performance.

The employees contended that the shed foreman was improperly displaced due to the fact that such disciplinary action was taken against him without first being accorded a proper investigation under the provisions of the schedule, and therefore the employees maintained that the claimant should be restored to his former position of shed foreman. The employees further contended that, as there was no reduction in staff at Moncton and as the shed foreman was not displaced by a senior employee, he did not have any right under the schedule to exercise his seniority to the position of baggagemaster at Amherst, N.S.

The railways contended that owing to the high cost of handling freight at Moncton,

it had been intimated to the shed foreman on a number of occasions that unless an improvement took place a change would be necessary. After an investigation it was reported that "the men are as good as anywhere on the system but that lack of leadership in the person of the foreman resulted in Moncton costs being too high." The railways also maintained that the principle of a demoted employee displacing a junior employee in his group in the same way as if he was laid off, had always been recognized.

Both parties to the dispute appeared before the Board and gave oral evidence. The Board decided that in view of the extenuating circumstances of the case, the claimant "should be returned to his former position of baggagemaster at Moncton; that the present occupant of the baggagemaster's position at Moncton be transferred back to his former position in the freight office at Moncton, and that employees who were displaced at Amherst as a result of the claimant being permitted to exercise seniority at that position shall be returned to their respective positions which they held prior to the claimant going to Amherst."

Case No. 204.—Operating Department, Central Region.—In this case, the freight office employees at Bonaventure Station, Montreal, claimed payment of the schedule rate ($131 per month) for an employee assigned to the position of special collector effective December 16, 1938. The position was bulletined on November 17, 1938, at a rate of $116 per month. The employees contended that the management had violated the schedule "by arbitrarily reducing the rate of this position from $131 to $116 per month, and that the occupant of this position should be paid the scheduled rate of $131 per month, retroactive to December 16, 1938."

In their contention, the railways referred to a change which had been made in the method of collecting freight revenues at Montreal, resulting in the majority of accounts being forwarded by mail. For this work, one collector rated at $131 per month and four collectors at $120 per month were assigned to handle the collection work in the freight office. The subsequent reclassification and rerating of these five positions resulted in the submission of the case to the Board of Adjustment No. 2, the case being heard on February 23, 1931. The Board denied the claim of the employees on that occasion and recommended that an offer made by the company should be accepted. The offer was not accepted by the representatives of the employees. The railways therefore considered that as the recommendation of the Board on that occasion had been carried out, there was no justification for the claim for the rate of $131 per month on the position in question.

Both parties appeared before the Board and gave oral evidence in support of their contentions, and the Board expressed the opinion that "no conclusive evidence was submitted that an agreement had been made between the company and the employees' representative that when the two collectors' positions rated in the schedule at $131 became vacant, the rate thereafter would be $116 per month." The Board also stated that it was not within its purview to change schedule rates of pay.

The Board's decision sustained the claim of the employees.

Case No. 205.—Operating Department, Atlantic Region.—When the position of staff and record clerk in the superintendent's office, Halifax, was bulletined, the second assistant export clerk, port agent's office, with seniority dating from August 4, 1914, became an applicant for the position. On the expiration of the bulletin, the position was awarded to a lady-member of the assistant superintendent's staff at Bridgewater, Nova Scotia.

The employees contended that the successful candidate for the position was not an employee within the meaning of the schedule, and she therefore held no seniority under the schedule and was not entitled to the position. It was pointed out by the employees that the bulletin calling for applications stated that the successful applicant would have to be proficient in shorthand and typewriting. The employees protested the action of the superintendent in demanding this qualification for a number of reasons.

The railways contended that the assistant export clerk's application for a transfer from the port agent's office to the superintendent's office did not constitute an application for the position of staff and record clerk when it was bulletined, and that the claimant did not make application for the position in the prescribed manner. The railways pointed out that the successful applicant had previously exercised seniority from the position at Bridgewater to other schedule positions and that her name appeared on the 1938 seniority list. On account of reductions in staff, it was stated that the position of staff and record clerk was not a full time one, and it was desirable that the person holding this position should have a knowledge of stenography in order to perform other duties in the superintendent's office. The railways maintained that the requirement of stenography was not an unreasonable qualification to include in the bulletin.

Representatives of the parties to the dispute appeared before the Board and submitted oral evidence in support of their contentions. The Board's decision sustained the claim of the employees.

ANALYSIS OF MATERIAL AID STATISTICS FOR 1938

REVISED figures now available from the National Registration of persons on Aid to which the Government of the Dominion contributes show that in the final month of last year the aggregate number of persons receiving either Urban or Agricultural Aid was 896,477, compared with 956,924 in December, 1937, and 1,115,309 in December, 1936. In this comparison the decreases to December, 1938, from the two preceding Decembers were 6·3 from 1937 and 19·6 from 1936.

Numbers on Urban Aid (including fully employable, partially employable, unemployable and non-worker type dependents) stood at 604,666 in December, 1938, which was an increase of 4·2 per cent from the figure of 580,341 in December, 1937, but was lower by 24·9 per cent than the 805,357 in December, 1936.

Persons on Agricultural Aid (farmers and their families) numbered 291,811 in December, 1938, a substantial decrease from the 376,583 in December, 1937, and a reduction, though of smaller proportions, from 309,952 in December, 1936. Thus numbers on Agricultural Aid in December, 1938, were less by 22·5 per cent than in December, 1937, and by 5·9 per cent than in December, 1936.

Fully employable (but unemployed) persons among those on Urban Aid numbered 162,331 in December, 1938, an increase of 5·5 per cent compared with the 153,918 in December, 1937, but a decrease of 31·7 per cent from the December, 1936, total, which was 237,694.

Explanatory Notes re Tabular Statistics

The tables which follow provide a resumé of numbers of persons on Material Aid throughout Canada in the year 1938, as derived from the National Registration, with some comparisons with figures pertaining to the year 1937. Material Aid refers only to direct relief, so that in the sense here used the term does not include persons being provided with work on relief projects paid for at wages, even though such work was undertaken to alleviate unemployment. Material Aid is divided into Urban Aid and Agricultural Aid. Agricultural Aid refers to assistance given to resident farm operators and their dependents for human subsistence, where such farmers would normally derive their livelihood from the land which they occupy. Urban Aid refers to all persons other than farm operators and their dependents, and thus includes the unemployed and unemployable persons. "Head of Family" is used to designate a person who is socially responsible for the support of one or more dependents. An "Individual Person" is one who is neither a dependent of a head of family nor has any one dependent upon himself. The term "wife" refers to the member of a family unit who performs the housekeeping duties and "wives" are a sub-classification of dependents. "Dependents" are all who look to the head of a family for their support and, thus, "dependents" include some adult employable persons still living under the parental roof.

Subsequent to April 1, 1937, the Province of New Brunswick had substituted a works program for Material Aid, and consequently that province does not contribute to the Registration totals on Material Aid as shown in these tables, for the months after the date mentioned. Moreover, in the case of all provinces the present figures include only persons receiving Aid to which the Government of the Dominion contributed financially.

The tables in Group A—*Numbers of Persons on Material Aid*—relate to the main outlines of the problem. Table I shows a monthly average of 870,103 persons on Material Aid across Canada in 1938, of whom 64·1 per cent were on Urban and 35·9 per cent on Agricultural Aid; the comparable monthly average for 1937 was 965,907, of whom 68·3 per cent were on Urban and 31·7 per cent on Agricultural Aid. Table II shows the percentage distribution by provinces of the average monthly number on Urban Aid, the average monthly number on Agriculture Aid, and the average monthly number on Material Aid (i.e., Urban and Agricultural Aid combined) in the years 1938 and 1937. Table III gives an analysis of the Dominion totals for the month of December, 1938, showing a distribution by provinces and by the main domestic classifications. It may be noted that within each class of Aid, i.e., Urban and Agricultural, the numerical relationship of the number of dependents to the number of heads of families remains virtually constant month after month. Table IV separates each of the groups "Heads of Families" and "Individual Persons" on Urban Aid in December, 1938, into Fully Employable, Partially Employable and Unemployable. While the percentage division of heads of families and individuals varies materially from month to month when the volume of employment is fluctuating, due to the absorption of fully employable persons into employment, or due to the reverse process, a comparison of the Decembers in 1938 and 1937 in the case of family heads and individuals from this point of view does not show any major relative change:

	Heads of Families				Individual Persons			
	Total	Fully Employable %	Partially Employable %	Unemployable %	Total	Fully Employable %	Partially Employable %	Unemployable %
December, 1938 ..	132,482	80·0	11·2	8·8	45,804	53·0	25·1	21·9
December, 1937 ..	127,310	78·4	13·3	8·3	41,381	52·5	27·7	19·8

Table V provides a classification of dependents of heads of families on Urban Aid in December, 1938, from the viewpoint of employability and non-employability.

The tables in Group B—*Fully Employable Persons on Urban Aid*—relate to those persons who are reported by the local authorities issuing Aid as fully employable, that is to say, to the unemployed on Aid. The separation on degree of employability is made in respect of persons in receipt of Urban Aid only, as resident farm operators and their dependents on Agricultural Aid are not seeking industrial employment, and are the victims of distress due to climatic or other conditions quite apart from unemployment or unemployability. For the purposes of this employability classification the following domestic categories are considered as available for employment, if reported fully employable by local authorities: heads of families, individual persons and dependents (other than wives) 16 years of age and over. Table VI shows that in 1938 the average monthly numbers of fully employable persons unemployed on Aid throughout Canada were 148,289, of whom 119,358 were males and 28,931 were females; in 1937 the monthly average total was 187,203, of whom 148,413 were males and 38,790 were females. Table VII shows the distribution by provinces in December, 1938. Table VIII shows a separation of fully employable persons on Aid in September, 1938, by age groups, with a comparison for September, 1937, September in both instances being the month when the re-registration was taken. Table IX shows a separation of the fully employable persons by occupational groups in September, 1938. Table X makes comparison of the distribution of fully employable persons by industry of last normal employment in December, 1938 and 1937.

Group C—*Persons on Aid in Cities*—consisting only of Table XI, shows total numbers of persons (of all domestic categories) and total numbers of fully employable persons only, on Aid in cities of over 25,000 population in December, 1938, with averages for the years 1938 and 1937. The columns "Fully Employable Persons Only" thus represent, in each respective column, a portion of the persons shown under "Total Persons on Aid."

COMBINES INVESTIGATION ACT

Report of an Investigation into an Alleged Combine in the Manufacture and Sale of Paperboard Shipping Containers and Related Products

THE report of an investigation into an alleged combine in the manufacture and sale of paperboard shipping containers and related products, made by F. A. McGregor, Commissioner of the Combines Investigation Act, was tabled in Parliament on March 31, by the Minister of Labour.

The Commissioner found price-fixing agreements of manufacturers of paperboard shipping containers and related products throughout Canada to be in violation of the Combines Investigation Act. The report follows an investigation commenced in 1938 into the activities of two trade associations: Container Materials, Limited, which is reported to include or to have associated with it all but one of the manufacturers of corrugated boxes in Canada, and Shipping Case Material Manufacturers Association, which comprises four manufacturers of the paperboards which are used by the makers of corrugated boxes. Both associations have their headquarters in Toronto and operate under the secretarial management of Messrs. Hardy and Badden. The finding of the Commissioner is that "Both these associations have operated and are likely to operate to the detriment and against the interest of the public and are therefore combines within the meaning of the Combines Investigation Act." Parties to the alleged combine of box manufacturers are stated to be located in Ontario and Quebec, the Maritime Provinces, Manitoba, and British Columbia. The four manufacturers of paperboard, who constitute Shipping Case Material Manufacturers Association, have their head offices in Toronto and Montreal. The two Toronto firms also manufacture paperboard boxes and are members of both combinations.

Hearings in the investigation were held in Toronto and Montreal, the two principal manufacturing centres for corrugated boxes, and in Ottawa. J. C. McRuer, K.C., and J. L. McLennan, of Toronto, acted as commission counsel in the inquiry.

The development of the price-fixing agreements among manufacturers is traced in detail in the report, which states: "since September, 1931, all the leading manufacturers of corrugated paper boxes in Canada have been either members of Container Materials, Limited, or associated with it under arrangements to fix prices and regulate conditions of sale." In regard to the combination of paperboard manufacturers it is reported that: "Shipping Case Material Manufacturers Association has operated since January, 1935, to regulate prices, conditions of sale and standards of quality of paperboard used for shipping containers."

Elimination of Competition

In reviewing the activities of the combination of corrugated box manufacturers, the Commissioner states in his conclusion that

"it would be difficult to devise a more complete elimination of price competition in any industry than has been achieved through the operations of Container Materials, Limited, in connection with the manufacture and sale of shipping containers. Certainly nothing more complete in this respect has been the subject of investigation under the Combines Investigation Act since it was passed in 1923."

The methods employed by the combination of box manufacturers to eliminate price competition are stated to have commenced with a series of written agreements binding the members to absolute adherence to the prices fixed and to have developed into a system of control to prevent any possible deviation from the agreements. Amounts ranging from $500 to $10,000 were deposited as guarantees that prices would be maintained and other regulations observed. Through additional levies these deposits have increased to a quarter of a million dollars. Salesmen and sales managers have been required to file each month affidavits that they have made no discount or other inducement to any customer, and fines have been imposed whenever infractions have been discovered. "The giving of any advantage to a customer by means of improved quality or service at the agreed price is checked by a fixing of the qualities of materials used and restrictions on the services that may be rendered." Enforcement of the combination's regulations, according to the report, "has involved constant check and review of the records and transactions of the member companies and affiliated manufacturers by auditors acting for the management of the associations."

System of Zone Prices

A system of zone prices has been established for paperboard shipping containers through Container Materials, Limited. One price schedule applies to Ontario, Quebec and the Maritime Provinces, another to the Prairie Provinces and another in British Columbia. All companies associated with Container Materials, Limited, must charge exactly the same

price for any container sold in any of the three zones. This uniformity applies not only to regular prices but also to quantity discounts, printing charges, and period of time within which order must be shipped to avoid extra charges. There is only one manufacturer of corrugated boxes in British Columbia. The report shows that this company signed the price agreement "with the full understanding that quotations in British Columbia are to be made only from the Price Schedule furnished by ourselves and not according to any Eastern schedule." Instances of manufacturers being fined by the officers of Container Materials, Limited, for charging or even quoting prices lower than those fixed are cited by the Commissioner.

Sales Allotments

The report gives details of a scheme of sales allotments which has been developed "under which each member subject to the quota arrangement is allotted a certain percentage of the total business, paying a penalty if he sells beyond his quota or receiving cash compensation if he sells below." These penalties on excess sales were increased from 15 per cent to 25 and 30 per cent. This latter rate was maintained from 1934 until October, 1938, when it was reduced to 10 per cent. Up to the end of 1937 approximately $500,000 had been paid in and distributed under the quota arrangement. A few companies made large payments in this period, $186,000 in one case and $80,000 in another. According to the report:

"it is manifest that the continuance of the sales allotment or quota system by the combination of manufacturers of shipping containers throughout Canada has been possible because the prices which have been agreed upon have been sufficient not only to permit the relatively efficient firms in the industry to make large returns upon their investment, but to provide for the payment of the substantial charges for pool tax, purchases of machinery, and other restrictions on competition which have been effected through the price-fixing controls operated under the name of Container Materials, Limited."

The report states that the quota system does not apply to all manufacturers in the combination, but that the sales of quota companies form about 80 per cent of the entire production in Canada.

Inducements To Competitors

The Commissioner reports that "where new competition has developed, financial or other inducements have been offered the new companies to persuade them to conform to the price agreement, with the result that at present only one company, and that one established in 1938, is not maintaining these prices." In one instance it is stated that the combination induced the O. and S. Corrugated Products Company, of Toronto, to agree to its fixed prices "by offering the company a sales allotment and a guarantee that even if the company produced nothing it would be compensated to the extent of $30,000 for its first nine months with the group." The report goes on to show that at the end of the 25-month period ending April 30, 1938, the compensation received by this new firm amounted to almost $70,000 or more than 80 per cent of the value of its sales in the same period. The Commissioner states this payment was made

"largely if not altogether as a return for its undertaking to refrain from any competition in price with the members of the combination. This amount was paid to this Ontario company in several instalments by all the members of Container Materials, Limited, including those whose plants are located in the Maritime Provinces, Manitoba and British Columbia."

Another instance reported is the joint purchase of the fibreboard box business of Building Products, Limited, at Portneuf, P.Q., for which the combination paid about $86,000, of which amount only $5,655 was recovered through the sale of the machinery to the member companies.

Arbitrary Fixing of Prices

The report states:

"It was claimed by counsel for Container Materials, Limited, that the prices set by that association must be considered reasonable because they were based on cost. This contention has been met in the discussion of the so-called cost method of setting prices earlier in the present report. It is clear that the prices fixed were not established on the basis of actual costs and that the method pursued was an arbitrary fixing of prices by the group. With respect to shipping case materials, no evidence was put forward which would indicate that the prices set by Shipping Case Material Manufacturers Association were based on costs. Even if it were possible to determine accurately each manufacturer's actual cost of producing each class of corrugated box or paperboard at a given time, question would remain as to what part of these costs had developed because of the absence of competitive conditions. In reports made by Jenkins and Hardy, auditors for the corrugated box combination, figures are submitted showing 'that the individual member's cost of doing business varied widely. Total costs of members in 1937 ranged from 79 per cent to 97 per cent of sales, on the basis of the accounting methods adopted by the association's auditors in their surveys. Cost variations to this extent are found even though the agreements among the member companies embrace types of materials which may be used and though the cost of principal materials is fixed by the price agreement of the manufacturers of paperboard."

Conclusions

In reviewing the methods of the alleged combine in maintaining control of price, the report concludes:

"When these facts are considered, and when it is realized that the industry has operated until recently under a tariff protection which

worked out to between forty and fifty per cent, it is apparent that price competition as a public safeguard in this industry has been all but completely suppressed by the operations of this association."

"In the case of the combination of manufacturers of paperboard, known as the Shipping Case Material Manufacturers Association," the report states,

"the objective, the elimination of price competition, has been the same as that sought by the manufacturers of corrugated boxes. The method of the incorporated company has not been followed and no quota system has been adopted. . . . In all other important respects the measures of price control adopted by the two combinations are of the same character. Written price agreements form the basis of the combination of paperboard manufacturers. Infringement of these agreements brings upon a member the financial penalties which the secretary of the association is authorized to impose, and a substantial deposit is required of each company as a guarantee that these penalties will be accepted. The machinery for enforcement is substantially the same as in the case of Container Materials, Limited."

In the Commissioner's report the parties to the alleged combine of corrugated box manufacturers are stated to be the following shareholders or quota members of Container Materials, Limited, and the associated companies which have agreed to maintain its prices:

Shipping Containers, Limited, Montreal, P.Q.
Standard Paper Box, Limited, Montreal, P.Q.
Martin-Hewitt Containers, Limited, Peterborough, Ont.
Canadian Wirebound Boxes, Limited, Toronto, Ont.
The Corrugated Paper Box Company, Limited, Toronto, Ont.
Gair Company, Canada, Limited, Toronto, Ont.
Hinde and Dauch Paper Company of Canada, Limited, Toronto, Ont.
Hygrade Corrugated Products, Limited, London, Ont.
Hilton Brothers, Limited, Winnipeg, Man.
Martin Paper Products, Limited, Winnipeg, Man.
Canadian Boxes, Limited, Vancouver, B.C.
Maritime Paper Products, Limited, Halifax, N.S.
Wilson Boxes, Limited, Fairville, N.B.
Dominion Corrugated Paper Company, Limited, Toronto, Ont.
O. and S. Corrugated Products Company, Toronto, Ont.
G. W. Hendershot Corrugated Paper Company, Limited, Hamilton, Ont.
Kraft Containers, Limited, Hamilton, Ont.
Superior Box Company, Limited, Kitchener, Ont.
Container Materials, Limited, Toronto, Ont.
H. J. Badden, President and Secretary-Treasurer, Container Materials, Limited, Toronto, Ont.

Those reported to be parties to the alleged combine of manufacturers of paperboard are:

Bathurst Power and Paper Company, Limited, Montreal, P.Q.
Brompton Pulp and Paper Company, Limited, Montreal, P.Q.
Gair Company, Canada, Limited, Toronto, Ont.
Hinde and Dauch Paper Company of Canada, Limited, Toronto, Ont.
Messrs. Hardy & Badden, Secretary-Treasurer, Shipping Case Material Manufacturers Association, Toronto, Ont.

Copies of the report and evidence have been remitted to the Attorneys-General of Ontario and Quebec, for such action as they may decide to take in view of the conditions disclosed by the investigation. Copies of the report have been sent also to the Attorneys-General of Nova Scotia, New Brunswick, Manitoba and British Columbia.

Proceedings in Alberta against Alleged Tobacco Combine

Preliminary hearings of charges under section 498 of the Criminal Code against tobacco manufacturers and wholesalers were commenced before Magistrate A. I. Miller, K.C., in Edmonton on March 20. These charges were laid following the report of the Commissioner of the Combines Investigation Act of an investigation of an alleged combine in the distribution of tobacco products in the Province of Alberta and elsewhere in Canada which was reviewed in the October number of the Labour Gazette, pages 1090-1092. The prosecution is being conducted by A. L. Smith, K.C., of Calgary, and H. J. Wilson, K.C., Assistant Deputy Attorney-General of Alberta.

Dismissal of Action to Quash Report on Alleged Tobacco Combine

Mr. Justice Hogg of the Supreme Court of Ontario, in a written judgment delivered on March 14, dismissed an application, by way of certiorari, by the Imperial Tobacco Company of Canada, Limited, and the Imperial Tobacco Sales Company of Canada, Limited, for an order directed to F. A. McGregor, Commissioner of the Combines Investigation Act, to remove into Court all records, proceedings, papers and the report of the Commissioner, dated August 31, 1938, relating to an investigation into an alleged combine in the distribution of tobacco products in the Province of Alberta and elsewhere in Canada, and to quash the report. (A summary of this report appeared in the October number of the Labour Gazette, pp. 1090-1092.)

The grounds alleged by the companies in seeking the Court order were (1) that the investigation and proceedings were held, and the report was made, without jurisdiction or in excess of any jurisdiction conferred upon the Commissioner by the statute; (2) that no reasonable notice of the proceedings or investigation or of any charge against the applicants was given to them, and the applicants were not allowed to be heard in person or by counsel, as required by the Act and by sections 12 and 13 of the Inquiries Act, and (3)

that the investigation and proceedings and the report made following the same were contrary to natural justice.

The following were some of the grounds on which certiorari was opposed: (1) that the Commissioner had full jurisdiction to hold the investigation and to make the report in question, and that he had complied with all the requirements of the statute; (2) that if the Commissioner failed to do an act required by the statute and such failure might have deprived him of jurisdiction, such irregularity was waived by the applicants in express terms by their conduct and by their electing to treat the inquiry as valid and in attempting to obtain from the Commissioner an opinion favourable to them; (3) that certiorari cannot be directed to the Commissioner for the reason that his functions are purely administrative, and not judicial, the object of the investigation being merely to obtain information, and that he is not given authority to determine, nor does the report made by him determine or affect, the rights of or impose obligations upon, those whose activities are the subject of the investigation.

In view of the judgments of the Judicial Committee of the Privy Council in *Proprietary Articles Trade Association* v. *Attorney-General of Canada,* (1931) A.C. 310 and *O'Connor* v. *Waldron,* (1935) A.C. 76, Mr. Justice Hogg held that the question as to whether the investigation made by the Commissioner into the affairs of the applicant companies is a judicial proceeding or not, and whether the report of the Commissioner could or does affect the rights of the said companies, is not open to consideration. Mr. Justice Hogg said:

"The investigation is an administrative and not a judicial proceeding. It is conducted for the purpose of obtaining information which, with the conclusions of the Commissioner based upon such information, are submitted to the Minister of Labour. No rights of the persons whose business activities have been investigated are determined or affected by the report itself, and some further action outside of, and apart from the report, is required before such rights are affected.

The principle has been firmly established by the judgments in several outstanding cases in the Courts in England and in the Judicial Committee, that certiorari will not be granted in respect to proceedings that are not judicial in their nature and the result of which does not determine or affect the rights of the subject of such proceedings."

In dealing with the contentions advanced on behalf of the applicant tobacco companies, Mr. Justice Hogg said:

"I do not think that the absence of counsel for the applicants upon the examination of the several persons in Alberta and British Columbia or of Mr. Spafford in Ottawa, nor the refusal of the Commissioner to give the applicants a copy of the evidence taken upon these examinations in the West, deprived the applicants of a fair hearing in accordance with the terms of substantial justice, and that the applicants held a similar view could not be expressed more clearly than is set out in the letter of the 28th July of the President of the Imperial Tobacco Company to which I have already referred.

Nor, in my opinion, can it be held that the applicants were prejudiced because they were not informed before the investigation was actually commenced, of the complaints made in the application received by the Commissioner in February, 1938, upon which the investigation was founded. The applicant companies had ample time and full opportunity to present their case and to meet all of the allegations made against them, and they placed before the Commissioner such arguments and such material as they thought might cause him to form the opinion that they had not contravened the terms of the Combines Act.

The statement of Duff J. (now C.J.) in *Wilson* v. *Esquimalt and Nanaimo Ry. Co.,* (1922) 1 A.C. 202, at pages 213 and 214, may, in my opinion, be applied to the point now under consideration.

I cannot reach the conclusion that the Commissioner acted, during the course of the investigation in question, in a manner which was unfair to the applicants or that he was not impartial.

The further ground advanced in support of the application . . . must now be considered, namely, that the Commissioner acted in excess of his jurisdiction in that he did not carry out, or acted contrary to, the provisions of sections 12 and 13 of the Inquiries Act because of the fact that he did not allow the applicants, against whom a charge was made, to be represented by counsel in the course of the investigation; that he did not give reasonable notice to the applicants of the charge of misconduct alleged against them, and, furthermore, that he did not give the applicants full opportunity to be heard in person or by counsel before making his report.

If the statute itself, under the terms of which an investigation such as that now under consideration is authorized, prescribes the procedure to be followed, the official or body by whom the investigation is made, must comply with the terms of the statute.

Lord Shaw said in the *Arlidge* case, referring to the inquiry made by the Local Government Board, 'If a statute prescribes the means it must employ them.'

It is to be noted again, that the provisions of the Inquiries Act are to be applied to an investigation under the Combines Investigation Act only if they are not repugnant to the provisions of the latter Act and except in so far as any such powers may be inconsistent with the provisions of the Combines Act.

All of the procedure prescribed by the Inquiries Act does not adapt itself to an investigation under the Combines Act having regard to the fact that the proceedings before the Commissioner are to be conducted in private unless he orders otherwise.

This provision is necessary to protect the business interests of those who may be involved in, or who may be examined in the course of the investigation, in order that their affairs and the details of their business may not be exposed to the public to their detriment.

. . .

It was argued on behalf of the Commissioner that the application for an investigation made in pursuance of section 11 of the Combines Act

is not a specific charge of misconduct such as is contemplated by the Inquiries Act but that the applicants merely advance as their opinion that a combine exists and give the names of those who are believed to be concerned therein.

But if it be assumed that the application for an investigation is a charge of misconduct against the companies who are parties to this motion, can it be said that the Commissioner was prohibited by said section 12 of the Inquiries Act, from conducting an examination under oath of the several persons whose testimony was taken in Alberta and British Columbia unless the applicant companies were represented at such examinations by counsel so that such persons might be subject to cross-examination?

I do not think it consistent with the plain intention of the Combines Act to protect from unnecessary publicity, the business affairs of persons from whom the Commissioner may desire information, that the parties who are believed to be concerned in an alleged combine should, on all such examinations be represented by counsel.

. . .

In so far as the provisions of section 13 of the Inquiries Act are concerned, I must conclude that the report of the Commissioner was not made until the applicant companies had reasonable notice of the allegations made against them and until they had full opportunity to be heard before the Commissioner in person or by counsel. Such being the case, the terms of this section were complied with."

The decision of Mr. Justice Hogg was that the applicants were not entitled to an order of certiorari, and that the application must be dismissed with costs. The applicants have filed notice of appeal against this judgment. *Re Investigation under the Combines Investigation Act and Re Imperial Tobacco Company, Limited* and *Imperial Tobacco Sales Company, Limited.*

Industrial Home Work under U.S. Fair Labor Standards Act

The March issue of *Labor Standards,* published monthly by the United States Department of Labor, contains a review of industrial home work under the Fair Labor Standards Act. The summary referred to the "Interpretative Bulletin" (No. 1) wherein Administrator Andrews of the Wage and Hour Division held that "employees otherwise coming within the terms of the act are entitled to its benefits whether they perform their work at home, in the factory, or elsewhere," and outlines the recent amendment as follows:

In recognition of the difficulties of regulation peculiar to the home-work practice, however, the Wage and Hour Division has amended its general record-keeping regulation by requiring employers to keep special records for industrial home workers. During the hearings, which were held prior to the issuance of the new regulation, all aspects of the application of the act to home work were examined. It was generally agreed that home work is an old evil which has recently shown a tendency to increase in a number of fields.

In making the new regulation public, Mr. Andrews said, "The regulations, which we are putting into effect for a 6-month period beginning March 15, represent the best judgment of those who participated in the conferences on this subject. Those who participated feel that these regulations will at least test practicability of this kind of control of industrial home work and perhaps answer the question as to whether we can enforce the provisions of the Fair Labor Standards Act as it now stands with respect to work of this nature."

The new regulation requires each home-work employer to keep a record showing the name and address of each worker, his date of birth if under 19 years of age, and the name and address of each agent, distributor, or contractor through whom home work is distributed.

With respect to each lot of work issued, the records must show the date and hour on which work is given out and returned, the amount of work given out and returned, the kind of articles worked on and the operations performed, the piece rates paid, the hours worked on each lot of work returned, deductions for Social Security taxes, the amount of wages paid for the lot returned and the date of payment.

The records must also show, with respect to each workweek, the total number of hours worked, the wages earned at the regular piece rates, extra pay for overtime, the total wages earned during the week and the amount deducted for Social Security taxes.

The regulation further requires the employer to keep a duplicate record in a handbook which will remain in the possession of the home worker. The employer, however, must make all entries and assume responsibility for the items. The handbooks are numbered serially, and employers, for their own protection, have been urged to keep a record of each number. A separate handbook must be kept by each employer for whom work is performed, and when more than one worker in a family work on a consignment of materials a separate handbook must be kept for each individual worker.

75831—3½

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Canada Shipping Act—Alberta Male Minimum Wage Act—New Brunswick Forest Operations Commission Act—Ontario Public Health Act—Quebec Fair Wage Act—Quebec Limitation of Hours of Work Act

NEW orders made recently amend Dominion regulations concerning mates on home-trade vessels and the by-laws for certain pilotage districts. In Alberta, overtime for male workers must be paid at the rate of time and a half and changes have been made in the minimum wage orders applying to inexperienced workmen. Other provincial regulations include wage orders for woodsmen in New Brunswick, the fixing of a maximum compensation in Ontario for persons deprived of their means of livelihood by being declared carriers of typhoid fever, a table of percentages to enable the application of certain wage orders in Quebec, changes in the orders relating to municipal and hospital employees and an increase from eight to nine a day in the maximum hours for unskilled workers in the building trades in the Montreal Division of the Province.

Canada Shipping Act

Recent regulations include a change in the experience required for mates on home trade vessels, amendments in the by-laws for the Pilotage Districts of Sydney, Halifax, Saint John and British Columbia and new by-laws for the District of Digby, Annapolis and Bear River in Nova Scotia. From February 22, 12 of the 36 months' service at sea required for mates on home-trades vessels by regulations of November 5, 1936, must be spent as a wheelsman or as a seaman performing wheelsman's duties. The fees for pilot licences in the Sydney District have been increased but the Pilotage Authority may renew licences issued prior to February 13 under the old terms.

Orders in Council of March 4 applying to the above Districts except Digby and Annapolis, re-define the powers of the Pilotage Authority and Superintendent with respect to fines and suspension and set out the conditions under which pilots are liable to such discipline.

By-laws for the Pilotage District of Digby, Annapolis and Bear River were adopted on February 15 and approved by order in council on March 7. Provision is made for a Secretary-Treasurer to be appointed by the Authority with the approval of the Lieutenant-Governor in Council and charged with the collection of pilotage dues, payment of pilot's wages and other duties. The number of licensed pilots in the district is to be determined by the Pilotage Authority. A pilot must be 21 years of age, pass a prescribed examination, have satisfactory eyesight, and be physically and mentally fit.

Alberta Male Minimum Wage Act

A new Order, No. 6, relating to overtime and an amendment in Order 1 (Labour Gazette, 1937, p. 1100) under this Act came into force on February 28. Order 6 provides that all male workers in the province, except farm labourers, domestic servants and certain employees in the lumbering, logging and the railway tie industry in rural districts, must be paid time and a half for work in excess of the maximum hours of nine a day and 54 a week fixed in the Hours of Work Act. In the case of workmen engaged in drilling or operating oil and gas wells in the Turner Valley and of taxi drivers in Edmonton and Calgary, special maximum hours are fixed by regulation and the overtime provision applies to an eight-hour day and 48-hour week in the Turner Valley and to a 12-hour day and six-day week for taxi drivers.

Order No. 1 is amended with respect to rates for inexperienced workmen. The original order distinguished between inexperienced workmen over 21 years of age and those under 21 and different rates were established for each of these classes below the minimum for experienced workmen. As amended, the Order requires all workmen over 21 to be paid at least 33⅓ cents an hour if hired by the week or longer period or 40 cents an hour if hired for a shorter period. These rates apply to all male workers in the Province except farm labourers, domestic servants, men employed in box factories, woodworking plants, logging and the railway tie industry in rural districts, indentured apprentices, workmen governed by schedules of wages and hours under the Industrial Standards Act or by codes drawn up under the Department of Trade and Industry Act, persons paid on a commission basis and hired by contract approved by the Board of Industrial Relations, workers hired for temporary work not for the purpose of the employer's business and persons engaged in fighting prairie or forest fires.

New Brunswick Forest Operations Commission Act

Wage rates in force for certain woodsmen under this Act since March 20, 1937, were replaced on April 1. For the first time a minimum rate per day has been fixed for stream drivers and the average wage of $3 a day and board formerly required to be paid by any employer, is reduced to $2.50 and board. The new order stipulates that no stream driver shall be paid less than $2.25 a day and board. All employers must keep a time book showing the name, days of employment and rate of pay of each workman. Provisions remaining unchanged include a maximum charge to boomers and sorters of 50 cents a day for board and lodging, the exclusion of the wages of cooks, foremen, bookkeepers and clerks for the purpose of determining the average wage and the stipulation that all payrolls must be submitted to and, if necessary, audited by the Commission and that the industry may be investigated from time to time by the Fair Wage Board.

Ontario Public Health Act

Regulations of December 10, 1937, for the control of typhoid and paratyphoid fever were amended on March 7 to give effect to a 1938 amendment in the Act providing for the payment of compensation by the Department of Health to persons pronounced "carriers" of a communicable disease and thereby deprived of their means of livelihood. The amount of and eligibility for compensation are to be determined by the Minister of Health. In no case may compensation exceed $20 a month for an unmarried person or $20 for a married man with an additional $5 for each dependant under 16 years of age.

Quebec Fair Wage Act

Certain orders under the Fair Wage Act fix three or four minimum rates for workers in the establishments governed by each Order. Each rate applies to a proportion of the workmen, the lower rates to not more than a certain percentage and the highest rate to not less than a certain percentage. For example, under Order 4, where workers are required to be classified there is a specified rate for not more than 15 per cent, a slightly higher rate for not more than 25 per cent and the highest minimum fixed in the Order applies to not less than 60 per cent of the workers. Subsequent orders also establish different rates for a minimum or maximum proportion of the workers and there is some variation in the proportions.

Where the number of workers in an establishment is such that they cannot be classified in the exact proportion fixed in the Order governing the industry, the Fair Wage Board has drawn up tables indicating the number of workers to be assigned to each class. Three new tables of this kind issued by the Board were gazetted on March 11 and another on March 25. Two tables published earlier were referred to in the Labour Gazette, October, 1938, at p, 1097.

Several changes in Orders under this Act were gazetted on March 3. From May 3 the minimum wage fixed by Order 4 (Labour Gazette, 1938, p. 512) for municipal and school board employees need not be paid by any such corporation unless the majority of its members so decide. This exemption is stated to be a result of representations to the Government to the effect that the minimum wages impose a considerable burden on the taxpayers without guaranteeing employment to the workers involved.

Order 11 (Labour Gazette, 1938, p. 1098) applying to all employees in hospitals not covered by other orders except the St. Jean-de-Dieu Hospital, Gamelin and those in the cities of Quebec and Levis and adjacent counties, is repealed from January 1. It was to remain in force until June 30, 1939. Order 6 (Labour Gazette, 1938, p. 624) governing stationary engineers is also repealed in so far as it applies to hospitals. In the repealing order it is stated that the application of these Orders created a difficult situation since the hospitals' funds are insufficient to make the required adjustments in wage-rates and the provincial Government is unable to give additional financial assistance.

Quebec Limitation of Hours of Work Act

Regulations effective March 15 repeal and amend certain orders under this Act, in force since May 1, 1937, governing the building industry in the Montreal Division which includes the judicial districts of Montreal, Montcalm, Hull, Pontiac, Terrebonne, Joliette, St. Hyacinthe, Chambly, Iberville and Richelieu. The maximum weekly hours of 44 for skilled and 48 for unskilled workers in this area are no longer imposed and the daily maximum of eight hours, which remains unchanged for skilled workers, is increased to nine hours for labourers.

As before, any contractor may use two shifts of six hours a day and 36 a week each. From May 1 to October 1 such a system is compulsory on works costing more than $20,000 undertaken for a municipal or school corporation, fabrique or parish trustees or for the Provincial Government or on works half the cost of which is borne or guaranteed by the Provincial Government or a municipal corporation, or by both.

LEGAL MINIMUM AGE FOR EMPLOYMENT OF CHILDREN IN CANADA

IN the accompanying table are set out the minimum ages for the employment of children in mines, factories and shops under provincial statutes. In no province is there a general child labour law prohibiting any employment below a specified age and regulating the hours of labour or other working conditions of juveniles. In Alberta and Manitoba the Child Welfare Acts, in a section taken from the English Education Act, forbid the employment of a child under 16 in any occupation likely to injure his life, limbs, health, education or morals.

Conventions of the International Labour Conference would prohibit employment under 14 years of age in agriculture, or under 15 at sea or in industrial undertakings, including mines, quarries, manufacturing establishments, shipbuilding, construction and engineering works and the transport by road, rail or inland waterway, or in any non-industrial undertaking. The employment of school children outside school hours would also be subject to regulation under the Convention relating to non-industrial employment. The Dominion Government ratified the Convention of 1920 fixing a minimum age of 14 on sea-going vessels but has not yet given effect to the revised Convention of 1936 raising the age-limit to 15.

Few changes have been made in child labour legislation in Canada in recent years except in relation to mines. In 1935 and 1937, British Columbia raised the ages for the employment of children in metal and coal mines respectively and in 1935 Saskatchewan also raised the age for work below ground. In 1933, New Brunswick fixed a minimum age of 16 for work underground. A minimum age for work in shops was established in Quebec for the first time in 1934. The provisions which have applied to industrial establishments for some years were applied to shops, hotels, restaurants, theatres and other places of business. No child under 14 may be employed at any time and, as before, no boys or girls under 16 may be employed unless they are able to read and write fluently or unless they are attending night school. In 1936 and 1937 Manitoba, by means of regulations made under the authority of the Minimum Wage Act, prohibited employment in shops of children under 15 years of age instead of under 14 as stipulated in the Shops Regulation Act.

In New Brunswick, no statutory age is in effect throughout the province for any class of employment but the Factories Act, which was passed in 1937 but which has not yet been proclaimed in force, would establish a minimum age of 15.

Street selling by children is less generally and effectively regulated and enforcement of the law is left to the local police in most provinces. In all provinces municipal authorities have power to pass by-laws regulating street work and in British Columbia and Manitoba such employment as that in billiard rooms and bowling alleys. In Alberta employment in these latter places is prohibited under 18 years of age. No girls under 18 may be employed as ticket sellers, ushers or cleaners in theatres, moving-picture houses or dance halls in Alberta and Manitoba. The Child Welfare Acts in these two provinces contain clauses forbidding the habitual employment of a child under 18 between the hours of 9 o'clock in the evening and 6 in the morning. In Ontario, Manitoba and Alberta, work on the streets and in places of amusement is governed by the Children's Protection Act or Child Welfare Act and children selling articles on the streets are "neglected" children within the meaning of the statute and may be taken into custody by the Children's Aid Society or other authority. Further, there is a penalty provided for any person causing a child to be neglected.

In Ontario, the Children's Protection Act directly prohibits any boy under 12 or any girl engaging in a street trade such as selling newspapers or magazines at any hour and any child under 16 being so employed between 10 p.m. and 6 a.m.

Compulsory school attendance laws applying to all children in the province are in effect in all provinces but New Brunswick and Quebec. In Prince Edward Island attendance is only required in rural districts for 60 per cent of the school term but in Charlottetown and Summerside children must attend for the full term. Except in Prince Edward Island and British Columbia, the school laws prohibit the employment of children of school age during school hours unless they are exempt from attendance. The British Columbia Act makes no provision for exemption from school attendance. There is no regulation in Canada of employment of school children outside the regular hours for school attendance except that the Ontario Adolescent School Attendance Act forbids the employment, between 8 a.m. and 5 p.m., of any child who is over 14 and under 16 years of age and who has not a certificate exempting him from school attendance. In Quebec there is no school attendance law. In New Brunswick the statute requires attendance for the full term of children under 14 in Fredericton, Saint John, Newcastle, Chatham, Marysville, Edmundston and Campbellton. In other

towns, the municipal council may make a by-law requiring attendance for at least 120 days of the school year of children under 16 years of age. In rural districts children under 12 may be required to attend school for at least 60 per cent of the term if the rate-payers adopt a resolution to that effect.

The statutory school-leaving age is 13 in Prince Edward Island; 14 in the rural districts of Nova Scotia and in Manitoba unless the school district raises it to 15 or unless the child is unemployed when the age is 16; 15 in Alberta, British Columbia and Saskatchewan; and 16 in Ontario and in cities and towns in Nova Scotia. In all these provinces, children who have attained a certain academic standard are not required to attend until they reach the school-leaving age and in all but British Columbia they may absent themselves from school, usually for not more than six weeks in the term, if their services are deemed necessary for the maintenance of themselves or others. In Ontario children over 14 and in Nova Scotia children over 13 may be given employment certificates and freed from any obligation to attend school. Neither does the law impose any limit on the absence from school of a child in Saskatchewan if his own or others' needs require him to work.

REPORT OF NOVA SCOTIA ROYAL COMMISSION ON THE ACADIA COAL COMPANY

A COMMISSION to investigate the affairs and operations of the Acadia Coal Company, Limited, at Stellarton in Pictou County, Nova Scotia, was appointed by the provincial government on August 2, 1937. The coal miners in Pictou County had asked for an investigation of the relationship of the company with the Dominion Steel and Coal Corporation and an inquiry of a wider scope was decided upon. The commission consisted of the Honourable W. F. Carroll, Judge of the Supreme Court of Nova Scotia, A. Stanley Mackenzie, Ph.D., F.R.S.C., Chairman of the Nova Scotia Economic Council, and Frederick H. Sexton, LL.D., Principal of the Nova Scotia Technical College. Dr. Mackenzie died during the preparation of the report but the other commissioners stated in the report that they believed he agreed with the views expressed and the recommendations made.

The Acadia Company, which employs about 1,200 miners, is controlled by the Nova Scotia Steel and Coal Company which in turn is controlled by the Dominion Steel and Coal Corporation which succeeded the British Empire Steel Corporation as a result of a reorganization in 1928. The corporation also controls the Dominion Coal Company and the Cumberland Railway and Coal Company. In 1933 the Nova Scotia Steel and Coal Company was unable to pay its bond interest and was placed in the hands of liquidators who therefore managed also the Acadia Coal Company. The wage rates in the mines of these companies were reduced thereafter much more than those of the other coal companies. In 1934 Mr. Thomas Graham, a mining engineer, was appointed by the provinical government to investigate the operations of the Acadia Coal Company and reported that a wage reduction

was necessary in order to carry on operations. In recent months the receivership has been terminated and the two companies again came under the management of the Dominion Steel and Coal Corporation. The United Mine Workers of America had agreements with the corporation's mining companies since 1919 and contended that the miners of the Acadia Coal Company should now receive a wage increase, which was given to those of the other companies in 1937, and also advocated that a new seam should be opened to replace operations at one of the mines worked out and closed down at the end of 1937.

The provincial government at the request of the miners' union engaged Dr. Geo. S. Rice, formerly chief mining engineer of the United States Bureau of Mines, who had been engaged to deal with coal mining problems also in France and the western provinces in Canada. Dr. Rice visited each mine, accompanied by the miners' pit committee, provincial inspectors, etc., and discussed difficulties with the miners. He reported to the Commission that the mines were most difficult and expensive to operate owing to the irregularity of the coal seams, the softness of the coal and of the overlying strata, fire damp, etc. These difficulties and the precautions necessary for safety accounted for the low output per man and high cost per ton as compared with other mines. With reference to the opening of the new seam it was reported that this would be needed later when the other seams now operated became worked out but that in the meantime these could produce more coal than could be marketed. The equipment in the mines was found to be efficient and well maintained, though not modern owing to lack of capital. In regard to mine safety, the government inspectors, mine officials and miners were commended. Some additions to the equipment for rescue work were recommended.

In regard to wages it was considered that it was not possible for the company to pay more as there had been losses of $200,000 to $300,000 annually in recent years and the company had kept the mines in operation only with the assistance of the provincial government, royalties and assessments for the Workmen's Compensation Board had been waived and taxes had not been paid. The company had continued part time operation of all its mines instead of concentrating on one mine in order to give some employment to all the employees but the annual earnings were found to average only from $750 to $950 except for the pumpmen, etc., who were constantly employed and these averaged about $1,300. It was reported that the best prospect for the mines lay in the promotion of the use of Pictou coal in household furnaces, with blowers, as unlike most other Nova Scotia coal, it is non-coking and has little tendency to form clinker. It was also suggested that if a household furnace were devised to burn the coal instead of anthracite or coke a better market might be developed.

In dealing with the relations of the company and the holding companies the commission reported that prior to 1933 the Nova Scotia Steel and Coal Company had taken nearly two million dollars which was in excess of net earnings and left the company without working capital. It was considered that the present difficulties would have developed even if this had not been done as the reserves would have been exhausted soon in the subsequent years. It was recommended that the provincial authorities should secure legislation in regard to the powers of all holding companies in dealing with subsidiary companies, as being in control through the common stock they may sacrifice the interests of the real owners of the property, the owners of bonds, debenture stock, etc. For companies dealing with the public domain it was recommended that the payment of dividends should be controlled in the interest of the industry and to safeguard the assets of the province.

The liquidators had retained the services of the Dominion Steel and Coal Corporation as to sales, engineering and accounting services, etc. The Commission approved of this as it would have cost the company very much more to have set up its own organization for these purposes. It was found that no discrimination in sales had occurred, and that the company had received good service although the annual fee of $12,500 had not been paid since 1935.

The Commission reported that co-operation between the management and employees in promoting efficient operation of the collieries was most important as had been reported by the Commission under the chairmanship of Sir Andrew Rae Duncan in 1925, Labour Gazette, January, 1926. It was considered that this co-operation was still being prevented by the prejudices and animosities resulting from the long and bitter struggle for collective bargaining prior to 1919. The Commission quoted with very strong approval, from a handbook on "Production Problems," issued by the Committee for Industrial Organization, with which the union of the United Mine Workers of America was affiliated, making suggestions for co-operation of workers and management in the steel industry, and also from an address by Mr. Arthur B. Purvis, President and Managing Director of Canadian Industries Limited on the "Social Responsibility of the Employer," before the Institute of Public Affairs at Halifax on October 28, 1939. (Labour Gazette, November, 1938, page 1196.)

ANNUAL REPORT OF SASKATCHEWAN BUREAU OF LABOUR AND PUBLIC WELFARE, 1938

THE report of the Saskatchewan Bureau of Labour and Public Welfare, covering the administration of the various activities under its jurisdiction for the year ended April 30, 1938, has been received recently in the Department. As indicated in the introduction, this report is the eighteenth since the original Bureau of Labour and Industries was organized, and the fourth since the present Bureau of Labour and Public Welfare was organized.

After reviewing the legislative recommendations of the Saskatchewan Executive of the Trades and Labour Congress (Labour Gazette, February 1938, page 160) and presenting the approved fair wage schedule for government work, the report details the inspections under provincial labour laws, viz.: The Factories Act, One Day's Rest in Seven Act, Minimum Wage Act, etc.

Apprenticeship Agreements.—Twelve apprenticeship agreements were approved during the year, covering the trades of electric repairing, millinery, radio repairing, jewellery repairing, stonecutting, motor mechanics, baking, knitting, beautician and fur finishing.

Strikes and Lockouts.—During the period under review there were three industrial disputes, involving 24 employees and a total time loss of 190 working days.

Industrial Standards Act.—The report characterizes the Industrial Standards Act as "the most effective means produced by legislation of the province, of maintaining fair wages for workers." During the year four prosecutions were instituted in the courts against alleged violators of the schedules. Three cases were dismissed by the magistrate. In the other case, a verdict of not guilty rendered by the magistrate's court was appealed, the decision of the lower court reversed and a fine imposed upon the defendant.

The report lists the industries and zones for which schedules have been approved under the Act.

Employment Service.—The report of the employment service, maintaining nine offices in the province, indicated the volume of transactions for the year ended April 30, 1938 to be as follows: Applications, 65,493; vacancies, 52,101; placements, 50,406.

Farm Wages.—The average wage for farm work prevailing throughout the year was: Winter—$5 plus government bonus; spring—$10 to $25 per month; harvest—$1.50 to $3 per day; fall, after threshing to freeze-up—$10 to $20 per month. Wages for men working in the lumber camps averaged $13 per month.

Youth Training.—During the period November 1, 1937, to March 31, 1938, 676 boys and 650 girls in the province took advantage of practical free courses for young men and women, which were arranged by the federal and provincial governments in co-operation with the Regina Rehabilitation Committee and were known as the "Dominion-Provincial Youth Training Program." The length of these courses was from two to five months and young men and women between the ages of 18 and 30, who were unemployed and in necessitous circumstances, were eligible.

"This plan" states the report, "undoubtedly proved a success as we are informed by a number of these students that they have been able to secure employment and, if suitable employment was not available for some of the students at the completion of their course, they undertook the study of another subject."

Farm Improvement and Employment.—In a section on operations under the Dominion and Provincial Farm Improvement Plan, a statistical summary is presented showing the number of persons benefited and the total expenditure. This summary indicates that placements totalled 31,747 and that disbursements to the individuals thus placed amounted to $1,308,799.62. In addition $783,336.28 was paid to 31,747 employers; $1,365.16 in transportation issued to 1,019 persons and $7,008.89 in clothing issued to 2,309 persons.

Minimum Wages

The report contains an account of the administration of the Minimum Wage Act and reference was made to the revision of certain Board orders applicable to both men and women.

During the year under review, there were 2,640 general inspections made and 345 special investigations. The number of business places affected were 2,023, in which there were 2,682 experienced female employees and 617 inexperienced female employees, together with 7,710 experienced male employees and 789 inexperienced male employees. In addition to these, there were 305 females and 332 males employed on part time. There were 74 overtime permits issued as follows: 28 to factories and 46 to retail stores.

By negotiating with employers the inspectors were successful in collecting $6,507.73 in back wages to the benefit of 210 women and 308 men.

In order to bring about compliance with the orders, it was necessary to take to court eighteen charges against employers. Of these charges six were withdrawn, nine upheld and three dismissed. In those instances where the employer was found guilty fines were imposed.

The full text of the six orders of the Board, together with statements showing the number of women and men employed in different cities and the rate of wages paid, are given in tabular statistics.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, FEBRUARY, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on March 1 was 11,309, the employees on their pay-rolls numbering 1,027,846 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for February was 1,967, having an aggregate membership of 252,099 persons, 16·4 per cent of whom were without employment on March 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of March, 1939, as Reported by Employers

Returns tabulated by the Dominion Bureau of Statistics from 11,309 employers throughout Canada show that there was little general change in industrial employment at the beginning of March, improvement in manufacturing being largely offset by shrinkage in some of the non-manufacturing industries, notably logging, for which the active season in many districts is drawing to a close. The reported staffs of these 11,309 establishments aggregated 1,027,846, compared with 1,027,619 at February 1. This increase of 227 employees was not sufficient to alter the index number, which stood at 106·5 at both March 1 and February 1, 1939, as compared with 107·8 at the beginning of March, 1938, and 102·8 at March 1, 1937; in calculating these indexes, the base used is the 1926 average employment of the reporting firms as 100.

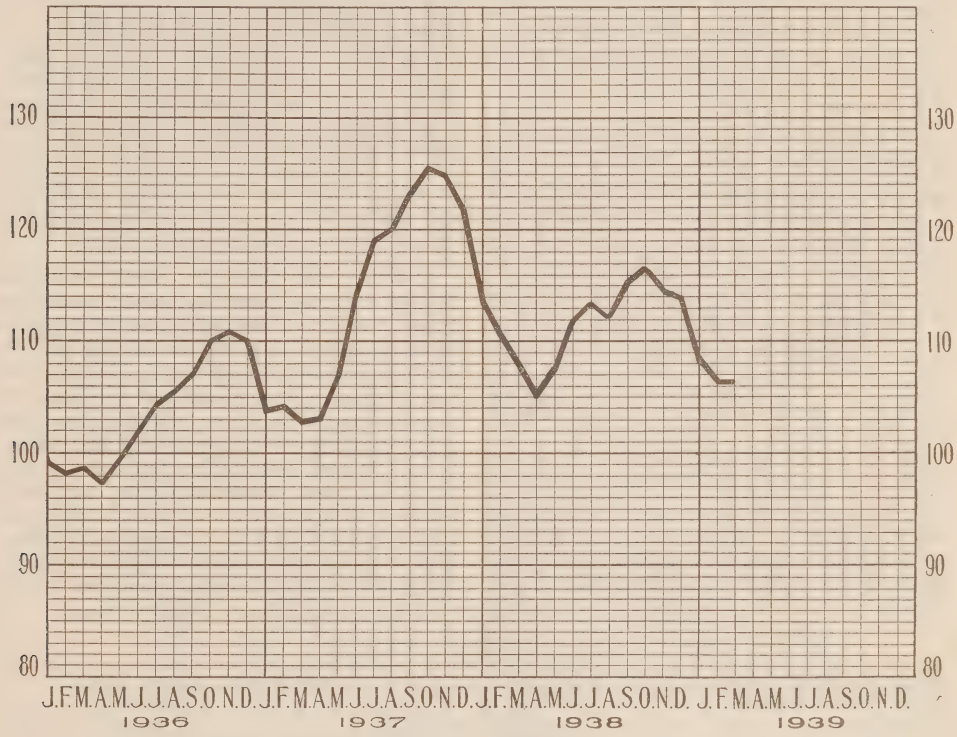
In the last eighteen years, employment, on the average, has shown little change between February 1 and March 1, increases in some years just about offsetting declines in others. In the period, 1929-1937, upon whose experience the seasonal variation factors are calculated, the trend at March 1 was very slightly downward; the small advance at the latest date, which had an imperceptible effect upon the crude index, increased fractionally the seasonally-adjusted index, which rose from 110·6 at the beginning of February to 111·0 at March 1.

Moderate improvement was reported in manufacturing at March 1, 1939; the advance was smaller than the average in the years since 1920, but largely exceeded the gain indicated by the establishments furnishing data for the beginning of March of last winter. The most pronounced increases from February 1, 1939, were in leather, lumber and textile factories. Among the non-manufacturing industries, mining, transportation and highway and railway construction and maintenance showed heightened activity; the additions to staffs in the last-named resulted, in the main, from heavy snow falls. On the other hand, logging reported large seasonal declines; communications, building construction and services showed moderate declines, while trade was decidedly slacker, the curtailment being seasonal in character.

For March 1, 1938, statistics had been received from 10,416 employers with a combined working force of 1,027,992 persons, compared with 1,052,699 in the preceding month. The index number then was slightly over one point higher than at the latest date.

The unadjusted index numbers of employment at March 1 in the years since 1927 are as follows: 1939, 106·5; 1938, 107·8; 1937, 102·8; 1936, 98·9; 1935, 96·4; 1934, 92·7; 1933, 76·9; 1932, 88·7; 1931, 100·2; 1930, 110·2; 1929, 111·4; and 1928, 102·6.

Employment by Economic Areas



The trend at the beginning of March was moderately upward in Prince Edward Island, Nova Scotia, Manitoba, Saskatchewan and British Columbia, but employment declined in New Brunswick, Quebec, Ontario and Al-

berta. In Quebec, the Prairie Provinces as a unit and British Columbia, the indexes were rather higher than at March 1 of last year; the change in British Columbia in this comparison was fractional. In the Maritime Provinces and Ontario, however, the situation indicated was not so favourable.

Maritime Provinces.—On the whole, there was an increase in industrial activity in the Maritime Provinces, the 812 reporting employers enlarging their staffs from 73,913 at February 1, to 74,366 at the beginning of March; the improvement took place in Nova Scotia and Prince Edward Island, while curtailment was reported in New Brunswick. Construction and maintenance afforded more employment, mainly due to snow-clearing operations, and mining, transportation and trade were also slightly more active. On the other hand, manufacturing was quieter, and logging showed a considerable seasonal decline. General curtailment had been indicated at March 1, 1938, but the index then was several points higher than that of 101·2 at the date under review.

Reports for the beginning of March of last year had been tabulated from 719 firms, whose pay-rolls aggregated 78,250 persons, compared with 81,192 in the preceding month.

Quebec.—Employment in Quebec showed a slight decrease, which was decidedly smaller than that recorded at the beginning of March, 1938, and was also less than the decline which has been the average change between February 1 and March 1 in the last eighteen years. There was improvement in manufacturing at the date under review, notably in leather, lumber and textile plants; mining, transportation and railway construction and maintenance also afforded more employment; the additions to staffs in the last-named were mainly due to snow-clearing operations. On the other hand, logging recorded a substantial contraction as the active season drew to a close, and there was also curtailment in building and highway work and in trade. Statements were tabulated from 2,826 firms, whose pay-rolls aggregated 320,154 employees, as against 320,714 at the beginning of February. The index, at 112·8, was slightly higher than

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

at March 1, 1938, when it stood at 110·1; the latter was computed from information furnished by 2,509 establishments, with 306,764 persons on their pay-rolls, a decrease of 12,478 from their staffs at February 1, 1938.

Ontario.—A slackening was noted in Ontario, where the 4,918 co-operating employers released 494 persons from their forces, bringing them to 428,734 at March 1. The trend of employment at that date in the years for which statistics are available has not invariably been upward, although the average change in the years since 1920 has been a small increase. The March 1 index, at 109·1, was a few points lower than at the same date in 1938, when it had stood at 113·7; the 4,615 firms whose returns were then tabulated had employed 443,444 workers.

There was some improvement in factory employment at the date under review, the co-operating manufacturers having added 1,759 workers to their staffs. The increase occurred mainly in textile, iron and steel, leather and tobacco works, while animal food factories were slacker. Among the non-manufacturing classes, logging, transportation and trade showed declines, those of a seasonal character in the first-named being most pronounced. On the other hand, railway and highway construction and maintenance reported heightened activity, largely as a result of heavy falls of snow.

Prairie Provinces.—There was a moderate increase in employment in Manitoba and Saskatchewan, but in Alberta slight curtailment was shown; on the whole, industrial activity in the Prairie Provinces gained slightly at March 1; the trend has been downward at that date in fifteen of the eighteen preceding years for which statistics are available, so that the advance at the beginning of March was contra-seasonal in character. The index number, at 94·3, was slighty higher than that of 92·2 at the same date in 1938, when a small increase from the preceding month had also been shown. Data were tabulated from 1,632 establishments with 121,539 employees at March 1, 1939, compared with 121,150 in their last report. The manufacturing industries in the Prairie Provinces reported a moderate reduction, declines in the animal food, pulp and paper and iron and steel divisions rather more than offsetting gains in lumber mills. Construction and maintenance showed heightened activity, chiefly in the railway division, as a result of snow-clearing operations. Logging also recorded improvement. On the other hand, trade released some employees.

The 1,498 employers making returns for March 1 of last year had reported 117,703 men and women on their payrolls, compared with 117,076 at the first of February, 1938.

British Columbia.—The manufacture of lumber, pulp and paper and electric light and power was more active, while other plants reported little general change; factory employment as a whole considerably advanced and there was also improvement in building, but the tendency in most other groups was moderately downward, the largest losses being in mining and trade. The working forces of the 1,121 co-operating employers aggregated 83,053 persons, as compared with 82,614 in the preceding month. This increase was not equal to the average gain indicated at March 1 in the period, 1921-1938, although it compared favour-

Table I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(Average Calendar Year 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
